4.1 Streetscape

4.1.1 Barcom Avenue Heritage Conservation Area (C11)

The Barcom Avenue Heritage Conservation Area has a dense urban character predominantly comprising 1-3 storey Victorian terrace houses interspersed with small green spaces. The LEP listing for describes the HCA as follows:

The Barcom Avenue Conservation Area is defined by Craigend Street to the north, Barcom Avenue and Boundary Street to the east and south, St. Vincents and Victoria Street properties to the west. The area has a dense urban character predominantly comprising 1 - 3 storey terrace housing. There are a few small pockets of green space interspersed.

The area slopes steeply to the northeast creating diverse changing vistas. The irregular street pattern responds to the topography of the area, the alignment of Boundary Street approximates that of the former Rushcutters Creek. Royston Street in the northwest corner evidences the redevelopment of the 'Craigend' site in the Interwar period.

The area is dominated by Victorian terrace housing ranging in scale from 1-3 storey. Because of the steep topography some terraces are set high above the street on sandstone basement, others incorporate basement levels below street level and there are terraces with original dormer windows. A few face brick Federation period terraces survive. The Inter - war period is visibly represented in 2-4 storey flat buildings scattered throughout the area and some terraces. In addition to this, extensive rows of Victorian terraces received an addition to the street facade creating a cohesive Inter-war period streetscape which has the scale and rhythm of the Victorian built form. Extensive street plantings enhance the streetscapes. The school provides a community focus.¹⁷

The surrounding streets are described:

Nimrod Street: Mixed development Rating B

Caldwell Street: Star Rating B

Craigend Street: 2 storey terraces, villa, detracting wall Rating A

In terms of physical condition, the general condition of building stock is described as good.

There is some archaeological potential on redeveloped sites.

Modifications of Victorian terraces during the Inter-war period along with the redevelopment of industrial sites for residential uses in the late twentieth century are noted in the heritage inventory for the Conservation Area.

¹⁷: Heritage NSW, State Heritage Inventory, Barcom Avenue Heritage Conservation Area, <https://www.hms.heritage.nsw.gov.au/App/Item/ViewItem?itemId=2421458>

4.1.2 Nimrod Street

Nimrod Street runs parallel to Victoria Street, which is an arterial road connecting Potts Point and Darlinghurst, and intersects with Craigend Street on the north and Surry Street on the south. It is a one-way street with vehicular traffic moving in a northerly direction.

Nimrod Street curves around the SBW Stables Theatre before descending towards Surry Street. Caldwell Street intersects Nimrod Street at the southern corner of the subject site and is occupied by predominantly two storey Victorian terrace houses.

The western side of Nimrod Street comprises mostly of the rear elevations of low rise apartments and properties whilst on the east, the street is lined with two storey terrace houses and a small public park. The rear elevation of a commercial building occupies the corner site at Craignend Steet. This side of Nimrod Street is not located within the Barcom Avenue Heritage Conservation Area.

4.2 Site Assessment

4.2.1 Exterior 10 and 12 Nimrod Street

The SBW Stables Theatre at 10 Nimrod Street is a two storey brick and metal roof building that encompasses the whole of the lot. The main elevations of the building comprise of face brickwork and timber framed windows and doors with the exception of the aluminium framed box office ticket window and fire egress doors on the ground floor. The corrugated metal roof is curved and rises above the brick parapet.

A metal awning spans across the entrance and ticket window and folds up to the parapet with theatre signage above. Two ledged and braced timber doors, at the main entrance of the theatre, reference the original use of the site as a stables. Additional signage and advertising panels are located on the north elevation and are visible from Craighend Street..

A right of way runs along the northern boundary of the property which can be accessed via the main gate on Nimrod Street. The lane is overgrown with vegetation and appears to be rarely used.

The terrace house at 12 Nimrod Street is a two storey building with facebrick façades at the front and rear, timber weatherboard cladding along the sides, timber framed windows and doors, and a metal, gable roof. There is a small verandah addressing Nimrod Street and a deck and pergola structure to the rear. 12 Nimrod Street is of a smaller scale and setback further from the street than the adjacent terrace houses on Caldwell Street.

4.2.2 SBW Stables Theatre - Interior

Ground Floor - Foyer and Bar

The main entry to the theatre is from Nimrod Street which leads into the foyer with a small Box Office to the right. The timber post and beam in the foyer, which supports the theatre above, may be associated with the original timber stables. The foyer is connected to a small lounge and bar on the left with bench and banquette seating, and theatre sound-lock and laundry to the right. Public amenities are located down a central corridor which continues out to the shared laneway.

Level 1 - Theatre

Entry into the theatre is through the sound-lock and up the stairs which arrive at the front of the triangular stage. The theatre has capacity for 65 people on opposing tiered seating. A small opening and narrow walkway above the stairs leads to the Bio Box, which is lined with timber floor boards. There is a high risk of falling due to the narrowness of the walkway and the lack of a balustrade.

The performer’s dressing room and bathroom are located at the northern end of the theatre. It is connected to the stage via a narrow corridor behind the theatre seating and along the eastern perimeter wall.

Fire egress is located opposite the stairs from the foyer and leads out to Nimrod Street.

4.2.3 12 Nimrod Street - Interior

Ground Floor

The front entrance leads to a corridor that connects through to the living room, dining room and rear courtyard. A bedroom is located off the front entrance and the bathroom and kitchen are located adjacent to the dining room area. A small laundry room is accessed via the rear courtyard.

The main spaces have tiled floors. An exposed face brick wall separates the kitchen from the bathroom, whilst the remaining walls are rendered or of lightweight construction, some tiled. The ceilings appear to have been relined in plasterboard, with simple mouldings.

Upper Level

A narrow stair leads to the upper level which comprises two bedrooms which are carpeted. A large terrace with a timber framed pergola and balustrade is accessed via the north facing bedroom.

5.1 Assessment of Heritage Significance

5.1.1 Barcom Avenue Heritage Conservation Area (C11)

The subject site is located within the Barcom Avenue Heritage Conservation Area (C11) which is listed on Schedule 5 - Environmental Heritage of Sydney Local Environmental Plan 2012.

