

Attachment A

Recommended Conditions of Consent
--

SCHEDULE 1A

APPROVED DEVELOPMENT/DESIGN MODIFICATIONS/COVENANTS AND CONTRIBUTIONS/USE AND OPERATION

Note: Some conditions in Schedule A are to be satisfied prior to issue of a Construction Certificate and some are to be satisfied prior to issue of Occupation Certificate, where indicated.

(1) APPROVED DEVELOPMENT

- (a) Development must be in accordance with Development Application No. D/2018/313 dated 29 March 2018 and the following drawings:

Drawing Number	Architect	Date
DA-0200 rev. H	SJB	18.04.2018
DA-0201 rev. H	SJB	20.04.2018
DA-0202 rev. H	SJB	20.04.2018
DA-0203 rev. H	SJB	18.04.2018
DA-0500 rev. H	SJB	18.04.2018
DA-0501 rev. H	SJB	18.04.2018
DA-0502 rev. H	SJB	20.04.2018
DA-0503 rev. H	SJB	19.04.2018
DA-0601 rev. H	SJB	20.04.2018
DA-0602 rev. H	SJB	20.04.2018
DA-0701 rev. H	SJB	20.04.2018
DA-0702 rev. H	SJB	18.04.2018
DA-2551 rev. G	SJB	14.03.2018

and as amended by the conditions of this consent.

- (b) In the event of any inconsistency between the approved plans and supplementary documentation, the drawings will prevail.

(2) AWNINGS

- (a) The proposed awning to the separate ground floor tenancy entrance on Wellington Street which projects beyond the site boundary is to be deleted; and

- (b) Galvanised steel is to be used for the new curved awning to the main entrance, as well as for the steel framed joinery at the entries on Wellington Street.

The modifications are to be submitted to and approved by Council's Area Planning manager prior to the issue of a Construction Certificate.

(3) INDICATIVE SIGNAGE NOT APPROVED

The proposed signage, including two vertical projecting wall signs, two building identification signs, and one above awning sign, have not been approved as part of this application.

(4) SIGNAGE STRATEGY

A signage strategy for the building is to be submitted to and approved by Council's Area Planning manager prior to the issue of a Construction Certificate. The signage strategy must include information and scale drawings of the location, type, construction, materials and total number of signs appropriate for the building.

(5) HERITAGE DESIGN DETAILS

- (a) The existing western and eastern parapet walls, including the engaged piers and chimney, must be retained and not removed. The new walls are to be built on top of the existing parapet walls;
- (b) The form of the roller shutter door to the loading dock entrance on the easternmost side of the front facade is to be retained. If a tilt-up panel door is proposed, the door surface is to be finished with corrugated metal;
- (c) The existing internal timber beams and posts at the edges of the proposed voids must be retained and not removed. Any strengthening needed to the void edges must minimise the new structural elements' visual impact.

(6) REMOVAL OF PAINT FINISH FROM EXTERNAL WALLS

Removal of the existing paint on the facade wall must not damage the surface of the brickwork. Abrasive removal methods are not allowed. Trials of different paint removal measures may be carried out on a small wall surface to test their effectiveness. Of the workable measures, the method with the least impact is to be applied to the building.

The final paint removal method and the test results are to be submitted to Council's Area Planning Manager prior to the issue of a Construction Certificate.

(7) LANDSCAPING OF THE SITE

- (a) A detailed landscape plan, drawn to scale, by a qualified landscape architect or landscape designer, must be submitted to and approved by Council's Area Planning Manager prior to the issue of a Construction Certificate for above ground building works. The plan must include:
 - (i) Location of existing and proposed structures on the site including, but not limited to, existing and proposed trees, paved areas, planted areas

on slab, planter areas on awnings, planted areas in natural ground, trellis, lighting and other features;

- (ii) Details of earthworks and soil depths including mounding and retaining walls and planter boxes. The minimum soil depths for planting on slab must be 1000mm for trees, 450mm for shrubs and 200mm for groundcovers;
 - (iii) Location, numbers, type and supply of plant species, with reference to Australian Standards;
 - (iv) A mulch layer for all planting with a 75mm minimum depth;
 - (v) Adequate soil depth for all planting including the 8m tall mature tree proposed to the ground floor lobby (refer to the City of Sydney Landscape Code vol. 2);
 - (vi) Maintenance and irrigation details for the metal planters to the rear ground floor courtyard, and the 250mm planter above the curved ground floor awning;
 - (vii) Maintenance and safety details for the four 650mm deep metal raised planters to the front of the second floor outdoor terrace;
 - (viii) Details of planting procedure and maintenance;
 - (ix) Details of drainage, waterproofing and watering systems including the location of an automatic irrigation controller;
 - (x) Details of electrical conduits for feature lighting;
 - (xi) Details of the location, sizes and numbers of plants used with reference to Australian Standards, with preference for drought resistant species;
 - (xii) Details of installation methodology e.g. safety considerations for working at height, location of maintenance hooks and safety anchor points, transport materials etc.
- (b) Prior to the issue of a Construction Certificate, the following details are to be submitted to and approved by the Principal Certifier:
- (i) A maintenance plan which is to be complied with during occupation of the property;
 - (ii) Evidence the landscaping has been assessed as part of the structural certification and waterproofing certification provided for the development.
- (c) All landscaping in the approved plan is to be completed prior to an Occupation Certificate being issued.
- (d) Prior to the issue of an Occupation Certificate, a maintenance plan is to be submitted and approved by the Principal Certifier. A copy of the maintenance plan is to be kept on site at all times during construction and shall be

produced to Council on request following completion. The Maintenance Manual shall include as a minimum:

- (i) Frequency and methodology of different maintenance requirements including the removal of green waste.
 - (ii) Details of safety procedures.
 - (iii) Laminated copies of 'As Built' drawings.
 - (iv) Manufacturer's contact details and copies of manufacturers' typical details and specification;
 - (v) Copies of warranties and guarantees relating to all materials and plant used in construction; and
 - (vi) Decommissioning procedures.
- (e) Inaccessible landscaping elements are required to remain inaccessible during occupation of the property.

(8) FLOOR SPACE RATIO - ALL OTHER AREAS

The following applies to Floor Space Ratio:

- (a) The Floor Space Ratio for the business use must not exceed 1.86:1; calculated in accordance with the Sydney Local Environmental Plan 2012. For the purposes of the calculation of FSR, the total Gross Floor Area is 1,118sqm.
- (b) Prior to an Occupation Certificate being issued, a Registered Surveyor must provide certification of the total and component Gross Floor Areas (by use) in the development, utilising the definition under the Sydney Local Environmental Plan 2012, applicable at the time of development consent, to the satisfaction of the Principal Certifier.

