**CONSULTATION SUMMARY –
STAGE 3 SUBMISSIONS –
DETAILED ISSUES AND RESPONSES**

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3
Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
2	Like all the strategies	The strategies have been developed with the community through 3 rounds of consultation to establish key directions and balance priorities in how the parklands will be embellished in the future. Feedback from the consultation provided high level of support for the strategies and Master Plan	
2	Want grass areas	The existing parklands and new areas comprise large areas of open grass lands for passive and active recreation. The new areas increase opportunities for picnicking, ball sports etc., and to visually connect them to the existing parklands. The Master Plan balances a range of landscape settings to and guides the evolution of a diverse, sustainable and activated parklands.	
1	Please remove palms close to canal	The Master Plan does not propose removal of the palms. A Tree Management Plan will be prepared by the City Arborist to facilitate ongoing tree management and future replacements.	
1	Please don't remove too many trees	The Master Plan does not outline specific tree removals. Detailed site investigations will be undertaken at the individual project level to minimise tree loss. An aim of the Sydney 2030 Strategy is to increase tree canopy across the Local Government Area	
1	Want trees for shade	Shade and trees in our parks are an integral element. The Master Plan proposes to improve existing canopies with new trees, and proposes opportunities for more substantial areas of vegetation areas around The Hill and in Harold Park.	Additional trees in the Crescent have been included to increase shade and amenity.
1	Want more trees along The Crescent	The Master Plan includes street trees along The Crescent where possible between Nelson Street and Johnston Street. The existing and new trees in Federal Park south bring the parklands to the edge of the street. New trees are proposed in the Crescent open space area to provide shade, define park areas and focus view through the parklands and heritage viaducts	Additional street trees to The Crescent are included in the north of the Crescent and shown adjacent to Harold Park redevelopment.
2	Dislike native plants	The parklands will include a mix of exotic, cultural and native planting. The Master Plan aims to balance a range of landscape settings, create habitat and improve diversity and ecologies. Overall, it aims to create a diverse and interesting parklands.	
1	Like native plants	The parklands will include a mix of exotic, cultural and native planting.	
1	Don't remove or destroy any habitat for native animals	The Master Plan does not include the removal of any habitat. A key strategy of the Master Plan is to increase areas of habitat and includes, improved canopy, areas for revegetation, protection and expansion of saltmarsh communities, expansion of wetlands, and new cliff face habitat.	
1	Don't create habitat areas at the expense of recreational/open space	The Master Plan balances the requirements for passive and active recreation and areas of habitat. The areas of habitat expand on existing communities around the Hill and existing saltmarsh in Federal Park, and is opportunistic in capturing and treating stormwater.	The amended Master Plan will reduce the size of the proposed saltmarsh at the foreshore by 40%, to ensure a balance between maintaining open lawn areas at the foreshore and expanding this ecologically endangered community.

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3
Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
1	Don't create recreational/open space areas at the expense of conservation/habitat areas. Like the Master Plan proposals	The Master Plan balances the requirements for passive and active recreation and areas of habitat. The new areas of parklands include areas for recreational/open space and areas of habitat.	
1	Like the initiatives that nurture water birds	Noted. The new areas of wetland, swale and saltmarsh will attract and provide habitat for water birds.	
1	Like bird and nature corridor	Noted.	
1	Want cliff face exclusion zone of 8-10m	The Master Plan includes an area of habitat at the base of the cliff. The cliff will be remediated and stabilised in accordance with planning consent requirements before handing to the City.	

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3

Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
Water			
Water Quality and Flooding			
4	Flooding/stormwater is a problem	The parklands are located at the bottom of a large stormwater catchment and some areas of the parkland are subject to flooding and poor drainage. The Master Plan proposes strategies to improve the usability of waterlogged active sports areas such as Federal Park field and Jubilee Oval. The water treatment proposals including new wetlands, saltmarsh and canal naturalisation improve the impact of flooding in the parklands.	
2	Water quality is a problem	A key strategy of the Master Plan is to improve the quality of water before it reaches the canal and Rozelle Bay. Water quality is improved with treatment by vegetation-lined swales, rain gardens and freshwater wetlands.	
3	Like all the water management proposals	Noted.	
1	Like all the proposals to manage stormwater - please extend them	Noted for further consideration in the design development of individual projects.	
1	Want WSUD	Water Sustainable Design is a key element in the Master Plan. Water quality is improved with treatment by vegetation-lined swales, rain gardens and freshwater wetlands. These components are incorporated in Harold Park, and new freshwater wetland across the canal in Federal Park South and in the Crescent. These systems will treat stormwater from the surrounding residential catchments before it enters the canal and Rozelle Bay.	
1	Manage stormwater further back in catchment	The WSUD proposals in the Master Plan consider the treatment of the Toxteth Estate catchment, up to the ridge of Glebe Point Road, and a portion of lower Annandale catchment, to the ridge beyond Johnston Street. The Sydney's 2030 Strategy also sets targets for water reuse and stormwater improvement across the LGA. Raingardens to filter run-off and reduce peak load and water reuse tanks for irrigation use are implemented in projects across the whole catchment.	
1	Manage gross pollutants via boom gate over Johnstons Creek	There are several gross pollutant traps proposed in association with the water management scheme.	
1	Use stormwater for irrigation	The Master Plan proposes stormwater capture for treatment and irrigation, to align with the City of Sydney's 2030 strategy to reduce drinkable water demand for irrigation.	
1	Use stormwater to generate hydro power	City of Sydney's 2030 strategy identifies a range of opportunities to reduce energy consumption and generate energy through sustainable methods. Current projects include wind turbine and solar collectors. Unfortunately the use of stormwater to generate hydro power is not achievable at this stage.	
1	Would like to be able to swim in Rozelle Bay	The proposed stormwater treatment will improve quality of the water in the Bay. Further stormwater treatment projects, monitoring and testing would be required all with the aspiration to be able to swim in the Bay one day.	

