

Item 13.8**Notices of Motion****Street Lamps on Tusculum Street, Potts Point**

By Councillor Phelps

It is resolved that:

- (A) Council note that:
- (i) Tusculum Street, Potts Point is a historically significant street located between Victoria Street and Macleay Street in the City's local government area, with Wayside Chapel and the state heritage-listed Tusculum property on the street;
 - (ii) the street has a medium to high pedestrian traffic for residents, local and international tourists walking between the two main thoroughfares and beyond as well as residential students of St Vincent's College getting to the school's residential block;
 - (iii) the City's 'Passion: Sydney's Wild Side' historical walking tour features two stops close to Tusculum Street - Wayside Chapel and heritage-listed Tusculum - and visitors must walk down Tusculum Street as part of this tour;
 - (iv) there are nine street lamps on Tusculum Street, but the street features five different types and styles of street lamp as the City, over time, replaced the original uniform low-height lamps with lamps of three different heights and two types of construction material;
 - (v) local residents have asked for the lamps to be upgraded as part of the Macleay Street Upgrade and replaced with uniform, low-height and discreet lamps; and
 - (vi) while the street lamps are owned by AusGrid, under the AusGrid's Public Lighting Management Plan and the City's Sydney Lights Public Domain Design Code, the City does have input on street lamp design;
- (B) the Chief Executive Officer be requested to:
- (i) identify the most appropriate style of street lamp for Tusculum Street that is both low-impact to the residencies along the street and provides the most efficient method of lighting the street, given the street's current environmental factors;
 - (ii) investigate the feasibility of including the upgrade of Tusculum Street's street lamps for Tusculum Street, so that all nine street lamps are uniform, as part of the MacLeay Street Upgrades;
 - (iii) work with AusGrid to provide the residents of Tusculum Street with nine uniform street lamps; and
 - (iv) consider streetscape upgrades for Tusculum Street at the same time as the Macleay Street Upgrade works.