(9) RESTRICTION OF END OF JOURNEY FLOOR SPACE

Prior to an Occupation Certificate being issued a documentary restrictive covenant to the effect that 64sqm of the building has been approved as end of journey floor space is to be registered on the Title of the development site pursuant to section 88E of the Conveyancing Act 1919. The covenant is to be created in right of Council and at no cost to Council.

(10) BUILDING HEIGHT

- (a) The height of the building must not exceed RL 29.330 (AHD) to the top of the building and RL 25.90 (AHD) to the parapet of the building.
- (b) Prior to an Occupation Certificate being issued, a Registered Surveyor must provide certification that the height of the building accords with (a) above, to the satisfaction of the Principal Certifier.

(11) HOURS OF OPERATION

The hours of operation are restricted to between 7.00am and 8.00pm, Monday to Sunday.

(12) CAFÉ USE – GROUND FLOOR TENANCY

(a) The separate ground floor tenancy is approved as a café use only. No fit-out is approved under this consent.

(13) A separate approval for the fit-out of the tenancy must be obtained prior to the use commencing. CONTRIBUTION TOWARDS PUBLIC AMENITIES – CITY OF SYDNEY DEVELOPMENT CONTRIBUTIONS PLAN 2015 – SOUTH PRECINCT

Council has identified the development will increase demand for public amenities and facilities. Pursuant to Section 7.11 of the Environmental Planning and Assessment Act, 1979 (as amended), and the City of Sydney Section 94 Contributions Development Contributions Plan 2015 the following monetary contributions are required towards the cost of public amenities.

<u>Contribution Category</u>	<u>Amount</u>
Open Space	\$55,350.97
Community Facilities	\$8,605.29
Traffic and Transport	\$70,264.37
Stormwater Drainage	\$27,784.87
Total	\$162,005.50

The City of Sydney will index the above contribution for inflation at the time of payment using the following formula.

$$C_{\text{payment}} = C_{\text{consent}} \times (CPI_{\text{payment}} \div CPI_{\text{consent}})$$

Where:

C_{payment} = Is the contribution at time of payment;

C_{consent} = Is the contribution at the time of consent, as shown above;

CPI_{payment} = Is the Consumer Price Index (All Groups Index) for Sydney published by the Australian Bureau of Statistics that applies at the time of payment; and

CPI_{consent} = Is the Consumer Price Index (All Groups Index) for Sydney at the date the contribution amount above was calculated being – 113.6 for the March 2018 quarter.

The contribution must be paid prior to the issue of any Construction Certificate in relation to this development.

Please contact Council's Planning Administration staff at planningsystemsadmin@cityofsydney.nsw.gov.au to request a letter confirming the indexed contribution amount payable.

Once the letter confirming the indexed contribution is obtained, payment may be made at any of the City's Neighbourhood Service Centres or the One Stop Shop at Town Hall House. Acceptable payment methods are EFTPOS (debit card only), cash or a bank cheque made payable to the City of Sydney. Personal or company cheques will not be accepted.

(14) NOISE - GENERAL

- (a) The emission of noise associated with the use of the premises including the cumulative operation of any mechanical plant and equipment, and air conditioning shall comply with the following:
- (i) The $L_{Aeq, 15 \text{ minute}}$ noise level emitted from the use must not exceed the project specific noise level for that receiver as determined in accordance with the *NSW EPA Industrial Noise Policy*. Noise must be measured in accordance with the Industrial Noise Policy and relevant requirements of Australian Standard AS 1055-1997 Acoustics – Description and measurement of environmental noise.
 - (ii) Project specific noise levels shall be determined by establishing the existing environmental noise levels, in complete accordance with the assessment $L_{A90, 15 \text{ minute}}$ / rating $L_{A90, 15 \text{ minute}}$ process to be in accordance with the requirements for noise monitoring listed in the *NSW EPA Industrial Noise Policy* and relevant requirements of Australian Standard AS1055-1997 Standard AS 1055-1997 Acoustics – Description and measurement of environmental noise.
 - (iii) Modifying factors in Table 4.1 of the *NSW EPA Industrial Noise Policy* are applicable.
- (b) An $L_{Aeq, 15 \text{ minute}}$ noise level emitted from the use must not exceed the $L_{A90, 15 \text{ minute}}$ noise level by more than 3dB in any Octave Band Centre Frequency (31.5 Hz to 8 kHz inclusive) when assessed inside any habitable room of any affected residence or noise sensitive commercial premises provided that;
- (i) Where the $L_{A90, 15 \text{ minute}}$ noise level is below the threshold of hearing, T_f at any Octave Band Centre Frequency as defined in Table 1 of International Standard ISO 226 : 2003- Normal Equal-Loudness-Level Contours then the value of T_f corresponding to that Octave Band Centre Frequency shall be used instead.
 - (ii) The $L_{Aeq, 15 \text{ minute}}$ noise level and the $L_{A90, 15 \text{ minute}}$ noise level shall both be measured with all external doors and windows of the affected residence closed;
 - (iii) The relevant background noise level ($L_{A90, 15 \text{ minute}}$) is taken to mean the day, evening or night rating background noise level determined in complete accordance with the methodology outlined in the *NSW EPA Industrial Noise Policy* and Australian Standard AS1055.1997 Acoustics – Description and measurement of environmental noise.

- (iv) Background noise shall be established in the absence of all noise emitted from the use but with the ventilation equipment normally servicing the affected residence operating. Background noise measurements are to be representative of the environmental noise levels at the affected location.
- (v) Modifying factors in Table 4.1 of the *NSW EPA Industrial Noise Policy* are applicable. Internal Noise measurements are not to be corrected for duration.

(15) COMPLIANCE WITH THE ACOUSTIC REPORT PRIOR TO CONSTRUCTION AND OR OCCUPATION CERTIFICATES

- (a) All performance parameters, requirements, engineering assumptions and recommendations contained in the acoustic report prepared by Acoustic report prepared by Wilkinson Murray, May 2018, '1-7 Wellington Street, Chippendale, assessment of mechanical plant noise emissions' report no: 18108, version A Trim 2018/249489 must be implemented as part of the detailed design assessment and implemented into the design drawings prior to the commencement of the use of the premises in accordance with the requirements of (b) and (c) below and to the satisfaction of the certifying authority.
- (b) Prior to the issue of a Construction Certificate, the construction drawings and construction methodology must be assessed and certified by a suitably qualified acoustic consultant* (see definition below) to be in accordance with the requirements of the DA acoustic report prepared by Acoustic report prepared by Wilkinson Murray, May 2018, '1-7 Wellington Street, Chippendale, assessment of mechanical plant noise emissions' report no: 18108, version A Trim 2018/249489.
- (c) Prior to the issue of an Occupation Certificate, a suitable qualified acoustic consultant is to provide a written Acoustic Verification Report to the satisfaction of the PCA that the development complies with the requirements set out in the Report and in (a) and (b) above.

Note: Suitably qualified Acoustic Consultant means a consultant who possesses the qualifications to render them eligible for membership of the Australian Acoustics Society, Institution of Engineers Australia or the Association of Australian Acoustic Consultants at the grade of member.