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3
Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
1	Ensure approvals are sought by a flooding engineer on any proposed amendments to current proposals by Mirvac in Harold Park open space.	This will be subject to further detailed design and approvals. A hydraulic engineer will provide expert advice and modelling to ensure proposed changes do not affect the flooding behaviour or critical levels of the project.	
1	Ensure any changes won't effect flooding behaviour	Sydney Water supports the current proposed strategies including naturalisation. The City will continue to liaise with Sydney Water as these projects develop. Authority consent with future project delivery will be gained as requested.	
Wetlands and Saltmarsh Communities			
52	Don't reduce open space in order to create saltmarsh	The over five hectares of additional open space provides an opportunity to develop a variety of landscape settings in new and existing areas. A natural association with the mangroves, it will reference the saltmarsh along the canal and to the south.	The amended Master Plan will reduce the size of the proposed saltmarsh at the foreshore by 40%, to ensure a balance between maintaining open lawn areas at the foreshore and expanding this ecologically endangered community.
4	Like saltmarsh	Noted.	
3	Like wetlands	The wetlands create integral ecological system in the parklands.	
2	Don't like wetlands	The wetlands create integral ecological system in the parklands. They provide for increased habitat, interest and diversity in the parklands. In addition to improving the quality of stormwater for re-use or prior to entering the harbour. Their design will ensure integration with the parklands and create a unique entry feature from The Crescent.	
1	Like Federal Park wetland but worried about size	The wetland proposed at Federal Park south treats the water from the surrounding Annandale catchment before entering into the canal and harbour. The proposal balances the integrity of the wetland and other park uses such as access, open park areas and trees.	
6	Don't like saltmarsh, wetlands, mangroves or any other bio filtration measure	The wetlands, mangroves and saltmarshes create integral ecological system in the parklands. They provide for increased habitat, interest and diversity in the parklands, in addition to improving the quality of stormwater for re-use or prior to entering the harbour.	
1	Enhancing mangroves is unnecessary	The Master Plan identifies an opportunity to consider strategies to protect and improve the health of the existing mangroves.	
1	Wants a habitat zone along riparian zone	The Master Plan proposes areas of habitat zone along the creek / riparian zone.	
1	Like the swale	Noted.	
3	Remove the swale and enclose stormwater	The stormwater design for the Harold Park development includes stormwater pipes and an overland flow swale in the new open space. The Master Plan seeks to integrate the design within a parkland setting, and use the opportunity to harvest and improve the quality of this stormwater before it reaches Rozelle Bay.	
2	No open swale in Harold Park (will attract flies and mosquitoes)	The purpose of the swale is to filter and direct water. It will be designed to limit stagnant water and create an ecosystem. Well considered and functioning ecosystems have minimal issues with mosquitoes and flies.	

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3

Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
1	Wants additional swale	The key opportunities to capture overland flow have been captured in the Master Plan. There may be additional opportunities that arise in the detailed design for each project.	
Canal Naturalisation			
5	Like naturalisation of canal	The strategy for water proposes the naturalisation of the canal in various forms and interventions. It will provide opportunities to improve water quality and habitat.	
3	Dislike naturalisation of canal	Naturalisation of the canal will create a more natural appearance and link habitat improvements along the channelised creek line. Naturalisation will also assist to reduce flooding in the parklands.	
1	Maintain high water levels in creek - they look better	The canal is tidal, however the naturalisation of the canal could increase the volume of water retained in the creek at low tide.	
Water and Recreation			
2	Want a shower near beach because children and dogs swim in it. Should be signage warning that it's contaminated	The provision of shower can be provided with the new amenity buildings nearby. The park signage recommends against consuming fish and swimming in Blackwattle Bay	
3	Don't obscure views across parklands with water management areas (fences, vegetation, mangroves etc.)	The vegetation found in wetlands and saltmarshes will not obscure views across the parklands. The Master Plan does not include a proposal to increase the area of existing mangroves.	The amended Master Plan will reduce the size of the proposed saltmarsh at the foreshore, and restrict its area to directly behind the mangroves.
1	Once water quality is improved, introduce non-motorised boating	The Master Plan includes the facilities and storage for kayaks. The beach, water stairs and pontoon enable access to the water	
2	Want interpretive elements in water management areas	An interpretation strategy is included in the Master Plan. It includes the story of water and water management areas.	
2	Want boardwalk in wetlands	Boardwalks, walking trails and new settings through the wetlands are included in the Master Plan, acknowledging the informal recreation opportunities within them.	
1	Proposes additional seawall habitats	Noted. This can be considered in ongoing detail design development of proposals to the seawalls to encourage additional opportunities for habitat.	

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3
Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
Recreation			
General			
5	Like all the strategies	Noted.	
1	Thinks the Master Plan is 'cluttering up the park'	The Master Plan recognises the varied landscape types in the parklands. It integrates and composes this diversity in a creative way. At a detailed scale, a common design theme, a sense of order and hierarchy, and coordinated planting and materials provides cohesion as well as a new identity to the whole parklands.	Supporting material to better explain the proposed character of the new spaces has been included in the Master Plan. The amended Master Plan will remove the courts at the Crescent.
Sport Facilities			
3	Like sporting facilities provided for in Master Plan	Noted. The proposals include improving the existing playing fields at Jubilee and Federal Park, and including an additional junior playing field at the Crescent. In addition, the parklands will support a range of sporting facilities such as skate, cycling, play spaces, and courts.	
5	Want multi-purpose sports facilities	Noted. A key strategy is to ensure all spaces are flexible and available for a broad range of users. This ensures multi-purpose facilities throughout the parklands.	
1	Like all the hockey provisions	Noted. An additional junior sized playing field is proposed at the Crescent. This provides for Minkey Hockey (junior hockey). The existing fields will be improved to increase usage.	
12	Want a hockey field (some want it to be artificial turf)	An additional junior sized playing field is proposed at the Crescent and can accommodate minkey hockey (junior hockey). The existing fields will be improved and will remain for hockey use. In response to early community consultation requesting a full-sized hockey field, two locations in The Crescent and Harold Park were considered. It is not possible to fit a full sized playing field in the new areas with consideration to existing site conditions and access and circulation requirements. Detailed design will consider alternative surfaces, however initial studies have indicated artificial turf could effect drainage and flooding in the parklands.	

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3
Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
3	want all weather full sized sports field in Harold Park	<p>A large open area suitable for casual games is located in Harold Park. A full-sized field was considered and tested in two locations, Harold Park and in the Crescent. It is not possible to fit a full sized playing field in the Harold Park after considering the requirements for access and circulation around the park, the stormwater swale and ensuring adequate forecourt to the Tram Sheds.</p> <p>An additional junior sized playing field is proposed at the Crescent. This location consolidates the active recreation precinct of Federal Park and Jubilee Oval, offering the opportunity to co-locate supporting amenities such as equipment storage, toilets and change rooms, as well as good access to parking and drop-off areas.</p>	
1	Want a hockey area for children	The Master Plan proposes a junior sized playing field at the Crescent. The size is appropriate for junior hockey.	
3	Want an artificial sports field at The Crescent	The Master Plan currently recommends turf to ensure it is flexible for a range of uses. The detailed design of this project will review potential surfaces for the playing field.	
1	Want sports facilities on The Crescent asap	The Master Plan will guide the incremental development of the parklands and provides Council with coordinating future projects.	
1	Like new oval	Noted.	
4	Want Federal Park to have formalised sports field (some want it to be synthetic)	Federal Park currently functions as a formal sports field and this will be retained. Improvements are proposed to increase use of Federal Park as a sports field.	
		Detailed design will consider alternative surfaces. however initial studies have indicated artificial turf could effect drainage and flooding in the parklands.	
1	Want artificial cricket pitch on Federal Park	A cricket pitch is proposed on the new junior sized playing field.	
1	Want Federal Park upgraded	Noted. Improvements to Federal Park are included. It will be improved by raising its level, installing new drainage and soil and repairing water pipe leaks. This will increase its usability of the field.	
2	Want planning for sports facilities to respect residents' need for quiet	The location of the additional sports facilities is focused around existing areas of active recreation and adjacent to The Crescent.	
3	Want tennis courts	Courts were proposed in the draft Master Plan however, in response to other issues raised by the community, the amended Master Plan proposes no courts will be provided.	
1	Want a croquet court		
1	Want netball court		

