

Attachment A

Recommended Conditions of Consent
--

CONDITIONS OF CONSENT

SCHEDULE 1A

(1) APPROVED DEVELOPMENT

- (a) Development must be in accordance with Development Application Number D/2021/1253 dated 28 October 2021 and the following drawings prepared by SJB Architects:

Drawing Number	Drawing Name	Date
DA-0301 [11]	Demolition Plan – Basement – L2	14.03.2022
DA-0302 [11]	Demolition Plan – L3 & Roof	14.03.2022
DA-1001 [11]	Floor Plan – Basement	14.03.2022
DA-1002 [11]	Floor Plan – Ground	14.03.2022
DA-1003 [11]	Floor Plan – Level 1	14.03.2022
DA-1004 [11]	Floor Plan – Level 2	14.03.2022
DA-1005 [11]	Floor Plan – Level 3	14.03.2022
DA-1006 [12]	Floor Plan – Level 4	15.06.2022
DA-1007 [12]	Floor Plan – Roof	15.06.2022
DA-1401 [12]	Elevations North	15.06.2022
DA-1402 [12]	Elevations East	15.06.2022
DA-1403 [12]	Elevations South	15.06.2022
DA-1404 [12]	Elevations West	15.06.2022
DA-1501 [12]	Section AA	15.06.2022
DA-1502 [12]	Section BB	15.06.2022
DA-1511 [12]	Sections – Façade Elevations East & South	15.06.2022
DA-1512 [12]	Sections – Façade Elevations West	15.06.2022
DA-6101 [11]	Area Plan – GFA, Landscape & Deep Soil	14.03.2022
DA-6611 [11]	External Finishes	14.03.2022

and the following landscape drawings prepared by Dangar Barin Smith:

Drawing Number	Drawing Name	Date
LP01-D7721 [J]	DA Cover Page	31.03.2022
LP02-D7721 [J]	Maintenance Strategy & Details	31.03.2022
LP03-D7721 [J]	Basement/Ground Landscape	31.03.2022
LP04-D7721 [J]	Level 4 Landscape	31.03.2022
LP05-D7721 [J]	Basement/Ground Landscape	31.03.2022
LP06-D7721 [J]	Planter Zones Plan	31.03.2022
LP07-D7721 [J]	Planter Type A Detail	31.03.2022
LP08-D7721 [J]	Planter Type B Detail	31.03.2022
LP09-D7721 [J]	Planter Type C Detail	31.03.2022
LP10-D7721 [J]	Planter Type D Detail	31.03.2022

and as amended by the conditions of this consent.

- (b) In the event of any inconsistency between the approved plans and supplementary documentation, the plans will prevail.

(2) LANDSCAPE MODIFICATION

A revised landscape plan and planting specification of the green roof is to be submitted confirming that no planting is to reach a mature height of more than 300mm.

The modification is to be submitted to and approved by Council's Area Coordinator Planning Assessments or Area Planning Manager prior to the issue of a Construction Certificate.

(3) BUILDING HEIGHT

- (a) The height of the building must not exceed RL 22.100 (AHD) to the top of the roof of building and RL 22.300 (AHD) to the parapet, lift overrun and solar panels of the building.
- (b) Prior to an Occupation Certificate being issued, a Registered Surveyor must provide certification that the height of the building accords with (a) above, to the satisfaction of the Principal Certifier.

(4) AFFORDABLE HOUSING CONTRIBUTION – RESIDUAL LAND OR CENTRAL SYDNEY – PAYMENT IN LIEU OF FLOOR SPACE CONTRIBUTION – PRIOR TO CONSTRUCTION CERTIFICATE

- (a) In accordance with the City of Sydney Affordable Housing Program and prior to the issue of a Construction Certificate, the applicant must provide evidence that a monetary contribution towards the provision of affordable housing has been paid to the City of Sydney Council.
- (b) The contribution is \$141,879.90 (indexed at 1 March 2022). This is calculated by establishing the sum of the equivalent monetary contribution \$11,599.74 multiplied by 1.5% of the total additional floor area for residential development (815.42sqm).
- (c) If the contribution is paid after the indexation period in which the consent is granted, being 1 March 2022 to 28 February 2023 the above contribution will be adjusted according to the Sydney LGA median strata dwelling price ('MDP') using the following formula.
- (d) Contribution payable at Time of Payment = $C \times \text{MDP2} / \text{MDP1}$, where:
 - (i) C is the original total contribution amount payable to the City of Sydney as shown above;
 - (ii) MDP2 is the Median Strata Dwelling Price in Sydney LGA taken from the most recent NSW Government Rent and Sales Report at the time of indexation of the equivalent monetary contribution rate; and
 - (iii) MDP1 is the Median Strata Dwelling Price in Sydney LGA taken from the NSW Government Rent and Sales Report used to establish the current equivalent monetary contribution rate, being 1 March 2022 to 28 February 2023 (insert months and year of quarterly range applicable at time of consent),

Contact Council's Planning Assessment Unit at planningsystemsadmin@cityofsydney.nsw.gov.au for written confirmation of the amount payable, with indexation as necessary, prior to payment.

(5) APPROVED DESIGN ROOF - TOP PLANT

All roof-top plant and associated equipment must be located within the approved building envelope.

(6) EXTERNAL LIGHTING - SEPARATE DEVELOPMENT APPLICATION

A separate development application is required to be lodged and approved prior to any other external floodlighting or illumination of the building or site landscaping.

(7) REFLECTIVITY

The Principal Certifier must ensure that the visible light reflectivity from building materials used on the facade of the building does not exceed 20% prior to issue of the Construction Certificate.

(8) SWINGING DOORS OVER PUBLIC WAY

Any access doors to enclosures housing building services and facilities, such as hydrant and sprinkler booster assemblies or the like, must not open over the footway/roadway.

(9) AIR CONDITIONERS GENERALLY

No air-conditioning equipment is to be visible from the public domain. Equipment and associated wiring shall:

- (a) not be located on awnings or attached to the face of the building;
- (b) not be located on roofs in such a way that it is visible from any street, footpath or park;
- (c) be visually screened if located 1.8 metres above ground level in other locations; and
- (d) wiring must be fully concealed.

(10) NO AIR CONDITIONING UNITS TO FACADE OR BALCONIES OF BUILDING

Development consent is not granted for the installation of any individual air conditioning units to the facade, terraces or balconies of the building.

(11) PARTITION WALLS

Where internal partitions meet external walls they must abut window mullions, columns or other such building elements and not glazing.

(12) NO SPEAKERS OR MUSIC OUTSIDE

Speakers and/or noise amplification equipment must not be installed, and music must not be played in any of the outdoor areas associated with the building including the public domain. Speakers located within the building must not be placed so as to direct the playing of music towards the outdoor areas associated with the building.

(13) ALLOCATION OF CAR PARKING

Car parking spaces are to be provided in accordance with the table below. Details confirming the quantity and allocations of car parking spaces is to be submitted to the satisfaction of the Certifying Authority prior to the issue of a Construction Certificate.

Car Parking Type	Number
Residential spaces	26
Residential visitor spaces	1
Accessible residential visitor spaces	1
Motorcycle parking	3
Service vehicle spaces (Australian Standard B99 spaces)	1

(14) ASSOCIATED ROADWAY COSTS

All costs associated with the construction of new road/footpath works including kerb and gutter, road pavement, drainage system and footway shall be borne by the developer. The new road works must be designed and constructed in accordance with the City's "Sydney Streets Technical Specification" including amendments and "Sydney Streets Design Code".

(15) BICYCLE PARKING

The minimum number of bicycle parking spaces to be provided for the development must comply with the table below.

User	Number of bicycles to be accommodated	Requirements
Residential	9	Class A or B bicycle parking facility in accordance with AS2890.3 (see note below)
Residential visitor	1	Class C bicycle parking facility in accordance with AS2890.3

The layout, design and security of bicycle facilities must comply with *Australian Standard AS 2890.3:2015 Parking Facilities Part 3: Bicycle Parking Facilities*. The details must be submitted to and approved by the Certifying Authority confirming prior to the Construction Certificate being issued.

Notes: A basement storage area on title and large enough to store a bicycle in accordance with the Bicycle spacing envelope requirements in AS2890.3 can be counted as a space.

(16) CHANGES TO KERB SIDE PARKING RESTRICTIONS

A separate submission must be made to the Local Pedestrian, Cycling and Traffic Calming Committee via the City Infrastructure and Traffic Operations Unit seeking the City's approval for any changes to kerb side parking arrangements. There is no guarantee kerb side parking will be changed, or that any change will remain in place for the duration of the development use.

The submission must include two plans. One showing the existing kerb side parking restriction signs and stems, the second showing the proposed kerb side parking restriction signs and stems. Both plans must include chainages to all signs and stems from the kerb line of the nearest intersection.

All costs associated with the parking proposal will be borne by the developer.

Note: As parking in the City of Sydney Local Government Area is at a premium, it is recommended that the applicant should approach the Area Traffic Engineer to discuss the proposal before making a submission.

(17) COST OF SIGNPOSTING

All costs associated with signposting of any kerbside parking restrictions and traffic management measures associated with the development shall be borne by the developer.

(18) DRIVEWAY WIDTH

The maximum width of the driveway access to be 3.2 metres.

(19) INTERCOM FOR VISITORS

Where a boom gate or barrier control is in place, the visitor spaces must be accessible to visitors by the location of an intercom at the car park entry and at least 4 metres clear of the property boundary, wired to all units. The intercom must comply with *Australian Standard AS 1428.2-1992: Design for access and mobility - Enhance and additional requirements - Building and facilities Sections 22 and 23*.

(20) ON-SITE LOADING OPERATION

All loading and unloading associated with the site must be carried out within the site at all times and must not obstruct other properties or the public way.

At all times the car parking spaces and access driveways must be kept clear of goods and must not be used for storage purposes, including garbage storage.

(21) PARKING DESIGN

The design, layout, signage, line marking, lighting and physical controls of all off-street parking facilities is to satisfy the Australian Standard AS/NZS 2890.1 - 2004 Parking facilities Part 1: Off-street car parking and Australian Standard AS/NZS 2890.6 - 2009 Parking facilities Part 6: Off-street parking for people with

disabilities. The details must be submitted to and approved by the Principal Certifier prior to a Construction Certificate being issued.

(22) PARKING ON COMMON PROPERTY AREAS

No part of the common property, apart from the visitor vehicle spaces which are to be used only by visitors to the building, and service vehicle spaces which are to be used only by service vehicles, is to be used for the parking or storage of vehicles or boats. The strata subdivision of the building is to include an appropriate documentary restriction pursuant to Section 88B of the *Conveyancing Act, 1919*, so burdening common property, with the Council being the authority to release, vary or modify the restriction.

(23) PARKING WAYFINDING PLAN

- (a) Signage directing users to the bicycle parking facilities, loading dock, service bays, car share and any visitor parking provided are to be installed from the street level, between the entry point/s at the site boundary and the entry point to the above facilities, including directions to lifts and illuminated signage, where appropriate.
- (b) The wayfinding plan must be submitted to and approved by Council's Area Planning Manager prior to any Construction Certificate for the site being issued. Signage must be installed to the satisfaction of the Principal Certifier before the issue of any Occupation Certificate.

(24) SECURITY GATES

Where a car park is accessed by a security gate, that gate must be located at least 6 metres within the site from the street front property boundary.

(25) SERVICE VEHICLE SIZE LIMIT

The size of vehicles servicing the property must not exceed 5.2 metres.

(26) SIGNS AT EGRESS

The following signs must be provided and maintained within the site at the point(s) of vehicle egress:

- (a) Compelling drivers to "Give Way to Pedestrians" before proceeding across the footpath.

The signs are to be erected prior to issue of an Occupation Certificate and must be maintained in good order at all times by the owners of the building.

(27) TRAFFIC WORKS

Any proposals for alterations to the public road, involving traffic and parking arrangements, must be designed in accordance with RMS Technical Directives and must be referred to and agreed to by the Local Pedestrian, Cycling and Traffic Calming Committee prior to any work commencing on site.

(28) VEHICLE FOOTWAY CROSSING

A separate application is to be made to, and approved by, Council for the construction of any proposed vehicle footway crossing or for the removal of any existing crossing and replacement of the footpath formation where any such crossings are no longer required.

All disused or redundant vehicle crossings and laybacks must be removed and footway, kerb, gutter and road restoration reinstated in accordance with Council's standards, to suit the adjacent finished footway and edge treatment materials, levels and details, or as otherwise directed by Council officers. All construction and replacement works are to be completed in accordance with the approved plans prior to the issue of an Occupation Certificate.

Note: To reinforce the priority of pedestrian movement on the footpath, the footpath paving surface is to be continued over the vehicle crossing.

(29) VEHICLE SITE ACCESS AND EGRESS

All vehicles are to enter and depart the site travelling in a forward direction.

