SCHEDULE – DEVELOPED DESIGN**

# C16086 – Parks General Upgrades – Reconciliation Park, Redfern

Community Consultation Response Schedule – Developed Design

## Summary of Comments

This summary comprises items identified following community consultation for Reconciliation Park, Redfern.

Consultation Date: June 2013.

Number of responses **4**

Date of receipt	Form of submission	Comments (summarised) Refer to submissions if clarification on summarized comments is required.	Response to Comments In response to these comments, the City and its consultant team will undertake the following:
03/03/13	e-mail received	In favour of the scheme, particularly the <b>additional planting</b> .	Noted.
05/07/13	“	Concerned about <b>large trees and poor lighting</b> on George Street. Do not plant a row of trees along the George Street frontage to the park. Install lighting at the George Street end of the site.	Noted. The large Eucalyptus located in the south western corner of the site (fronting George St) is proposed for removal following the recent failure of a large porting of the canopy. The removal of these trees will open up the George St frontage of the park. Low planting is proposed at the George Street end of the site so that site lines are maintained and the site has a welcoming character.
15/07/13	“	Respondent believes the proposed garden area between the playground and community garden will block <b>lines of site</b> . Do not block lines of site of playground from William St. Do not block lines of site through the park. Provide north facing <b>seating</b> away from the playground.	Noted. Lines of site to the playground will not be obscured. The garden bed between the playground and community garden will contain low shrubs and groundcovers. A variety of seating opportunities are provided, including bench seat and low height seating walls. These are positioned in a variety of locations to provide seating in sun and shade.

 Community Consultation Response Schedule – Developed Design

Date of receipt	Form of submission	Comments (summarised) Refer to submissions if clarification on summarized comments is required.	Response to Comments In response to these comments, the City and its consultant team will undertake the following:
15/07/13	“	<p><b>Cigarette butts</b> are left in the playground and children pick them up and put them in their mouths.                      Install no smoking signs in the playground.                      Install cigarette butt bins elsewhere in park.  <b>Fence</b> the playground and the existing wall.                      The playground receives a lot of <b>western sun</b> in summer.</p>	<p>Noted.                      The park signage suite includes a no smoking in playground notice. This site will have signage installed after upgrade.                      The design proposes low height walls to separate the playground and provide a seating wall for adults to sit while supervising their children.                      The existing wall is being rebuilt and terraces to decrease the overall height.                      Two additional trees are proposed in the playground area to shade the equipment.</p>
<b>END</b>