(16) NO SPEAKERS OR MUSIC OUTSIDE

Speakers and/or noise amplification equipment must not be installed and music must not be played in any of the outdoor areas associated with the premises including the public domain. Speakers located within the premises must not be placed so as to direct the playing of music towards the outdoor areas associated with the premises.

(17) EXTERNAL LIGHTING

A separate development application is required to be lodged and approved prior to any external floodlighting or illumination of the building or site landscaping.

(18) MATERIALS AND SAMPLES BOARD

A physical materials sample board detailing all proposed finishes and specific colours must be submitted to and approved by Council’s Area Planning Manager prior to a Construction Certificate being issued.

(19) SIGNS/GOODS IN THE PUBLIC WAY

No signs or goods are to be placed on the footway or roadway adjacent to the property.

(20) ALLOCATION OF PARKING

The number of car parking spaces to be provided for the development shall comply with the table below. Details confirming the parking numbers shall be submitted to the satisfaction of the Certifying Authority prior to the issue of a Construction Certificate.

Car Parking Type	Number
Small Rigid Vehicle loading dock	1
Total	1

(21) PARKING DESIGN

The design, layout, signage, line marking, lighting and physical controls of off-street parking facilities must comply with Australian Standard AS/NZS 2890.2 Parking facilities Part 2: Off-street commercial vehicle. The details must be submitted to and approved by the Principal Certifying Authority prior to a Construction Certificate being issued.

(22) BICYCLE PARKING AND END OF TRIP FACILITIES

The minimum number of bicycle parking spaces and end of trip facilities to be provided for the development must comply with the table below.

Bicycle Parking Type	Number	Requirements
Non-residential staff/employee/customer	13	Spaces must be Security Level B (AS2890.3:2015) bicycle facilities
End of Trip Facility Type	Number	
Showers with change area	4	
Personal lockers	13	

The layout, design and security of bicycle facilities must comply with *Australian Standard AS 2890.3:2015 Parking Facilities Part 3: Bicycle Parking Facilities*. The details must be submitted to and approved by the Principle Certifying Authority confirming prior to the Construction Certificate being issued.

(23) COST OF SIGNPOSTING

All costs associated with signposting of kerbside parking restrictions and traffic management measures associated with the development shall be borne by the developer.

(24) ASSOCIATED ROADWAY COSTS

All costs associated with the construction of new road/footpath works including kerb and gutter, road pavement, drainage system and footway shall be borne by the developer. The new road works must be designed and constructed in accordance with the City's "Sydney Streets Technical Specification" including amendments and "Sydney Streets Design Code".

(25) SERVICE VEHICLE SIZE LIMIT

The size of vehicles servicing the property must not exceed 6.4m.

(26) ON-SITE LOADING AREAS AND OPERATION

All loading and unloading associated with the site must be carried out within the confines of the site, at all times and must not obstruct other properties/units or the public way.

At all times the service vehicle docks, car parking spaces and access driveways must be kept clear of goods and must not be used for storage purposes, including garbage storage.

(27) TRAFFIC WORKS

Any proposals for alterations to the public road, involving traffic and parking arrangements, must be designed in accordance with RMS Technical Directives and must be referred to and agreed to by the Local Pedestrian, Cycling and Traffic Calming Committee prior to any work commencing on site.

SCHEDULE 1B

PRIOR TO CONSTRUCTION CERTIFICATE/COMMENCEMENT OF WORK/HEALTH AND BUILDING

Note: Prior to the issue of the Construction Certificate, sufficient information must be forwarded to the certifying authority (whether Council or a private accredited certifier) illustrating compliance with the relevant requirements of the Building Code of Australia (and a copy forwarded to Council where Council is not the certifying authority). If Council is to be the certifying authority, please contact the Building Unit to discuss the requirements prior to submission of the application for construction certificate.

(28) HERITAGE CONSERVATION WORKS

- (a) Prior to the issue of the Construction Certificate, a schedule of conservation works to be undertaken concurrent with the works is to be submitted to Council's Area Planning Manager for approval.
- (b) The schedule is to detail the conservation of all fabric identified as having a heritage value including but not limited to the following: paint removal and repair to the brickwork; repair and repainting of timber joinery; repair to timber posts, beams, joists, and flooring; and retention and display of the extant metal clad fire doors.
- (c) The schedule is to be supported by outline specifications, methodologies and detailed architectural sections, elevations and plans at 1:20 and 1:5 scales. The details should incorporate any structural and/or building services design for the building.
- (d) The proposed works are to be carried out in a manner that minimises demolition, alterations and new penetrations/fixings to the significant fabric of the existing building.
- (e) All conservation and adaptation works are to be in accordance with the Articles of the Australian ICOMOS Burra Charter 2013. Appropriately qualified contractors and tradespersons are to be commissioned who are skilled in traditional building and engineering trades to carry out the proposed scope of works within the heritage building.
- (f) **INSPECTION AND APPROVAL:** The conservation works are to be progressively inspected by, and be implemented to the satisfaction of, Council's own Heritage Specialist prior to the issue of the Occupation Certificate or commencement of the use, whichever is the earlier.

(29) BUILDING WORKS TO COMPLY WITH BCA – HERITAGE BUILDINGS OR BUILDINGS WITHIN CONSERVATION AREA

Any building works required to ensure compliance with the BCA or new building standards not specified in the submitted/approved plan must not damage existing fabric and building features. If such upgrading works have impact or potentially have impact on existing fabric and features, details of the works must be submitted and approved by Council's Area Planning Manager prior to issue of any Construction Certificate.

(30) ARCHAEOLOGICAL DISCOVERY DURING EXCAVATION

- (a) Should any relics be unexpectedly discovered on the site during excavation, all excavation or disturbance to the area is to stop immediately and the Heritage Council of NSW should be informed in accordance with section 146 of the *Heritage Act 1977*.
- (b) Should any Aboriginal objects be unexpectedly discovered then all excavation or disturbance of the area is to stop immediately and NSW Government Office of Environment and Heritage is to be informed in accordance with Section 89A of the *National Parks and Wildlife Act 1974*
- (c) Should any archaeological remains or Aboriginal objects be discovered, a copy of recording of the finds and the final archaeological summary report is to be submitted to Council prior to the Occupational Certificate;
- (d) If the discovery is on Council's land, Council must be informed.

(31) CONSTRUCTION TRAFFIC MANAGEMENT PLAN

A Construction Traffic Management Plan must be submitted to and approved by Council prior to a Construction Certificate being issued.

