| Recommended Conditions of Consent |
|--|

SCHEDULE 1A

APPROVED DEVELOPMENT/DESIGN MODIFICATIONS/COVENANTS AND CONTRIBUTIONS/USE AND OPERATION

Note: Some conditions in Schedule 1A are to be satisfied prior to issue of a Construction Certificate and some are to be satisfied prior to issue of Occupation Certificate, where indicated.

(1) APPROVED DEVELOPMENT

- (a) Development must be in accordance with Development Application No. D/2021/1060 dated 16 September 2021 and the following drawings prepared by BEEM PROJECTS:

| Drawing Number | Drawing Name | Date |
|----------------|-----------------------|------------|
| D-02 (A.3) | Site & Roof Plan | 24.02.2022 |
| D-04 (A.3) | Floorplans - Proposed | 24.02.2022 |
| D-05 (A.3) | Elevations – Short | 24.02.2022 |
| D-06 (A.3) | Elevations – Long | 24.02.2022 |
| D-07 (A.3) | Sections – Short | 24.02.2022 |
| D-08 (A.3) | Sections – Long | 24.02.2022 |
| D-09 (A.3) | Landscape Plan | 24.02.2022 |
| D-13 (A.4) | Services Plan | 24.03.2022 |

and as amended by the conditions of this consent.

- (b) In the event of any inconsistency between the approved plans and supplementary documentation, the plans will prevail.

(2) DESIGN MODIFICATIONS

The design of the building must be modified as follows:

- (a) The 2x proposed skylight windows to the rear principal roof are to be changed to vertically proportioned windows to be positioned parallel to the slope of the roof, rather than horizontally positioned as proposed

The modifications are to be submitted to and approved by Council's Area Coordinator Planning Assessments or Area Planning Manager prior to the issue of a Construction Certificate.

(3) VISUAL PRIVACY DETAILS

Details of the proposed privacy screens to the front and rear first floor windows of the laneway addition are to be provided at a scale of 1:20. The submission must demonstrate that the privacy screens adequately safeguard visual privacy to side and rear boundaries.

Details are to be submitted to and approved by Council's Area Coordinator Planning Assessments or Area Planning Manager prior to the issue of a Construction Certificate.

(4) MATERIALS AND SAMPLES SCHEDULE – MINOR DEVELOPMENT

A detailed materials, colours and finishes schedule (including visible rainwater goods and services) keyed to each building elevation must be submitted to and approved by Council's Area Coordinator Planning Assessments or Area Planning Manager prior to a Construction Certificate being issued. The materials and samples schedule/board must not include generic material or colour descriptions, or use terminology such as 'or similar'.

(5) EXTERNAL COLOUR SCHEME (HOUSES)

The external colour scheme is to comprise predominantly earthy tones in keeping with the overall Victorian character of the building and/or character of the Heritage Conservation Area. A schedule of colours is to be submitted to and approved by Council's Urban Design and Heritage Manager or Area Coordinator Planning Assessments / Area Planning Manager prior to the issue of any Construction Certificate. The documentation must show the distribution of the colours on the elevation drawings, specify paint types and include colour swatches/colour names and codes.

It is recommended that reference be made to the book "Colour Schemes for Old Australian Houses" by Ian Evans, Clive Lucas and Ian Stapleton.

(6) DEMOLITION, EXCAVATION AND CONSTRUCTION NOISE AND VIBRATION MANAGEMENT PLAN

The plan must include but not be limited to the following:-

- (a) identification of noise sensitive receivers near to the site.
- (b) A prediction as to the level of noise impact likely to affect the nearest noise sensitive receivers from the use and proposed number of high noise intrusive appliances intended to be operated onsite. A statement should also be submitted outlining whether or not predicted noise levels will comply with the noise criteria stated within the *City of Sydney Construction Hours /Noise Code of Practice 1992* for the typical construction hours of 07.00am to 7.00pm. Where resultant site noise levels are likely to be in exceedance of this noise criteria then a suitable proposal must be given as to the duration and frequency of respite periods that will be afforded to the occupiers of neighbouring property.
- (c) A representative background noise measurement ($L_{A90, 15 \text{ minute}}$) should be submitted, assessed in the vicinity of any potentially affected receiver locations and measured in accordance with AS 1055:1.2.1997.
- (d) Confirmation of the level of community consultation that has/is and will be undertaken with Building Managers/ occupiers of the main adjoining noise sensitive properties likely to be most affected by site works and the operation of plant/machinery particularly during the demolition and excavation phases.
- (e) Confirmation of noise monitoring methodology that is to be undertaken during the main stages of work at neighbouring noise sensitive properties in order to keep complaints to a minimum and to ensure that noise from site works complies with the noise criteria contained within City's Construction Noise Code.

- (f) What course of action will be undertaken following receipt of a complaint concerning offensive noise.
- (g) Details of any noise mitigation measures that have been outlined by an acoustic consultant or otherwise that will be deployed on site to reduce noise impacts on the occupiers of neighbouring noise sensitive property to a minimum.
- (h) What plant and equipment is to be used on site, the level of sound mitigation measures to be undertaken in each case and the criteria adopted in their selection taking into account the likely noise impacts on the occupiers of neighbouring property and other less intrusive technologies available.