(30) VISITOR CAR PARKING TO BE RETAINED AS COMMON PROPERTY

Visitor car parking spaces must not at any time be allocated, sold or leased to an individual owner/occupier and must be strictly retained as common property by the Owners Corporation for use by building visitors.

All spaces must be clearly marked 'VISITOR' prior to the issue of an Occupation Certificate. All signs must be maintained in good order at all times.

(31) RESTRICTION ON RESIDENTIAL DEVELOPMENT

The following restriction applies to buildings approved for residential use:

- (a) The accommodation portion of the building (ground floor and levels 1 to 4 inclusive) must be used as permanent residential accommodation only and not for the purpose of a hotel, motel, serviced apartments, private hotel, boarding house, tourist accommodation or the like, other than in accordance with the Sydney Local Environmental Plan 2012.
- (b) A restrictive covenant is to be registered on the title of the development site in the above terms and restricting any change of use of those levels from a residential flat building as defined in the Sydney Local Environmental Plan 2012.
- (c) The covenant is to be registered on title prior to any Occupation Certificate being issued or the use commencing, whichever is earlier, to the satisfaction of the Council. All costs of the preparation and registration of all associated documentation are to be borne by the applicant.
- (d) If a unit contains tenants, it must be subject to a residential tenancy agreement for a term of at least three months.

- (e) No person can advertise or organise the use of residential apartments approved under this consent for short term accommodation or share accommodation.

(32) RESTRICTION ON USE OF CAR SPACES - RESIDENTIAL

The following conditions apply to car parking:

- (a) The on-site car parking spaces, exclusive of service and visitor car spaces, are not to be used other than by an occupant, tenant or resident of the subject building.
- (b) Prior to any Occupation Certificate being issued, a documentary restrictive covenant, is to be registered on the Title of the development site pursuant to Section 88E of the *Conveyancing Act, 1919*, to the effect of (a) above. The covenant is to be created appurtenant to Council, at no cost to and to the satisfaction of Council.
- (c) Any future strata subdivision of the site is to include a restriction on User pursuant to Section 39 of the *Strata Schemes Development Act, 2015*, as amended, burdening all utility car parking allotments in the Strata Plan and/or an appropriate restrictive covenant pursuant to Section 88B of the *Conveyancing Act, 1919* burdening all car parking part - lots in the strata scheme.

(33) USE OF COMMON AREAS AND FACILITIES

All residential lobbies, corridors and other communal areas must be available for the use of all residents of the building, and must be designated as common property on any strata subdivision of the site, with no exclusive use rights.

(34) COMMON PROPERTY MUSIC PRACTICE ROOM - ACOUSTIC REQUIREMENTS

The Music Practice Room (music room) must remain common property and be provided and maintained for the use of all residents and achieve the following acoustic requirements:

- (a) The walls must have an airborne sound insulation rating equal to or greater than RW + Ctr of 58.
- (b) The ceiling must have an airborne sound insulation rating equal to or greater than RW + Ctr of 58. In this instance, to prevent flanking paths for noise, the walls and ceiling must meet the deemed to satisfy provisions F5.5 (e) and F5.5 (f) of the Volume One (Class 2-9) of the National Construction Code.
- (c) Music Room door systems (door, frame & seal) must achieve an airborne sound insulation rating of Rw 45, and windows (combined glass frame and seal) must achieve an Rw 40. Windows to the façade of a building must be of minimum necessary dimensions, per the requirements of the Building Code of Australia. Access doors must be to common property accessible by all building occupants.
- (d) The floor is to be carpeted.

(35) DEMOLITION, EXCAVATION AND CONSTRUCTION NOISE AND VIBRATION MANAGEMENT PLAN

A site-specific noise management plan shall be submitted to the Council's Area Planning Manager for comment and approval prior to issue of any Construction Certificate.

The Plan must be prepared by a suitably qualified person who possesses the qualifications to render them eligible for membership of the Australian Acoustic Society, Institution of Engineers Australia or the Australian Association of Acoustic Consultants. The plan must include but not be limited to the following:-

- (a) identification of noise sensitive receivers near to the site.
- (b) A prediction as to the level of noise impact likely to affect the nearest noise sensitive receivers from the use and proposed number of high noise intrusive appliances intended to be operated onsite. A statement should also be submitted outlining whether or not predicted noise levels will comply with the noise criteria stated within the *City of Sydney Construction Hours /Noise Code of Practice 1992* for the typical construction hours of 07.00am to 7.00pm. Where resultant site noise levels are likely to be in exceedance of this noise criteria then a suitable proposal must be given as to the duration and frequency of respite periods that will be afforded to the occupiers of neighbouring property.
- (c) A representative background noise measurement ($L_{A90, 15 \text{ minute}}$) should be submitted, assessed in the vicinity of any potentially affected receiver locations and measured in accordance with AS 1055:1.2.1997.
- (d) Confirmation of the level of community consultation that has/is and will be undertaken with Building Managers/ occupiers of the main adjoining noise sensitive properties likely to be most affected by site works and the operation of plant/machinery particularly during the demolition and excavation phases.
- (e) Confirmation of noise monitoring methodology that is to be undertaken during the main stages of work at neighbouring noise sensitive properties in order to keep complaints to a minimum and to ensure that noise from site works complies with the noise criteria contained within City's Construction Noise Code.
- (f) What course of action will be undertaken following receipt of a complaint concerning offensive noise.
- (g) Details of any noise mitigation measures that have been outlined by an acoustic consultant or otherwise that will be deployed on site to reduce noise impacts on the occupiers of neighbouring noise sensitive property to a minimum.
- (h) What plant and equipment is to be used on site, the level of sound mitigation measures to be undertaken in each case and the criteria adopted in their selection taking into account the likely noise impacts on the occupiers of neighbouring property and other less intrusive technologies available.

(36) COMPLIANCE WITH DEMOLITION, EXCAVATION & CONSTRUCTION NOISE AND VIBRATION MANAGEMENT PLAN

- (a) All works conducted on site which form part of this development must be carried out in accordance with the submitted and approved Demolition, Excavation and Construction Management Plan.
- (b) Where all such control measures have been implemented and the resultant noise and/ or vibration levels at any sensitive receiver still exceed the council's applicable criteria stated in the Construction Hours/Noise Code 1992 and are giving rise to sustained complaints then the contractor must provide regular, appropriate and sustained periods of respite in consultation with Council's Health and Building unit. Approval to vary the authorised noise and vibration levels must be received in writing by the proponent from Council prior to activities being undertaken that exceed sanctioned emission levels. (Use where respite periods not specified under the approved DEC NMP).

(37) COMPLIANCE WITH THE ACOUSTIC REPORT PRIOR TO CONSTRUCTION AND OR OCCUPATION CERTIFICATES

- (a) All relevant performance parameters (including but not limited to requirements, engineering assumptions and recommendations) in the Acoustic assessment report prepared by Stantec Australia Pty Ltd referenced 301350538 Rev 005 and dated 15/03/2022, council ref: TRIM ref: 2022/186683-02 must be implemented in the development prior to the commencement of its use.
- (b) Prior to the issue of any relevant Construction Certificate, the final construction drawings and final construction methodology must be assessed and reported to be in accordance with the requirements of the DA Acoustic Report in (a) above, with reference to relevant documentation. This must be done by a Suitably Qualified Acoustic Consultant* (see definition below). This work will be to the satisfaction of the accredited certifier.
- (c) Prior to the issue of any Occupation Certificate, a Suitably Qualified Acoustic Consultant* is to provide a written Acoustic Verification Report to the satisfaction of the Principal Certifier that the development complies with the requirements set out in the Report and in (a) and (b) above.

Note: *Suitably Qualified Acoustic Consultant* means a consultant who possesses the qualifications to render them eligible for membership of the Australian Acoustical Society, Institution of Engineers Australia or the Association of Australian Acoustical Consultants at the grade of member firm.

- (d) All physical aspects of the building's structure installed in order to meet performance parameters in accordance with this condition must be maintained at all times.

(38) NOISE – COMMERCIAL PLANT / INDUSTRIAL DEVELOPMENT

- (a) Noise from commercial plant and industrial development must not exceed a project amenity/intrusiveness noise level or maximum noise level in

accordance with relevant requirements of the NSW EPA [Noise Policy for Industry 2017 \(NPfI\)](#) unless agreed to by the City's Area Planning Manager. Further:

- (i) Background noise monitoring must be carried out in accordance with the long-term methodology in [Fact Sheet B](#) of the NPfI unless otherwise agreed by the City's Area Planning Manager.
 - (ii) Commercial plant is limited to heating, ventilation, air conditioning, refrigeration and energy generation equipment.
- (b) An $L_{Aeq,15 \text{ minute}}$ (noise level) emitted from the development must not exceed the $L_{A90, 15 \text{ minute}}$ (background noise level) by more than 3dB when assessed inside any habitable room of any affected residence or noise sensitive commercial premises at any time. Further:
- (i) The noise level and the background noise level must both be measured with all external doors and windows of the affected residence closed.
 - (ii) Background noise measurements must not include noise from the development but may include noise from necessary ventilation at the affected premise.
- (c) Corrections in [Fact Sheet C](#) of the NPfI are applicable to relevant noise from the development measured in accordance with this condition, however duration corrections are excluded from commercial noise.

(39) PUBLIC ART

- (a) Public art must be installed to Council's satisfaction prior to the issue of any Occupation Certificate.
- (b) The public artwork must be in accordance with the Sydney DCP 2012, the Public Art Policy, and the Interim Guidelines: Public art in private developments.
- (c) A Detailed Public Art Plan with final details of the proposed public artwork must be submitted to and approved by Council's Director City Planning, Development and Transport prior to the issue of any Construction Certificate.
- (d) Public art must be inspected and approved and the Final Public Art Report submitted and approved by Council's Area Planning Manager prior to the issue of any Occupation Certificate.
- (e) Note: Public Art locations, budget and shortlisted artists must be reviewed and endorsed by the City's Public Art Team prior to preparation of the Detailed Public Art Plan and submission for Council approval. Further information is available online at <http://www.cityofsydney.nsw.gov.au/explore/arts-and-culture/public-art>

Please contact the Public Art Team at publicartreferrals@cityofsydney.nsw.gov.au for further information.

(40) SIGNS - SEPARATE DEVELOPMENT APPLICATION REQUIRED

No consent is granted or implied for either the erection of any signage under this development consent, apart from that required by other conditions of consent.

A separate development application or applications for the erection of any signs (other than exempt or complying signs under the State Environmental Planning Policy (Exempt and Complying Development Codes) 2008 or those required by other conditions of consent) must be submitted to and approved by Council prior to the erection or display of any such signs.

SCHEDULE 1B

(41) ACCESS AND FACILITIES FOR PERSONS WITH DISABILITIES

The building must be designed and constructed to provide access and facilities for people with a disability in accordance with the *Building Code of Australia*.

If, in complying with this condition, amendments to the development are required, the design changes must be submitted to and approved by Council prior to a Construction Certificate being issued.

(42) ADAPTABLE HOUSING

Prior to the issue of a Construction Certificate, information from an appropriately qualified access consultant must be submitted to the Principal Certifier:

- (a) confirming that at least 1 residential apartment is able to be adapted for people with a disability in accordance with the National Construction Code; and
- (b) demonstrating (in a checklist) that at least 2 residential apartments achieve compliance with Australian Standard AS4299 and the Liveable Housing Guideline's silver level.

(43) EMISSIONS

- (a) The use of the premises must not give rise to the emission of gases, vapours, dusts or other impurities which are a nuisance, injurious or prejudicial to health.
- (b) Gaseous emissions from the development must comply with the requirements of the *Protection of the Environment Operations Act, 1997* and *Protection of the Environment Operations (Clean Air) Regulation, 2010*.

(44) ANNUAL FIRE SAFETY STATEMENT FORM

An annual Fire Safety Statement must be given to Council and Rescue NSW commencing within 12 months after the date on which the initial Interim/Final Fire Safety Certificate is issued or the use commencing, whichever is earlier.

(45) BASIX CERTIFICATE – DETAILS TO BE LODGED WITH A CONSTRUCTION CERTIFICATE

A copy of the required completed BASIX certificate accepted as part of this Development Consent with respect to the proposed residential building works, must be lodged with an application for a construction certificate and the items nominated as part of the subject BASIX certificate must be specified on the plans submitted with the construction certificate application. – See Note.

Important Note: Any requirement detailed in the accompanying BASIX Certificate, **MUST** be included as a specific notation or inclusion on any future Construction

Certificate plans and specification in accordance with Part 3 of Schedule 1 of the *Environmental Planning and Assessment Regulation, 2000*.