Construction Traffic Management Plans are to be prepared in accordance with Standard Requirements for Construction Traffic Management Plan on the City's website <http://www.cityofsydney.nsw.gov.au/business/business-responsibilities/traffic-management/construction-traffic-management-plans>

(32) ALIGNMENT LEVELS – MAJOR DEVELOPMENT

- (a) Proposed building floor levels, basement levels, basement car park entry levels and ground levels shown on the approved Development Application plans are indicative only and have not been approved by this consent.
- (b) Prior to a Construction Certificate being issued for any excavation, civil construction, drainage or building work (whichever is earlier), excluding approved preparatory or demolition work, alignment levels for the building and site frontages must be submitted to and approved by Council. The submission must be prepared by a Registered Surveyor and designed by a suitably qualified engineer, must be in accordance with the City of Sydney's *Public Domain Manual* and must be submitted with a completed Levels and Gradients Approval Application form (available on the City's website).
- (c) These alignment levels, as approved by Council, are to be incorporated into the plans submitted with the application for a Construction Certificate for any civil, drainage and public domain work as applicable under this consent. If the proposed detailed design of the public domain requires changes to any previously approved Alignment Levels, then an amended Alignment Levels submission must be submitted to and approved by Council to reflect these changes prior to a Construction Certificate being issued for public domain work.

(33) FLOOD PLANNING LEVELS

- (a) The following performance criteria shall apply to the design of the buildings and structures on the site:
 - (i) All proposed habitable ground floor levels within the site shall be set at minimum RL.16.70m AHD
 - (ii) All proposed non-habitable ground floor levels within the site shall be set at minimum RL.16.70m AHD
 - (iii) Any material used for the habitable/non-habitable floor level below RL.16.70m AHD shall comply with the flood compatible materials under section 6 – flood compatible materials of the Interim floodplain Management Policy dated May 2014.
- (b) A design certification report prepared by a suitably qualified practitioner engineer (NPER), for floor levels of buildings and structures demonstrating compliance of these requirements above shall be submitted to and be approved by the Principal Certifying Authority prior to the issue of a Construction Certificate. The approval report shall be provided to the City Of Sydney prior to the commencement of work.

(34) PHOTOGRAPHIC RECORD / DILAPIDATION REPORT - PUBLIC DOMAIN

Prior to an approval for demolition being granted or a Construction Certificate being issued, whichever is earlier, a photographic recording of the public domain site frontages is to be prepared and submitted to Council's satisfaction.

The recording must include clear images of the building facade adjoining the footpath, the footpath, nature strip, kerb and gutter, driveway crossovers and laybacks, kerb ramps, road carriageway, street trees and plantings, parking restriction and traffic signs, and all other existing infrastructure along the street.

The form of the recording is to be as follows:-

- (a) A PDF format report containing all images at a scale that clearly demonstrates the existing site conditions;
- (b) Each image is to be labelled to identify the elements depicted, the direction that the image is viewed towards, and include the name of the relevant street frontage;
- (c) Each image is to be numbered and cross referenced to a site location plan;
- (d) A summary report, prepared by a suitable qualified professional, must be submitted in conjunction with the images detailing the project description, identifying any apparent existing defects, detailing the date and authorship of the photographic record, the method of documentation and limitations of the photographic record;
- (e) Include written confirmation, issued with the authority of both the applicant and the photographer that the City of Sydney is granted a perpetual non-exclusive license to make use of the copyright in all images supplied, including the right to make copies available to third parties as though they

were Council images. The signatures of both the applicant and the photographer must be included.

Any damage to the public way including trees, footpaths, kerbs, gutters, road carriageway and the like must immediately be made safe and functional by the applicant. Damage must be fully rectified by the applicant in accordance with the City's standards prior to a Certificate of Completion being issued for Public Domain Works or before an Occupation Certificate is issued for the development, whichever is earlier.

(35) PROTECTION OF STONE KERBS

- (a) The existing stone kerbs on the Wellington Street frontage of the site are to be retained and properly protected during excavation and construction works.
- (b) To avoid damage to stone kerbs during excavation and construction works for the development, temporary removal and storage of the stone kerbs may be approved by Council. Removed, serviceable stone kerbs (i.e. those that are in good condition as agreed by Council officers) must be re-installed in accordance with the City of Sydney's standard details and specifications after the construction works have been completed. Note: A temporary concrete kerb will need to be constructed to retain the footpath until the stone kerbs can be reinstalled. The removed stone kerbs are to be reinstalled prior to the issue of an Occupation Certificate. Note: all costs associated with the works are to be at no cost to the Council.
- (c) Damaged kerbs are to be replaced to match existing to Council's satisfaction or as otherwise advised by Council officers.
- (d) Where new crossings or temporary crossings are to be constructed to access the property, the affected kerb stones should be salvaged and reused wherever possible.
- (e) All new driveway laybacks and kerbs are to be constructed with stone kerbs to match existing stones or as specified by City officers. All unused stone kerbs are to be salvaged and returned to the City's store.
- (f) Council approval is required before kerbs are removed.
- (g) Council approval is required prior to the cutting of existing stone kerbs for stormwater kerb outlets.

(36) PUBLIC DOMAIN PLAN

- (a) A detailed Public Domain Plan must be prepared by a suitably qualified architect, urban designer, landscape architect or engineer and must be lodged with Council's Public Domain Section and be approved by Council prior to a Construction Certificate being issued for public domain work or above ground building work, whichever is later.
- (b) The Public Domain Plan must document all works required to ensure that the public domain complies with the City of Sydney's *Public Domain Manual*, *Sydney Streets Code* and *Sydney Streets Technical Specification*, including requirements for road pavement, traffic measures, footway pavement, kerb

and gutter, drainage, vehicle crossovers, pedestrian ramps, lighting, street trees and landscaping, signage and other public domain elements. If an Alignment Levels condition applies to the development, the Public Domain Plan submission must incorporate the approved Alignment Levels. If the proposed detailed design of the public domain requires changes to any previously approved Alignment Levels, then an amended Alignment Levels submission must be submitted to and approved by Council to reflect these changes prior to a Construction Certificate being issued for public domain work.

- (c) The works to the public domain are to be completed in accordance with the approved Public Domain Plan and Alignment Levels plans and the *Public Domain Manual* before any Occupation Certificate is issued in respect of the development or before the use commences, whichever is earlier.
- (d) A Public Domain Works Deposit will be required for the public domain works, in accordance with the City of Sydney's adopted fees and charges and the *Public Domain Manual*. The Public Domain Works Deposit must be submitted as an unconditional bank guarantee in favour of Council as security for completion of the obligations under this consent.
- (e) Council's Public Domain section must be contacted to determine the guarantee amount prior to lodgement of the guarantee. The guarantee must be lodged with Council prior to a Construction Certificate being issued.
- (f) The Bank Guarantee will be retained in full until all Public Domain works are completed and the required certifications, warranties and works-as-executed documentation are submitted and approved by Council in writing. On satisfying the above requirements, 90% of the total securities will be released. The remaining 10% will be retained for the duration of the specified Defects Liability Period.