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3

Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
1	Want a polo field	A polo field has not been included in the Master Plan. The City of Sydney Recreation Needs Study 2007 identifies the provision of recreational sporting needs across the LGA. Polo has not been identified as a need within the LGA.	
2	Want cricket nets	Future detailed design of the parklands will consider location for cricket nets.	
1	Sports facilities need to have good lighting	The Master Plan proposes that the active recreation areas have appropriate facilities including lighting.	
2	Want more active recreation areas	The Master Plan proposes two additional areas for a range of more active play in addition to the existing formal areas of Jubilee Oval and Federal Park field. The existing large grass areas in Bicentennial Park east will be retained.	
2	No more active sporting areas	The proposed sporting areas address the needs for sports facilities and amenities in the LGA. From population forecasts, it can be assumed an increase in needs for sports with the increase in population. The sporting areas are proposed to be flexible to allow for a range of different uses.	The courts located at the Crescent have been removed. The Master Plan provides clarity around the proposed Village Greens at the Crescent and Harold Park, both can host of range of informal passive recreation as well as active recreation.
2	Like strategies aimed at youth and would like to see more	The Master Plan provides a range of opportunities for youth including active and passive recreation. The provision of a skate space, junior sports field, community facility, play areas and areas for kick about spaces have been included.	
Skate area			
19	Need a decent skate park - please prioritise this	The Master Plan proposes a new skate space in the northern part of the Crescent. It is a high visibility and located near the community facility ensures the area becomes a community hub to support a range of ages.	
Playgrounds			
1	Want children's playground in Harold Park closer to the development	The proposed location of the children's play space addresses proximity to other uses, existing and new residential areas.	
8	Want children's playground upgraded (note the comment did not specify which playground)	The Master Plan proposes the upgrade of the two children's playgrounds, Jubilee Park and Bicentennial Park. In addition, new play spaces are proposed in Harold Park.	
1	No children's facilities - children should make their own fun	The parklands will include free form areas and settings for children to create their own fun, games and explorations. The Master Plan will retain the existing children's playgrounds and proposes new play spaces. Play spaces for children are important in promoting creative, imaginative and active play and improving development and social skills.	

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3

Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
7	Want facilities for older children	The Master Plan recognises the need for older children to play. The parklands will offer areas of courts and a skate area for more active play, as well as free form areas for casual ball sports or kickabout spaces, and 'wilder' settings for exploration. The community facility aims to be a creative and social hub which can respond to a wide range of age groups including older children.	
1	Like children's playground (don't specify where)	Noted.	
1	Want fenced playgrounds with shade covering	The detailed design of these playgrounds will consider shade and any requirements for barriers.	
2	Want playgrounds that cater for range of ages	It is proposed that the range of play areas cater for a range of age groups and play activities.	
1	Want more playing fields than playgrounds	The Master Plan proposes two additional Village Greens, to accommodate junior games and large informal kickabout spaces. The balance of playing field and playgrounds is addressed in the Master Plan to cater for a large range of uses.	
3	Want adult fitness equipment	Noted.	The amended Master Plan includes a fitness circuit, improving the recreation opportunities in the parkland
	Water activities		
5	Introduce non-motorised water vessels (canoes, kayaks etc.)	An additional kayak / canoe launching pontoon is proposed in the Master Plan. In addition, storage for small vessels are proposed near the foreshore.	
3	Want storage for kayaks, canoes etc.	Storage for kayaks / canoes is included and is proposed near the foreshore.	
2	Want kayak storage relocated	Kayak storage is proposed in close proximity to the foreshore and to parking areas. It is located to ensure important views and vistas to the water are not obstructed.	
	Passive recreation		
1	Want Harold Park space to provide for a variety of passive recreation experiences	Harold Park has been designed to include passive and informal active recreation spaces. The spaces provide shady seating areas of various scales. Combined with the chance to experience a more natural landscape.	
5	Want more passive recreation areas	With an additional 5.1 hectares added to the parklands, the Master Plan includes more areas for passive recreation. In addition, it opens new opportunities for increased passive recreation in existing areas such as the saltmarsh with new pathways, boardwalks and timber viewing decks.	The Master Plan provides clarity around the proposed Village Greens at the Crescent and Harold Park, both can host of range of informal passive recreation as well as active recreation.
3	Like provisions for passive recreation	Noted.	

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3
Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
1	Identifies a big local need for open space	Noted. There will be an additional 5.1 hectares of additional parkland.	
1	Don't increase hard surfaces, want more grass	The Master Plan reduces the amount of hard surfaces in the parklands with the removal of remnant industrial lots, removing part of Chapman Road and consolidating parking areas. Additional areas of grass will be provided.	
	Amenities		
5	Want more picnic areas	Noted. Additional picnic areas are included in the Master Plan.	
3	Want more bbqs	Noted. Additional barbeques are included in the Master Plan.	
1	Want more seating around foreshore	Additional seating would be considered during future detail design of the projects.	
1	Want more seats with backs		
1	Want more seats with shade		Additional trees in the Crescent have been included to increase shade and amenity.
8	Supports toilet block strategies	The Master Plan provides the opportunity to holistically plan future provision.	
2	Want more toilet facilities	Toilets are proposed to be generally within 250 metres of any place in the park and are located near children's playgrounds and active open spaces. The Master Plan provides access to toilet facilities throughout the parklands: in Harold Park, the Crescent, Bicentennial Park west, Jubilee Oval and Jubilee Park / Bicentennial Park east.	
1	Want toilet facilities close to Jubilee Oval	Toilet facilities are proposed close to Jubilee Oval. They could be located in the future shaded seating. The toilets at the rear of the pavilion would be retained.	
2	Want kiosk and toilet relocated to Western side near viaducts	Toilets are proposed to be generally within 250 metres of any place in the park and are located near children's playgrounds and active open spaces.	The kiosk near Northcote / Federal Road has been removed.
4	Reconsider toilet and kiosk facility at Federal / Northcote Road.	Located close to the street, in an area of passive surveillance is optimal for public safety. Toilet facilities can be managed and locked at night to prevent unwanted use.	The toilet facility has been sized appropriately for a small toilet facility. It has been reorientated to a position where there are not direct sightlines from adjacent houses and away from open vistas.