(8) USE OF INTRUSIVE APPLIANCES – NOT APPROVED

This development consent does not extend to the use of appliances which emit noise of a highly intrusive nature (such as pile - drivers and hydraulic hammers) or are not listed in Groups B, C, D, E or F of Schedule 1 of the City of Sydney Code of Practice for Construction Hours/Noise 1992”.

A separate Section 4.55 application must be submitted to the Council for the use of any equipment of a highly intrusive nature (such as pile - drivers and hydraulic hammers) or are not listed in Groups B, C, D, E or F of Schedule 1 of the *City of Sydney Code of Practice for Construction Hours/Noise 1992*.

(9) ALLOCATION OF CAR PARKING

Car parking spaces are to be provided in accordance with the table below. Details confirming the quantity and allocations of car parking spaces is to be submitted to the satisfaction of the Certifying Authority prior to the issue of a Construction Certificate.

| Car Parking Type | Number |
|---|--------|
| Residential spaces (Two car spaces in a vertical car stacker system. Mechanical parking installations, tandem or stacked parking are not to be used for visitor parking.) | 2 |

(10) CAR PARKING DESIGN

The design, layout, signage, line marking, lighting and physical controls of all off-street car parking facilities is to satisfy the Part 1: Off-street car parking and Australian Standard AS/NZS 2890.2 - 2002 Parking facilities. The details must be submitted to and approved by the Certifying Authority prior to a Construction Certificate being issued.

(11) MECHANICAL PARKING FACILITIES

- (a) A report addressing the following is to be submitted with respect to the proposed mechanical parking stackers:

- (i) Confirmation that the provision of parking is in compliance with the relevant Australian Standards for off-street car parking;
 - (ii) The predicted noise and vibration levels arising from the car parking area received by occupiers of the building, including references to relevant Standards;
 - (iii) Details outlining the day-to-day safety procedures and at the event of mechanical fault and/or breakdown to be implemented;
 - (iv) Comply with the manufacture's specification; and
 - (v) Any further information requested by the Principal Certifying Authority.
- (b) The report is to be submitted to and approved by Principal Certifying Authority prior to the issue of any Construction Certificate.

(12) COST OF SIGNPOSTING

All costs associated with signposting of any kerbside parking restrictions and traffic management measures associated with the development shall be borne by the developer.

(13) ASSOCIATED ROADWAY COSTS

All costs associated with the construction of any new road works including kerb and gutter, road pavement, drainage system and footway shall be borne by the developer. The new road works must be designed and constructed in accordance with the City's "Development Specification for Civil Works Design and Construction".

(14) VEHICLE FOOTWAY CROSSING

A separate application is to be made to, and approved by, Council for the construction of any proposed vehicle footway crossing or for the removal of any existing crossing and replacement of the footpath formation where any such crossings are no longer required.

All disused or redundant vehicle crossings and laybacks must be removed and footway, kerb, gutter and road restoration reinstated in accordance with Council's standards, to suit the adjacent finished footway and edge treatment materials, levels and details, or as otherwise directed by Council officers. All construction and replacement works are to be completed in accordance with the approved plans prior to the issue of an Occupation Certificate.

(15) VEHICLES ACCESS

The site must be configured to allow all vehicles to enter the site by reversing in and exit the site in a forward direction.

(16) NO AIR CONDITIONING UNITS TO FACADE OR BALCONIES OF BUILDING

Approval is not granted for the installation of individual air conditioning units to the facade or balconies of the building.

SCHEDULE 1B

PRIOR TO CONSTRUCTION CERTIFICATE/COMMENCEMENT OF WORK/HEALTH AND BUILDING

(17) DISPOSAL OF SURPLUS SALVAGED MATERIALS

Salvaged traditional building materials surplus to the requirements of this project including rear fireplace, timber doors and timber windows are to be sold to an established dealer in second-hand heritage building materials. Documentation of the salvage methodology must be submitted for the approval of Council prior to the commencement of demolition.

(18) BASIX CERTIFICATE - DETAILS TO BE LODGED WITH A CC

A copy of the required completed BASIX certificate accepted as part of this Development Consent with respect to the proposed residential building works, must be lodged with an application for a construction certificate and the items nominated as part of the subject BASIX certificate must be specified on the plans submitted with the construction certificate application. – See Note.

All commitments listed in the BASIX Certificate for the development must be fulfilled prior to an Occupation Certificate being issued.

IMPORTANT NOTE:

Any requirement detailed in the accompanying BASIX Certificate, **MUST** be included as a specific notation or inclusion on any future Construction Certificate plans and specification in accordance with Part 3 of Schedule 1 of the EP&A Regulation, 2000.

(19) BUILDING WORKS TO COMPLY WITH BCA – HERITAGE BUILDINGS OR BUILDINGS WITHIN CONSERVATION AREA

Any building works required to ensure compliance with the BCA or new building standards not specified in the submitted/approved plan must not damage existing fabric and building features. If such upgrading works have impact or potentially have impact on existing fabric and features, details of the works must be submitted and approved by Council's Urban Design and Heritage Manager prior to issue of a Construction Certificate.