(37) PUBLIC DOMAIN WORKS - HOLD POINTS AND HANDOVER

- (a) Prior to a Construction Certificate being issued for public domain work, including civil, drainage and subsurface works, a set of hold points for approved public domain, civil and drainage work is to be determined with and approved by the City's Public Domain section in accordance with the City of Sydney's *Public Domain Manual* and *Sydney Streets Technical Specification*.
- (b) Prior to a Certificate of Completion being issued for public domain works and before the issue of any Occupation Certificate for the development or before the use commences, whichever is earlier, electronic works-as-executed (as-built) plans and documentation, certified by a suitably qualified, independent professional must be submitted to and accepted by Council for all public domain works. Completion and handover of the constructed public domain works must be undertaken in accordance with the City of Sydney's *Public Domain Manual* and *Sydney Streets Technical Specification*, including requirements for as-built documentation, certification, warranties and the defects liability period.

(38) STORMWATER AND DRAINAGE - MAJOR DEVELOPMENT

- (a) Prior to issue of any Construction Certificate for excavation, civil construction, drainage or building work (whichever is earlier), excluding approved preparatory or demolition work, a detailed engineering design for drainage including calculations and design for the stormwater overland flow path for the development must be:
 - (i) Prepared by a suitably qualified hydraulic or civil engineer to show the proposed method of collection and disposal of stormwater; and
 - (ii) Prepared in accordance with the City of Sydney's Stormwater Drainage Manual, technical specifications, standards and policies, as amended from time to time; and
 - (iii) Submitted to and be approved by the City of Sydney and a copy of the City's letter of approval must be provided to the Principal Certifier.
- (b) For approval of a connection into the City of Sydney's drainage system an "Application for Approval of Stormwater Drainage Connections" must be submitted to the City, together with an application fee in accordance with the City of Sydney's adopted Schedule of Fees and Charges.
 - (i) The application must be approved by the City of Sydney prior to an approval or Construction Certificate being issued for excavation, civil construction, drainage or building work (whichever is earlier), excluding approved preparatory or demolition work.
 - (ii) All proposed connections to the City's underground drainage system require the owner to enter into a Deed of Agreement with the City of Sydney and obtain registration on Title of a Positive Covenant prior to an Occupation Certificate being issued, including an Interim Occupation Certificate.

On-site Detention

- (c) The requirements of Sydney Water with regard to the on-site detention of stormwater must be ascertained and complied with.
 - (i) Evidence of the approval by Sydney Water of the detailed design for on-site detention must be submitted to and be accepted by the City of Sydney and a copy of the City's letter of acceptance must be provided to the Principal Certifier prior to any Construction Certificate being issued, excluding for any approved preparatory, demolition or excavation works.
 - (ii) Prior to the issue of any Occupation Certificate, including any Interim Occupation Certificate, a Positive Covenant must be registered on the property title for all drainage systems involving On-Site Detention (OSD) to ensure maintenance of the approved OSD system regardless of the method of connection.

Stormwater Quality Assessment

- (d) Prior to a Construction Certificate being issued for any excavation, civil construction, drainage or building work (whichever is earlier), but excluding approved preparatory or demolition work, a stormwater quality assessment must be undertaken and must be approved by City of Sydney and a copy of the City's letter of approval must be provided to the Principal Certifier.

A stormwater quality assessment must be undertaken by a suitably qualified drainage engineer to demonstrate how the development will be designed to ensure that the flow of post-development pollutants from the site due to stormwater will be reduced. The water quality assessment must be submitted to and be approved by the City of Sydney and a copy of the City's letter of approval must be provided to the Principal Certifier prior to a Construction Certificate being issued for any excavation, civil construction, drainage or building work (whichever is earlier), excluding approved preparatory or demolition work.

Prior to the issue of an Occupation Certificate, maintenance schedules of the proposed water sensitive urban design and drainage measures must be submitted to and be approved by the Principal Certifier and a copy provided to the City of Sydney.

Completion / Works-as-Executed Documentation

- (e) Prior to a Certificate of Completion being issued by the City of Sydney for stormwater drainage works:
- (i) All works for the disposal of stormwater and drainage are to be implemented in accordance with the approved plans, City of Sydney technical specifications. Standards and policies, approval letters and the requirements of this consent.
 - (ii) Works-As-Executed survey, prepared, signed and dated by a Registered Surveyor, must be submitted to and be accepted by the City of Sydney. The plan must be overlaid on a copy of the approved stormwater drainage plans issued with the Construction Certificate, with variations to locations, dimensions, levels and storage volumes clearly marked.
 - (iii) Electronic works-as-executed (as-built) details, certifications, warranties, inspection reports (including Closed Circuit Television reports) and associated documentation for the completed work must be prepared and certified by a suitably qualified hydraulic engineer, in accordance with the requirements of the City of Sydney's technical specifications, the Public Domain Manual, the Stormwater Drainage Manual, the conditions of this consent and all letters of approval issued by the City of Sydney for works in the public domain, and must be submitted to and be accepted by the City of Sydney.
- (f) Prior to the issue of the first Occupation Certificate, including an Interim Occupation Certificate, or before the use commences (whichever is earlier):
- (i) A copy of the City's Certificate of Completion for all stormwater and drainage work undertaken in the public domain must be provided to the Principal Certifier;

- (ii) A Works-As-Executed survey, must be prepared, signed, dated and certified by a Registered Surveyor and must be submitted to and be accepted by the Principal Certifier. The Works-as-Executed plan must be overlaid on a copy of the approved stormwater drainage plans issued with the Construction Certificate, with variations to locations, dimensions, levels and storage volumes clearly marked;
- (iii) A Hydraulic Compliance Certificate and Calculation Sheet must be prepared by a suitably qualified hydraulic engineer (minimum NER), showing approved versus installed hydraulic calculations, and must be submitted to and be accepted by the Principal Certifier;
- (iv) Evidence of Sydney Water's acceptance of the Works-As-Executed documentation, certification and Hydraulic Compliance Certificate and Calculation Sheet must be provided to the Principal Certifier;
- (v) The Principal Certifier must submit a copy of the Works-As-Executed plans, certifications, Hydraulic Compliance Certificate and Calculation Sheet to the City of Sydney.

(39) DEFECTS LIABILITY PERIOD – PUBLIC DOMAIN WORKS

All works to the City's public domain, including rectification of identified defects, are subject to a 12 month defects liability period from the date of final completion. The date of final completion will be nominated by Council on the Certificate of Completion for public domain works.

(40) DRAINAGE AND SERVICE PIT LIDS

Drainage and service pit lids throughout the public domain shall be heelguard and bicycle safe, finish flush with the adjacent pavement to avoid trip hazards and be clear of obstructions for easy opening and cleaning. Pit lids shall be in accordance with the *City of Sydney's Sydney Streets Design Code* and *Sydney Streets Technical Specification*. Details of drainage and service pit lids shall be submitted and approved by Council prior to a Construction Certificate being issued for the relevant stage of work.