The Statement of Significance for the Barcom Avenue Heritage Conservation Area contained in the heritage listing reads as follows:

SYDNEY LEP HERITAGE LISTING BARCOM AVENUE HERITAGE CONSERVATION AREA		
CRITERION	ASSESSMENT OF SIGNIFICANCE	LEVEL
SHR Criteria a) [Historical significance]	Including part of Thomas West's Barcom Glen, the area represents a later residential subdivision with a high proportion of industry reflecting early use of the land. The subdivision of Craigend Estate illustrates the developmental overlays that follow the incremental subdivision of Darlinghurst's villa estates.	Meets this criteria at a local level.
SHR Criteria b) [Associative significance]	Not applicable.	
SHR Criteria c) [Aesthetic significance]	Rows of highly intact terrace housing overlayed on sloping topography create coherent and picturesque streetscapes. The area incorporates a diverse range of housing types from 1850s - 1930s.	Meets this criteria at a local level.
SHR Criteria d) [Social significance]		
SHR Criteria e) [Research potential]		
SHR Criteria f) [Rarity]		
SHR Criteria g) [Representativeness]	Representative of a later wave of residential development of East Sydney, with mix of industrial sites.	Meets this criteria at a local level.
Integrity/Intactness	The area retains a high degree of integrity	
Statement of Significance	The Barcom Glen Estate was a predominantly industrial and rural area until the nineteenth century, subdivided for residential development later than surrounding districts. It therefore has historical significance for its ability to evidence the industrial history of Darlinghurst. The area also has high aesthetic values for its fine coherent streetscapes representing middle class, residential development of the late Victorian period, Federation and inter-war periods. The topography and street plantings enhance the picturesque qualities of the highly intact streetscapes.	

18: Heritage NSW, State Heritage Inventory, Barcom Avenue Heritage Conservation Area, <https://www.hms.heritage.nsw.gov.au/App/Item/ViewItem?itemId=2421458>

5.1.2 10 Nimrod Street - Stables Theatre

The Stables Theatre is located in the Barcom Avenue Heritage Conservation Area. The existing theatre building is not a heritage item nor is it identified as a potential heritage item in any heritage study. It is listed as being of neutral significance on the building contribution map.

The table below assesses the significance of 10 Nimrod Street against the criterion for inclusion as a heritage item.

Criterion (a) – an item is important in the course, or pattern of, NSW’s cultural or natural history (or the cultural or natural history of the local area).	
Originally the site of a stables, the existing building had a variety of uses prior to its conversion to a theatre in 1970. The site has local historical value as a theatre which showcases innovative Australian plays.	
The site meets the guidelines for inclusion at a local level.	
Guidelines for Inclusion	Guidelines for Exclusion
<input type="checkbox"/> Shows evidence of a significant human activity.	<input type="checkbox"/> Has incidental or unsubstantiated connections with historically important activities or processes.
<input checked="" type="checkbox"/> Is associated with a significant activity or historical phase.	<input type="checkbox"/> Provides evidence of activities or processes that are of dubious historical importance.
<input type="checkbox"/> Maintains or shows the continuity of a historical process or activity.	<input type="checkbox"/> Has been so altered that it can no longer provide evidence of a particular association.
Criterion (b) – an item has strong or special association with the life or works of a person, or group of persons, of importance in the cultural or natural history of NSW (or the cultural or natural history of the local area).	
The site has special associations with John Bell, Ken Horler and Richard Wherrett and their friends who established the building as the Nimrod St Theatre in 1970, Bob Ellis and Anne Brooksbank who purchased the building in 1976 and the Griffin Theatre Company who took over occupancy as the resident theatre company in 1979. It also has special associations Dr Rodney Seaborn who established the Seaborn, Broughton & Walford Foundation in 1986 to guarantee the venue’s future for the Griffin Theatre Company, as a low cost theatre which showcases innovative Australian plays.	
The site meets the guidelines for inclusion at a local level.	
Guidelines for Inclusion	Guidelines for Exclusion
<input type="checkbox"/> Shows evidence of a significant human occupation.	<input type="checkbox"/> Has incidental or unsubstantiated connections with historically important people or events.
<input checked="" type="checkbox"/> Is associated with a significant event, person, or group of persons.	<input type="checkbox"/> Provides evidence of people or events that are of dubious historical importance.
	<input type="checkbox"/> Has been so altered that it can no longer provide evidence of a particular association.

Criterion (c) – an item is important in demonstrating aesthetic characteristics and/or a high degree of creative or technical achievement in NSW (or the local area).

The existing building is a simple, two storey brick building which does not meet the guidelines for inclusion for its aesthetic values. The building has been modified over time which has led to a loss of original fabric and hence significance.

Guidelines for Inclusion	Guidelines for Exclusion
<input type="checkbox"/> Shows or is associated with creative or technical innovation or achievement.	<input type="checkbox"/> Is not a major work by an important designer or artist.
<input type="checkbox"/> Is the inspiration for a creative or technical innovation or achievement.	<input checked="" type="checkbox"/> Has lost its design or technical integrity.
<input type="checkbox"/> Is aesthetically distinctive.	<input type="checkbox"/> Its positive visual or sensory appeal or landmark and scenic qualities have been more than temporarily degraded.
<input type="checkbox"/> Has landmark qualities.	<input type="checkbox"/> Has only a loose association with a creative or technical achievement.
<input type="checkbox"/> Exemplifies a particular taste, style or technology.	

Criterion (d) - An item has strong or special association with a particular community or cultural group in NSW (or the local area) for social, cultural or spiritual reasons.

The site has a strong, ongoing association with the Griffin Theatre Company who took over occupancy of the building from 1979. It was also known as the ‘Nimrod St Theatre’ between 1970-1974, ‘The Stables Theatre’ in 1976, was briefly known as ‘The Loft’, and finally the ‘SBW Stables Theatre’ from 1986 until the present time. It also has special associations with Australian play writers, actors and their audiences.

The site meets the guidelines for inclusion at a local level.

Guidelines for Inclusion	Guidelines for Exclusion
<input checked="" type="checkbox"/> Is important for its associations with an identifiable group	<input type="checkbox"/> Is only important to the community for amenity reasons.
<input type="checkbox"/> Is important to a community’s sense of place	<input type="checkbox"/> Is retained only in preference to a proposed alternative.

Criterion (e) - An item has potential to yield information that will contribute to an understanding of NSW’s cultural or natural history (or cultural or natural history of the local area).

The site has not been identified as being of archaeological potential.

Does not meet this criterion.