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3
Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
1	Demolishing newly refurbished toilet blocks is a waste.	The Master Plan is a long term vision and provides recommendations for improved toilet facilities, including consolidating with other park building / amenities. The Master Plan retains the existing newly refurbished toilet block at Jubilee Oval. The removal of the toilets under the viaduct would be staged with new community facility and will open vistas and connections between the parks.	
1	Does not want the boat facility and toilet at the entrance to Bicentennial Park as it will block vistas.	The proposed toilet is located near the existing playground. It would be combined with boat storage, in close proximity to the carpark and not too far from the water. It would not impede important vistas from the pedestrian and vehicular entry at The Crescent and Chapman Road.	
2	Want bike riding encouraged in parklands as a sport	A hierarchy of paths is developed to accommodate and acknowledge the range of riding opportunities - including recreational and community cycling.	
1	Like walking tracks	Noted.	
	Community facilities and events		
3	Need the daycare facility	The proposed community facility includes child care as a possible use in the building.	
3	Want/need community facility	The proposed community facility can provide a flexible space for a range of mixed community uses. It can help address current community facility and childcare shortfalls.	
2	Want community facility to be in Tram Sheds rather than The Crescent	The Tram Sheds are a privately owned building. The developer will provide 500m2 to the City for community space. While this will be a positive contribution to overall provision in the precinct, the size, location and surrounding amenities would not be appropriate for the mix of facilities proposed.	
1	No commercial premises	The Master Plan includes the removal of the large scale commercial uses from the Crescent. The Master Plan includes the proposal for community facilities such as child care, kiosks and canteen. These are ancillary and support the park uses.	
3	Want a café	Café opportunities are cited for the proposed community facility.	
1	Want free cultural events in the parklands	Noted. The Master Plan supports cultural events in the parklands, both existing and new events.	
1	Want a canteen building near cricket stand on Jubilee	The Master Plan proposes to consolidate buildings in the parkland. A café is proposed in the community facility adjacent to The Crescent.	

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3
Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
2	want community garden	The Master Plan proposes two outdoor community spaces which could contain community gardens.	Additional opportunities for community garden locations are included for further development in future projects.
1	Please consult with local artists and young people for cultural uses	The future projects for these specific items would include consultation with local artists, young people, community groups and the wider community.	
	Park Management		
1	Get rid of personal trainers in the parklands	The City allows personal trainers to use our parks. A Code of Conduct is currently being prepared to ensure appropriate park use and encourage respect of other park users and residents.	

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3

Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
Transport, Circulation and Access			
General			
1	Support strategies for connectivity and access	Noted.	
1	Better access required	<p>The Master Plan improves access into the parklands and to key destinations within the parklands. A range of path entries and networks ensures significant north/south and east/west networks link the new open spaces with the existing parklands and the continuation of a greater foreshore link.</p> <p>The Master Plan connects the park to the surrounding neighbourhoods through the removal of most of the buildings along The Crescent, new paths and stairs into Harold Park. into Harold Park via stairs and paths from adjacent neighbourhoods. All existing paths and entry points will be retained or enhanced as required.</p>	The Master Plan clarifies access to and through the park.
3	disabled access should be a priority	A strategy of the Master Plan is to provide universal access. This will ensure the parklands can be enjoyed by all age groups and abilities.	
Public Transport			
12	Want use of public transport and walking, biking encouraged	Noted. A key strategy is to encourage visits by public transport, walking and cycling.	
3	Connection to light rail is important	Noted. Connections to the light rail station is improved.	
3	Want Ferry Stop	The existing wharf can accommodate ferry and water taxi uses. Sydney Ferries is a state body outside the control of the City. The City advocates for improving public transport.	
2	Want bus terminal adjacent to park upgraded (don't say which one)	Two additional bus stops are proposed. improving public access to the parklands.	
1	Want additional bus stop on Wigram Road and Ross Street.	There is an existing bus stop on Wigram Road very close to the entry to Harold Park open space.	
Parking			
1	Review the amount of parking in the plan	Parking demand and needs have been assessed and balanced with other park values to guide the Master Plan proposals for parking.	

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3

Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
4	Insufficient parking in plan	<p>Parking demand and needs have been assessed and balanced with other park values to guide the Master Plan proposals for parking.</p> <p>The strategy proposes to maintain existing numbers of parking spaces.</p> <p>Parking and drop-off areas are located on the edge of the parklands and near to the key destinations such as the playground, picnic areas, community facility and junior playing field.</p> <p>Parking for the Tram Sheds will be provided and delivered by Mirvac.</p> <p>The strategy proposes to maintain existing numbers of parking spaces.</p>	
2	Parking is a priority		
3	Prioritise providing visitor parking		
1	Don't build any carparks as it encourages car use	<p>The strategy proposes to maintain existing numbers of parking spaces.</p>	
2	Don't prioritise parking over green space	<p>Parking demand and needs have been assessed and balanced with other park values to guide the Master Plan proposals for parking.</p>	
1	No carpark on The Crescent Lands, just open space.		
3	Don't want parking on The Crescent	<p>The parking is proposed to be relocated from Chapman Road to the edge of The Crescent. This will maximise parkland by linking the Crescent with Federal Park.</p>	
1	Make sure number of existing parking spaces are maintained.	<p>The strategy proposes to maintain existing numbers of parking spaces and minimise the existing car park footprints, improve their appearance and circulation.</p>	
1	Don't want these plans to increase overflow parking on streets of Annandale	<p>The Master Plan include car parking to minimise impact on adjacent residents. The plan improves access and circulation to the parking, and include a drop-off area close to sporting and community facilities.</p>	
1	Want parking in surrounding streets, not in the parklands	<p>The Master Plan relocates parking to the edge of the parklands. It includes additional parking spaces in Victoria Road and Federal Road.</p>	
2	Worried that existing residents will be impacted by all parking proposals	<p>The Master Plan proposes to maintain existing number of parking spaces to reduce any possible impact on adjacent residents. The plan improves access and circulation to the parking, and include a drop-off area close to sporting and community facilities.</p>	
1	Vehicular Access and Traffic		
1	No entry through the Glebe Estate [Toxteith Estate] as increased parking will impact on residents	<p>No vehicular entry to the parklands is proposed from Maxwell Road.</p>	
1	Change parking time categories	<p>Only vehicular access to the new apartments on Maxwell Road will be from Maxwell Road, as per previous planning applications and approvals.</p> <p>A parking management plan can be implemented to optimise the use of parking.</p>	