(20) GENERAL HERITAGE

- (a) The proposed works are to be carried out in a manner that minimises demolition, alterations and new penetrations/fixings to the significant fabric of the existing building which is listed as a Heritage Item.
- (b) The fabric and features to be retained by the proposal must be properly protected during the process of demolition and construction. The protection measures are to be specified in the construction management plan.
- (c) All conservation and adaptation works are to be in accordance with the Articles of the Australian ICOMOS Burra Charter 2013.
- (d) New services are to be surface mounted rather than chased-in to existing walls to minimise impact on heritage fabric.

- (i) New services must use existing service runs;
- (ii) Where this is not possible, details of an alternative solution must be shown on drawings at a suitable scale and submitted and approved by Council's Urban Design and Heritage Manager / Area Planning Manager prior to the issue of any Construction Certificate.
- (e) Appropriately qualified tradespersons (as appropriate) are to be commissioned who are skilled in traditional building and engineering trades to carry out the proposed scope of works.
- (f) The new windows and doors on the existing building must match the original material, which is timber joinery.
- (g) The face brickwork/stone/tiles must not be rendered, painted or coated.
- (h) Where internal partitions meet external walls they must abut window mullions, columns or other such building elements and not glazing.

(21) HERITAGE CONSERVATION WORKS

- (a) Prior to the issue of the Construction Certificate, a schedule of conservation works to be undertaken concurrent with the works is to be submitted to Council's Urban Design and Heritage Manager for approval.
- (b) The schedule is to detail the conservation of all fabric identified as having a heritage significance including but not limited to the following: door and window joinery, stone work and fireplace.
- (c) The schedule is to be supported by outline specifications, methodologies and detailed architectural sections, elevations and plans at 1:20 and 1:5 scales. The details should incorporate any structural and/or building services design for the building.
- (d) The proposed works are to be carried out in a manner that minimises demolition, alterations and new penetrations/fixings to the significant fabric of the existing building.
- (e) All conservation and adaptation works are to be in accordance with the Articles of the Australian ICOMOS Burra Charter 2013. Appropriately qualified contractors and tradespersons are to be commissioned who are skilled in traditional building and engineering trades to carry out the proposed scope of works within the heritage building.
- (f) INSPECTION AND APPROVAL: The conservation works are to be progressively inspected by and be implemented to the satisfaction of Council's Urban Design and Heritage Manager prior to the issue of any Occupation Certificate or commencement of the use, whichever is the earlier.

(22) FLUSH FITTING OF NEW ROOF STRUCTURES

The approved skylights must be fitted flush to the roof slope and not intrude the ridge lines or damage the flashings.

(23) MATERIALS FOR MAKING GOOD

New materials for making good and repairs, are to match the existing in terms of colours, finishes, sizes, profile and properties.

(24) NO STRUCTURES ON STREET-FACING ROOF PLANE

No solar hot water heater storage tanks, ventilators, air conditioning units, satellite dishes and antennae or the like are to be placed on the street-facing roof plane of the building.

(25) PHOTOGRAPHIC ARCHIVAL DOCUMENTATION (MINOR WORKS)

Prior to a Construction Certificate being issued, an archival photographic recording of the terrace is to be prepared to Council's satisfaction. The recording is to be in digital form and prepared in accordance with the NSW Heritage Division guidelines titled "Photographic Recording of Heritage Items using Film or Digital Capture". One copy of the record is to be submitted to Council to be lodged with Council's Archives.

The form of the recording is to be as follows:

- (a) The Development Application number must be noted on the submitted information.
- (b) Include a summary report detailing the project description, date and authorship of the photographic record, method of documentation and limitations of the photographic record.
- (c) Include written confirmation, issued with the authority of both the applicant and the photographer that the City of Sydney is granted a perpetual non-exclusive licence to make use of the copyright in all images supplied, including the right to make copies available to third parties as though they were Council images. The signatures of both the applicant and the photographer must be included.
- (d) The report is to be submitted on a USB or digital file transfer in PDF/A format, (created directly from the digital original), with the digital catalogue of images containing the following data for each location, image subject/description and date.
- (e) The electronic images are to be taken with a minimum 8 megapixel camera, saved as JPEG TIFF or PDF files with a size of approximately 4-6MB, and cross referenced to the digital catalogue sheets and base plans. Choose only images that are necessary to document the process and avoid duplicate images.

(26) REDUCTION OF RISING DAMP AND SALT ATTACK IN BUILDINGS CONSTRUCTED PRIOR TO 1920

- (a) To avoid potential damage caused by rising damp and migrating salts the following is to apply to the ground floor.
 - (i) No concrete slab is to be laid directly on the ground within the building;

- (ii) Expansion strips should be used in conjunction with external walls; and
 - (iii) External slabs must be set down from internal levels to improve cross ventilation.
- (b) The existing suspended timber floor at ground floor level, and the ventilated subfloor space is to be retained.