Guidelines for Inclusion	Guidelines for Exclusion
<input type="checkbox"/> Has potential to yield new or further substantial scientific and/or archaeological information.	<input type="checkbox"/> The knowledge gained would be irrelevant to research on science, human history or culture.
<input type="checkbox"/> Is an important benchmark or reference site, or type.	<input checked="" type="checkbox"/> Has little archaeological or research potential.
<input type="checkbox"/> Provides evidence of past human cultures that is unavailable elsewhere.	<input type="checkbox"/> Only contains information that is readily available from other resources or archaeological sites.

Criterion (f) – An item possesses uncommon, rare or endangered aspects of NSW’s cultural or natural history (or the cultural or natural history of the local area)

There are many brick warehouse buildings within the Sydney LGA and the existing building is not considered a rare or unusual example of its type.

The existing building does not meet the guidelines for inclusion.

Guidelines for Inclusion	Guidelines for Exclusion
<ul style="list-style-type: none"> <input type="checkbox"/> Provides evidence of a defunct custom, way of life or process. <input type="checkbox"/> Demonstrates a process, custom or other human activity that is in danger of being lost. <input type="checkbox"/> Shows unusually accurate evidence of a significant human activity. <input type="checkbox"/> Is the only example of its type. <input type="checkbox"/> Demonstrates designs or techniques of exceptional interest. <input type="checkbox"/> Shows rare evidence of a significant human activity important to a community. 	<ul style="list-style-type: none"> <input checked="" type="checkbox"/> Is not rare. <input type="checkbox"/> Is numerous but under threat.

Criterion (g) – An item is important in demonstrating the principal characteristics of a class of NSW’s (or a class of the local area’s) cultural or natural places; or cultural or natural environments.

The building is relatively utilitarian and not considered an exemplar of its type within the Sydney LGA.

The existing building does not meet the guidelines for inclusion.

Guidelines for Inclusion	Guidelines for Exclusion
<ul style="list-style-type: none"> <input type="checkbox"/> Is a fine example of its type. <input type="checkbox"/> Has the principal characteristics of an important class or group of items. <input type="checkbox"/> Has attributes typical of a particular way of life, philosophy, custom, significant process, design, technique or activity. <input type="checkbox"/> Is a significant variation to a class of items. <input type="checkbox"/> Is part of a group which collectively illustrates a representative type. <input type="checkbox"/> Is outstanding because of its setting, condition or size. <input type="checkbox"/> Is outstanding because of its integrity or the esteem in which it is held. 	<ul style="list-style-type: none"> <input type="checkbox"/> Is a poor example of its type. <input checked="" type="checkbox"/> Does not include or has lost the range of characteristics of a type. <input type="checkbox"/> Does not represent well the characteristics that make up a significant variation of a type.

Statement of Significance

The site at 10 Nimrod Street has historical significance for its past uses as a stable and has social significance associated with its use as a theatre over the past 50 years.

The Stables Theatre has special associations with John Bell, Ken Horler and Richard Wherrett and their friends who established the building as the Nimrod St Theatre in 1970, Bob Ellis and Anne Brooksbank who purchased the building in 1976 as well as the Griffin Theatre Company who took over occupancy as the resident theatre company. The site also has special associations with many play writers, actors and their audiences, along with the philanthropists who supported them including Dr Rodney Seaborn who established the Seaborn, Broughton & Walford Foundation in 1986 to guarantee the venue's future for the Griffin Theatre Company, as a low cost theatre which showcases innovative Australian plays.

The existing building is a simple, utilitarian, two storey brick building which does not meet the guidelines for inclusion as a heritage item for its aesthetic values, rarity or representativeness.

5.1.3 12 Nimrod Street

The existing terrace house at 12 Nimrod Street is not listed as a Heritage Item under SLEP. The site is located within the Barcom Avenue Heritage Conservation Area and the building's contribution to the HCA is considered Neutral. The building has been substantially altered since it was recorded by the National Trust in 1976, to the point that it is no longer recognisable as the weatherboard house that it once was.

The table below assesses the significance of the 12 Nimrod Street against the criterion for inclusion as a heritage item.

Criterion (a) – an item is important in the course, or pattern of, NSW’s cultural or natural history (or the cultural or natural history of the local area).	
The existing terrace house has been substantially altered and does not meet the guidelines for inclusion for its historical values.	
Guidelines for Inclusion	Guidelines for Exclusion
<input type="checkbox"/> Shows evidence of a significant human activity. <input type="checkbox"/> Is associated with a significant activity or historical phase. <input type="checkbox"/> Maintains or shows the continuity of a historical process or activity.	<input type="checkbox"/> Has incidental or unsubstantiated connections with historically important activities or processes. <input type="checkbox"/> Provides evidence of activities or processes that are of dubious historical importance. <input checked="" type="checkbox"/> Has been so altered that it can no longer provide evidence of a particular association.
Criterion (b) – an item has strong or special association with the life or works of a person, or group of persons, of importance in the cultural or natural history of NSW (or the cultural or natural history of the local area).	
There are no special associations to the life or works of a person are known for this house.	
Guidelines for Inclusion	Guidelines for Exclusion
<input type="checkbox"/> Shows evidence of a significant human occupation. <input type="checkbox"/> Is associated with a significant event, person, or group of persons.	<input type="checkbox"/> Has incidental or unsubstantiated connections with historically important people or events. <input type="checkbox"/> Provides evidence of people or events that are of dubious historical importance. <input checked="" type="checkbox"/> Has been so altered that it can no longer provide evidence of a particular association.
Criterion (c) – an item is important in demonstrating aesthetic characteristics and/or a high degree of creative or technical achievement in NSW (or the local area).	
The existing house is a simple, two storey terrace house which has been altered in the past and does not meet the guidelines for inclusion for its aesthetic values.	
Guidelines for Inclusion	Guidelines for Exclusion
<input type="checkbox"/> Shows or is associated with creative or technical innovation or achievement. <input type="checkbox"/> Is the inspiration for a creative or technical innovation or achievement. <input type="checkbox"/> Is aesthetically distinctive. <input type="checkbox"/> Has landmark qualities. <input type="checkbox"/> Exemplifies a particular taste, style or technology.	<input checked="" type="checkbox"/> Is not a major work by an important designer or artist. <input checked="" type="checkbox"/> Has lost its design or technical integrity. <input type="checkbox"/> Its positive visual or sensory appeal or landmark and scenic qualities have been more than temporarily degraded. <input type="checkbox"/> Has only a loose association with a creative or technical achievement.