(46) BUILDING CODE OF AUSTRALIA COMPLIANCE - ALTERATIONS AND ADDITIONS - UPGRADE OF WHOLE BUILDING IS REQUIRED

- (a) Pursuant to Clause 94 of the *Environmental Planning and Assessment Regulation, 2000* an assessment of the development proposal has been undertaken and:
 - (i) As more than 50 percent of the volume of the building is proposed to be altered
 - (ii) It has been determined that the whole building must be brought into total conformity with the *Building Code of Australia*.
- (b) If compliance with (a) above cannot be achieved through the deemed-to-satisfy pathway, an alternative solution in accordance with Part A2 of the BCA must be prepared and submitted to the Principal Certifier illustrating how the relevant performance provisions are to be satisfied, and must form part of the approval prior to a Construction Certificate being issued.

(47) EXTERNAL WALLS AND CLADDING FLAMMABILITY

The external walls of the building including attachments must comply with the relevant requirements of the Building Code of Australia (BCA). Prior to the issue of a Construction Certificate and Occupation Certificate the Accredited Certifier and the Principal Certifier must:

- (a) Be satisfied that suitable evidence is provided to demonstrate that the products and systems proposed for use or used in the construction of external walls including finishes and claddings such as synthetic or aluminium composite panels comply with the relevant requirements of the BCA; and
- (b) Ensure that the documentation relied upon in the approval processes include an appropriate level of detail to demonstrate compliance with the BCA as proposed and as built.

(48) FLASHINGS TO BOUNDARY WALLS

A flashing must be provided to prevent water entering between the proposed and existing external boundary walls of the adjoining properties.

Note: Attachments or connections to party walls may require the consent of the adjoining property owner/s.

(49) OPERATING HOISTING DEVICES INCLUDING BUILDING MAINTENANCE UNITS OVER A PUBLIC ROAD

If it is proposed to install a building maintenance unit or operate a hoisting device above a road (footpath) including swinging, hoisting material/equipment and slewing any part of the device, a separate application under Section 68 of the *Local*

Government Act, 1993 and Sections 138/139 of the *Roads Act, 1993* must be submitted to and approved by Council prior to the installation of such devices.

Note: Building maintenance unit means a power operated suspended platform and associated equipment on a building specifically designed to provide permanent access to the faces of the building for maintenance (*Work Health and Safety Regulation, 2017*).

(50) PRODUCTS BANNED UNDER THE BUILDING PRODUCTS (SAFETY) ACT 2017

- (a) No building products that are banned, or products that are subject to a ban if used in a particular way, under the *Building Products (Safety) Act, 2017* are to be used in the construction of the development approved in this development consent.
- (b) Prior to the issue of any Occupation Certificate, the principal certifier is to confirm that none of the building products used on the building are subject to a building product use ban under the *Building Products (Safety) Act, 2017* or, if a product is only subject to a ban if used in a particular way that it is not used in any way contrary to the *Building Products (Safety) Act, 2017*.

(51) STRUCTURAL CERTIFICATION FOR DESIGN – BCA (ALL BUILDING CLASSES)

Prior to the issue of a Construction Certificate, structural details and a Structural Certificate for Design by a qualified practising structural engineer and in accordance with Clause A5.2(1)(e) of the Building Code of Australia must be submitted to the satisfaction of Council (where Council is the Accredited Certifier).

(52) STRUCTURAL CERTIFICATION FOR EXISTING BUILDING – ALTERATIONS AND ADDITIONS

A qualified practising certified structural engineer must provide structural certification to Council (where Council is the Principal Certifier) verifying that the existing structure can adequately support the proposed new loads and the structural design complies with the Structural Provisions of Part B1 (Vol 1) and Part 2.1 (Vol 2) of the *Building Code of Australia* prior to a Construction Certificate being issued. The proposed additional loads and/or alterations must not cause a decrease in the existing structural performance of the building including its performance under earthquake actions (AS1170.4).

(53) PHYSICAL MODELS

- (a) Prior to the issue of any Occupation Certificate an accurate 1:500 scale model of the development as constructed must be submitted to and approved by Council's Area Coordinator Planning Assessments/Area Planning Manager for the City Model in Town Hall House.

Note:

- (i) The models must be constructed in accordance with the Model Specifications available online at:

<http://www.cityofsydney.nsw.gov.au/development/application-guide/application-process/model-requirements>

- (ii) Council's modellers must be consulted prior to construction of the model.
- (ii) The models are to comply with all of the conditions of the Development Consent.
- (iii) The models must be amended to reflect any further modifications to the approval (under Section 4.55 of the *Environmental Planning and Assessment Act, 1979*) that affect the external appearance of the building.

(54) SUBMISSION OF ELECTRONIC CAD MODELS PRIOR TO OCCUPATION CERTIFICATE

- (a) Prior to any Occupation Certificate being issued, an accurate 1:1 electronic CAD model of the completed development must be submitted to and approved by Council's Area Coordinator Planning Assessments/Area Planning Manager for the electronic Visualisation City Model.
- (b) The data required to be submitted within the surveyed location must include and identify:
 - (i) building design above and below ground in accordance with the development consent;
 - (ii) all underground services and utilities, underground structures and basements, known archaeological structures and artefacts;
 - (iii) a current two points on the site boundary clearly marked to show their Northing and Easting MGA (Map Grid of Australia) coordinates, which must be based on Established Marks registered in the Department of Lands and Property Information's SCIMS Database with a Horizontal Position Equal to or better than Class C.
- (c) The data is to be submitted as a DGN or DWG file on a Compact Disc. All modelling is to be referenced to the Map Grid of Australia (MGA) spatially located in the Initial Data Extraction file.
- (d) The electronic model must be constructed in accordance with the City's 3D CAD electronic model specification. The specification is available online at:
<http://www.cityofsydney.nsw.gov.au/development/application-guide/application-process/model-requirements>
- (e) Council's Modelling staff should be consulted prior to creation of the model. The data is to comply with all of the conditions of the Development Consent.

(55) CONSTRUCTION TRAFFIC MANAGEMENT PLAN

- (a) A Construction Traffic Management Plan (CTMP) must be submitted to and approved by Council's Area Planning Manager prior to a Construction Certificate being issued.
- (b) The CTMP must be prepared in accordance with Council's requirements, located on the City's website at:

<https://www.cityofsydney.nsw.gov.au/construction-permits-approvals/prepare-construction-traffic-management-plan>
- (c) The approved CTMP must be complied with at all times while the development is under construction.

(56) DEMOLITION, EXCAVATION AND CONSTRUCTION MANAGEMENT

- (a) Prior to the commencement of demolition and/or excavation work the following details must be submitted to and be approved by the Principal Certifier:
 - (i) Plans and elevations showing distances of the subject building from the location of adjoining and common/party walls, and (where applicable) the proposed method of facade retention.
 - (ii) A Demolition Work Method Statement prepared by a licensed demolisher who is registered with the Work Cover Authority. (The demolition by induced collapse, the use of explosives or on-site burning is not permitted.)
 - (iii) An Excavation Work Method Statement prepared by an appropriately qualified person.
 - (iv) A Waste Management Plan for the demolition and or excavation of the proposed development.
 - (v) Plans and elevations showing the location, construction and installation of temporary site fencing and any temporary structures used in connection with the construction of the development.

Note: Temporary structures, including hoardings and scaffolding, proposed for erection on City-owned and controlled land (footways and roadways), must comply with the City's *Guidelines for Hoardings and Scaffolding* and be approved by Council under the provisions of the *Local Government Act, 1993* and the *Roads Act, 1993* prior to installation.

- (b) Such statements must, where applicable, be in compliance with AS2601-2001 Demolition of Structures, the *Work, Health and Safety Act, 2011* and Regulation; Council's *Policy for Waste Minimisation in New Developments 2005*, the *Waste Avoidance and Resource Recovery Act, 2001*, and all other relevant acts and regulations and must include provisions for:

- (i) A Materials Handling Statement for the removal of refuse from the site in accordance with the *Waste Avoidance and Resource Recovery Act, 2001*.
- (ii) The name and address of the company/contractor undertaking demolition/excavation works.
- (iii) The name and address of the company/contractor undertaking off site remediation/disposal of excavated materials.
- (iv) The name and address of the transport contractor.
- (v) The type and quantity of material to be removed from site.
- (vi) Location and method of waste disposal and recycling.
- (vii) Proposed truck routes, in accordance with this development consent.
- (viii) Procedures to be adopted for the prevention of loose or contaminated material, spoil, dust and litter from being deposited onto the public way from trucks and associated equipment and the proposed method of cleaning surrounding roadways from such deposits. (Note: With regard to demolition of buildings, dust emission must be minimised for the full height of the building. A minimum requirement is that perimeter scaffolding, combined with chain wire and shade cloth must be used, together with continuous water spray during the demolition process. Compressed air must not be used to blow dust from the building site).
- (ix) Measures to control noise emissions from the site.
- (x) Measures to suppress odours.
- (xi) Enclosing and making the site safe.
- (xii) Induction training for on-site personnel.
- (xiii) Written confirmation that an appropriately qualified Occupational Hygiene Consultant has inspected the building/site for asbestos, contamination and other hazardous materials, in accordance with the procedures acceptable to SafeWork NSW.
- (xiv) An Asbestos and Hazardous Materials Clearance Certificate by a person approved by the SafeWork NSW.
- (xv) Disconnection of utilities.
- (xvi) Fire Fighting. (Fire fighting services on site are to be maintained at all times during demolition work. Access to fire services in the street must not be obstructed).
- (xvii) Access and egress. (Demolition and excavation activity must not cause damage to or adversely affect the safe access and egress of the subject building or any adjacent buildings).
- (xviii) Waterproofing of any exposed surfaces of adjoining buildings.

- (xix) Control of water pollution and leachate and cleaning of vehicles tyres (proposals must be in accordance with the *Protection of the Environmental Operations Act, 1997*).
 - (xx) Working hours, in accordance with this development consent.
 - (xxi) Any SafeWork NSW requirements.
- (c) The approved work method statements and a waste management plan as required by this condition must be implemented in full during the period of construction.

(57) DILAPIDATION REPORT – MAJOR EXCAVATION/DEMOLITION

- (a) Subject to the receipt of permission of the affected landowner, dilapidation report/s, including a photographic survey of the following properties are to be prepared by an appropriately qualified structural engineer prior to commencement of demolition/excavation works:
- (i) 27 Billyard Avenue, Elizabeth Bay; and
 - (ii) 19 Ithaca Road, Elizabeth Bay.
- (b) A copy of the dilapidation report/s together with the accompanying photographs must be given to the above property owners, and a copy lodged with the Accredited Certifier and the Council prior to the issue of a Construction Certificate.

UPON COMPLETION OF EXCAVATION/DEMOLITION

- (b) A second Dilapidation Report/s, including a photographic survey must then be submitted at least one month after the completion of demolition/excavation works. A copy of the second dilapidation report/s, together with the accompanying photographs must be given to the above property owners, and a copy lodged with the Principal Certifier and the Council prior to the issue of any Occupation Certificate.

Any damage to buildings, structures, lawns, trees, sheds, gardens and the like must be fully rectified by the applicant or owner, at no cost to the affected property owner.

Note: Prior to the commencement of the building surveys, the applicant/owner must advise (in writing) all property owners of buildings to be surveyed of what the survey will entail and of the process for making a claim regarding property damage. A copy of this information must be submitted to Council.

(58) EROSION AND SEDIMENT CONTROL

The Erosion and Sediment Control Plan accompanying this Development Application has not been approved by this consent.

Prior to the commencement of demolition/excavation/construction work, an Erosion and Sediment Control Plan (ESCP) must be submitted to and be approved by the Principal Certifier. The ESCP must:

- (a) Conform to the specifications and standards contained in *Managing Urban Stormwater: Soils and Construction* (Landcom, 2004); the *Guidelines for Erosion and Sediment Control on Building Sites* (City of Sydney, 2004); and the *NSW Protection of the Environment Operations Act, 1997*.
- (b) Include a drawing(s) that clearly shows:
 - (i) Location of site boundaries and adjoining roads;
 - (ii) Approximate grades and indications of direction(s) of fall;
 - (iii) Approximate location of trees and other vegetation, showing items for removal or retention;
 - (iv) Location of site access, proposed roads and other impervious areas;
 - (v) Existing and proposed drainage patterns with stormwater discharge points; and
 - (vi) North point and scale.
- (c) Specify how soil conservation measures will be conducted on site including:
 - (i) Timing of works;
 - (ii) Locations of lands where a protective ground cover will, as far as is practicable, be maintained;
 - (iii) Access protection measures;
 - (iv) Nature and extent of earthworks, including the amount of any cut and fill;
 - (v) Where applicable, the diversion of runoff from upslope lands around the disturbed areas;
 - (vi) Location of all soil and other material stockpiles including topsoil storage, protection and reuse methodology;
 - (vii) Procedures by which stormwater is to be collected and treated prior to discharge including details of any proposed pollution control device(s);
 - (viii) Frequency and nature of any maintenance program; and
 - (ix) Other site-specific soil or water conservation structures.