(27) STRUCTURAL INTEGRITY OF RETAINED BUILDING ELEMENTS

Prior to a commencement of demolition, excavation or construction work, a report or certification from a practicing structural engineer experienced in dealing with heritage buildings must be submitted to and approved by Council's Urban Design and Heritage Manager / Area Coordinator Planning Assessments / Area Planning Manager. The report must explain how the retained building elements, such as building facades or chimneys are to be retained, supported and not undermined by the proposed development and give details of any intervention or retrofitting needed.

(28) USE OF HERITAGE CONSULTANT – MINOR DEVELOPMENT

- (a) A heritage consultant experienced in heritage restoration and renovation works is to be commissioned to work with the consultant team throughout the design development, contract documentation and construction stages of the project. The heritage consultant is to be involved in the resolution of all matters where existing significant fabric and spaces are to be subject to preservation, restoration, reconstruction, adaptive reuse, recording and demolition. The heritage consultant is to be provided with full access to the site and authorised by the applicant to respond directly to Council where information or clarification is required regarding the resolution of heritage issues throughout the project. Evidence and details of the above commission on the above terms are to be submitted to Council's Area Coordinator Planning Assessments / Area Planning Manager prior to commencement of work on site.
- (b) The heritage consultant must sign off the completed project and submit a final report to Council's Area Coordinator Planning Assessments / Area Planning Manager specifying how the heritage conditions are satisfied prior to the issue of any Occupation Certificate or the commencement of the use, whichever is earlier.

(29) ARCHAEOLOGICAL DISCOVERY DURING EXCAVATION

- (a) Should any relics be unexpectedly discovered on the site during excavation, all excavation or disturbance to the area is to stop immediately and the Heritage Council of NSW should be informed in accordance with section 146 of the Heritage Act 1977.
- (b) Should any Aboriginal objects be unexpectedly discovered then all excavation or disturbance of the area is to stop immediately and NSW Government Office of Environment and Heritage is to be informed in accordance with Section 89A of the *National Parks and Wildlife Act 1974*.
- (c) Should any archaeological remains or Aboriginal objects be discovered, a copy of recording of the finds and the final archaeological summary report

is to be submitted to Council prior to the issue of any Occupational Certificate.

(d) If the discovery is on Council's land, Council must be informed.

(30) STRUCTURAL INDEPENDENCE OF ADDITIONS

All approved additions must be structurally independent and must not rely upon vertical or lateral support of any party walls or boundary walls.

(31) FLASHINGS TO BOUNDARY WALLS

A flashing must be provided to prevent water entering between the proposed and existing external boundary walls of the adjoining properties.

Note: Attachments or connections to party walls may require the consent of the adjoining property owner/s.

(32) DILAPIDATION REPORT – MINOR

Subject to the receipt of permission of the affected landowner, dilapidation report/s of adjoining buildings are to be prepared by an appropriately qualified practising structural engineer and submitted for the approval of the Principal Certifier:

(a) prior to the commencement of demolition/excavation works; and

(b) on completion of construction demolition/excavation works.

(33) CLASSIFICATION OF WASTE

Prior to the exportation of waste (including fill or soil) from the site, the waste materials must be classified in accordance with the provisions of the Protection of the *Environment Operations Act 1997* and the *NSW DECC Waste Classification Guidelines, Part1: Classifying Waste (July 2009)*. The classification of the material is essential to determine where the waste may be legally taken. The *Protection of the Environment Operations Act 1997* provides for the commission of an offence for both the waste owner and the transporters if the waste is taken to a place that cannot lawfully be used as a waste facility for the particular class of waste. For the transport and disposal of industrial, hazardous or Group A liquid waste advice should be sought from the EPA.

(34) HAZARDOUS MATERIALS SURVEY REQUIRED

A Hazardous Materials Survey Report must be prepared by a certified Occupational Hygienist (*Australia Institute of Occupational Hygienists*) and submitted to the satisfaction of Council's Area Coordinator Planning Assessments / Area Planning Manager prior to any demolition / refurbishment work commencing at the site. The report must identify and record the type, location and extent of any hazardous materials on the site and make recommendations as to their safe management and/or removal to ensure the site is made safe for demolition, construction and future use/occupation.

(35) IMPORTED FILL MATERIALS

All fill imported onto the site must be validated to ensure the imported fill is suitable for the proposed land use from a contamination perspective. Fill imported on to the site shall also be compatible with the existing soil characteristic for site drainage purposes.

The City may require details of appropriate validation of imported fill material to be submitted with any application for future development of the site. Hence all fill imported onto the site should be validated by either one or both of the following methods during remediation works:

- (a) Imported fill must be accompanied by documentation from the supplier which certifies that the material is not contaminated based upon analyses of the material for the known past history of the site where the material is obtained; and/or
- (b) Sampling and analysis of the fill material shall be conducted in accordance with NSW EPA (1995) Sampling Design Guidelines.

(36) NOTIFICATION – NEW CONTAMINATION EVIDENCE

Council's Area Planning Manager and the Principal Certifier must be notified of any new information which comes to light during remediation, demolition or construction works which has the potential to alter previous conclusions about site contamination.