Criterion (d) - An item has strong or special association with a particular community or cultural group in NSW (or the local area) for social, cultural or spiritual reasons.	
There are no known community or cultural group associations, nor any social or spiritual connections with the property.	
Guidelines for Inclusion	Guidelines for Exclusion
<input type="checkbox"/> Is important for its associations with an identifiable group <input type="checkbox"/> Is important to a community's sense of place	<input checked="" type="checkbox"/> Is only important to the community for amenity reasons. <input type="checkbox"/> Is retained only in preference to a proposed alternative.
Criterion (e) - An item has potential to yield information that will contribute to an understanding of NSW's cultural or natural history (or cultural or natural history of the local area).	
There is no known archaeology on the site.	
Guidelines for Inclusion	Guidelines for Exclusion
<input type="checkbox"/> Has potential to yield new or further substantial scientific and/or archaeological information. <input type="checkbox"/> Is an important benchmark or reference site, or type. <input type="checkbox"/> Provides evidence of past human cultures that is unavailable elsewhere.	<input type="checkbox"/> The knowledge gained would be irrelevant to research on science, human history or culture. <input checked="" type="checkbox"/> Has little archaeological or research potential. <input type="checkbox"/> Only contains information that is readily available from other resources or archaeological sites.
Criterion (f) - An item possesses uncommon, rare or endangered aspects of NSW's cultural or natural history (or the cultural or natural history of the local area)	
The house is not a rare or unusual example of its type within the Sydney LGA.	
Guidelines for Inclusion	Guidelines for Exclusion
<input type="checkbox"/> Provides evidence of a defunct custom, way of life or process. <input type="checkbox"/> Demonstrates a process, custom or other human activity that is in danger of being lost. <input type="checkbox"/> Shows unusually accurate evidence of a significant human activity. <input type="checkbox"/> Is the only example of its type. <input type="checkbox"/> Demonstrates designs or techniques of exceptional interest. <input type="checkbox"/> Shows rare evidence of a significant human activity important to a community.	<input checked="" type="checkbox"/> Is not rare. <input type="checkbox"/> Is numerous but under threat.

Criterion (g) – An item is important in demonstrating the principal characteristics of a class of NSW’s (or a class of the local area’s) cultural or natural places; or cultural or natural environments.

The house is not representative.

Guidelines for Inclusion

- Is a fine example of its type.
- Has the principal characteristics of an important class or group of items.
- Has attributes typical of a particular way of life, philosophy, custom, significant process, design, technique or activity.
- Is a significant variation to a class of items.
- Is part of a group which collectively illustrates a representative type.
- Is outstanding because of its setting, condition or size.
- Is outstanding because of its integrity or the esteem in which it is held.

Guidelines for Exclusion

- Is a poor example of its type.
- Does not include or has lost the range of characteristics of a type.
- Does not represent well the characteristics that make up a significant variation of a type.

Statement of Significance

The existing terrace house at 12 Nimrod Street, Darlinghurst has been substantially altered and does not meet the guidelines for inclusion as a heritage item.

Figure 165: 12 Nimrod Street.
Source: TZG architects, 2022.

5.2 Aboriginal Archaeological Potential

A desktop search of the Aboriginal Heritage Information Management System (AHIMS) revealed no known Aboriginal sites or places near the subject site. Disturbance resulting from development reduces the likelihood of Aboriginal archaeological finds. Even so, while the potential for Aboriginal archaeological resources may be removed by historical land use and development, the potential for intangible cultural heritage values associated with the Aboriginal occupation of certain areas remain high.

5.3 Archaeological Potential

The subject site lies outside the boundaries of the archaeological study undertaken in 1992 by the City of Sydney as defined by the Archaeological Zoning Plan. However, the listing for the Barcom Avenue Heritage Conservation Area identifies that there is some archaeological potential on redeveloped sites within the Conservation Area.

6.0

The Proposal

6.1 The Proposal

Change of Zoning

The site is currently zoned R1 General Residential. This Heritage Impact Assessment accompanies a Site Specific Planning Proposal to include ‘entertainment facility’ as an additional permitted use for the sites at 10 and 12 Nimrod Street. The planning proposal also seeks to increase the height and floor space ratio permitted on the land.

Proposed Development

The proposal involves removal of the existing buildings at 10 and 12 Nimrod Street and construction of a new theatre building, that is purpose built for the Griffin Theatre Company. The new building will add theatre spaces and upgrades that are not possible within the spatial constraints of the existing building such as a rehearsal space and provision for an accessible lift, as well as providing an increased seating capacity.

State of the art front of house areas, theatre seating and amenities will enhance the visitor experience while larger back-of-house areas including services and storage facilities, will improve the operations of the Griffin Theatre Company and provide support spaces for the performers and artists.

The new theatre building comprises of three levels which are accessible by a new passenger lift and BCA compliant fire egress stairs. A dedicated rehearsal area with an attached sunken courtyard, patron amenities and storage space are located in the basement. The rehearsal area also has the flexibility to be adapted into an office space if required. On the ground floor, a large foyer area is connected to two forecourt entries. The main forecourt entry extends from the paved footpath to the north of the site while the secondary entrance to the south is screened by a small garden. The new theatre space is located above the foyer. The main stage and opposing tiered seating are arranged at the centre of the space with the actors’ dressing room and amenities accessed via a cross over area. Additional tiered and balcony seating, Bio Box and plant rooms are located on the upper level of the theatre.

A summary of the current proposal is contained below:

Demolition

- All extant structures on the subject site will be removed for the new development (SBW Stables Theatre at 10 Nimrod Street and terrace house at 12 Nimrod Street).

Salvage

The proposal will carefully salvage original fabric proposed to be removed and store it for potential reuse or repair. Prior to the removal of any historic fabric, a photographic archival record will be conducted and coordinated with a salvage and reuse schedule.

Existing fabric to be salvaged for potential reuse includes the following:

- External bricks from the facade of the SBW Stables Theatre to be reused on the facade treatment of the new theatre.
- Timber elements associated with the stables including the stable entrance doors and timber beam and column in foyer space.
- Metal ventilation grilles.
- Interpretation boards in the foyer space.
- Timber weatherboards on the side façades of the terrace house at 12 Nimrod Street.