(59) ROAD OPENING PERMIT

A separate Road Opening Permit under Section 138 of the *Roads Act, 1993* must be obtained from Council prior to the commencement of any:

- (a) Excavation in or disturbance of a public way; or
- (b) Excavation on land that, if shoring were not provided, may disturb the surface of a public road (including footpath).

(60) RODENT TREATMENT PROGRAMME – PRE DEMOLITION AND/OR EXCAVATION

- (a) Prior to the commencement of any demolition and/or excavation works, a programme of baiting and monitoring of rodent activity is to be put in place at the site.
- (b) A licensed Pest Control Operative must carry out all pest control work and prepare a report, confirming that there is no evidence of any rodent activity at the site prior to the commencement of any works on site. The report must be submitted to and be approved/endorsed by Council's Area Coordinator Planning Assessments/Area Planning Manager.

Such periods must be set and agreed to by Council's Health and Building Unit.

(61) TEMPORARY GROUND ANCHORS, TEMPORARY SHORING AND PERMANENT BASEMENT/RETAINING WALLS AFFECTING THE ROAD RESERVE

For temporary shoring including ground anchors affecting the road reserve, a separate application under Section 138 of the *Roads Act, 1993* must be lodged with Council.

(62) ASBESTOS REMOVAL WORKS

- (a) All works removing asbestos containing materials must be carried out by a suitably licensed asbestos removalist duly licensed with Safework NSW, holding either a Friable (Class A) or a Non-Friable (Class B) Asbestos Removal Licence which ever applies.

A copy of the relevant licence must be made available to any authorised Council officer on request within 24 hours.

- (b) Five days prior to the commencement of licensed asbestos removal, Safework NSW must be formally notified of the works. All adjoining properties and those opposite the development must be notified in writing of the dates and times when asbestos removal is to be conducted. The notification must identify the licensed asbestos removal contractor and include a contact person for the site together with telephone number and email address.
- (c) All work must be carried out in accordance with the *Work Health and Safety Regulation, 2017* and the NSW Government and SafeWork NSW document entitled *How to manage and control asbestos in the work place: Code of Practice (Safework NSW) December 2011* and the *City of Sydney Managing Asbestos Policy dated 21 October 2013 and associated guidelines*.
- (d) The asbestos removalist must use signs and barricades to clearly indicate the area where the asbestos removal work is being performed. Signs must be placed in positions so that people are aware of where the asbestos removal work area is and should remain in place until removal is completed and clearance to reoccupy has been granted. Responsibilities for the security and safety of the asbestos removal site and removal must be specified in the asbestos removal control plan (where required). This includes inaccessible areas that are likely to contain asbestos.

- (e) Warning signs must be placed so they inform all people nearby that asbestos removal work is taking place in the area. Signs must be placed at all of the main entry points to the asbestos removal work area where asbestos is present. These signs must be weatherproof, constructed of light-weight material and adequately secured so they remain in prominent locations. The signs must be in accordance with AS 1319 -1994 *Safety Signs for the Occupational Environment* for size, illumination, location and maintenance.
- (f) Asbestos waste must only be transported and disposed of at an EPA licensed waste facility.
- (g) No asbestos products are to be reused on the site (i.e. packing pieces, spacers, formwork or fill etc).
- (h) No asbestos laden skips or bins are to be left in any public place without the written approval of Council.
- (i) A site notice board must be located at the main entrance to the site in a prominent position and must have minimum dimensions of 841mm x 594mm (A1) with any text on the notice to be a minimum of 30 point type size.

The site notice board must include the following:

- (i) contact person for the site;
- (ii) telephone and facsimile numbers and email address; and
- (iii) site activities and time frames.

(63) CLASSIFICATION OF WASTE

Prior to the exportation of waste (including fill or soil) from the site, the waste materials must be classified in accordance with the provisions of the Protection of the *Environment Operations Act, 1997* and the *NSW DECC Waste Classification Guidelines, Part1: Classifying Waste (July 2009)*. The classification of the material is essential to determine where the waste may be legally taken. The *Protection of the Environment Operations Act, 1997* provides for the commission of an offence for both the waste owner and the transporters if the waste is taken to a place that cannot lawfully be used as a waste facility for the particular class of waste. For the transport and disposal of industrial, hazardous or Group A liquid waste advice should be sought from the EPA.

(64) HAZARDOUS MATERIALS SURVEY REQUIRED

A Hazardous Materials Survey Report must be prepared by a certified Occupational Hygienist (*Australia Institute of Occupational Hygienists*) and submitted to the satisfaction of Council's Area Coordinator Planning Assessments / Area Planning Manager prior to any demolition / refurbishment work commencing at the site. The report must identify and record the type, location and extent of any hazardous materials on the site and make recommendations as to their safe management and/or removal to ensure the site is made safe for demolition, construction and future use/occupation.

(65) COMPLIANCE WITH HAZARDOUS MATERIALS SURVEY REPORT

All of the recommendations for management and/or removal of hazardous materials on the site, as outlined in the Hazardous Materials Survey Report, as approved must be complied with.

Prior to the issue of any Occupation Certificate, certification must be submitted to the Principal Certifier from a certified Occupational Hygienist (*Australia Institute of Occupational Hygienists*) confirming that all hazardous materials identified have been contained, managed or removed in accordance with the recommendations given in the approved Hazardous Materials Survey Report and that the site is safe for future occupation in accordance with the approved use.

(66) IMPORTED FILL MATERIALS

All fill imported onto the site must be validated to ensure the imported fill is suitable for the proposed land use from a contamination perspective. Fill imported on to the site shall also be compatible with the existing soil characteristic for site drainage purposes.

The City may require details of appropriate validation of imported fill material to be submitted with any application for future development of the site. Hence all fill imported onto the site should be validated by either one or both of the following methods during remediation works:

- (a) Imported fill must be accompanied by documentation from the supplier which certifies that the material is not contaminated based upon analyses of the material for the known past history of the site where the material is obtained; and/or
- (b) Sampling and analysis of the fill material shall be conducted in accordance with NSW EPA (1995) Sampling Design Guidelines.

(67) NOTIFICATION – NEW CONTAMINATION EVIDENCE

Council's Area Planning Manager and the Principal Certifier must be notified of any new information which comes to light during remediation, demolition or construction works which has the potential to alter previous conclusions about site contamination.

(68) STOCKPILES

- (a) No stockpiles of soil or other materials must be placed on footpaths or nature strips unless prior approval has been obtained from the City's Construction Regulation Team.
- (b) All stockpiles of soil or other materials must be placed away from drainage lines, gutters or stormwater pits or inlets.
- (c) All stockpiles of soil or other materials likely to generate dust or odours must be covered.

- (d) All stockpiles of contaminated soil must be stored in a secure area and be covered if remaining more than 24 hours

(69) PHOTOGRAPHIC ARCHIVAL DOCUMENTATION

Prior to a Construction Certificate being issued, an archival photographic recording of the existing building is to be prepared to Council's satisfaction. The recording is to be in digital form and prepared in accordance with the NSW Heritage Division guidelines titled "Photographic Recording of Heritage Items using Film or Digital Capture". One copy of the record is to be submitted to Council to be lodged with Council's Archives.

The form of the recording is to be as follows:

- (a) The Development Application number must be noted on the submitted information.
- (b) Include a summary report detailing the project description, date and authorship of the photographic record, method of documentation and limitations of the photographic record.
- (c) Include written confirmation, issued with the authority of both the applicant and the photographer that the City of Sydney is granted a perpetual non-exclusive licence to make use of the copyright in all images supplied, including the right to make copies available to third parties as though they were Council images. The signatures of both the applicant and the photographer must be included.
- (d) The report is to be submitted on a USB or digital file transfer in PDF/A format, (created directly from the digital original), with the digital catalogue of images containing the following data for each location, image subject/description and date.
- (e) The electronic images are to be taken with a minimum 8 megapixel camera, saved as JPEG TIFF or PDF files with a size of approximately 4-6MB, and cross referenced to the digital catalogue sheets and base plans. Choose only images that are necessary to document the process and avoid duplicate images.

(70) CAR PARK VENTILATION

The car park must be ventilated in accordance with the *Building Code of Australia* and, where necessary, Australian Standard AS1668, Parts 1 and 2. Ventilation must be controlled by carbon monoxide monitoring sensors to ensure compliance with occupant health requirements.

(71) MICROBIAL CONTROL IN WATER SYSTEMS

The installation, operation and maintenance of any water-cooling or warm water systems installed on the premises must comply with the following:

- (a) AS/NZS 3666:1:2011 - Air-handling and water systems of buildings- Microbial Control Part 1: Design, installation and commissioning.

- (b) AS/NZS 3666:2:2011 - Air-handling and water systems of building-Microbial Control Part 2: Operation and maintenance.
- (c) AS/NZS 3666:3:2011 - Air-handling and water systems of buildings-Microbial Control Part 3: Performance based maintenance of cooling water systems.
- (d) AS/NZS 3666:4:2011 – Air-handling and water stems of buildings-Microbial Control Part 4: Performance – based maintenance of air – handling systems (ducts and components).
- (e) Prior to the issue of an Occupation Certificate associated with the Cooling Water System the occupier of the premise at which the system is installed, must notify the Council in writing on the prescribed form, of the installation of all water-cooling tower systems within the premises under the *Public Health Act, 2010*. Warm water systems other than hospitals (hospitals (which also includes nursing homes, declared mental health facilities, private health facilities) are exempt from notifying Council.

Notification forms are available on Council's website www.cityofsydney.nsw.gov.au

(72) DILAPIDATION REPORT - PUBLIC DOMAIN

Prior to an approval for demolition and preparatory works being granted or the issue of any Construction Certificate, whichever is earlier, a photographic recording of the public domain site frontages is to be prepared as described in the Public Domain Manual and submitted for approval by Council's Public Domain Unit. The City's *Public Domain Manual* is available for download from the City's website at <https://www.cityofsydney.nsw.gov.au/>

The submission is to include written confirmation, issued with the authority of both the applicant and the photographer that the City of Sydney is granted a perpetual non-exclusive license to make use of the copyright in all images supplied, including the right to make copies available to third parties as though they were Council images. The signatures of both the applicant and the photographer must be included.

(73) LETTERBOXES

- (a) Details of the location and design of all letterboxes are to be submitted to and approved by Council's Area Coordinator Planning Assessments / Area Planning Manager prior to the issue of a Construction Certificate.
- (b) Letterboxes are to be discreetly located, must not obstruct and/or dominate the public way and must be of a type and specification that minimises opportunities for mail theft.
- (c) Where possible, consideration should be given to locating letterboxes within secure building lobbies.

Note: The applicant is strongly advised to contact Australia Post to discuss how the letterboxes within the lobby will be accessed.

(74) NO OBSTRUCTIONS

All public footways and paths of travel must be free from obstructions. If services are required to be relocated to clear paths of travel then this must be undertaken at the developer's expense. All obstructions are to be removed prior to the issue of any Occupation Certificate.

(75) SURVEY INFRASTRUCTURE – IDENTIFICATION AND RECOVERY

Under Section 24 of the Surveying and Spatial Information Act 2002, it is an offence to remove, damage, destroy, displace, obliterate or deface any survey mark unless authorised to do so by the Surveyor-General. Accordingly, the applicant must, where possible, ensure the preservation of existing survey infrastructure undisturbed and in its original state or else provide evidence of the Surveyor-General's authorisation to remove or replace marks.

Prior to the issue of any Construction Certificate, documentary evidence must be prepared by a Registered Surveyor and submitted to and approved by Council's Area Planning Manager / Coordinator. This evidence must include either:

- (a) A copy of any Surveyor-General's Approval for Survey Mark Removal granted by NSW Spatial Services for the subject site, including all documentation submitted as part of that application (for example the survey mark audit schedule, strategy plan and strategy report); or
- (b) A letter, signed by a current NSW Registered Land Surveyor and including his or her Board of Surveying and Spatial Information (BOSSI) identification number, stating that all investigations required under Surveyor-General's Direction No.11 have been made for the subject site and that no survey infrastructure will be affected by the proposal.

Council's Principal Surveyor may request further information and/or add conditions to any Surveyor-General's Approval at their discretion.

(76) PUBLIC DOMAIN CONCEPT PLAN

A public domain concept plan, showing all site frontages, including areas extending a minimum of 5m either side of the site boundary and to the road centreline, is to be prepared in accordance with the *Public Domain Manual* and the City's *Sydney Streets Code*. It must be submitted to and approved by City's Public Domain Unit prior to the issue of any Construction Certificate for the development other than for demolition or excavation.

Note: A detailed Public Domain Plan will be required prior to construction (refer to Public Domain Plan Detailed documentation for construction).