(41) PUBLIC DOMAIN DAMAGE DEPOSIT

A Public Domain Damage Deposit calculated on the basis of 29 lineal metres of Concrete site frontage must be lodged with Council in accordance with the City of Sydney's adopted Schedule of Fees and Charges. The Public Domain Damage Deposit must be submitted as an unconditional bank guarantee in favour of Council as security for repairing any damage to the public domain in the vicinity of the site.

The guarantee must be lodged with Council prior to an approval for demolition being granted or a Construction Certificate being issued, whichever is earlier.

The Bank Guarantee will be retained in full until the final Occupation Certificate has been issued and any rectification works to the footway and Public Domain are completed to Council's satisfaction. On satisfying the above requirements 90% of the total securities will be released, with the remaining 10% to be retained for the duration of the 12 months Defect Liability Period.

(42) EMISSIONS

- (a) The use of the premises must not give rise to the emission of gases, vapours, dusts or other impurities which are a nuisance, injurious or prejudicial to health.
- (b) Gaseous emissions from the development must comply with the requirements of the *Protection of the Environment Operations Act 1997* and *Protection of the Environment Operations (Clean Air) Regulation 2010*.
- (c) Uses that produce airborne particulate matter must incorporate an effective dust collection system.

(43) ASBESTOS REMOVAL WORKS

- (a) All works removing asbestos containing materials must be carried out by a suitably licensed asbestos removalist duly licensed with Safework NSW, holding either a Friable (Class A) or a Non- Friable (Class B) Asbestos Removal Licence which ever applies.

A copy of the relevant licence shall be made available to any authorised Council officer on request within 24 hours.

- (b) Five days prior to the commencement of licensed asbestos removal, Safework NSW must be formally notified of the works. All adjoining properties and those opposite the development must be notified in writing of the dates and times when asbestos removal is to be conducted. The notification must identify the licensed asbestos removal contractor and include a contact person for the site together with telephone number and email address.
- (c) All work must be carried out in accordance with the *Work Health and Safety Regulation 2011* and the NSW Government and Work Cover document entitled *How to manage and control asbestos in the work place: Code of Practice (Safework NSW) December 2011* and the *City of Sydney Managing Asbestos Policy dated 21 October 2013 and associated guidelines*.
- (d) The asbestos removalist must use signs and barricades to clearly indicate the area where the asbestos removal work is being performed. Signs must be placed in positions so that people are aware of where the asbestos removal work area is and should remain in place until removal is completed and clearance to reoccupy has been granted. Responsibilities for the security and safety of the asbestos removal site and removal must be specified in the asbestos removal control plan (where required). This includes inaccessible areas that are likely to contain asbestos.
- (e) Warning signs must be placed so they inform all people nearby that asbestos removal work is taking place in the area. Signs must be placed at all of the main entry points to the asbestos removal work area where asbestos is present. These signs must be weatherproof, constructed of light-weight material and adequately secured so they remain in prominent locations. The signs must be in accordance with AS 1319 -1994 *Safety Signs for the Occupational Environment* for size, illumination, location and maintenance.

- (f) Asbestos waste must only be transported and disposed of at an EPA licensed waste facility.
- (g) No asbestos products are to be reused on the site (i.e. packing pieces, spacers, formwork or fill etc).
- (h) No asbestos laden skips or bins are to be left in any public place without the written approval of Council.
- (i) A site notice board must be located at the main entrance to the site in a prominent position and must have minimum dimensions of 841mm x 594mm (A1) with any text on the notice to be a minimum of 30 point type size.

The site notice board must include the following:

- (i) contact person for the site;
- (ii) telephone and facsimile numbers and email address; and
- (iii) site activities and time frames.

(44) IMPORTED FILL MATERIALS

All fill imported onto the site shall be validated to ensure the imported fill is suitable for the proposed land use from a contamination perspective. Fill imported on to the site shall also be compatible with the existing soil characteristic for site drainage purposes.

The City may require details of appropriate validation of imported fill material to be submitted with any application for future development of the site. Hence all fill imported onto the site should be validated by either one or both of the following methods during remediation works:

- (a) Imported fill should be accompanied by documentation from the supplier which certifies that the material is not contaminated based upon analyses of the material for the known past history of the site where the material is obtained; and/or
- (b) Sampling and analysis of the fill material shall be conducted in accordance with NSW EPA (1995) Sampling Design Guidelines.

(45) MECHANICAL VENTILATION – ADDITIONAL ODOUR AND SMOKE CONTROLS

A Professional Engineer (as defined in Volume One of the National Construction Code) must:

- (a) Prior to the issue of a Construction Certificate, specify filtration and odour control systems as part of the proposed mechanical ventilation design and drawings (including specifications of the proposed mechanical kitchen exhaust ventilation system) to ensure that exhaust air can be discharged to the atmosphere in accordance with *AS1668.2 - The Use of Ventilation and Air-Conditioning in Buildings – Mechanical Ventilation in Buildings*, and will not cause a danger or a nuisance to occupants within the building, occupants of neighbouring buildings or members of the public; and

- (b) Certify the design in accordance with the *Building Code of Australia and AS1668 - The Use of Mechanical Ventilation and Air Conditioning in Buildings*; and
- (c) Prior to the issue of an Occupation Certificate inspect the mechanical ventilation and filtration/odour control systems and certify that the system/s have been installed to the approved design; and
- (d) Certify the satisfactory performance of the installed system/s.

(46) MICROBIAL CONTROL IN WATER SYSTEMS

- (a) Prior to the issue of a Construction Certificate detailed plans of any water cooling system (including cooling towers) as defined under the *Public Health Act 2010* must be prepared by a suitably qualified person and certified in accordance with *AS3666: 1: 2011 Air Handling and Water Systems of Buildings – Microbial Control – Design, installation and commissioning* and must be submitted to and approved in writing by the Council's Area Planning Manager at email hbapplications@cityofsydney.nsw.gov.au.
- (b) Water cooling system operation and maintenance manuals and maintenance service records must be readily available at the premises for inspection by an authorised officer upon request. Such records must be kept on the premises in accordance with Clause 2.6 to *AS/NZS 3666:2:2011 Air Handling and Water Systems of Buildings – Microbial control, operation and maintenance*.
- (c) The installation, operation and maintenance of warm water systems and water cooling systems (as defined under the *Public Health Act 2010*) must comply with the following:
 - (i) *Public Health Act 2010, Public Health Regulation 2012* and Parts 1 and 2 (or part 3 if a Performance-based water cooling system) of *AS3666:2011 Air Handling and Water Systems of Buildings – Microbial Control* and the *NSW Health Code of Practice for the Control of Legionnaires Disease*.
 - (ii) Prior to the issue of an Occupation Certificate or if non-applicable, prior to commencement of the use, the owner or occupier of the premises at which any warm water system and/or water cooling system is installed must cause notice of such installation(s) by providing to Council's Health and Building Unit, written notification by way of the prescribed form under Clause 12 to the *Public Health Regulation 2012*. Any changes to these particulars must be notified to the Council's Health and Building Unit in writing within 7 days of the change(s). Copies of the notification forms are available on the City of Sydney Council's website.

