Lawson Street improvements

DESCRIPTION

We're redesigning Lawson Street to make it safer for people walking and riding bikes.

The Lawson Street footpath, between Little Eveleigh Street and Ivy Lane, is a popular thoroughfare for people walking between Redfern Station and Sydney University.

Up to 3,000 people use the path during the morning peak creating congestion and safety concerns. These proposed works aim to create more space for pedestrians, while balancing the needs of local residents, parking and the general appeal of the street.

A new cycleway is also proposed on the northern side, between Eveleigh Street and Regent Street. This will provide a missing link and safe connection for riders between Newtown and the inner City. In conjunction with the Roads & Maritime Services, the City of Sydney has already installed a 40km/hr zone along Lawson Street, to help slow traffic and make the area safer.

The NSW Government is providing funding for the Lawson Street cycleway as part of the Priority Cycleways Program. This program aims to build connections on priority routes and in major centres for cyclists in Sydney. Delivery of these important projects and programs help meet Goal 8 of the NSW State Plan 2021 to increase the number of bicycle and walking trips in the Greater Sydney area.

DESIGN OBJECTIVES

The objectives for this project are to:

- Provide more footpath space for people walking;
- Provide a safe cycle route along Lawson Street and Lawson Square between Little Eveleigh Street & Wells Street;
- Provide safe crossing points for people walking and riding bikes at intersections;
- Maintain the function of the road for vehicles;
- Maintain access for residents and pedestrians through gradual re-planting of street trees in the parking lane;
- Balance need for more space for pedestrians and street trees whilst maintaining as much parking as possible for residents and visitors.

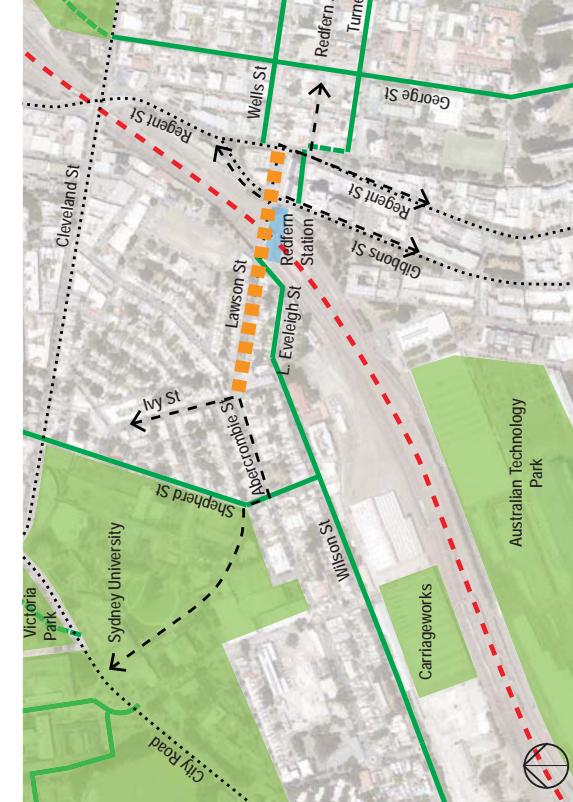

PROJECT PROPOSAL

Footpaths will be widened to create more room for people walking, particularly in front of Redfern Station, and at the busy Lawson and Little Eveleigh Street intersection.

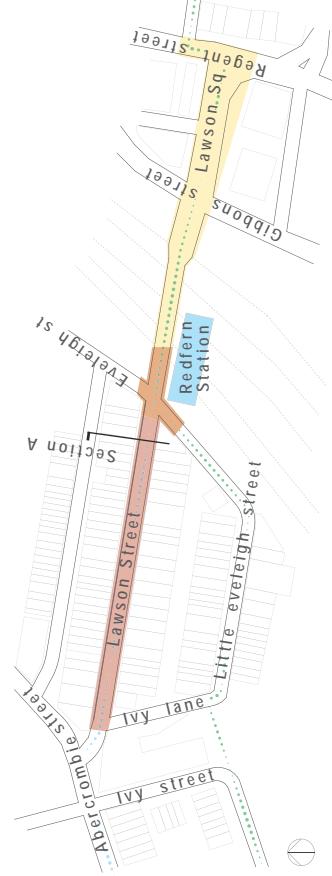

A new raised pedestrian crossing is proposed in front of Redfern Station to improve safety for people walking.

By redesigning no parking zones at either end of Lawson Street (between Little Eveleigh Street and Ivy Lane), extra footpath space will be created and road lanes narrowed which will also help slow traffic and improve safety. The separated bi-directional cycleway will run along Lawson Street and Lawson Square between Little Eveleigh and Wells Streets, providing a crucial link for riders off the busy street and away from traffic.

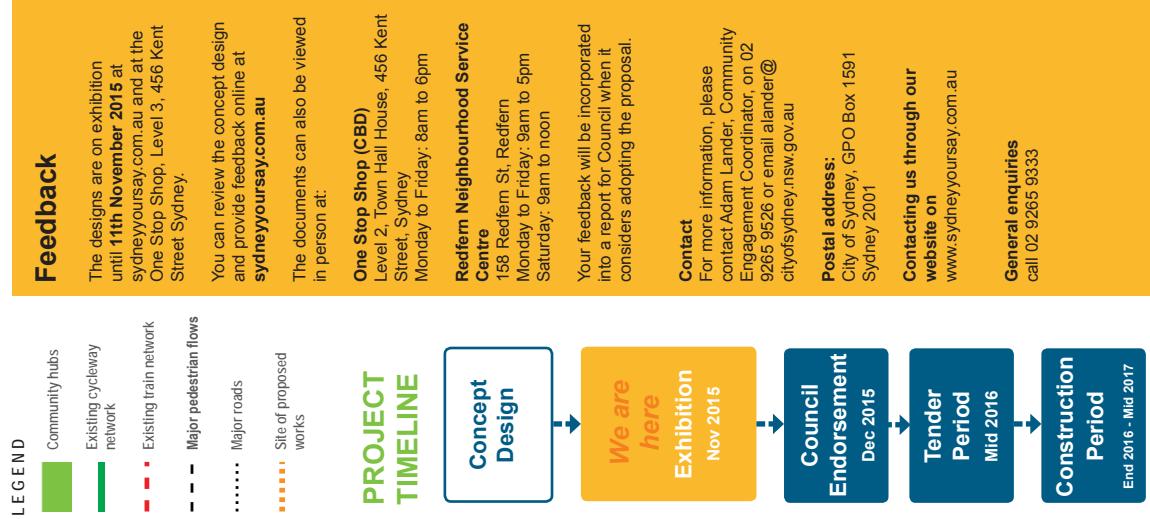

A key part of the project is widening the southern footpath to create more room for people walking. This will require the gradual removal of all southern footpath street trees over the next ten years. The five largest trees will remain in the first year and seven new native trees (Spotted Gum (*Corymbia maculata*)) will be planted to provide shade and to maintain the street appeal. Three car spaces will be removed. All trees on the northern footpath will be retained.

The designs are on exhibition until **11th November 2015** at sydneyyoursay.com.au and at the One Stop Shop, Level 3, 456 Kent Street Sydney.

You can review the concept design and provide feedback online at sydneyyoursay.com.au

The documents can also be viewed in person at:

One Stop Shop (CBD)
Level 2, Town Hall House, 456 Kent Street, Sydney
Monday to Friday: 8am to 6pm

Redfern Neighbourhood Service Centre
158 Redfern St, Redfern
Monday to Friday: 9am to 5pm
Saturday: 9am to noon

Your feedback will be incorporated into a report for Council when it considers adopting the proposal.