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3

Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
4	Don't want Chapman Road used as access to Tram Sheds	Existing access to the Tram Sheds will be retained. This is consistent with the Harold Park Development Control Plan and details of the access will be subject to further Development Application approvals for the Harold Park development.	
1	Want Chapman Road as access to Tram Sheds	The Master Plan retains existing access to the Tram Sheds. This is in accordance with the Development Application approvals for Harold Park development. The detail of the access will be subject to further Development Application approvals for the Harold Park development.	
1	Wants Canal Road to be access to Tram Sheds		
1	Access route through Nelson St only for emergency vehicles	Access at Nelson Street will be available for park users, the existing properties and existing access to the Tram Sheds.	
1	Concerned about traffic going into Mirvac development	The Master Plan indicates the priority of pedestrians and bicycle riders in the parklands and establishes key north / south connections.	
1	Please don't create unnecessary traffic congestion	Development Application for Harold Park redevelopment will need to include a detailed Traffic Impact Assessment and is subject to City approvals.	
3	No unauthorised vehicles in parklands	The plan improves access and circulation to the parking, and include a drop-off area close to sporting and community facilities.	
1	Want less access to parklands from surrounding areas because it will impact on residents	The improved location of the parking on the edge of the parklands will improve safety and restrict unauthorised access through the parklands.	
	Pedestrian and Cycle Access	Access will accommodate maintenance and emergency vehicles.	
2	Want wider paths	Using public transport, walking and cycling are encouraged as a ways of getting to the park.	
1	Maxwell Road access should be via the Hill and shared with Victoria Street.	The Master Plan sets a hierarchy of paths. Wider paths to accommodate different park users on the main paths would be included.	
Note	For submissions regarding stair access to Harold Park open space refer to the Harold Park section in this summary.	The Master Plan proposes access to Maxwell Road at the Hill.	
4	Improve pedestrian crossing at The Crescent		
1	Want crossing on bridge at The Crescent improved	The Master Plan includes a new crossing at The Crescent into the parklands.	
1	Improve pedestrian crossing from Harold Park to Forest Lodge	The Master Plan includes pedestrian access improvements at The Crescent bridge. The connection under The Crescent is a key link to green space corridors. This will be retained.	
		Improving pedestrian access into the parkland at Wigram Rd will be part of the Harold Park development.	

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3

Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
1	Want pedestrian crossing from Federal Road bus stop to Jubilee Park	The provision of pedestrian crossing at Jubilee Park entry do not meet RMS warrants and technical requirements at this stage. A pedestrian crossing may be possible in the future.	
1	Like new canal crossings	There are two canal crossings proposed to improve connectivity between the parklands.	
3	Like canal crossing at the foreshore	Noted.	
2	Only need the canal crossing at the foreshore	The crossing near the Hill will provide better connections to the Jubilee Park light rail station in the future.	
1	Don't want the canal crossing at the foreshore.	The canal crossing at the foreshore creates a continuous foreshore link.	
6	Don't want any additional canal crossings	Canal crossings are proposed to improve connectivity between the parklands. The two crossings will improve connections to the light rail station and create a continuous foreshore link.	The foreshore path and bridge over the canal is downgraded to a secondary access route in the amended Master Plan.
1	Make sure canal crossings are high enough that kayakers can go under them	This will be determined in the future detailed design for these projects.	
1	Like canal crossing at foreshore but don't allow bikes on it	The canal crossing and new paths would be designed appropriately to accommodate a mix of uses, to minimise conflict and ensure better connections and safety.	The foreshore path and bridge over the canal is downgraded to a secondary access route in the amended Master Plan. This will guide the future design of the bridge and associated pathways to be relatively low key and slow speed design, encouraging cross-park cycling via the existing bridge to the south.
1	Make canal crossing at foreshore arched so that it slows bike riders		
1	Want canal crossing for cyclists		
2	Want Master Plan to encourage cycling	The Master Plan encourages cycling, with improved connections to existing paths, a hierarchy of paths for different cycling.	
1	Parklands should be acknowledged as part of a regional cycle route	The regional route network does not pass through the parklands. The regional route is just to the north over the Anzac Bridge. However, the Master Plan proposes to improve and extend the existing path network and links to surrounding neighbourhoods and key destinations.	
1	Want dedicated children's cycling area with education initiatives included (road rules etc.)	The City of Sydney has a children's bike track and education facility at Sydney Park, St Peter. Another facility in the parklands is not warranted.	
1	Cycling Is the bypass of The Crescent from Chapman Rd North to Chapman Rd South, under the viaduct in the Master Plan? This link is a safer alternative to the narrow section of The Crescent between Johnston St and Nelson St. It appears to have vanished from the plans.	This link is retained and improved in the Master Plan, with a new path along The Crescent and new entry point into the park to connect under the viaduct. In addition, the strategy plan shows a primary access route along The Crescent.	The Transport, Access and Circulation plan will be updated to clarify this connection under the viaduct.

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3

Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
1	It would be much appreciated if some extra material was added to the plans to explain any proposed cycling facilities and access paths, and some recognition of cycling in the Transport and Access sections.	The path network is shown on the Transport, Access and Circulation plans and includes the proposed bicycle routes. All access routes are shared paths for pedestrians and bike riders. The primary access route provides links between major destinations and therefore accommodates a higher level of pedestrian and cycle movements.	The Transport, Circulation and Access strategy plan is updated to clarify the existing and proposed paths, the existing boundary, and connections for pedestrians and cyclists through the viaduct arches from The Crescent.
1	there appears to be no recognition of improving The Crescent in this narrow section for cyclists. This would be an extremely valuable north south bike route through the area.	The Transport, Access and Circulation strategy shows a shared path along The Crescent.	The Transport, Access and Circulation plan is updated to clarify the existing and proposed primary access routes along The Crescent.
1	Another bicycle link currently well used is the diagonal path from the timber bridge to corner of Northcote and Eglinton Sts. This also does not seem to be mentioned.	This route is noted on the Master Plan.	
1	I would question the status of the new shared path along Johnstons Creek into Spindler Park as a third tier link.	It is noted as a primary access route within the parklands.	
1	I see a fountain is proposed on this path, from the timber bridge over Johnstons Ck to Northcote St. A circular bypass around the fountain might be considered to separate cyclists from people congregating at the fountain.	The connection into adjacent streets and open space not within the City's LGA are noted with no hierarchy. Noted. This could be considered in detailed design for this project.	
1	The narrow section of foreshore path in Pope Paul Reserve is unsuitable for cyclists and pedestrians to share so cyclists should be directed to Federal Rd, where the footpath is very wide and links with the Blackwattle Bay shared path.	Noted. The Master Plan does not recommend separated cycling facilities through the parkland due to the greater potential conflicts this can generate.	
2	Management - cycle and pedestrians cyclists and pedestrians clash	Pedestrian and cycle access and connections to and through the parklands is encouraged. Shared paths will need to be carefully designed to minimise conflict.	
1	No more bike paths	Pedestrian and cycle access and connections to and through the parklands is encouraged. The Master Plan proposes shared paths encouraging a slow speed route for cyclists. It establishes a hierarchy of path networks to accommodate the different uses and routes through the park. Shared paths will need to be carefully designed to minimise conflict.	