(77) PUBLIC DOMAIN LEVELS AND GRAIDENTS - MAJOR

Prior to the issue of any Construction Certificate, a Public Domain Levels and Gradients submission for the building and site frontages must be submitted to and approved by the City's Public Domain Unit. The submission, must be prepared in accordance with the City's *Public Domain Manual* and submitted with a completed *Application for Public Domain Levels and Gradients*. Information on how to

complete the submission can be downloaded from the City's website at <https://www.cityofsydney.nsw.gov.au/development/public-domain-works/da-associated-works>.

Any requirements to comply with Disability Discrimination Act at the entrance to a building or publicly accessible space must be resolved inside the site boundary.

Note: Approved Public Domain Levels and Gradients plans are to be submitted with Public Domain Plan – Detailed Documentation for Construction Condition submission.

(78) STORMWATER DRAINAGE DESIGN

Prior to issue of any Construction Certificate a detailed stormwater management plan prepared by suitable qualified and experienced professionals must be submitted to and approved by the City's Public Domain Unit and must include;

A certified stormwater drainage design complying with

- (i) Council's *Sydney Streets Technical Specifications*, Part A4 *Stormwater Drainage Design*;
- (ii) Council's *Sydney Streets Technical Specifications*, Standard Drawings;
- (iii) Council's *Sydney Streets Technical Specifications*, Part B10: *Stormwater Drainage Construction*;
- (iv) Council's Stormwater Drainage Manual; and
- (v) All relevant Australian Standards.

This information is available for download from the City's website at <https://www.cityofsydney.nsw.gov.au/development/public-domain-works/da-associated-works>.

- (a) Note: A Deed of Agreement (Stormwater Deed) for all proposed connections to the City's drainage system, and a Positive Covenant for all OSD systems is required prior to issue of any Occupation Certificate.

(79) STORMWATER ON-SITE DETENTION

The requirements of Sydney Water with regard to the on-site detention (OSD) of stormwater must be ascertained and complied with. Evidence of the approval must be submitted to Council prior to issue of any Construction Certificate other than demolition.

Where an OSD is not required by Sydney Water one may still be required by the City.

(80) STORMWATER QUALITY ASSESSMENT

The development must comply with the MUSIC Link report dated 11/05/2022 approved with this development application.

Prior to issue of any Construction Certificate a stormwater quality assessment report prepared by a suitably qualified practicing civil engineer (NER), demonstrating compliance with approved music link targets and parameters must be submitted to and approved by the City's Public Domain Unit.

The report must include a response to all stormwater quality improvement devices structural integrity, treatment train and their treatment properties demonstrating compliance with the approved MUSIC link report.

(81) PUBLIC DOMAIN LIGHTING UPGRADE

Prior to issue of any Construction Certificate for excavation, civil construction, drainage or building work (whichever is earlier), a concept Public Domain Lighting Upgrade Plan for pedestrian and street lighting in the public domain must be submitted to and approved by City's Public Domain Unit. The Lighting Plan must be prepared in accordance with the *Sydney Streets Technical Specifications A5- Street Lighting Design* and *B8- Street Lighting Construction*, *Sydney Lights: Public Domain Design Code* and *Public Domain Manual*. This information is available for download from the City's website at <https://www.cityofsydney.nsw.gov.au/development/public-domain-works/da-associated-works>.

The lighting upgrade plan must cover all adjacent street frontages, being Ithaca Road and Billyard Avenue and shall be designed to include the following requirements;

- (a) Upgrade existing Ausgrid street lighting using network standard LED luminaires.
- (b) Lighting standards compliance of AS1158.3.1:2020 Category PR2 must be achieved.
- (c) Lighting designs certified by an appropriately qualified practicing lighting engineer.

Advice on site specific lighting requirements must be obtained from the City's Public Domain Unit before proceeding with the preparation of any final lighting design proposals.

(82) PUBLIC DOMAIN PLAN DETAILED DOCUMENTATION FOR CONSTRUCTION

A detailed public domain plan and all relevant documentation must be submitted to and approved by the City's Public Domain Unit prior to the construction of any public domain works. This Plan must document all works required to ensure that the public domain upgrade work complies with the City of Sydney's *Public Domain Manual*, *Sydney Streets Code*, *Sydney Street Tree Masterplan*, *Sydney Lights: Public Domain Design Code*, *Sydney Streets Technical Specification*. The documentation must be *checked, be accurate, and comply with specified requirements*. Plans must be based on an accurate survey, to scale and fully

coordinated across all disciplines and submissions. The supplied documentation must be For Construction issue and will be approved under Section 138 of the Roads Act 1993.

The Public Domain Manual and all other relevant documents are available for download from Council's website at <https://www.cityofsydney.nsw.gov.au/development/public-domain-works/da-associated-works>.

The Public Domain Plan documentation must be submitted with an *Application for Public Domain Plan Assessment* and include the approved Public Domain Levels and Gradients documentation. If the proposed detailed design of the public domain requires changes to any previously approved levels, an *Application for Public Domain Levels and Gradients* must be submitted to and approved by the Public Domain Unit to reflect these changes prior to an approval being issued for the construction of public domain work.

(83) PAVING MATERIALS

The surface of any material used or proposed to be used for the paving of colonnades, thoroughfares, plazas, arcades and the like which are used by the public must comply with AS/NZS 4586:2004 (including amendments) "Slip resistance classification of new pedestrian surface materials".

(84) PUBLIC DOMAIN WORK - CONSTRUCTION APPROVAL UNDER SECTION 138 ROADS ACT 1993

Prior to the construction of any public domain works, approval under Section 138 / 139 of the *Roads Act 1993* must be issued by the City's Public Domain Unit.

(85) HOLD POINTS

Prior to an approval being issued for the construction of public domain and / or planning agreement works, including civil, drainage and subsurface works, a set of hold points will be provided by the City's Public Domain Unit in accordance with the City's *Public Domain Manual* and *Sydney Streets Technical Specification*. The list of hold point inspections will be included in the Public Domain works approval letter.

These hold point inspections must be adhered to during construction works. Prior to the issue of any Occupation Certificate, confirmation from the City's Public Domain Unit, that hold point inspections have been completed and works have been accepted by the City must be provided to the Principal Certifier.

(86) STORMWATER DRAINAGE CONNECTION

For approval of a connection into the City of Sydney's underground drainage infrastructure system an *Application for Approval of Stormwater Drainage Connection* must be submitted to the City, together with an application fee in accordance with the City of Sydney's adopted Schedule of Fees and Charges. This must be approved prior to approval being issued for the construction of public domain work.

(87) PUBLIC DOMAIN LIGHTING RETICULATION DESIGN

Prior to the issue of any relevant approval for the construction of public domain works, a detailed Public Domain Lighting reticulation Plan for pedestrian and street lighting in the public domain must be submitted to and approved by the City's Public Domain Unit in accordance with the City of Sydney's *Sydney Lights: Public Domain Design Code*, *Sydney Streets Code*, *Sydney Streets Technical Specification* and *Public Domain Manual*.

The *Public Domain Manual* and all other relevant documents are available for download from Council's website at <https://www.cityofsydney.nsw.gov.au/development/public-domain-works/da-associated-works>.

This public domain lighting documentation shall include pole footing locations and structural details, location and details of underground electrical reticulation including connections and conduits, pit cabling and certifications as described in the City's *Public Domain Manual*. The public domain lighting is to be superimposed on the public domain plan to show any conflicts between lighting and the proposed landscape design.

(88) PUBLIC DOMAIN WORKS SECURITY BOND

A Public Domain Works Security Bond will be required for the public domain works and repairing damage that may be caused to the public domain in the vicinity of the site, in accordance with the City of Sydney's adopted fees and charges and the *Public Domain Manual*.

The City's Public Domain Unit must be contacted to determine the bond amount prior to lodgement. The bond must be lodged with the City prior to approval being issued for the construction of the public domain works.

The bond will be retained in full until all public domain works, including any rectification of damage to the public domain, are completed to City's standards, and the required work as executed documentation is approved. On satisfying the above requirements and the issue of the Public Domain Works Letter of Completion **Operational Acceptance** by the City, 90% of the bond will be released. The remaining 10% balance will be held for the duration of the specified defects liability period.

(89) DEFECTS LIABILITY PERIOD – PUBLIC DOMAIN WORKS

All works to the City's public domain, including rectification of identified defects, are subject to a 6 month defects liability period from the date of Completion. The date of Completion will be nominated by Council on the Public Domain Works Letter of Completion **Operational Acceptance**.

(90) NO OBSTRUCTIONS

All public footways and paths of travel must be free from obstructions. If services are required to be relocated to clear paths of travel, then this must be undertaken at the developer's expense. All obstructions are to be removed prior to the issue of any Occupation Certificate.

(91) PUBLIC DOMAIN WORKS COMPLETION

The Public Domain works are to be constructed in accordance with the Public Domain Works Approval letter stamped plans for Public Domain Levels and Gradients, Stormwater Drainage, Public Domain Lighting, *Public Domain Manual*, *Stormwater Drainage Manual*, *Sydney Lights: Public Domain Design Code* and *Sydney Streets Technical Specification*.

The public domain work must be inspected, and a Public Domain **Works** Letter of Completion **Operational Acceptance** must be issued by Council's Public Domain Officer prior to the issue of any Occupation Certificate or before the commencement of use, whichever is earlier.

(92) PUBLIC DOMAIN COMPLETION - WORK AS EXECUTED DOCUMENTATION

Prior to a Public Domain **Works** Letter of Completion **Operational Acceptance** being issued for public domain works, works-as-executed (As-Built) plans and documentation, must be submitted to and accepted by the City of Sydney for all public domain works, including where required Stormwater, Public Domain Lighting and Road construction. Details of the plans and documentation required for approval will be advised by the City's Public Domain Unit.

(93) STORMWATER COMPLETION DEED OF AGREEMENT AND POSITIVE COVENANT

Prior to the issue of any Occupation Certificate:

- (a) The Owner is required to enter into a Deed of Agreement (Stormwater Deed) with the City of Sydney and obtain registration of Title of a Positive Covenant for all proposed connections to the City's underground drainage system. The deed and positive covenant will contain terms reasonably required by the City and will be drafted by the City's Legal Services Unit at the cost of the applicant, in accordance with the City's Fees and Charges.
- (b) A Positive Covenant must be registered on the property title for all drainage systems involving On-Site Detention (OSD) to ensure maintenance of the approved OSD system regardless of the method of connection. The positive covenant will contain terms reasonably required by the City and will be drafted by the City's solicitor at the cost of the applicant, in accordance with the City's Fees and Charges.

(94) SURVEY INFRASTRUCTURE – IDENTIFICATION AND RECOVERY

Under Section 24 of the *Surveying and Spatial Information Act, 2002*, it is an offence to remove, damage, destroy, displace, obliterate or deface any survey mark unless authorised to do so by the Surveyor-General. Accordingly, the applicant must, where possible, ensure the preservation of existing survey infrastructure undisturbed and in its original state or else provide evidence of the Surveyor-General's authorisation to remove or replace marks.

Prior to the issue of any Construction Certificate, documentary evidence must be prepared by a Registered Surveyor and submitted to and approved by Council's Area Planning Manager / Coordinator. This evidence must include either:

- (a) A copy of any Surveyor-General's Approval for Survey Mark Removal granted by NSW Spatial Services for the subject site, including all documentation submitted as part of that application (for example the survey mark audit schedule, strategy plan and strategy report); or
- (b) A letter, signed by a current NSW Registered Land Surveyor and including his or her Board of Surveying and Spatial Information (BOSSI) identification number, stating that all investigations required under Surveyor-General's Direction No.11 have been made for the subject site and that no survey infrastructure will be affected by the proposal.

Council's Principal Surveyor may request further information and/or add conditions to any Surveyor-General's Approval at their discretion.

(95) SURVEY INFRASTRUCTURE – PRE-SUBDIVISION CERTIFICATE WORKS

- (a) Pursuant to Section 38 of the *Surveying and Spatial Information Act, 2002*, if it is likely that any new survey mark will be disturbed by associated works (for example, footpath or kerb and gutter construction), a surveyor may defer the placement of those marks.
- (b) Prior to any the issue of any Subdivision Certificate, documentary evidence in accordance with Section B11 – *Survey Infrastructure of the Technical Specification* must be prepared by a Registered Surveyor and submitted to and approved by the City. This evidence must include:
 - (i) A copy of any Surveyor-General's Approval for Deferment of Survey Marks granted by NSW Spatial Services for the subject site, including all documentation submitted as part of that application (for example the draft deposited plan) or
 - (ii) A certificate of Practical Completion obtained from the City's Public Domain team, together with a letter, signed by a current NSW Registered Land Surveyor and including his or her Board of Surveying and Spatial Information (BOSSI) identification number, stating that all survey marks shown on their Deposited Plan remain at the date of practical completion.