(37) STOCKPILES

- (a) No stockpiles of soil or other materials must be placed on footpaths or nature strips unless prior approval has been obtained from the City's Construction Regulation Team.
- (b) All stockpiles of soil or other materials must be placed away from drainage lines, gutters or stormwater pits or inlets.
- (c) All stockpiles of soil or other materials likely to generate dust or odours must be covered.
- (d) All stockpiles of contaminated soil must be stored in a secure area and be covered if remaining more than 24 hours

(38) STORMWATER AND DRAINAGE - MINOR DEVELOPMENT

The drainage system is to be constructed in accordance with Council's standard requirements as detailed in Council's 'Stormwater Drainage Connection Information' document dated July 2006. This information is available on Council's website - www.cityofsydney.nsw.gov.au.

The development is to be designed so that the flow of pollutants from the site due to stormwater is reduced.

Council's 'Stormwater Drainage Manual', also available on Council's website, contains information on whether on-site stormwater detention (OSD) would be required for the development. If OSD is required, a Positive Covenant must be registered on the title of the development site, prior to the issue of any Occupation Certificate, for all drainage systems involving OSD to ensure

maintenance of the approved OSD system regardless of the method of connection.

(39) ASBESTOS REMOVAL WORKS

- (a) All works removing asbestos containing materials must be carried out by a suitably licensed asbestos removalist duly licensed with Safework NSW, holding either a Friable (Class A) or a Non- Friable (Class B) Asbestos Removal Licence which ever applies.

A copy of the relevant licence shall be made available to any authorised Council officer on request within 24 hours.

- (b) Five days prior to the commencement of licensed asbestos removal, Safework NSW must be formally notified of the works. All adjoining properties and those opposite the development must be notified in writing of the dates and times when asbestos removal is to be conducted. The notification must identify the licensed asbestos removal contractor and include a contact person for the site together with telephone number and email address.
- (c) All work must be carried out in accordance with the *Work Health and Safety Regulation 2011* and the NSW Government and Work Cover document entitled *How to manage and control asbestos in the work place: Code of Practice (Safework NSW) December 2011* and the *City of Sydney Managing Asbestos Policy dated 21 October 2013 and associated guidelines*.
- (d) The asbestos removalist must use signs and barricades to clearly indicate the area where the asbestos removal work is being performed. Signs must be placed in positions so that people are aware of where the asbestos removal work area is and should remain in place until removal is completed and clearance to reoccupy has been granted. Responsibilities for the security and safety of the asbestos removal site and removal must be specified in the asbestos removal control plan (where required). This includes inaccessible areas that are likely to contain asbestos.
- (e) Warning signs must be placed so they inform all people nearby that asbestos removal work is taking place in the area. Signs must be placed at all of the main entry points to the asbestos removal work area where asbestos is present. These signs must be weatherproof, constructed of light-weight material and adequately secured so they remain in prominent locations. The signs must be in accordance with AS 1319 -1994 *Safety Signs for the Occupational Environment* for size, illumination, location and maintenance.
- (f) Asbestos waste must only be transported and disposed of at an EPA licensed waste facility.
- (g) No asbestos products are to be reused on the site (i.e. packing pieces, spacers, formwork or fill etc).
- (h) No asbestos laden skips or bins are to be left in any public place without the written approval of Council.
- (i) A site notice board must be located at the main entrance to the site in a prominent position and must have minimum dimensions of 841mm x

594mm (A1) with any text on the notice to be a minimum of 30 point type size.

The site notice board must include the following:

- (i) contact person for the site;
- (ii) telephone and facsimile numbers and email address; and
- (iii) site activities and time frames.

SCHEDULE 1C

DURING CONSTRUCTION/PRIOR TO OCCUPATION/COMPLETION

(40) HAZARDOUS AND INDUSTRIAL WASTE

Hazardous and/or industrial waste arising from the demolition/operational activities must be removed and/or transported in accordance with the requirements of the NSW Work Cover Authority pursuant to the provisions of the following:

- (a) *Protection of the Environment Operations Act 1997*
- (b) *Protection of the Environment Operations (Waste) Regulation 2005*
- (c) *Waste Avoidance and Resource Recovery Act 2001*
- (d) *Work Health and Safety Act 2011*
- (e) *Work Health and Safety Regulation 2017.*

(41) SYDNEY WATER CERTIFICATE (TAP-IN)

- (a) The approved plans must be submitted to Sydney Water's "Tap-in" online service to determine whether the development will affect Sydney Water's sewer and water mains, stormwater drains and/or easements, and if further requirements need to be met. Sydney Water's "Tap-in" online service is available at www.sydneywater.com.au, (see Plumbing, Building & Development and then Sydney Water "Tap-in").
- (b) The Consent Authority or a Certifying Authority must ensure that Sydney Water has appropriately stamped the plans before the commencement of work.

(42) SYDNEY WATER CERTIFICATE

A Section 73 Compliance Certificate under the Sydney Water Act 1994 must be obtained from Sydney Water Corporation.

Application must be made through an authorised Water Servicing Coordinator. Please refer to the Building Developing and Plumbing section on the web site www.sydneywater.com.au then refer to "Water Servicing Coordinator" under "Developing Your Land" or telephone 13 20 92 for assistance.