(47) FUTURE FOOD USE - MECHANICAL VENTILATION PROVISION

Prior to the issue of a Construction Certificate, the mechanical exhaust systems and/or shafts must be designed to allow for the discharge of effluent air above roof level and must be designed with capacity to accommodate exhaust ducts and mechanical ventilation systems for all commercial tenancies proposed with the potential to become a food premises in future. Systems must be designed in

accordance with *AS1668.2 – The Use of Ventilation and Air-conditioning in Buildings – Mechanical Ventilation in Buildings*, and *AS1668.1 – The Use of Mechanical Ventilation and Air-Conditioning in Buildings – Fire and Smoke Control in Multi-compartment Buildings*.

(48) EROSION AND SEDIMENT CONTROL - BETWEEN 250 AND 2,500SQM

Prior to the commencement of demolition/excavation/construction work, an Erosion and Sediment Control Plan (ESCP) must be submitted to and be approved by the Principal Certifier. The ESCP must:

- (a) Conform to the specifications and standards contained in *Managing Urban Stormwater: Soils and Construction* (Landcom, 2004); the *Guidelines for Erosion and Sediment Control on Building Sites* (City of Sydney, 2004); and the *NSW Protection of the Environment Operations Act 1997*.
- (b) Include a drawing(s) that clearly shows:
 - (i) location of site boundaries and adjoining roads
 - (ii) approximate grades and indications of direction(s) of fall
 - (iii) approximate location of trees and other vegetation, showing items for removal or retention
 - (iv) location of site access, proposed roads and other impervious areas
 - (v) existing and proposed drainage patterns with stormwater discharge points
 - (vi) north point and scale
- (c) Specify how soil conservation measures will be conducted on site including:
 - (i) timing of works
 - (ii) locations of lands where a protective ground cover will, as far as is practicable, be maintained
 - (iii) access protection measures
 - (iv) nature and extent of earthworks, including the amount of any cut and fill
 - (v) where applicable, the diversion of runoff from upslope lands around the disturbed areas
 - (vi) location of all soil and other material stockpiles including topsoil storage, protection and reuse methodology
 - (vii) procedures by which stormwater is to be collected and treated prior to discharge including details of any proposed pollution control device(s)
 - (viii) frequency and nature of any maintenance program
 - (ix) other site-specific soil or water conservation structures.

(49) ROAD OPENING PERMIT

A separate Road Opening Permit under Section 138 of the *Roads Act 1993* must be obtained from Council prior to the commencement of any:

- (a) Excavation in or disturbance of a public way, or
- (b) Excavation on land that, if shoring were not provided, may disturb the surface of a public road (including footpath).

(50) APPLICATION FOR HOARDINGS AND SCAFFOLDING INSTALLED ON OR ABOVE A PUBLIC ROAD AND OPERATING HOISTING DEVICES INCLUDING BUILDING MAINTENANCE UNITS OVER A PUBLIC ROAD

- (a) A separate application under Section 68 of the *Local Government Act 1993* and Section 138 of the *Roads Act 1993* is to be made to Council to erect a hoarding and/or scaffolding (temporary structures) on or above a public road (footway and/or roadway).
- (b) Where an approval (Permit) is granted allowing the placement of temporary structures on or above a public road the structures must comply fully with Council's *Hoarding and Scaffolding Policy; Guidelines for Hoardings and Scaffolding*; and the conditions of approval (Permit) granted including:
 - (i) maintaining a current and valid approval for the full duration that the temporary structure/s is in place;
 - (ii) maintaining temporary structure/s in a structurally sound and stable condition for the full duration of installation (Clause 2.11.1);
 - (iii) bill posters and graffiti being removed within 24 hours of their placement (Clause 2.11.2);
 - (iv) maintaining temporary structures and the public place adjoining the work site in a clean and tidy condition including repainting and/or repair of graphics (Clauses 2.11.1, 2.11.4, 2.14.1 and 3.9.3);
 - (v) maintaining a watertight deck (Type B hoardings) to prevent liquids including rainwater, falling onto the footway/roadway surfaces (Clauses 3.9.1 and 3.9.4);
 - (vi) approved site sheds on the decks of a Type B hoarding being fully screened from the public place (Clause 3.9.5);
 - (vii) material and equipment not being placed or stored on the deck of Type B hoardings, unless specifically approved by Council (Clause 3.9.4);
 - (viii) providing and maintaining operational artificial lighting systems under Type B hoardings including at high-bay truck entry points (Clause 3.9.9); and
 - (ix) ensuring all required signage is provided and maintained (Clauses 3.9.3, 3.9.6, 3.9.8, 3.10.1 and 4.2).

If it is proposed to operate a hoisting device including a building maintenance unit above a public road which swings, hoists material/equipment and/or slews any part of the device over the public road, a separate application under Section 68 of the *Local Government Act 1993* and Section 138 of the *Roads Act 1993* must be made to Council to obtain approval.

Note: 'Building maintenance unit' means a power-operated suspended platform and associated equipment on a building specifically designed to provide permanent access to the faces of the building for maintenance (*Work Health and Safety Regulation 2011*).

(51) WORKS REQUIRING USE OF A PUBLIC PLACE

Where construction/building works require the use of a public place including a road or footpath, approval under Section 138 of the *Roads Act 1993* is to be obtained from Council prior to the commencement of work. Details of any barricade construction, area of enclosure and period of work are required to be submitted to the satisfaction of Council.

(52) SYDNEY WATER CERTIFICATE (TAP-IN)

- (a) The approved plans must be submitted to Sydney Water's "Tap-in" online service to determine whether the development will affect Sydney Water's sewer and water mains, stormwater drains and/or easements, and if further requirements need to be met. Sydney Water's "Tap-in" online service is available at www.sydneywater.com.au, (see Plumbing, Building & Development and then Sydney Water "Tap-in").
- (b) The Consent Authority or a Principal Certifier must ensure that Sydney Water has appropriately stamped the plans before the commencement of work.

(53) WASTE AND RECYCLING MANAGEMENT - MINOR

The proposal must comply with the relevant provisions of Council's *Policy for Waste Minimisation in New Developments 2005* which requires facilities to minimise and manage waste and recycling generated by the proposal.

(54) UTILITY SERVICES

To ensure that utility authorities are advised of the development:

- (a) Prior to the issue of a Construction Certificate a survey is to be carried out of all utility services within and adjacent to the site including relevant information from utility authorities and excavation if necessary, to determine the position and level of services.
- (b) Prior to the commencement of work, if any utility services are affected by the proposed construction works, the applicant is to obtain written approval from the utility authorities (e.g. Energy Australia, Sydney Water, and Telecommunications Carriers) in connection with the relocation and/or adjustment of the services. Any costs associated with the relocation, adjustment, or support of services are to be the responsibility of the developer.