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
Heritage and Character			
The Viaduct			
2	Like proposed improvements to viaduct arches	Noted.	
5	Want all viaduct arches opened	The Master Plan proposes to open key arches in the viaduct. Those closed arches adjacent to The Crescent and Federal Park would be opened. At present there are seven closed arches adjacent to Jubilee Oval. With the realignment of the Hill behind the viaduct, four of the arches would be opened.	The amended Master Plan proposes to open the key viaduct arches adjacent to the Crescent. The Master Plan is amended to include opportunities for staging to allow existing uses to be relocated to new community spaces in the parkland.
2	Want most of viaducts opened		
1	Want arches on the Crescent side to be opened only		
10	Want a community cultural and/rec facility in viaduct arches	The Master Plan proposes to open key arches in the viaduct to improve views and access through to adjacent parklands. A community facility is planned with the adaptive re-use of part of an existing building on The Crescent. Community and cultural uses are proposed for this facility, creating a creative and community hub on the edge of the parklands.	
3	Want hockey and AFL to continue to use archways for storage	It may not be possible to open all the arches adjacent to the Hill, therefore uses for sporting and storage would be appropriate here.	
1	Want storage facility in arches		
2	If arches currently used for storage are opened, relocate current users somewhere equivalent	Current uses under the viaduct arches would be relocated. The community facility would accommodate storage for sports groups.	The Master Plan is amended to include opportunities for staging to allow existing uses to be relocated to new community spaces in the parkland.
1	Make viaduct arches more attractive	The viaduct is a significant item in the parklands and recognised in the Master Plan.	
1	Want viaducts to be like Viaduct Vert in Paris	The viaduct is a working light rail viaduct linking the city to the inner west.	
Heritage and Interpretation			
3	Don't want heritage celebrated in the parklands with further embellishment	The Master Plan proposes an interpretation strategy that would be subtle and allow the heritage elements to speak for themselves.	
6	Like interpretation of heritage in the Parklands	Noted.	
1	Maintain but don't enhance heritage landscapes	All heritage landscapes will be retained. Heritage items will be enhanced as required.	
1	Want heritage landscape elements preserved	All heritage landscapes and items will be preserved.	

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3
Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
1	Want Harold Park heritage interpreted in parklands	The past use of Harold Park and heritage items will be interpreted in the parklands.	
1	Want historical and environmental role of waterways interpreted	The role of water is a key story for interpretation.	
6	Want Aboriginal heritage interpreted in the parklands	The interpretation strategy seek to tell the story of the evolution of the parklands and the estuarine creek system. The site's pre-history, including the interaction of the Cadigal people with this environment is a key story in this interpretation.	
1	Want public art to reflect industrial past	Noted. This is a key strategy in telling the varied stories of use and development, which includes the parklands industrial past and current use.	
2	Want heritage interpretative elements to be vandal proof	Noted, detailed design of these elements would consider longevity and vandalism.	
3	want good public art	The Master Plan proposes the use of public art to reveal the varied stories of the site, key landscape items and incorporation into key sites or elements, to ensure the art is site specific, integrated and of high quality.	
	Character		
2	Don't want park to lose its present character	The Master Plan recognises the varied landscape characters and respects existing landscape types.	
1	Want Aboriginal cultural space	The Master Plan includes the retention and adaptive reuse of part of an existing building for community use. The community rooms can be used for cultural uses.	
2	Want it to be clear that Harold Park is public open space	The Master Plan proposes a high quality open space that maximises public use to surrounding neighbourhoods, a mix of passive and recreation uses in flexible spaces that can evolve over time and responds to community needs.	
1	want good signage	Noted. Park signage, wayfinding and interpretation strategies will be considered as detailed future projects.	
1	Entries should integrate parklands into surrounding suburbs	The Master Plan aims to bring the parkland character to the edge of the park, and integrate with surrounding streets.	
1	Increase height of land behind mangroves at foreshore for better viewing	Additional land form in the existing parks need to be considered carefully as they can impact on flooding and drainage.	
1	Want Rozelle Bay nursery to complete planting design for Bicentennial	Ongoing community involvement including activities such as planting design and work is integral to the ongoing development and community presence in the parklands.	
3	Discourage taggers	Detailed design for specific projects will consider longevity, safety and possible vandalism.	

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3
Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
The Hill			
General			
3	Like the strategies	Noted.	
5	Like provision for views	Noted.	
2	Remove The Hill	The project has reviewed and tested options for the Hill including complete removal, which was considered cost-prohibitive. The proposal to reshape and remediate the Hill provides an opportunity to view the Parkland from an elevated position and provide an accessible route between the parklands and the light rail.	
1	Don't do anything to The Hill	The Hill will be retained. The Master Plan proposes to remediate, revegetate and reshape the Hill to allow access to the Hill, provide connections to the light rail and Maxwell Road, and improve visual connections between the parklands. Reshaping will improve visual and physical connections through the viaducts park and to key transport nodes without incurring the cost of spoil removal.	
Access			
1	Want it covered in asphalt	The Master Plan considers the Hill a key opportunity to improve areas of revegetation providing new habitat and flora.	
1	Make it a car park	Additional parking is proposed adjacent to the Hill at Victoria Street. This restricts vehicular access to the edges of the parklands, improving safety and connectivity.	
1	Make pathways near it safe in terms of contamination etc.	All works would comprehensively plan and design for remediation of the Hill to ensure its safety for community use.	
1	reopen footpath down the side of The Hill to footbridge over canal	The Master Plan proposes a path along the southern side of the Hill to Maxwell Road and a new crossing over the canal to improve this key east west link.	
1	Make sure plans include additional access to lightrail	The Master Plan improves pedestrian access to the light rail. Additional paths to the light rail and to Maxwell Road is proposed on The Hill.	
1	Ensure pram access	A key strategy of the Master Plan is to ensure equitable access to all areas in the parkland. Pram ramps and accessible routes will be considered in detail for each future project.	
Environment			
3	Use for habitat and wildlife	Noted.	
3	Prioritise planting native veg over views	The Hill provides an opportunity for low shrub and higher tree canopy, still allowing native vegetation planting and views.	
1	Don't want too many trees		

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3
Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
1	Want trees for shade	In addition to the proposed tree canopy, the existing fig trees will provide shade.	
	Recreation		
3	Want a community garden	The Master Plan proposes two outdoor community spaces which could contain community gardens.	Additional opportunities for community garden locations are included for further development in future projects and could include the Hill.
4	Like provisions for passive rec	Noted.	
1	Want a café	The Master Plan proposes a café in the community facility at The Crescent and a kiosk on the eastern side of the park.	

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
Harold Park			
General			
5	Like strategies	The strategies have been developed with the community through three rounds of consultation to establish key directions and balance priorities in how the parklands will be embellished in the future. Feedback from the consultation provided high level of support for the strategies and Master Plan	
1	Don't like any of the strategies	The strategies have been developed with the community through three rounds of consultation to establish key directions and balance priorities in how the parklands will be embellished in the future	
1	Proposal is over complicated	Providing community facilities; increasing recreational opportunities and managing open space in a dense urban areas is complex. The Master Plan has distilled competing priorities into 6 key values which balances community aspirations and environment, recreational, heritage, character and access proposals.	
1	Don't focus on Harold Park, it only benefits developer	The redevelopment of Harold Park provides the community with an additional 3.8 hectares of public open space. The City is undertaking the embellishment of the park to ensure community needs are met.	
5	Worried open space is not for everyone, just Harold Park residents	The redevelopment of Harold Park provides the community with an additional 3.8 hectares of public open space. The Master Plan proposes a path and open space network that connects the new open space with adjacent parks and into the surrounding neighbourhoods. Detailed planting, tree canopy and creek swale will respond to a public open space and provide a level of buffer and between the new apartment buildings and parklands.	
1	Welcome Council's efforts in fast tracking the delivery of the project.	With the developer contribution, the embellishment of Harold Park has current funding. The next stage of the project will include the development of a Development Application. The works are scheduled to be complete early 2015.	
Environment			
1	Like plantings	The Master Plan enhances the diversity of plantings in the parklands. Harold Park includes areas of native vegetation, existing figs and date palms, habitat areas, planted swale and rain gardens.	
2	Want plantings for fauna	The Master Plan includes new areas of planting to increase areas for fauna.	