(96) SURVEY INFRASTRUCTURE – RESTORATION

- (a) Prior to any Occupation Certificate being issued for the development, documentary evidence of restoration must be prepared by a Registered Surveyor and submitted to and approved by Council's Area Planning Manager / Coordinator. This evidence must include:
 - (i) Certification that all requirements requested under the Surveyor-General's Approval for Survey Mark Removal or by the City's Principal Surveyor under condition "Survey Infrastructure – Identification and Recovery" have been complied with;
 - (ii) Certification that all requirements requested under any Surveyor-General's Approval for Deferment of Survey Marks from condition "Survey Infrastructure – Pre Subdivision Certificate works" have been complied with and;

- (iii) Time-stamped photographic records of all new survey infrastructure relating to the site clearly showing the mark itself and sufficient context to aid in identifying the mark on site.

(97) TEMPORARY DEWATERING DURING CONSTRUCTION

Prior to discharging any water collected during excavation and construction into the City's stormwater drainage system, approval must be sought from the City's Public Domain Unit. A dewatering management plan must be submitted with an *Application for Temporary Dewatering* available to download on the City's website.

Other options for dewatering include disposal to sewer with prior approval from Sydney Water, or off-site disposal by a liquid waste transporter for treatment/disposal to an appropriate waste treatment/processing facility.

(98) NUMBER OF ADULTS PER ROOM

- (a) No more than two adult people shall permanently occupy any bedroom and no bedroom shall contain more than two beds. This excludes children and children's beds, cots or bassinets.
- (b) The total number of adults residing in one unit must not exceed twice the number of approved bedrooms.

(99) REDUCTION OF NOISE FROM EXTERNAL SOURCES (RESIDENTIAL AND SERVICED APARTMENTS)

- (a) Prior to a Construction Certificate being issued, an acoustic assessment report prepared by a suitably qualified acoustic consultant must be submitted to and approved by the Accredited Certifier demonstrating compliance with the requirements of the Sydney Development Control Plan 2012 in relation to acoustic privacy. The approved drawings and specifications for construction are to be in accordance with the requirements of the Sydney Development Control Plan 2012.
- (b) In the preparation of the report:
 - (i) The environmental noise monitoring at the site of the proposed development must be undertaken for not less than 3 week days, or not less than 2 weeks where the site is affected by noise from part-time operations;
 - (ii) The repeatable maximum LAeq (1 hour) for the daytime period (0700-2200 hours) and for the night time period (2200-0700 hours) is to be identified, and
 - (iii) The LAeq (1 hour) noise levels within living rooms and bedrooms with windows and doors both open and closed must be shown.
- (c) Prior to any Occupation Certificate being issued, a Compliance Certificate from a qualified, practising acoustic engineer must be submitted to the satisfaction of the Principal Certifier, certifying compliance with the condition.

(100) VENTILATION SECURITY AND WEATHER PROTECTION

All habitable rooms must have a combination of openable sashes and/or louvres that ensure a minimum Effective Openable Area (EOA) for ventilation purposes as required by the NCC and the Apartment Design Guide (ADG) when opened to the maximum dimension permitted under the NCC provisions for *Protection of Openable Windows*.

The sashes and/or louvres must provide the minimum EOA under most wet weather conditions and must also be securable to prevent unauthorised entry when open. The minimum EOA must be provided in addition to any external doors as these cannot be adequately weather-protected or secured when left partially open. A reduction for fly screens must be taken into consideration to account for any future installation.

The method of measurement must be in accordance with the definition of EOA as defined by the Apartment Design Guide, which is:

'the minimum area of clear opening of a window that can take part in providing natural ventilation. The effective openable area of a sliding or hung sash window can be measured in elevation. Hinged windows such as casement, awning and hopper windows may measure the diagonal plane from the sash to the jamb and add the triangles at either end up to a total area of the window opening in the wall. Obstruction within 2 metres of a window reduce the effective openable area as measured in elevation. Fly screens and security screen will reduce the effective openable area by half.'

- (a) Prior to the issue of a Construction Certificate, the following details of the proposed fenestration must be submitted to, and approved by Council's Area Coordinator Planning Assessments / Area Planning Manager:
 - (i) Detailed elevation drawings and a window schedule which show the size, type and location of all openable sashes / louvres in relation to the floor area served by those sashes;
 - (ii) Details of any proposed insect screens or other barriers to free air flow;
- (b) Evidence that all fenestration details shown in the approved drawings described in part (a) above have been completed is to be provided to the Principal Certifier prior to any Occupation Certificate being issued.

(101) APPLICATION FOR HOARDINGS AND SCAFFOLDING INSTALLED ON OR ABOVE A PUBLIC ROAD AND OPERATING HOISTING DEVICES INCLUDING BUILDING MAINTENANCE UNITS OVER A PUBLIC ROAD

- (a) Where a hoarding and/or scaffolding (temporary structures) are proposed to be installed on or above a road reservation (footway and/or roadway), a separate application under Section 68 of the *Local Government Act, 1993* and Sections 138/139 of the *Roads Act, 1993* must be submitted to and approved by Council for such structures.
- (b) Where an approval (Permit) is granted allowing the placement of temporary structures on or above a public road the structures must comply fully with Council's *Hoarding and Scaffolding Policy; Guidelines for Hoardings and Scaffolding*; and the conditions of approval (Permit) granted including:

- (i) Maintaining a current and valid approval for the full duration that the temporary structure/s is in place;
- (ii) Maintaining temporary structure/s in a structurally sound and stable condition for the full duration of installation (Clause 2.11.1);
- (iii) Bill posters and graffiti being removed within 24 hours of their placement (Clause 2.11.2);
- (iv) Maintaining temporary structures and the public place adjoining the work site in a clean and tidy condition including repainting and/or repair of graphics (Clauses 2.11.1, 2.11.4, 2.14.1 and 3.9.3);
- (v) Maintaining a watertight deck (Type B hoardings) to prevent liquids including rainwater, falling onto the footway/roadway surfaces (Clauses 3.9.1 and 3.9.4);
- (vi) Approved site sheds on the decks of a Type B hoarding being fully screened from the public place (Clause 3.9.5);
- (vii) Material and equipment not being placed or stored on the deck of Type B hoardings, unless specifically approved by Council (Clause 3.9.4);
- (viii) Providing and maintaining operational artificial lighting systems under Type B hoardings including at high-bay truck entry points (Clause 3.9.9); and
- (ix) Ensuring all required signage, artwork or historic images are provided and fully maintained to the City's requirements (Clauses 3.4, 3.9.3, 3.9.6, 3.9.8, 3.10.1 and 4.2).

If it is proposed to operate a hoisting device including a building maintenance unit above a public road which swings, hoists material/equipment and/or slews/wind vanes any part of the device over the public road, a separate application under Section 68 of the *Local Government Act, 1993* and Sections 138/139 of the *Roads Act, 1993* must be made to Council to obtain approval.

Note: 'Building maintenance unit' means a power-operated suspended platform and associated equipment on a building specifically designed to provide permanent access to the faces of the building for maintenance (*Work Health and Safety Regulation, 2017*).

(102) INSTALLATION OF ARTWORK AND IMAGES ON SCAFFOLDING (DEMOLITION / CONSTRUCTION WRAPS)

- (a) Where scaffolding is to be installed to undertake the proposed development an approved artwork / historic image installation must be provided on the scaffolding system to screen the development from the public place, minimise adverse visual impacts on the locality and add visual and public art in the streetscape.
- (b) The artwork installation must be printed, installed and maintained in accordance with Council's *Guidelines for Hoardings and Scaffolding*. Details of the proposed installation must be submitted to and approved by Council prior to the issue of a construction certificate or work commencing.

Note: The scaffolding system on which a required artwork wrap is to be installed must be designed to safely and adequately accommodate and support the wrap mesh material on which the artwork is printed/displayed. This includes designing the scaffold to address potential increased wind loads that may be encountered in the locality.

(103) PUBLIC DOMAIN WORK – CONSTRUCTION APPROVAL UNDER SECTION 138 ROADS ACT 1993

Prior to the construction of any public domain works, approval under Section 138 / 139 of the *Roads Act, 1993* must be issued by the City's Public Domain Unit.

(104) TACTILE GROUND SURFACE INDICATORS AND HANDRAILS

All tactile ground surface indicators, handrails and other elements required to provide access into the building / property must be located entirely within the private property boundary.

(105) TEMPORARY STRUCTURES (HOARDINGS, SCAFFOLDING AND OTHER STRUCTURES) INSTALLED ON PUBLIC ROADS THAT REQUIRE DEVELOPMENT CONSENT

The following forms of temporary structures (hoardings, scaffolding and other structures) proposed for installation on or above public roads and in connection with the construction of the approved development require Council approval (development consent):

- (a) Type B hoardings that span over roads such as laneways;
- (b) Type B hoardings that propose more than a single storey of site sheds installed on a hoarding deck;
- (c) Type A and Type B hoardings with or without scaffolding that project beyond the side boundaries of adjoining properties;
- (d) Fenced work compounds at roadway/footway level;
- (e) Hoardings/scaffolding associated with works on heritage-listed buildings; or
- (f) Any other large and/or potentially high environmental impact temporary structures, as determined by Council.

A separate development application must be submitted and approved by Council prior to the installation of any temporary structure listed above.

(106) WORKS REQUIRING USE OF A PUBLIC PLACE

Where construction/building works require the use of a public place including a road or footpath, a separate application under Sections 138/139 of the *Roads Act, 1993* must be submitted to and approved by Council prior to the commencement of work. Details of any barricade construction, area of enclosure and period of work are required to be submitted to the satisfaction of Council.

(107) LAND SUBDIVISION

Any proposal for land subdivision, including any stratum subdivision of the buildings, will require a separate application to Council to obtain development Subdivision Certificate under Section 6.15 of the *Environmental Planning and Assessment Act, 1979*.

(108) STRATA SUBDIVISION

Any proposal for strata subdivision of the site will require development consent and therefore the lodgment of a separate development application or complying development application, and subsequent approval from Council, or an accredited certifier, of the Strata Plan and issue of a Strata Certificate under the *Strata Schemes Development Act, 2015*.

(109) PROTECTION OF NATIVE WILDLIFE

- (a) In the event that wildlife is found during the course of any approved tree removal or pruning works, work must stop until a trained wildlife handler attends the site or the animal relocates itself. In regards to tree pruning, works may only proceed if the animals will not come into direct harm.
- (b) In the event that the tree has nesting birds or native animals, works must be delayed until after the nesting period has been completed, unless in the event of an emergency.

(110) TREES APPROVED FOR REMOVAL

- (a) All trees detailed in Table 1 below are approved for removal. Tree removal must not occur until the Construction Certificate has been issued.

Table 1 – Tree Removal:

Tree No	Species
9	Jacaranda mimosifolia
5	Olea europaea subsp Africana
30	Archontophoenix alexandrae
29	Archontophoenix alexandrae
28	Archontophoenix alexandrae
16	Celtis sinensis
17	Murraya paniculata
18	Celtis sinensis
19	Murraya paniculata
20	Murraya paniculata
21	Murraya paniculata
22	Syzygium leuhmanni
23	Syzygium leuhmanni
24	Syzygium leuhmanni
27	Syzygium leuhmanni
25	Syzygium leuhmanni
26	Jacaranda mimosifolia

No number	Ficus rubiginosa
No number	Gleditsia triacanthos

- (b) Reference shall be made to the Arboricultural Impact Assessment Report prepared by Tree Management Strategies dated 8 October 2021 and addendum letter by TMS dated 20 April 2022 for tree locations and numbers.
- (c) All tree removal works must be carried out by a qualified Arborist, with a minimum Level 3 AQF in arboriculture and in accordance with WorkCover's Code of Practice – Amenity Tree Industry.

(111) TREES THAT MUST BE RETAINED

- (a) The existing trees detailed in Table 2 below must be retained and protected in accordance with the conditions of consent throughout the construction and development.

Table 2 – Tree Retention:

Tree No	Species
6	Cupressus torulosa
7	Cupressus torulosa
8	Cupressus torulosa
4	Magnolia grandiflora
3	Magnolia grandiflora
2	Magnolia grandiflora
1	Magnolia grandiflora

- (b) Reference shall be made to the Arboricultural Impact Assessment Report prepared by Tree Management Strategies dated 8 October 2021 and addendum letter by TMS dated 20 April 2022 for tree locations and numbers.

(112) TREES TO BE TRANSPLANTED

- (a) The existing trees detailed in Table 3 below must be transplanted and successfully established into new locations within the site.

Table 3 – Transplant:

Tree No	Species
10	Livistona australis
11	Livistona australis
12	Livistona australis
13	Livistona australis
14	Livistona australis
No number	Livistona australis

- (b) Reference shall be made to the Arboricultural Impact Assessment Report prepared by Tree Management Strategies dated 8 October 2021 and addendum letter by TMS dated 20 April 2022 for tree locations and numbers.

- (c) The Landscape Plans shall be amended prior to the issuing of the Construction Certificate to clearly identify the new transplanting locations for the above trees.