Following the submission of the application a "Notice of Requirements" will advise of water and sewer infrastructure to be built and charges to be paid. Please make early contact with the Coordinator, since building of water/sewer infrastructure can be time consuming and may impact on other services and building, driveway or landscape design.

The Section 73 Certificate must be submitted to Council or the Principal Certifier prior to an Occupation Certificate or subdivision/strata certificate being issued.

(43) ENCROACHMENTS – NEIGHBOURING PROPERTIES

No portion of the proposed structure shall encroach onto the adjoining properties.

(44) ENCROACHMENTS – PUBLIC WAY

No portion of the proposed structure, including gates and doors during opening and closing operations, shall encroach upon Council's footpath area.

(45) SURVEY

All footings and walls adjacent to a boundary must be set out by a registered surveyor. On commencement of brickwork or wall construction a survey and report must be submitted to the Principal Certifier indicating the position of external walls in relation to the boundaries of the allotment.

(46) SURVEY CERTIFICATE AT COMPLETION

A Survey Certificate prepared by a Registered Surveyor must be submitted at the completion of the building work certifying the location of the building in relation to the boundaries of the allotment.

(47) COVERING OF LOADS

All vehicles involved in the excavation and/or demolition process and departing the property with demolition materials, spoil or loose matter must have their loads fully covered before entering the public roadway.

(48) RODENT TREATMENT PROGRAMME – PRE DEMOLITION AND/OR EXCAVATION

Prior to the commencement of any demolition and/or excavation works, a programme of baiting and monitoring of rodent activity is to be put in place at the site.

A licensed Pest Control Operative must carry out all pest control work and prepare a report, confirming that there is no evidence of any rodent activity at the site prior to the commencement of any works on site. The report must be submitted to and be approved/endorsed by Council's Area Coordinator Planning Assessments/Area Planning Manager.

(49) DEMOLITION, EXCAVATION AND CONSTRUCTION MANAGEMENT

- (a) Prior to the commencement of demolition and/or excavation work the following details must be submitted to and be approved by the Principal Certifier:
- (i) Plans and elevations showing distances of the subject building from the location of adjoining and common/party walls, and (where applicable) the proposed method of facade retention.
 - (ii) A Demolition Work Method Statement prepared by a licensed demolisher who is registered with the Work Cover Authority. (The demolition by induced collapse, the use of explosives or on-site burning is not permitted.)
 - (iii) An Excavation Work Method Statement prepared by an appropriately qualified person.
 - (iv) A Waste and Recycling Management Plan – Demolition and Construction for the demolition and or excavation of the proposed

development. The plan is to include details of materials that will be excavated and their proposed destination or reuse.

- (v) Plans and elevations showing the location, construction and installation of temporary site fencing and any temporary structures used in connection with the construction of the development.

Note: Temporary structures, including hoardings and scaffolding, proposed for erection on City-owned and controlled land (footways and roadways), must comply with Council's *Guidelines for Hoardings and Scaffolding* and be approved by Council under the provisions of the Local Government Act 1993 and the Roads Act 1993 prior to installation.

- (b) Such statements must, where applicable, be in compliance with AS2601-2001 Demolition of Structures, the *Work, Health and Safety Act 2011* and Regulation; Council's *Guidelines for Waste Management in New Developments 2018*, the *Waste Avoidance and Resource Recovery Act 2001*, and all other relevant acts and regulations and must include provisions for:
 - (i) A Materials Handling Statement for the removal of refuse from the site in accordance with the *Waste Avoidance and Resource Recovery Act 2001*.
 - (ii) The name and address of the company/contractor undertaking demolition/excavation works.
 - (iii) The name and address of the company/contractor undertaking off site remediation/disposal of excavated materials.
 - (iv) The name and address of the transport contractor.
 - (v) The type and quantity of material to be removed from site.
 - (vi) Location and method of waste disposal and recycling.
 - (vii) Proposed truck routes, in accordance with this development consent.
 - (viii) Procedures to be adopted for the prevention of loose or contaminated material, spoil, dust and litter from being deposited onto the public way from trucks and associated equipment and the proposed method of cleaning surrounding roadways from such deposits. (Note: With regard to demolition of buildings, dust emission must be minimised for the full height of the building. A minimum requirement is that perimeter scaffolding, combined with chain wire and shade cloth must be used, together with continuous water spray during the demolition process. Compressed air must not be used to blow dust from the building site).
 - (ix) Measures to control noise emissions from the site.
 - (x) Measures to suppress odours.
 - (xi) Enclosing and making the site safe.
 - (xii) Induction training for on-site personnel.