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
Recreation and Community Facilities			
1	Move playground away from units	The Master Plan locates a small local scale play area away from residential buildings toward the southern end of the Harold Park development. The playground is located near stair and path links to increase access and surrounded with tree and shrub plantings.	
1	move playground to Tram Sheds area	The Master Plan locates a small local play spaces towards the southern park area. This ensure the play spaces are evenly distributed around the whole parklands in Federal Park, Jubilee Park and Harold Park and provides and ranges of recreation opportunities for the surrounding neighbourhoods.	
1	Want a playground in Harold Park	The provision of the playground is proposed in the Harold Park open space.	
2	Want community garden	Noted. A community garden is proposed in the strategies.	
1	Want community garden elsewhere	The strategies indicate a community garden could be located with the outdoor community space and interpretation of the historic gardens.	Additional opportunities for community garden locations are included for further development in future projects.
1	Like passive recreation space	Noted. Areas for passive recreation are included in Harold Park.	
1	Want more recreational options in this area	A mix of passive and active recreation is provided in Harold Park, such as strolling, running, cycling, ball games, play, quiet contemplation and picnicking.	
2	Provide access to toilets in Harold Park	The Master Plan indicates toilets will be associated with the refurbishment of the Tram Sheds in Harold Park.	
Access			
2	Harold Park open space must more accessible and useable for Harold Park residents	The Master Plan connects Harold Park to the adjacent suburbs and community. A path and stair network provides improved north south and east west links into the parklands. The proposal provide series of landscape settings for play, informal kick about space, passive recreation and native habitat area.	
1	Don't waste money on enabling access from neighbouring areas	The provision of convenient access to public open space from surrounding neighbourhoods is an established principle of open space planning. To ensure the new area is connected to the greater parklands and perceived as public open space, it is important to connect existing neighbourhoods with new public amenity.	
1	Want more access from neighbouring areas	A path and stair network is proposed through Harold Park connecting to the adjacent parklands.	
1	Want more access to the parklands		

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
5	Want no car access from Maxwell Road to Harold Park	The Master Plan does not propose vehicular access from Maxwell Road into the parklands. Vehicular access to Harold Park will be from The Crescent and new roads in the Harold Park redevelopment. Vehicular access will be provided to the new building as part of the Harold Park redevelopment adjacent to Maxwell Road.	The notations and graphics have been updated to clarify extent of vehicular and pedestrian shared environments to remove potential for misinterpretation.
1	Worried about traffic through the parklands		
5	Worried about traffic impacts		
1	Improve cycle connections to this area	Cycle connections are improved through this area with a new north south shared pedestrian and cycle path.	
2	Provide adequate visitor parking	Parking is provided at the edge of the parklands. Additional spaces in Victoria Road and Federal Road are included. The Master Plan relocates the parking in Chapman Road south to the edge of the parklands adjacent to The Crescent. Mirvac will provide parking for the Tram Sheds.	
2	Want more access into this space	A continuous north south path network is included to connect Forest Lodge with the parklands and the foreshore. East west paths and stairs provide connections from Glebe and Annandale into the new open space at Harold Park.	

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
56	No stair access from Toxteth Estate into Harold Park	The provision of convenient access to public open space from surrounding neighbourhoods is an established principle of open space planning. To ensure the new area is connected to the greater parklands and perceived as public open space, it is important to connect existing neighbourhoods with new public amenity.	The Master Plan is amended to remove the lift access from Toxteth Road into Harold Park.
Petition with 38 signatures			In addition, it is proposed that the stair access into Harold Park is staged. The amended Master Plan recommends that one stair access is delivered in the initial Harold Park open space embellishment project. The other stairs are proposed as longer term priority to be considered for potential funding in the future.
4	No stair access from Toxteth Estate - anti-social behaviour	Increased access and passive surveillance will increase safety in the parklands.	
1	No stair access from Toxteth Estate - encourages crime (break and enter)		
4	No stair access from Toxteth Estate - creation will reduce habitat		
11	No stair access from Toxteth Estate - increased cars and competition for parking		
10	No stair access from Toxteth Estate - it will bring more people in and destroy serenity		
4	No stair access from Toxteth Estate - it is unnecessary		
2	No stair access from Toxteth Estate - it only serves Harold Park residents		
3	No stair access from Toxteth Estate - safety issues		
1	Like stair access but want it to include lift		
6	Like stair access		
1	Have only 1 set of stairs from Toxteth Estate		
1	No lift access		
1	Remove shared path	The Master Plan proposes to improve pedestrian and cycle connections through the park. The shared paths will need to be carefully designed to minimise conflict.	The notations and graphics have been updated to clarify extent of vehicular and pedestrian shared environments to remove potential for misinterpretation.
1	Pathways need to be safe at night in this area	Vehicular shared environments in Harold Park are restricted to driveway access from Maxwell Road to the proposed apartments on Maxwell Road as part of the Harold Park redevelopment.	
1	Want Rock Lane stairs improved	The pathways will be lit to increase safety at night through the parklands.	
1		The Master Plan includes Rock Lane stair access.	The City has commenced design work on the improvement of Rock Lane stair access.

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3
Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
57	Oppose bus stop on Maxwell or Victoria Road	<p>The Master Plan does not propose a bus stop on Maxwell Road. The existing bus stop is a school bus stop.</p> <p>The Master Plan does not propose a new bus route along Maxwell and Victoria Roads.</p>	<p>The existing bus stop on Maxwell Road has been noted as a 'school bus stop' and the proposed bus stop on Victoria Road has been removed to clarify that the Master Plan does not propose new bus routes down Maxwell and Victoria Roads, removing potential for misinterpretation.</p>
Heritage			
2	Reinstate diggers memorial	The Master Plan considers the interpretation of past uses and commemorative gardens.	
1	Retain Tram Sheds	The Tram Sheds will be retained. The developer for the Harold Park redevelopment (Mirvac) will be undertaking restoration of the Tram Sheds.	