Excavation

Excavation of the site below the current ground level will be made for a new basement level.

New Infill Development

Basement Level

- New rehearsal space with flexibility for future use as office spaces.
- Female and male amenities, accessible WC.
- Laundry facility, storage room.
- Lift, stairs.
- Sunken courtyard at north east corner of site.

Ground Floor Level

- Entrance forecourt with large sliding entry doors at northern corner of site fronting Nimrod Street.
- Foyer and bar.
- Small courtyard in southern corner of site.
- Services cupboards.
- Lift, stairs.

Level 1

- Main theatre with tiered seating and stage (approximately 150 seats).
- Designated accessible wheelchair spaces.
- Back stage areas including dressing room and amenities.
- Balcony seating (upper level).
- Bio Box (upper level).
- Plant room and services room (upper level).
- Lift, stairs.

Roof

- Plant and equipment.

6.2 Design Options Considered

6.2.1 Early Options

Many options were considered prior to arriving at the current proposal. Options were considered that housed the Theatre on both the ground floor and in the basement; however, these were discounted for a range of reasons as outlined in the diagram below which outlines the issues and benefits of each option.

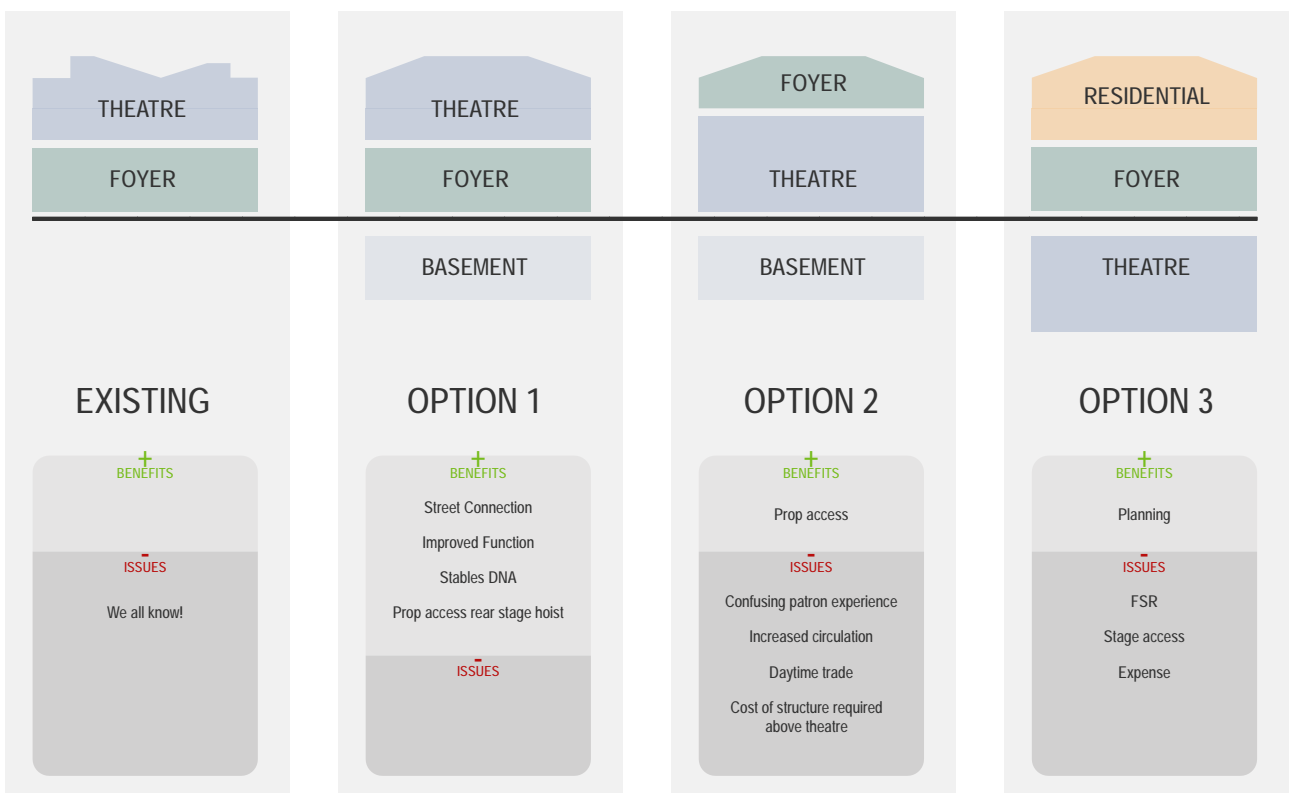

Figure 185: Options considered.

6.2.2 Design Principles

A series of design principles were established early in the genesis of the project which are outlined on the following page. These included:

- 1 Griffin DNA
- 2 Accessibility and Compliance
- 3 The Griffin Experience
- 4 Theatre Acoustic Envelope
- 5 Urban Stage
- 6 Building Organisation
- 7 Urban Form
- 8 Building Articulation
- 9 Open Space
- 10 Environmentally Sustainable Design

The Griffin DNA relates to honouring the social significance of the place, along with interpreting the historical significance of the former Stables through expressing the original footprint and reusing materials. It includes:

Developing a new building based on the SBW Griffin heritage and spirit by:

- Upholding the SBW Legacy through honouring the vision of John Bell, Richard Wherrett, Ken and Lillian Horler, Rodney Seaborn, Peter Broughton, Leslie Walford, Penny Cook, Michael Gow, Nick Enright, Peter Carmondy, Eadie Kurzer, Jenny Laing-Peach, Rosemarie Lenzo, John Senczuk, David Lynch, Katharine Brisbane, Robert Love, Peter Kingston, Ian Watson, Ros Horin, David Berthold, Nick Marchand, Sam Strong, Lee Lewis, Karen Rodgers, among many others.
- Reusing existing brick work, barn doors and other material as possible.
- Expressing the footprint of the original Stables.
- Using materiality of the new theatre addition to express Stables narrative.

Griffin Urban Design Principles

Accessibility and Compliance

A fundamental principle is to achieve a building that provides equitable access for all patrons and actors adhering to the site, as well as overcoming existing safety concerns and non-compliant building elements. To achieve this, the building will be able to accommodate the following:

- 1 New accessible lift
- 2 New access stairs
- 3 Fire egress stairs

Theatre Acoustic Envelope

Containing the theatre in a central, simple volume for efficiency and economy. Allowing the inherent qualities of the concrete 'encasing' to minimise acoustic impact within the theatre's residential setting. Clever material selection and minimising of junctions allows for unnecessary build-up to meet acoustic performance requirements.