- (xiii) Written confirmation that an appropriately qualified Occupational Hygiene Consultant has inspected the building/site for asbestos, contamination and other hazardous materials, in accordance with the procedures acceptable to SafeWork NSW.
 - (xiv) An Asbestos and Hazardous Materials Clearance Certificate by a person approved by the SafeWork NSW.
 - (xv) Disconnection of utilities.
 - (xvi) Fire Fighting. (Fire fighting services on site are to be maintained at all times during demolition work. Access to fire services in the street must not be obstructed).
 - (xvii) Access and egress. (Demolition and excavation activity must not cause damage to or adversely affect the safe access and egress of the subject building or any adjacent buildings).
 - (xviii) Waterproofing of any exposed surfaces of adjoining buildings.
 - (xix) Control of water pollution and leachate and cleaning of vehicles tyres (proposals must be in accordance with the *Protection of the Environmental Operations Act 1997*).
 - (xx) Working hours, in accordance with this development consent.
 - (xxi) Any SafeWork NSW requirements.
- (c) The approved work method statements and a waste management plan as required by this condition must be implemented in full during the period of construction.
 - (d) All waste records from the recycling and/or disposal of any demolition and construction waste generated from the works must be retained on site. These records must be available for sighting on request by an authorised Council officer.

(50) EROSION AND SEDIMENT CONTROL

The Soil and Water Management Plan (SWMP) or Erosion and Sediment Control Plan (ESCP) which has been approved by the Principal Certifier must be implemented in full during the construction period.

During the construction period:-

- (a) erosion and sediment controls must be regularly inspected, repaired and maintained in working order sufficient for a 10 year Average Recurrence Interval (ARI) rainfall event;
- (b) erosion and sediment control signage available from Council must be completed and attached to the most prominent structure visible at all times when entering the site for the duration of construction; and
- (c) building operations and stockpiles must not be located on the public footway or any other locations which could lead to the discharge of materials into the stormwater system.

(51) EROSION AND SEDIMENT CONTROL - LESS THAN 250SQM

Where less than 250 square metres are being disturbed, no formal plan is required however, the site is to be provided with sediment control measures and these must be implemented so that sediment, including soil, excavated material, building material or other materials cannot fall, descend, percolate, be pumped, drained, washed or allowed to flow to the street, stormwater system or waterways.

(52) VEHICLE CLEANSING

Prior to the commencement of work, suitable measures are to be implemented to ensure that sediment and other materials are not tracked onto the roadway by vehicles leaving the site. It is an offence to allow, permit or cause materials to pollute or be placed in a position from which they may pollute waters.

(53) LOADING AND UNLOADING DURING CONSTRUCTION

The following requirements apply:

- (a) All loading and unloading associated with construction activity must be accommodated on site.
- (b) If, during excavation, it is not feasible for loading and unloading to take place on site, a Works Zone on the street may be considered by Council.
- (c) A Works Zone may be required if loading and unloading is not possible on site. If a Works Zone is warranted an application must be made to Council at least 8 weeks prior to commencement of work on the site. An approval for a Works Zone may be given for a specific period and certain hours of the days to meet the particular need for the site for such facilities at various stages of construction. The approval will be reviewed periodically for any adjustment necessitated by the progress of the construction activities.
- (d) In addition to any approved construction zone, provision must be made for loading and unloading to be accommodated on site once the development has reached ground level.
- (e) The structural design of the building must allow the basement and/or the ground floor to be used as a loading and unloading area for the construction of the remainder of the development.
- (f) Where hoisting activity over the public place is proposed to be undertaken including hoisting from a Works Zone, a separate approval under Section 68 of the Local Government Act 1993 must be obtained.

(54) USE OF MOBILE CRANES

The following requirements apply:

- (a) Mobile cranes operating from the road must not be used as a method of demolishing or constructing a building.
- (b) For operations warranting the on-street use of mobile cranes (such as delivery of materials, hoisting of plant/equipment, erection and dismantling of onsite tower cranes, etc), permits must be obtained from Council for the

use of a mobile crane. The permits must be obtained 48 hours beforehand for partial road closures which, in the opinion of Council will create minimal traffic disruptions and 4 weeks beforehand in the case of full road closures and partial road closures which, in the opinion of Council, will create significant traffic disruptions.

- (c) Special operations and the use of mobile cranes must comply with the approved hours of construction. Mobile cranes must not be delivered to the site prior to 7.30am without the prior approval of Council.

(55) NO OBSTRUCTION OF PUBLIC WAY

The public way must not be obstructed by any materials, vehicles, refuse, skips or the like, under any circumstances. Non-compliance with this requirement will result in the issue of a notice by Council to stop all work on site.

(56) BARRICADE PERMIT

Where construction/building works require the use of a public place including a road or footpath, approval under Section 138 of the *Roads Act 1993* for a Barricade Permit is to be obtained from Council prior to the commencement of work. Details of the barricade construction, area of enclosure and period of work are required to be submitted to the satisfaction of Council.

(57) ROAD OPENING PERMIT

A separate Road Opening Permit under Section 138 of the *Roads Act 1993* must be obtained from Council prior to the commencement of any:

- (a) Excavation in or disturbance of a public way, or
- (b) Excavation on land that, if shoring were not provided, may disturb the surface of a public road (including footpath).

(58) APPLICATION FOR HOARDINGS AND SCAFFOLDING ON A PUBLIC PLACE

- (a) A separate application under Section 138 of the *Roads Act 1993* is to be made to Council to erect a hoarding and/or scaffolding (temporary structures) in a public place.
 - (i) maintaining a current and valid consent for the full duration that the temporary structures are installed in the public place (Section 139, *Roads Act 1993*);
 - (ii) bill posters and graffiti being removed within 24 hours of their placement (Clause 3.1);
 - (iii) maintaining temporary structures in a clean and tidy condition including repainting where directed by an authorised officer of Council (Clause 3.1);
 - (iv) hoarding site fences complying with Clause 3.3 - Element 3;
 - (v) site sheds on decks of Type B hoardings being fully screened from the public place (Clause 3.3 - Element 5); and

- (vi) providing and maintaining operational artificial lighting systems under Type B hoardings (Clause 3.3 – Element 9).