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3
Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
The Crescent			
General			
2	Love all the strategies	Noted.	
2	Like carpark proposal	Noted.	
1	Is proposed childcare for Leichhardt residents too?	Child care would be for residents from surrounding neighbourhoods including those in Leichhardt local government area.	
1	Put childcare closer to City residents so Leichhardt residents can't use it		
60	Like 1994 Master Plan	This Master Plan acknowledges and reflects past community effort and work, and has invested in significant consultation to ensure it also reflects current community needs and aspirations.	The amended Master Plan removes three courts from the Crescent and are replaced with an area of trees and grass to suit unstructured recreation.
67	No community, parking or sports facility - just open space as proposed by Leichhardt/old plan	<p>The Master Plan responds to current boundaries, current and future needs and develops a coherent vision to guide future effort.</p> <p>Many of the proposals and aspirations in the 1994 Master Plan have been delivered over the past 20 years and are also included in this Master Plan. Such as the successful acquisition of many properties along The Crescent by Leichhardt Council and subsequently the City, water treatment initiatives such as the wetland pond, proposed estuarine environment on the foreshore, and improving habitat and diversity.</p> <p>Both plans include areas for parking, a path network through the park, new trees and areas of planting and proposed uses such as a cafe.</p> <p>Current population trends indicate an increase in needs for sports facilities with the increase in population.</p>	<p>The amended Master Plan better explains the proposed landscape character and recreation uses on the Crescent. The Village Green is described as a landscape similar to Federal Park, an open area of grass with adjacent shade trees that allows open views and vistas. The Village Green is described as hosting a range of informal active or passive recreation activities when not being used for ball games.</p> <p>The amended Master Plan includes description that fixed structures such as fencing and goal posts are not proposed.</p>
12	No community buildings on The Crescent	Adaptive re-use of an existing building can help address current community facility and childcare short-falls, and can provide flexible space for recreation, education, creative and community use, for surrounding neighbourhoods.	
15	No community buildings on The Crescent just open space	The Crescent will contain a mix of active and passive recreation within a parkland comprising areas of grass, canopy trees and expanded saltmarsh.	

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3
Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
1	Demolish all of the buildings on The Crescent.	The majority of the buildings along The Crescent are proposed to be demolished. The adaptive re-use of an existing building for a community facility can help address current needs, consolidate ancillary facilities and support the existing uses the parklands.	
1	No community building on Crescent, will increase noise to residents	Acoustics would be considered in the detailed design for this future project.	
2	No community building as it's too close to busy road	The proposed location on the edge of the parklands, makes it more serviceable location and a correlation with the existing active precinct in which it sits. Opening to the parklands, the building can also be accessed from within the park and by Chapman Road carpark and drop-off zone.	
7	No community building, it will block views	The removal of the majority of the buildings along The Crescent will open views along The Crescent into the expanded parklands. Key vistas to the viaduct and bay will be open with the proposals in the Master Plan.	
24	Put community facility in Tram sheds	The Tram Sheds are a privately owned building. The developer Mirvac, will provide 500m2 to the City for community space. While this will be a positive contribution to overall provision in the precinct, the size is not sufficient for child care and additional uses proposed for the community facility. The proposed facility is sited in a more serviceable location, adjacent to proposed parking and an active street front. Its location has a strong correlation to the recreation precinct in which it sits.	
1	Put community facility elsewhere	This building is currently in the care and control of the City. Located adjacent to an active street and the recreation precinct of the parklands, the adaptive re-use of a portion of this building provides an opportunity to address the community's current needs.	
1	Demolish some of the buildings on The Crescent	The Master Plan proposes to demolish most of the buildings on The Crescent. Only a portion of one building would be retained for adaptive re-use for a community facility.	
1	Want Webber Carpet building demolished	This property is currently privately owned.	
3	Want the City to purchase all buildings on Western side	The Master Plan covers the areas of land within the care and control of the City. Property acquisitions and developer contribution have significantly expanded the open space area available.	
1	Want the City to consider purchasing Crescent Timber		
1	Relocate timber yards	This property is currently privately owned.	

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3
Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
1	Please show a timeline & budget for The Crescent project	The Master Plan will guide the incremental development of the parklands and provides Council with coordinating future projects.	
5	Want all the sporting facilities on The Crescent prioritised - create them now		
1	Use funds from Mirvac to complete Crescent as open space	The funds from Mirvac are for the embellishment of Harold Park.	
1	Want all sporting facilities moved to Harold Park	A large open area suitable for casual games is located in Harold Park. Jubilee Oval and Federal Park currently function as formal sports fields and these will be retained. The proposed junior sized playing field and courts proposed at the Crescent, consolidate the active recreation precinct of Federal Park and Jubilee Oval, offering the opportunity to co-locate supporting amenities such as equipment storage, toilets and change rooms, as well as good access to parking and drop-off areas.	The amended Master Plan notes the large open area at Harold Park as a Village Green.
1	Want cricket pitch on The Crescent	Noted. A cricket pitch is shown on the Crescent. The village green can accommodate a junior games and will provide an additional play area for junior cricket.	
1	Like skate facility	Noted.	
1	Want play areas for kids	The parklands include play areas for children. They include structured and free form areas for active recreation and play. The Master Plan will retain and expands the existing children's playgrounds. In addition, it proposes new play areas and a skate area. The junior playing field is targeted at junior cricket and junior hockey games.	
2	Don't want oval	The proposed junior oval on the Crescent provides additional active play areas to meet current sporting demands.	The amended Master Plan provides additional clarity around the playing area at the Crescent. It is described as a Village Green that can accommodate junior sport games, informal active and passive recreation.
1	Ensure balance of active and passive recreation	The Crescent provides a range of active and passive recreation. The proposals expand the active areas of Federal Park, and also includes the enhanced area of saltmarsh improving	

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3
Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
1	Don't want fence around wetlands removed	The future detailed design for this project will ensure protection of the saltmarsh. Areas of fencing, boardwalks and timber decks could all be used to protect areas and provide access.	
1	Want mound	The Master Plan proposes that the extended areas of parkland present an address to the street that draws on the existing characters of the adjacent parklands and maximises views and access. Subtle landforming could be explored in the future design of projects.	

Consultation Summary - Johnstons Creek Parklands Master Plan Stage 3

Draft Master Plan

No of mentions	Comment	Response to Comments	Proposed Amendments to the Plan
General Comments			
1			
1	Don't change anything	The preparation of a new Master Plan coordinates public domain planning and improvements across a number of new open space areas and properties. It considers the existing parks to ensure the new areas are integrated. Long term improvements for the whole of parklands have been identified which will provide many community benefits.	
17	Like the whole master plan		
4	Liked consultation	The Master Plan has been developed with the community and has included three rounds of consultation to seek community aspirations, establish key directions and balance priorities in how the parklands will be embellished in the future. The consultation included workshops, focus group workshops, intercept surveys, on-line forum discussions and surveys. The consultation aimed to capture the broader community and user groups in the parklands.	
6	Dislike consultation		
4	Worried about safety (want lighting etc.)	Lighting is considered in the strategies, ensuring paths and sporting areas are lit. Lighting will be further considered in detail in future projects.	
4	Leave the Annandale side of the parklands alone	The Master Plan includes the existing parklands as well as new areas of the Crescent. Proposals on the Annandale side of the park will provide many community benefits.	
1	Increases in population should be accounted for	The Master Plan reviews details of population trends and addresses current and future needs.	
2	Upset that the City hasn't acknowledged Save Rozelle Bay	Previous plans and studies are identified in the Master Plan.	The additional story of the parklands development through community involvement will be included as a key interpretive theme.