Building Organisation

- 1 Theatre located to the centre of the site elevated above the foyer maintaining opposing seat configuration.
- 2 Foyer connecting to Nimrod and Catwell Streets.
- 3 Basement rehearsal space connecting to the urban courtyard.

Future proofing the building by allowing for digital capacity and flexible spaces for future use(s).

Open Spaces

The extremities of the site form open spaces (shaded in green) and connect the foyer to the city.

- 1 North Entrance connecting to a new public space
- 2 South Secondary entrance connecting to a small garden and the terrace house at Catwell Street
- 3 East Basement rehearsal space connecting to the sunken courtyard.

Griffin DNA

The proposed design is centred around developing a new building based on the SBW Griffin heritage and split by:

- Upholding the SBW Legacy through honouring the vision of John Bell, Richard Wharmett, Ken and Lillian Hofer, Rodney Stuborn, Peter Broughton, Leslie Walford, Penny Cook, Michael Dow, Nick Krings, Peter Connolly, Eddie Kurzer, Jerry Lang-Peach, Rosemarie Lercio, John Sanzuka, David Lynch, Katharine Briskawa, Robert Love, Peter Kingston, Ian Watson, Rico Harris, David Berthold, Nick Marchand, Sam Strong, Leo Lewis, Karen Rodgers, among many others.
- Reusing existing brick work, barn doors and other material as possible
- Expressing the footprint of the original Stables
- Using materiality of the new theatre addition to express the Stables narrative

The Griffin Experience

Developing a new building that retains the unique experience when going to the Griffin Theatre through the following key parts:

- 1 **INTIMACY** SCALE
Designing spaces that retain the intimacy of the existing spaces
- 2 **EQUITABLE** ACTIVITIES AND LEVEL CONNECTION TO THE STREET
Locating flexible foyer spaces with direct access to street and community beyond
- 3 **EXCITING** HARNESSING THE ENERGY OF ANTICIPATION
Designing spaces to enhance and celebrate the arrival and progression of visiting the Griffin theatre
- 4 **NON-FUSSY** MATERIALS
Keeping to simple materials relating back to the heritage of the building, like recycled brickwork and concrete
- 5 **EGALITARIAN** EQUAL ACCESS TO PERFORMANCE
New lift access to all levels for audience members and performers
Retaining opposing seats and stage configuration enabling equal audience access to performances

Urban Stage

Expressing the Griffin at the three corners of the site.

Making a visually rich and inviting building, despite the need for the walls to be 'blank' to facilitate the theatre use.

- 1 North Signage structure visible from Craigie Street above the congregating public at the entrance.
- 2 South Vista into the foyer from Catwell Street and the star case ascending to the theatre.
- 3 East Shaped brick work panel 'speaking' to the residential setting.

Urban Form & Building Articulation

Articulating the three corners of the site and connecting the foyer to the urban context.

Making a theatre visually compatible in a residential setting. The foyer level is defined by the Griffin brickwork. The first floor is defined by accessibly beneficial off-form concrete. It is intended to articulate the concrete to express the SBW Griffin story.

Environmentally Sustainable Design Principles

Developing a new building that encompasses an environmentally sustainable approach through the selection of building materials, use of renewable energy systems, reuse of water and in keeping with the Griffin's current ESD initiatives.

- 1 **Building materials**
Reuse existing brickwork
Long life durable materials
Minimal painting
- 2 **Energy Systems**
Photo voltaic roof panels
Battery storage (future)
- 3 **Water retention and reuse** for landscaped areas
- 4 **Support Griffin's current ESD initiatives**

Figure 195: Urban Design Principles.

6.2.3 Pre-lodgement Discussion with City of Sydney

A Pre Lodgement meeting was held with the City of Sydney on 12 August 2021 to discuss the potential request to amend the planning controls for the expansion of the SBW Stables Theatre to accommodate a universally accessible theatre with an expanded seating capacity, a rehearsal space and other support spaces.

Proposal

Both sites are currently zoned Residential. The proposal to amend Schedule 1 of the Sydney Local Environmental Plan 2012 to include 'entertainment facility' as an additional permitted use for the sites at 10 and 12 Nimrod Street was discussed.

Council described the proposal as follows in their letter dated 6 September following the meeting:

The proposed redevelopment of the SBW Stables Theatre will incorporate 12 Nimrod Street and increase the floor space of the existing theatre by 96 sqm (or 40 per cent of the total existing floor space). It is understood that the proposal will comply with the existing planning controls including the FSR of 1.75:1 and 9m height of building control. While the theatre is adjacent to the boundary of the B4 mixed use zone west of Nimrod Street, it is located within the R1 Residential zone which prohibits entertainment facilities.

The following key issues were discussed at the meeting:

- Griffin Theatre Company's invitation to the National Performing Arts Partnership and the impetus to improve facilities and showcase Australian theatre
- Support for the continued use of the Stables Theatre and consistency with the objectives of the City of Sydney's Local Strategic Planning Statement to preserve creative, arts and cultural floor space
- The form of proposals to ensure more accessible multi-purpose, rehearsal and performance space and supporting facilities
- Neutral contribution of the terrace at 12 Nimrod Street to the Barcom Avenue conservation area
- Stakeholder engagement and relationship with neighbours
- Integration the public domain and local activation
- Impacts on the function of the un-named laneway to the north-east of the site
- Impacts on local amenity and movement
- Whether DCP amendments are needed to support the redevelopment.

The City agreed to accept a request to prepare a Planning Proposal to include listing 'entertainment facility' as an additional permitted use at the SBW Stables Theatre at 10 and 12 Nimrod Street. This approach was preferred to a request for mixed-use zoning which could risk the current use of the site and potentially introduce a range of other alternative uses for the site which may be less compatible with surrounding residential uses.

One detailed matter has been noted. The boundary between the theatre and terraces includes a chimney and other structures. If a party wall exists, it will be important to ensure that all relevant easements and structural matters can be resolved.