(59) OCCUPATION CERTIFICATE TO BE SUBMITTED

An Occupation Certificate must be obtained from the Principal Certifier and a copy submitted to Council prior to commencement of occupation or use of the whole or any part of a new building, an altered portion of, or an extension to an existing building.

(60) HOURS OF WORK AND NOISE – OUTSIDE CBD

The hours of construction and work on the development must be as follows:

- (a) All work, including building/demolition and excavation work, and activities in the vicinity of the site generating noise associated with preparation for the commencement of work (eg. loading and unloading of goods, transferring of tools etc) in connection with the proposed development must only be carried out between the hours of 7.30am and 5.30pm on Mondays to Fridays, inclusive, and 7.30am and 3.30pm on Saturdays, with safety inspections being permitted at 7.00am on work days, and no work must be carried out on Sundays or public holidays.
- (b) All work, including demolition, excavation and building work must comply with the *City of Sydney Code of Practice for Construction Hours/Noise 1992* and Australian Standard 2436 - 1981 *Guide to Noise Control on Construction, Maintenance and Demolition Sites*.

Note: The *City of Sydney Code of Practice for Construction Hours/Noise 1992* allows extended working hours subject to the approval of an application in accordance with the Code and under Section 4.55 of the *Environmental Planning and Assessment Act 1979*.

SCHEDULE 2

PRESCRIBED CONDITIONS

The prescribed conditions in accordance with Division 8A of the *Environmental Planning and Assessment Regulation 2000* apply:

- Clause 98 Compliance with *Building Code of Australia* and insurance requirements under the *Home Building Act 1989*
- Clause 98A Erection of signs
- Clause 98B Notification of *Home Building Act 1989* requirements
- Clause 98C Conditions relating to entertainment venues
- Clause 98D Conditions relating to maximum capacity signage
- Clause 98E Conditions relating to shoring and adequacy of adjoining property

Refer to the NSW State legislation for full text of the clauses under Division 8A of the *Environmental Planning and Assessment Regulation 2000*. This can be accessed at: <http://www.legislation.nsw.gov.au>

IMPORTANT ADDITIONAL INFORMATION

Advisory notes:

1. It is advised that the City of Sydney Neighbourhood Parking Policy may apply to this development. Eligibility for parking permits for residents or users of the development will be determined by the terms of this policy or subsequent future policies.

The Environmental Planning and Assessment Act 1979 requires you to:

1. Obtain a **Construction Certificate** prior to the commencement of any works. An application may be lodged with Council, or you may apply to a private accredited certifier for a Construction Certificate. An accredited certifier **must obtain Council's approval** to certain conditions of this development consent, where indicated before issuing the Construction Certificate.
1. ***It is compulsory to lodge digital copies of applications, including plans and documentation if lodging an application with Council. Please refer to Council's website for any further information about digital requirements and electronic files.***

Note: All applications must be lodged via the NSW Planning Portal.

2. Nominate a **Principal Certifier** which may be either Council or a registered certifier and notify Council of that appointment. You **cannot lawfully** commence works without complying with this requirement. Appointment must be made through the Planning Portal <https://www.planningportal.nsw.gov.au/>.
3. Give Council at least two days' notice of your intention to commence the erection of a building **before** commencing construction works. You cannot lawfully commence works without complying with this requirement.
4. Obtain an **Occupation Certificate** before commencing occupation or commencing to use the building or on the completion of other works including the erection of a sign. You cannot lawfully commence occupation or the use of a building without complying with this requirement.

You may also need to:

5. Obtain approval through the lodgement of an application under Section 68 of the *Local Government Act 1993* and Section 138 of the *Roads Act 1993* for an activity which is proposed to be undertaken in, on or above a road reservation (including footways). Such activities include:
 - (a) installation of hoardings/scaffolding;
 - (b) installation and/or alterations to advertising/business signs and street awnings;
 - (c) crane operation and other hoisting activities;
 - (d) temporary works (e.g.: barricading, road openings, mobile hoisting devices);
 - (e) works zone (for loading and unloading from the roadway); and
 - (f) temporary ground anchoring and shoring to support a roadway when excavating.

Application forms are available on the City's website.

6. Lodge an **Application for Subdivision** to obtain a **Subdivision Certificate** if a land (including stratum) subdivision is proposed and an Application for Subdivision to obtain **Strata Title Subdivision** under the relevant Strata Titles Act, if strata title of the development is proposed.
7. Contact Sydney Water regarding the water and sewerage services to this development. For further information go to www.sydneywater.com.au.

8. Carry out critical stage inspections in accordance with Section 6.5 of the EP&A Act 1979 and clauses 162A, 162B and 163 of the EP&A Regulation 2000.
