**NOTES: DA**

- PERMITS:**
  - 1.1. The contractor shall provide all necessary permits for the construction of this project.
  - 1.2. The contractor shall obtain all necessary permits from the appropriate authorities.
  - 1.3. The contractor shall provide all necessary information to the appropriate authorities.
  - 1.4. The contractor shall provide all necessary information to the appropriate authorities.
- CONSTRUCTION:**
  - 2.1. The contractor shall construct the project in accordance with the approved plans and specifications.
  - 2.2. The contractor shall maintain the site in a safe and secure condition at all times.
  - 2.3. The contractor shall provide all necessary safety measures for the construction of this project.
  - 2.4. The contractor shall provide all necessary safety measures for the construction of this project.
- QUALITY CONTROL:**
  - 3.1. The contractor shall provide all necessary quality control measures for the construction of this project.
  - 3.2. The contractor shall provide all necessary quality control measures for the construction of this project.
  - 3.3. The contractor shall provide all necessary quality control measures for the construction of this project.
  - 3.4. The contractor shall provide all necessary quality control measures for the construction of this project.
- COMMUNICATIONS EQUIPMENT:**
  - 4.1. The contractor shall provide all necessary communications equipment for the construction of this project.
  - 4.2. The contractor shall provide all necessary communications equipment for the construction of this project.
  - 4.3. The contractor shall provide all necessary communications equipment for the construction of this project.
  - 4.4. The contractor shall provide all necessary communications equipment for the construction of this project.

**NOTES: DA**

1. **PERMANENT EROSION CONTROL**  
a. The contractor shall provide erosion control measures to prevent soil erosion during construction.  
b. The contractor shall install silt fences and sediment basins at all construction entrances and exits.  
c. The contractor shall maintain all erosion control measures throughout the construction period.  
d. The contractor shall provide a final erosion control plan to the client upon completion of the project.
2. **CONCRETE CURING**  
a. The contractor shall use a curing compound on all concrete surfaces.  
b. The contractor shall maintain a minimum relative humidity of 90% on all concrete surfaces.  
c. The contractor shall provide a final curing plan to the client upon completion of the project.
3. **CONCRETE FINISHES**  
a. The contractor shall use a high-quality concrete finish on all concrete surfaces.  
b. The contractor shall provide a final finish plan to the client upon completion of the project.
4. **FINAL COMMUNICATIONS EQUIPMENT**  
a. The contractor shall provide a final communications equipment plan to the client upon completion of the project.

**NOTES: DA**

- PERMANENT PROTECTION**  
1.1. The applicant is required to provide permanent protection for the building facade during the construction period.  
1.2. The permanent protection must be installed prior to the commencement of construction.  
1.3. The permanent protection must be capable of withstanding the full weight of the building facade during the construction period.  
1.4. A Certificate of Approval must be obtained from the Council for the permanent protection.  
1.5. The permanent protection must be removed and the facade restored to its original condition as soon as practicable after the completion of construction.  
1.6. The permanent protection must be installed in accordance with the requirements of the Building Code of Australia (BCA) and the relevant standards.  
1.7. The permanent protection must be installed in accordance with the requirements of the relevant local council.  
1.8. The permanent protection must be installed in accordance with the requirements of the relevant local council.
- CONCRETE CURBING**  
2.1. The concrete curbing must be installed in accordance with the requirements of the BCA and the relevant standards.  
2.2. The concrete curbing must be installed in accordance with the requirements of the relevant local council.
- PERMANENT PROTECTION**  
3.1. The permanent protection must be installed in accordance with the requirements of the BCA and the relevant standards.  
3.2. The permanent protection must be installed in accordance with the requirements of the relevant local council.
- PERMANENT PROTECTION**  
4.1. The permanent protection must be installed in accordance with the requirements of the BCA and the relevant standards.  
4.2. The permanent protection must be installed in accordance with the requirements of the relevant local council.