Process

In terms of process, Council recommended that a detailed strategic analysis of the merit for changing the planning controls be lodged with the Planning Proposal. If strategic merit can be demonstrated, the request should also include adequate site-specific analysis to justify the proposed built form. Any planning proposal request must include adequate supporting studies to address potential impacts of a change to the planning controls.

If the City considers a request to be capable of demonstrating strategic and site-specific merit, the City will report the outcomes of the assessment and any planning proposal to Council and the Central Sydney Planning Committee for their consideration.

Supporting Studies

A range of key supporting studies were recommended to be submitted with the proposal including a concept proposal, along with an analysis of heritage issues, which this Statement of Heritage Impact aims to address:

- A concept proposal and justification, including an analysis of urban design and heritage issues to address the design of the building and its impact on the conservation area and neighbouring development and confirm whether the structures exhibit heritage significance.
- A study demonstrating that potential impacts from the expansion of the theatre on the amenity of neighbours can be managed, including an acoustic assessment to address the sound impact of the expansion of the theatre on the neighbouring development, including the terrace at 14 Nimrod Street and other affected sensitive uses.
- If a party wall exists, confirmation that all relevant easements and structural matters can be resolved if a party wall exists with the adjoin terrace.

In addition, it was recommended the proponent engage with the community prior to the lodgement of the planning proposal request.

STABLES

THE

7.0

Policy Context

7.1 Introduction

In this section, the heritage impact of the proposal is assessed against relevant heritage Statutory Controls, Conservation Policies and Guidelines contained in the following documents:

- NSW Heritage Act 1977
- Sydney Local Environmental Plan (SLEP) 2012 and
- Sydney Development Control Plan (SDCP) 2012

A Planning Proposal prepared by Hamptons Property Services accompanies the proposal and outlines how the proposal meets the relevant statutory controls.

7.2 Sydney Local Environmental Plan (SLEP) 2012

Schedule 5 of SLEP identifies Heritage Items and Conservation Areas. Although the buildings at 10 and 12 Nimrod Street are not listed as heritage items, they are located within the Barcom Avenue Heritage Conservation Area, identified as item No. C11 in the SLEP.

Part 5.10 of the LEP sets out controls related to Heritage Conservation. The proposal is addressed below in relation to the relevant clauses of the LEP.

CLAUSE SYDNEY LEP 2012	COMMENT
5.10 Heritage Conservation	
<p>(1) Objectives</p> <p>The objectives of this clause are as follows:</p> <p>(a) to conserve the environmental heritage of the City of Sydney,</p> <p>(b) to conserve the heritage significance of heritage items and heritage conservation areas, including associated fabric, settings and views,</p> <p>(c) to conserve archaeological sites,</p> <p>(d) to conserve Aboriginal objects and Aboriginal places of heritage significance.</p>	<p>10 and 12 Nimrod Street are not listed as heritage items; however, they are located within the Barcom Avenue Heritage Conservation Area (C11) and are identified as neutral buildings on the building contribution map. The statement of significance for the Barcom Avenue Heritage Conservation Area reads as follows:</p> <p><i>The Barcom Glen Estate was a predominantly industrial and rural area until the nineteenth century, subdivided for residential development later than surrounding districts. It therefore has historical significance for its ability to evidence the industrial history of Darlinghurst. The area also has high aesthetic values for its fine coherent streetscapes representing middle class, residential development of the late Victorian period, Federation and inter-war periods. The topography and street plantings enhance the picturesque qualities of the highly intact streetscapes.</i></p> <p>The proposal to include 'entertainment facility' as an additional permitted use for the sites at 10 and 12 Nimrod Street will have minimal impact on the significance of the Barcom Avenue Heritage Conservation Area. Nimrod Street has an established pattern of mixed use development and the building at 10 Nimrod Street has been used as a theatre for over 50 years. The terrace at 12 Nimrod Street has been changed over time which has led to a loss of significance. Use of this site to support an expanded theatre for the Griffin Theatre Company will have minimal heritage impact.</p> <p>The proposal will have minimal visual impact on the setting of the Barcom Avenue Heritage Conservation Area. The brickwork from the SBW Stables Theatre will be salvaged and reused in the principal façades to Nimrod Street to conserve the character of the building and make a positive contribution to the streetscape.</p> <p>There is no known archaeology on either site, however, a Watching Brief for an archaeologist is recommended during construction.</p> <p>The site is not identified as being of Aboriginal significance.</p>

CLAUSE SYDNEY LEP 2012	COMMENT
<p>(2) Requirement for Development consent is required for any of the following:</p> <p>(a) demolishing or moving any of the following or altering the exterior of any of the following (including, in the case of a building, making changes to its detail, fabric, finish or appearance):</p> <p>(i) a heritage item,</p> <p>(ii) an Aboriginal object,</p> <p>(iii) a building, work, relic or tree within a heritage conservation area,</p> <p>(b) altering a heritage item that is a building by making structural changes to its interior or by making changes to anything inside the item that is specified in Schedule 5 in relation to the item,</p>	<p>10 and 12 Nimrod Street are not listed as heritage items; however, they are located within the Barcom Avenue Heritage Conservation Area.</p> <p>This report accompanies a Site Specific Planning Proposal to include 'entertainment facility' as an additional permitted use for the sites at 10 and 12 Nimrod Street and has been submitted to the relevant consent authority, City of Sydney Council.</p> <p>The Heritage Impact Assessment also assesses the impact of the concept proposal.</p> <p>Upon approval of the Planning Proposal, a subsequent Development Application will be lodged with the City of Sydney for the removal of the existing buildings on the site and construction of a new infill building in accordance with this clause.</p>
<p>(3) When consent not required</p>	<p>Not applicable.</p>
<p>(4) Effect of proposed development on heritage significance.</p> <p>The consent authority must, before granting consent under this clause in respect of a heritage item or heritage conservation area, consider the effect of the proposed development on the heritage significance of the item or area concerned.</p> <p>This subclause applies regardless of whether a heritage management document is prepared under subclause (5) or a heritage conservation management plan is submitted under subclause (6).</p>	<p>This Statement of Heritage Impact accompanies a Site Specific Planning Proposal lodged with the City of Sydney, the consent authority, and concludes that the proposal will have minimal impact on the heritage significance of the sites themselves, the Barcom Avenue Heritage Conservation Area or Heritage Items located in the vicinity of the site.</p>
<p>(5) Heritage assessment</p> <p>The consent authority may, before granting consent to any development:</p> <p>(a) on land on which a heritage item is located, or</p> <p>(b) on land that is within a heritage conservation area, or</p> <p>(c) on land that is within the vicinity of land referred to in paragraph (a) or (b), require a heritage management document to be prepared that assesses the extent to which the carrying out of the proposed development would affect the heritage significance of the heritage item or heritage conservation area concerned.</p>	<p>The proposed works take into account the management recommendations for the Barcom Avenue Heritage Conservation Area contained in the heritage inventory listing.</p> <p>This Statement of Heritage Impact accompanies a Site Specific Planning Proposal and Concept Proposal assesses the extent to which carrying out the proposed development would affect the heritage significance of the Barcom Avenue Heritage Conservation Area and concludes that it will be minimal.</p>
<p>(6) Heritage conservation management plans</p>	<p>Not applicable.</p>
<p>(7) Archaeological Sites</p>	<p>Not applicable.</p>
<p>(8) Aboriginal places of heritage significance</p>	<p>Not applicable.</p>
<p>(9) Demolition of nominated State heritage items</p>	<p>Not applicable.</p>