(113) TRANSPLANTING TREE/S ON SITE

- (a) A Transplanting Methodology Report must be submitted to Council's Tree Management Officer for approval prior to commencement of the transplanting works. The report must be prepared by an experience transplanter within a minimum AQF level 5 and a minimum of 10 years demonstrated experience in successful transplanting. The report must include details of:
 - (i) Pre-transplant Considerations;
 - (ii) Site Preparation;
 - (iii) Excavation;
 - (iv) Preparation of new planting position;
 - (v) Lifting and Relocation methods;
 - (vi) Planting specifications;
 - (vii) Backfilling and completion;
 - (viii) Maintenance Program.
- (b) The transplanted palms must be maintained by a qualified Horticulturist or Arborist (minimum AQF Level 3) for a minimum period of twelve (12) months commencing from the date of planting. Maintenance includes, but is not limited to, watering, weeding, removal of rubbish from tree base, pruning, fertilizing, pest and disease control and any other operations to maintain a healthy robust tree;
- (c) If the transplanted palm tree or the replacement palm tree fails to establish within 12 months of the initial planting date, it must be replaced with a tree of comparable qualities.

(114) TREE PROTECTION PLANS

- (a) All detailed architectural, building, engineering (structural, stormwater and drainage services) and landscape documentation submitted for the Construction Certificate shall clearly show on all drawings the retention of trees as required by these conditions of consent, the position of their trunks, full diameter of their canopies, Structural Root Zones (SRZs) and Tree Protection Zones (TPZs).

(115) SITE SUPERVISION AND REPORTING

- (a) An Arborist with minimum qualifications in Arboriculture of Level 5 (under the Australian Qualification Framework) must oversee various stages of work

within the Tree Protection Zone of any tree listed for retention. The Arborist must certify compliance with each key milestone as detailed below:

- (i) Installation of tree protection measures;
 - (ii) During demolition of any ground surface materials (paving, concrete, grass etc) within the Tree Protection Zone (TPZ) of any tree to be retained;
 - (iii) During any excavation and trenching which has been approved by Council within the TPZ of any tree to be retained;
 - (iv) During any Landscape works within the TPZ of any tree to be retained.
- (b) An Arboricultural Compliance Report which includes photographic evidence and details of the health and condition of trees, must be submitted to Council's Area Planning Manager at each hold-point listed below:
- (i) Certification tree protection measures have been installed in accordance with the conditions prior to the commencement of works;
 - (ii) Certification of compliance with each key milestone listed above within 48 hours of completion;
 - (iii) Quarterly reporting for the duration of construction and development within the site;
 - (iv) Details of any other works undertaken on any tree to be retained or within TPZ/s;
 - (v) A final compliance report shall be submitted prior to the issuing of the Occupation Certificate.

(116) STREET TREE PROTECTION

All street trees directly outside the site must be retained and protected in accordance with the Australian Standard 4970 Protection of Trees on Development Sites. All street trees must be protected during the construction works as follows:

- (a) Tree trunk and major limb protection must be undertaken prior to the commencement of any works. The protection must be installed and certified by a qualified Arborist (AQF level 3) and must include:
 - (i) An adequate clearance, minimum 250mm, must be provided between the structure and tree branches, limbs and trunks at all times;
 - (ii) Tree trunk/s and/or major branches, must be protected by wrapped hessian or similar material to limit damage, and
 - (iii) Timber planks (50mm x 100mm or similar) must be placed around tree trunk/s. The timber planks must be spaced at 100mm intervals, and must be fixed against the trunk with tie wire, or strapping. The hessian and timber planks must not be fixed to the tree in any instance, or in any fashion,

- (iv) Tree trunk and major branch protection is to remain in place for the duration of construction and development works, and must be removed at the completion of the project.
- (b) All hoarding support columns are to be placed a minimum of 300mm from the edge of the existing tree pits/setts, so that no sinking or damage occurs to the existing tree setts. Supporting columns must not be placed on any tree roots that are exposed.
- (c) Temporary signs, or any other items, shall not be fixed or attached to any street tree.
- (d) Materials or goods, including site sheds, must not be stored or placed:
 - (i) around or under the tree canopy; or
 - (ii) within two (2) metres of tree trunks or branches of any street trees.
- (e) Any excavation within in any area known to, or suspected of having street tree roots greater than 40mm diameter must be undertaken by hand.
- (f) Any trenching works for services / hydraulics / drainage etc must not be undertaken within 5 metres of any street tree. Alternative installation methods for services, such as directional boring/drilling, or redirection of services shall be employed where large woody roots greater than 40mm diameter are encountered during the installation of any services.
- (g) Existing sections of kerbs adjacent to any street tree must not be removed without approval from the Council's Tree Management Officer.
- (h) Any damage sustained to street tree/s as a result of construction activities (including demolition) must be immediately reported to the Council's Tree Management Officer on 9265 9333. Any damage to street trees as a result of construction activities may result in a prosecution under the Local Government Act 1993 and the Environmental Planning and Assessment Act 1979.

(117) STREET TREE PRUNING

- (a) The consent from Council's Tree Management Officer must be obtained prior to the undertaking of any street tree pruning works including tree roots greater than 40mm diameter. Only minor pruning works will be approved by Council.
- (b) Any pruning that has been approved by Council, must be carried out by a qualified Arborist (AQF3), and must be in accordance with AS4373 Australian Standards 'Pruning of Amenity Trees'.

(118) ELECTRICITY SUBSTATION

If required by the applicable energy supplier, the owner must dedicate to the applicable energy supplier, free of cost, an area of land within the development site, but not in any landscaped area or in any area visible from the public domain, to enable an electricity substation to be installed. The size and location of the

substation is to be submitted for approval of Council and Ausgrid, prior to a Construction Certificate being issued or the commencement of the use, whichever is earlier.

(119) SYDNEY WATER CERTIFICATE (TAP-IN)

- (a) The approved plans must be submitted to Sydney Water's "Tap-in" online service to determine whether the development will affect Sydney Water's sewer and water mains, stormwater drains and/or easements, and if further requirements need to be met. Sydney Water's "Tap-in" online service is available at www.sydneywater.com.au, (see Plumbing, Building & Development and then Sydney Water "Tap-in").
- (b) The Consent Authority or a Principal Certifier must ensure that Sydney Water has appropriately stamped the plans before the commencement of work.

(120) TELECOMMUNICATIONS IN NEW DEVELOPMENTS

Prior to the issue of the Subdivision or Construction Certificate in connection with a development, the developer (whether or not a constitutional corporation) is to provide evidence satisfactory to the Accredited Certifier that arrangements have been made for:

- (a) the installation of fibre-ready facilities to all individual lots and/or premises in a real estate development project so as to enable fibre to be readily connected to any premises that is being or may be constructed on those lots. Demonstrate that the carrier has confirmed in writing that they are satisfied that the fibre ready facilities are fit for purpose; and
- (b) the provision of fixed-line telecommunications infrastructure in the fibre-ready facilities to all individual lots and/or premises in a real estate development project demonstrated through an agreement with a carrier.

Note: Real estate development project has the meanings given in section 372Q of the Telecommunications Act.

(121) TELECOMMUNICATIONS PROVISIONS

- (a) Appropriate space and access for ducting and cabling is to be provided within the plant area and to each apartment within the building within for a minimum of three telecommunication carriers or other providers of broadband access by ground or satellite delivery. The details must be submitted for the approval of the Accredited Certifier prior to a Construction Certificate being issued.
- (b) A separate development application must be submitted prior to the installation of any external telecommunication apparatus, or the like.

(122) UTILITY SERVICES

To ensure that utility authorities are advised of the development:

- (a) Prior to the issue of a Construction Certificate a survey is to be carried out of all utility services within and adjacent to the site including relevant information from utility authorities and excavation if necessary, to determine the position and level of services.
- (b) Prior to the commencement of work the applicant is to obtain written approval from the utility authorities (e.g. Energy Australia, Sydney Water, and Telecommunications Carriers) in connection with the relocation and/or adjustment of the services affected by the construction of the underground structure. Any costs in the relocation, adjustment or support of services are to be the responsibility of the developer.

(123) WASTE AND RECYCLING MANAGEMENT – DEMOLITION AND CONSTRUCTION WASTE

- (a) The proposal must comply with the relevant provisions of Council's Guidelines for Waste Management in New Developments 2018 which requires facilities to minimise and manage waste and recycling generated by the proposal.
- (b) Demolition waste must be contained and stored within the boundaries of the development.
- (c) Waste dockets are to be retained to confirm and verify which facility received the material for recycling or disposal.
- (d) Waste dockets are to be retained to confirm and verify that at least eighty percent (80%) of demolition material diverted from landfill for re-use and recycling.

(124) WASTE AND RECYCLING MANAGEMENT - RESIDENTIAL

- (a) A Waste and Recycling Management Plan is to be submitted to and approved by Council's Area Coordinator Planning Assessments / Area Planning Manager prior to a Construction Certificate being issued. The plan must comply with the Council's *Guidelines for Waste Management in New Developments 2018*. All requirements of the approved Waste and Recycling Management Plan must be implemented during construction of the development.
- (b) The building must incorporate designated areas or separate garbage rooms constructed in accordance with Council's *Guidelines for Waste Management in New Developments 2018*, to facilitate the separation of commercial waste and recycling from residential waste and recycling.

UPON COMPLETION OF THE DEVELOPMENT

- (c) Prior to any Occupation Certificate being issued or the use commencing, whichever is earlier, the Principal Certifier must obtain Council's approval of the waste and recycling management facilities provided in the development and ensure arrangements are in place for domestic waste collection by Council.

(125) WASTE/RECYCLING COLLECTION

- (a) The collection of waste and recycling must only occur during the designated zone collection times as outlined in the City's Waste Policy – Local Approvals Policy for Managing Waste in Public Places 2017.
- (b) Garbage and recycling must not be placed on the street for collection more than half an hour before the scheduled collection time. Bins and containers are to be removed from the street within half an hour of collection.

SCHEDULE 1C

DURING CONSTRUCTION/PRIOR TO OCCUPATION/COMPLETION

(126) OCCUPATION CERTIFICATE TO BE SUBMITTED

An Occupation Certificate must be obtained from the Principal Certifier and a copy submitted to Council prior to commencement of occupation or use of the whole or any part of a new building, an altered portion of, or an extension to an existing building.

(127) HOURS OF WORK AND NOISE

The hours of construction and work on the development must be as follows:

- (a) All work, including building/demolition and excavation work, and activities in the vicinity of the site generating noise associated with preparation for the commencement of work (e.g. loading and unloading of goods, transferring of tools etc.) in connection with the proposed development must only be carried out between the hours of 7.30am and 5.30pm on Mondays to Fridays, inclusive, and 7.30am and 3.30pm on Saturdays, with safety inspections being permitted at 7.00am on work days, and no work must be carried out on Sundays or public holidays.
- (b) All work, including demolition, excavation and building work must comply with the City of Sydney Code of Practice for Construction Hours/Noise 1992 and Australian Standard 2436 - 2010 Guide to Noise Control on Construction, Maintenance and Demolition Sites.
- (c) Notwithstanding the above, the use of a crane for special operations, including the delivery of materials, hoisting of plant and equipment and erection and dismantling of on-site tower cranes which warrant the on-street use of mobile cranes outside of above hours can occur, subject to a permit being issued by Council under Section 68 of the *Local Government Act, 1993* and/or Section 138 of the *Roads Act, 1993*.

Note: Works may be undertaken outside of hours, where it is required to avoid the loss of life, damage to property, to prevent environmental harm and/or to avoid structural damage to the building. Written approval must be given by the Construction Regulation Unit, prior to works proceeding

The *City of Sydney Code of Practice for Construction Hours/Noise 1992* allows extended working hours subject to the approval of an application in accordance with the Code and under Section 4.55 of the *Environmental Planning and Assessment Act, 1979*.

(128) ARCHAEOLOGICAL DISCOVERY DURING EXCAVATION

- (a) Should any relics be unexpectedly discovered on the site during excavation, all excavation or disturbance to the area is to stop immediately and the Heritage Council of New South Wales should be informed in accordance with Section 146 of the *Heritage Act, 1977*.

- (b) Should any Aboriginal objects be unexpectedly discovered then all excavation or disturbance of the area is to stop immediately and the New South Wales Government Office of Environment and Heritage is to be informed in accordance with Section 89A of the *National Parks and Wildlife Act, 1974*.
- (c) Should any archaeological remains or Aboriginal objects be discovered, a copy of recording of the finds and the final archaeological summary report is to be submitted to Council prior to the issue of any Occupation Certificate.
- (d) If the discovery is on Council's land, Council must be immediately informed in writing.

(129) BASIX

All commitments listed in each relevant BASIX Certificate for the development must be fulfilled prior to any Occupation Certificate being issued.