SCHEDULE 1C

DURING CONSTRUCTION/PRIOR TO OCCUPATION/COMPLETION

(55) CONSTRUCTION ACCESS DRIVEWAYS TO BE CONSTRUCTED

Approved driveways are to be constructed for all vehicular access to the construction site in accordance with the requirements of Council's "Driveway Specifications" to the satisfaction of Council.

(56) HOURS OF WORK AND NOISE – OUTSIDE CBD

The hours of construction and work on the development must be as follows:

- (a) All work, including building/demolition and excavation work, and activities in the vicinity of the site generating noise associated with preparation for the commencement of work (eg. loading and unloading of goods, transferring of tools etc) in connection with the proposed development must only be carried out between the hours of 7.30am and 5.30pm on Mondays to Fridays, inclusive, and 7.30am and 3.30pm on Saturdays, with safety inspections being permitted at 7.00am on work days, and no work must be carried out on Sundays or public holidays.
- (b) All work, including demolition, excavation and building work must comply with the City of Sydney Code of Practice for Construction Hours/Noise 1992 and Australian Standard 2436 - 2010 Guide to Noise Control on Construction, Maintenance and Demolition Sites.
- (c) Notwithstanding the above, the use of a crane for special operations, including the delivery of materials, hoisting of plant and equipment and erection and dismantling of on site tower cranes which warrant the on-street use of mobile cranes outside of above hours can occur, subject to a permit being issued by Council under Section 68 of the Local Government Act 1993 and/or Section 138 of the Roads Act 1993.

Note: Works may be undertaken outside of hours, where it is required to avoid the loss of life, damage to property, to prevent environmental harm and/or to avoid structural damage to the building. Written approval must be given by the Construction Regulation Unit, prior to works proceeding

The *City of Sydney Code of Practice for Construction Hours/Noise 1992* allows extended working hours subject to the approval of an application in accordance with the Code and under Section 4.55 of the *Environmental Planning and Assessment Act 1979*.

(57) ENCROACHMENTS – NEIGHBOURING PROPERTIES

No portion of the proposed structure shall encroach onto the adjoining properties.

(58) ENCROACHMENTS – PUBLIC WAY

No portion of the proposed structure, including gates and doors during opening and closing operations, shall encroach upon Council's footpath area.

(59) SURVEY

All footings, walls and floor slabs adjacent to a boundary must be set out by a registered surveyor. On commencement of brickwork or wall construction a survey and report, prepared by a Registered Surveyor, must be submitted to the Principal Certifier indicating the position of external walls in relation to the boundaries of the allotment. Any encroachments by the subject building over adjoining boundaries or roads must be removed prior to continuation of building construction work.

(60) SURVEY CERTIFICATE AT COMPLETION

A Survey Certificate prepared by a Registered Surveyor must be submitted at the completion of the building work certifying the location of the building in relation to the boundaries of the allotment.

(61) HAZARDOUS AND INDUSTRIAL WASTE

Hazardous and/or industrial waste arising from the demolition/operational activities must be removed and/or transported in accordance with the requirements of the NSW Work Cover Authority pursuant to the provisions of the following:

- (a) *Protection of the Environment Operations Act 1997*
- (b) *Protection of the Environment Operations (Waste) Regulation 2005*
- (c) *Waste Avoidance and Resource Recovery Act 2001*
- (d) *Work Health and Safety Act 2011*
- (e) *Work Health and Safety Regulation 2011.*

(62) COVERING OF LOADS

All vehicles involved in the excavation and/or demolition process and departing the property with demolition materials, spoil or loose matter must have their loads fully covered before entering the public roadway.

(63) VEHICLE CLEANSING

Prior to the commencement of work, suitable measures are to be implemented to ensure that sediment and other materials are not tracked onto the roadway by vehicles leaving the site. It is an offence to allow, permit or cause materials to pollute or be placed in a position from which they may pollute waters.

(64) LOADING AND UNLOADING DURING CONSTRUCTION

The following requirements apply:

- (a) All loading and unloading associated with construction activity must be accommodated on site, where possible.
- (b) If, it is not feasible for loading and unloading to take place on site, a Works Zone on the street may be considered by Council.

- (c) A Works Zone may be required if loading and unloading is not possible on site. If a Works Zone is warranted an application must be made to Council at least 8 weeks prior to commencement of work on the site. An approval for a Works Zone may be given for a specific period and certain hours of the days to meet the particular need for the site for such facilities at various stages of construction. The approval will be reviewed periodically for any adjustment necessitated by the progress of the construction activities.
- (d) Where hoisting activity over the public place is proposed to be undertaken including hoisting from a Works Zone, a separate approval under Section 68 of the Local Government Act 1993 must be obtained.

(65) NO OBSTRUCTION OF PUBLIC WAY

The public way must not be obstructed by any materials, vehicles, refuse, skips or the like, under any circumstances. Non-compliance with this requirement will result in the issue of a notice by Council to stop all work on site.

(66) USE OF MOBILE CRANES

The following requirements apply:

- (a) Mobile cranes operating from the road must not be used as a method of demolishing or constructing a building.
- (b) For special operations including the delivery of materials, hoisting of plant and equipment and erection and dismantling of on site tower cranes which warrant the on-street use of mobile cranes, permits must be obtained from Council for the use of a mobile crane. The permits must be obtained 48 hours beforehand for partial road closures which, in the opinion of Council will create minimal traffic disruptions and 4 weeks beforehand in the case of full road closures and partial road closures which, in the opinion of Council, will create significant traffic disruptions.
- (c) The use of a crane for special operations, including the delivery of materials, hoisting of plant and equipment and erection and dismantling of on site tower cranes which warrant the on-street use of mobile cranes outside of approved hours of construction can occur, subject to a permit being issued by Council under Section 68 of the Local Government Act 1993 and/or Section 138 of the Roads Act 1993.

SCHEDULE 2

PRESCRIBED CONDITIONS

The prescribed conditions in accordance with Division 8A of the *Environmental Planning and Assessment Regulation 2000* apply:

- Clause 98 Compliance with *Building Code of Australia* and insurance requirements under the *Home Building Act 1989*
- Clause 98A Erection of signs
- Clause 98B Notification of *Home Building Act 1989* requirements
- Clause 98C Conditions relating to entertainment venues
- Clause 98D Conditions relating to maximum capacity signage
- Clause 98E Conditions relating to shoring and adequacy of adjoining property

Refer to the NSW State legislation for full text of the clauses under Division 8A of the *Environmental Planning and Assessment Regulation 2000*. This can be accessed at: <http://www.legislation.nsw.gov.au>