(130) PUBLIC DOMAIN DAMAGE SECURITY BOND

- (a) A Public Domain Damage Security Bond calculated on the basis of 220 square metres of asphalt site frontage must be lodged with the City in accordance with the City of Sydney's adopted fees and charges. The bond must be provided as security for repairing any damage to the public domain in the vicinity of the site.
- (b) The City's Public Domain Unit must be contacted to determine the bond amount prior to lodgement. The Bond must be lodged with the City prior to an approval for demolition being granted or any Construction Certificate being issued, whichever is earlier.

(131) DRAINAGE AND SERVICE PIT LIDS

All existing or proposed drainage and utility service pit lids throughout the public domain shall be to City of Sydney specifications and heel / bicycle safe, slip resistant, infill with material to match surrounding surface, finished flush with the adjacent pavement to avoid trip hazards and be clear of obstructions for easy opening and cleaning. Infill pit lids are to be detailed where specified by the Council's Public Domain Officer. Private pits are not permitted within the public domain. All details of pit lids must be shown on the public domain plan and must be approved by the City's Public Domain Unit prior to the issue of an approval for public domain works.

(132) TACTILE GROUND SURFACE INDICATORS AND HANDRAILS

All tactile ground surface indicators, handrails and other elements required to provide access into the building / property must be located entirely within the private property boundary.

(133) LIGHTING OF SITE OUTSIDE OF STANDARD CONSTRUCTION HOURS

Lighting of the site while any work is undertaken outside of Council's standard hours of construction must ensure that at no time must the intensity, hours of illumination or location of the lighting cause objectionable glare or injury to the amenity of the neighbourhood or Obtrusive Light in accordance with the definition in Australian Standard AS4282-1997 *Control of the obtrusive effects of outdoor lighting*. If in the opinion of Council, injury is likely to be caused, the intensity, hours of illumination and location of the lighting must be varied so that it does not cause injury to nearby residents.

(134) NOTIFICATION OF EXCAVATION WORKS OR USE OF HIGH NOISE EMISSION APPLIANCES/PLANT

The immediately adjoining neighbours must be given a minimum of 48 hours' notice that excavation, shoring or underpinning works or use of high noise emission appliances / plant are about to commence.

(135) SITE NOTICE OF PROJECTS DETAILS AND APPROVALS

A site notice is to be prominently displayed at the boundary to each frontage of the site for the purposes of informing the public of appropriate project details and relevant approvals. The notice(s) is to satisfy all of the following requirements:

- (a) Minimum dimensions of the notice are to measure 841mm x 594mm (A1) with any text on the notice to be a minimum of 30 point type size;
- (b) The notice is to be durable and weatherproof and is to be displayed throughout the construction period;
- (c) A copy of the first page of the development approval, building approval (including any modifications to those approvals) and any civic works approvals is to be posted alongside the notice in weatherproof casing;
- (d) The approved hours of work, the Principal Certifier including contact address and certification details, the name of the site manager, the responsible managing company, its address and 24 hour contact phone number for any enquiries, including construction/noise complaint, and the estimated date of completion of the project are to be displayed on the site notice;
- (e) The notice(s) is to be mounted at eye level on the perimeter hoardings and is also to state that unauthorised entry to the site is not permitted; and
- (f) All notices and signs must be displayed in locations as specified in the City's Guidelines for Hoardings and Scaffolding.

(136) USE OF HIGH NOISE EMISSION APPLIANCES / PLANT

- (a) The operation of high noise emission appliances, plant and/or machinery such as pile – drivers, rock breakers and hydraulic hammers and those which are not listed in Groups B, C, D, E or F of Schedule 1 of the *City of Sydney Code of Practice for Construction Hours/Noise 1992* and Australian

Standard 2436-2010 *Guide to Noise Control on Construction, Maintenance and Demolition Sites* is restricted to the hours of:

- (i) Monday to Friday – 9:00am to 12:30pm and 2:00pm to 4:30pm;
 - (ii) Saturday – 9:00am to 1:00pm; and
 - (iii) Sunday and Public Holidays – No works.
- (b) All reasonable and feasible steps must be undertaken to ensure that the work, including demolition, excavation and building complies with the *City of Sydney Code of Practice for Construction Hours/Noise 1992* and Australian Standard 2436- 2010 *Guide to Noise Control on Construction, Maintenance and Demolition Sites*.

(137) ENCROACHMENTS – PUBLIC WAY

No portion of the approved development, including gates and doors during opening and closing operations, shall encroach upon or over Council's footpath area.

(138) ENCROACHMENTS – NEIGHBOURING PROPERTIES

No portion of the approved development shall encroach onto the adjoining properties.

(139) STRATA SUBDIVISION – DEVELOPMENT CONSENT

- (a) A Development Application for strata subdivision, subdividing the common property of SP 56631, shall be lodged with Sydney City Council, as Strata Plan 56631 will not reflect the true situation when construction is complete, and the building is over 5 years old. This application should be made as soon as possible after the issue of a Construction Certificate to avoid delays. A draft strata plan of subdivision prepared by a surveyor registered under the Surveying and Spatial Information Act, 2002 shall accompany the application
- (b) An alternative to clause a) above is to terminate strata scheme SP 56631 under the provisions of Section 142 of the *Strata Schemes Development Act 2015* and prepare a new strata plan close to completion
- (c) When the building is essentially complete, i.e. when all walls, floors, and structures defining proposed strata title boundaries are complete, an application should be made to Council or an accredited strata certifier for a strata certificate under the Strata Schemes Development Act 2015.
- (d) Prior to the issue of any staged or Final Occupation Certificate, the strata plan of subdivision shall be registered with the office of Land and Property Information NSW (LPI-NSW). Evidence of registration shall be provided to the PCA.

(140) SURVEY

- (a) PRIOR TO FOUNDATION STAGE - All footings and walls adjacent to a boundary or setback line must be set out by a surveyor registered under the Surveying & Spatial Information Act, 2002, and provided to the Principal Certifying Authority.
- (b) COMPLETION – Prior to the issue of an Interim or Final Occupation Certificate - A Final Identification Survey prepared and signed by a Surveyor registered under the Surveying & Spatial Information Act, 2002 must be submitted to the PCA at the completion of the building work certifying the location of the building and associated structures in relation to the boundaries of the allotment. Any encroachments of the building or other structures over the side boundaries must be removed, or alternatively appropriate easements under Section 88B of the Conveyancing Act, 1919, with terms to the satisfaction of Council, must be lodged with LPI-NSW and evidence of lodgement provided to the PCA prior to the issue of any staged or Final Occupation Certificate.

(141) STREET ADDRESSES OF LOTS

In accordance with Clause 60(c) of the Surveying and Spatial Information Regulation 2012, the street addresses for each lot must be shown on the Administration Sheet. An application should be made to Council's Land Information Officer to obtain the correct street address for each lot.

(142) SYDNEY WATER CERTIFICATE - SUBDIVISION

Prior to the issue of a Subdivision/Strata Certificate, a Section 73 Compliance Certificate under the Sydney Water Act 1994 must be obtained from Sydney Water Corporation.

Application must be made through an authorised Water Servicing Coordinator. Please refer to the Building Developing and Plumbing section on the web site www.sydneywater.com.au then refer to "Water Servicing Coordinator" under "Developing Your Land" or telephone 13 20 92 for assistance.

Following application a "Notice of Requirements" will advise of water and sewer infrastructure to be built and charges to be paid. Please make early contact with the Coordinator, since building of water/sewer infrastructure can be time consuming and may impact on other services and building, driveway or landscape design.

The Section 73 Certificate must be submitted to Council or the Principal Certifying Authority prior to a Subdivision/Strata Certificate being issued.

(143) COVERING OF LOADS

All vehicles involved in the excavation and/or demolition process and departing the property with demolition materials, spoil or loose matter must have their loads fully covered before entering the public roadway.

(144) EROSION AND SEDIMENT CONTROL

The Soil and Water Management Plan (SWMP) or Erosion and Sediment Control Plan (ESCP) which has been approved by the Principal Certifier must be implemented in full during the construction period.

During the construction period:

- (a) Erosion and sediment controls must be regularly inspected, repaired and maintained in working order sufficient for a 10 year Average Recurrence Interval (ARI) rainfall event;
- (b) Erosion and sediment control signage available from Council must be completed and attached to the most prominent structure visible at all times when entering the site for the duration of construction; and
- (c) Building operations and stockpiles must not be located on the public footway or any other locations which could lead to the discharge of materials into the stormwater system.

(145) HAZARDOUS AND INDUSTRIAL WASTE

Hazardous and/or industrial waste arising from the demolition/operational activities must be removed and/or transported in accordance with the requirements of the NSW Work Cover Authority pursuant to the provisions of the following:

- (a) *Protection of the Environment Operations Act, 1997;*
- (b) *Protection of the Environment Operations (Waste) Regulation, 2005;*
- (c) *Waste Avoidance and Resource Recovery Act, 2001;*
- (d) *Work Health and Safety Act, 2011;* and
- (e) *Work Health and Safety Regulation, 2017.*

(146) VEHICLE CLEANSING

Prior to the commencement of work, suitable measures are to be implemented to ensure that sediment and other materials are not tracked onto the roadway by vehicles leaving the site. It is an offence to allow, permit or cause materials to pollute or be placed in a position from which they may pollute waters.

(147) STREET NUMBERING

Prior to any Occupation Certificate being issued, street numbers and the building name must be clearly displayed at either end of the ground level frontage in accordance with the *Policy on Numbering of Premises within the City of Sydney*. If new street numbers or a change to street numbers is required, a separate application must be made to Council.

(148) SYDNEY WATER CERTIFICATE

A Section 73 Compliance Certificate under the *Sydney Water Act, 1994* must be obtained from Sydney Water Corporation.

Application must be made through an authorised Water Servicing Coordinator. Please refer to the Building Developing and Plumbing section on the web site www.sydneywater.com.au then refer to “Water Servicing Coordinator” under “Developing Your Land” or telephone 13 20 92 for assistance.

Following the submission of the application a “Notice of Requirements” will advise of water and sewer infrastructure to be built and charges to be paid. Please make early contact with the Coordinator, since building of water/sewer infrastructure can be time consuming and may impact on other services and building, driveway or landscape design.

The Section 73 Certificate must be submitted to Council or the Principal Certifier prior to an Occupation Certificate or subdivision/strata certificate being issued.

(149) ACCESS DRIVEWAYS TO BE CONSTRUCTED

Approved driveways are to be constructed for all vehicular access to the construction site in accordance with the requirements of Council's “Driveway Specifications” to the satisfaction of Council.

(150) LOADING AND UNLOADING DURING CONSTRUCTION

The following requirements apply:

- (a) All loading and unloading associated with construction activity must be accommodated on site.
- (b) If, during excavation, it is not feasible for loading and unloading to take place on site, a Works Zone on the street may be considered by Council.
- (c) A Works Zone may be required if loading and unloading is not possible on site. If a Works Zone is warranted an application must be made to Council at least 8 weeks prior to commencement of work on the site. An approval for a Works Zone may be given for a specific period and certain hours of the days to meet the particular need for the site for such facilities at various stages of construction. The approval will be reviewed periodically for any adjustment necessitated by the progress of the construction activities.
- (d) In addition to any approved Works Zone, provision must be made for loading and unloading to be accommodated on site once the development has reached ground level.
- (e) The structural design of the building must allow the basement and/or the ground floor to be used as a loading and unloading area for the construction of the remainder of the development.
- (f) Where hoisting activity over the public place is proposed to be undertaken including hoisting from a Works Zone, a separate approval under Section 68 of the *Local Government Act, 1993* must be obtained.

(151) NO OBSTRUCTION OF PUBLIC WAY

The public way must not be obstructed by any materials, vehicles, refuse, skips or the like, under any circumstances. Non-compliance with this requirement will result in the issue of a notice by Council to stop all work on site.

(152) USE OF MOBILE CRANES

The following requirements apply:

- (a) Mobile cranes operating from the road must not be used as a method of demolishing or constructing a building.
- (b) For operations warranting the on-street use of mobile cranes (such as delivery of materials, hoisting of plant/equipment, erection and dismantling of onsite tower cranes, etc.), permits must be obtained from Council for the use of a mobile crane. The permits must be obtained 48 hours beforehand for partial road closures which, in the opinion of Council will create minimal traffic disruptions and 4 weeks beforehand in the case of full road closures and partial road closures which, in the opinion of Council, will create significant traffic disruptions.
- (c) Special operations and the use of mobile cranes must comply with the approved hours of construction. Mobile cranes must not be delivered to the site prior to 7.30am without the prior approval of Council.

SCHEDULE 2

PRESCRIBED CONDITIONS

The prescribed conditions in accordance with Division 8A of the *Environmental Planning and Assessment Regulation, 2000* apply to the development.

Refer to the New South Wales State legislation for full text of the clauses under Division 8A of the *Environmental Planning and Assessment Regulation, 2000*. This can be accessed at: <http://www.legislation.nsw.gov.au>.