CLAUSE SYDNEY LEP 2012	COMMENT
<p>(10) Conservation incentives The consent authority may grant consent to development for any purpose of a building that is a heritage item or of the land on which such a building is erected, or for any purpose on an Aboriginal place of heritage significance, even though development for that purpose would otherwise not be allowed by this Plan, if the consent authority is satisfied that—</p> <p>(a) the conservation of the heritage item or Aboriginal place of heritage significance is facilitated by the granting of consent, and</p> <p>(b) the proposed development is in accordance with a heritage management document that has been approved by the consent authority, and</p> <p>(c) the consent to the proposed development would require that all necessary conservation work identified in the heritage management document is carried out, and</p> <p>(d) the proposed development would not adversely affect the heritage significance of the heritage item, including its setting, or the heritage significance of the Aboriginal place of heritage significance, and</p> <p>(e) the proposed development would not have any significant adverse effect on the amenity of the surrounding area.</p>	<p>The two buildings on the subject site are not identified as heritage items under Sydney LEP 2012. A heritage assessment of each building is included in this report which concludes that the SBW Stables Theatre at 10 Nimrod Street is of local historical and social significance, predominantly related to use of the site as a theatre and associations with actors, patrons and philanthropists over the past 50 years, whilst the terrace house at 12 Nimrod Street has been so altered that it is of little heritage significance at all.</p> <p>The proposal involves the removal of the extant structures on the site and construction of a new purpose-built theatre that meets current building regulations and code compliance.</p> <p>The extant buildings are not heritage items. The fabric of both buildings has been altered over time leading to a loss of significance.</p> <p>The proposal is generally in accordance with the recommendations contained in the listing for the Barcom Avenue Heritage Conservation Area.</p> <p>The proposed development has been carefully designed to minimise heritage impacts on the Barcom Avenue Heritage Conservation Area. The two storey brick warehouse which has been used as a theatre for over 50 years terminates the row of terrace houses that run along Caldwell Street. Salvaged brickwork from the existing building has been incorporated into the façades of the new infill development to reference the former building and to respond to the existing character of the area.</p> <p>The proposal will have minimal impact on the amenity of the surrounding area. Refer Planning Proposal.</p>

7.3 Sydney Development Control Plan (DCP) 2012

The site is located within the Barcom Avenue Heritage Conservation Area; however, the SBW Stables Theatre at 10 Nimrod Street and the terrace house at 12 Nimrod Street are not identified as heritage items. The buildings are considered Neutral in terms of their contribution to the conservation area.

The proposed development respects this status and has been designed to be generally in accordance with the heritage objectives and provisions contained in Section 3.9 - Heritage of Sydney DCP 2012.

Figure 197: SDCP Building Contributions Map 022.
Source: City of Sydney DCP 2012.

- Subject site, 10 and 12 Nimrod Street
- Contributing
- Detracting
- Neutral
- Conservation Area - General

7.3.1 Darlinghurst East Locality Statement

The site is located within the Darlinghurst East Locality and adjacent to the Darlinghurst West and William Street localities as defined by the DCP.

The Darlinghurst East Locality is bounded by Craigend Street and New South Head Road to the north, Nield Avenue to the east, Boundary Street to the south, Barcom Avenue, McDonald Street, West Street, Liverpool Street and the rear of eastern lots with frontages to Victoria Street to the west.

The proposal is assessed against the Principles of the Darlinghurst East Locality in the table on the following page.

Figure 198: SDCP Darlinghurst East Locality Map.
Source: City of Sydney DCP 2012.

 Subject site, 10 and 12 Nimrod Street

SYDNEY DCP - DARLINGHURST EAST LOCALITY STATEMENT	COMMENT
Principles	
(a) Development must achieve and satisfy the outcomes expressed in the character statement and supporting principles.	The proposal is assessed against the character statement and supporting principles of the Darlinghurst East Locality in the table below.
(b) Development is to respond to and complement heritage items and contributory buildings within heritage conservation areas, including streetscapes and lanes.	The proposal has been carefully designed to respect and complement the heritage items, contributory buildings, streetscapes and lanes within the Barcom Avenue Heritage Conservation Area.
(c) Maintain active frontages with showrooms and specialty services along the northern part of McLachlan Street.	Not applicable.
(d) Infill development is to maintain and conserve the existing heritage streetscape, which includes Victorian and Federation buildings on residential streets by reinforcing the subdivision pattern, predominant street setback and alignment and building height.	<p>The infill development proposed for the purpose-built theatre interprets the heritage streetscape along Nimrod Street through the incorporation of existing face brickwork, metal ventilation grilles and timber elements associated with the original stables into the facade treatment of the new theatre. The subdivision pattern, predominant street setback and alignment are respected by the proposal.</p> <p>With the exception of the roof structure, the proposed theatre is generally contained within the maximum height controls. The roof is shaped to minimise its impact.</p>
(e) Maintain the streetwall height of existing warehouses along McLachlan Avenue.	Not applicable.
(f) Provide awnings along McLachlan Avenue.	Not applicable.
(g) Provide openings such as windows and balconies along pedestrian through site links to improve casual surveillance.	Not applicable. The site is not located along a pedestrian through site link.
(h) Maintain the green vista along Liverpool Street that terminates at the end of Darlinghurst Public School.	Not applicable.
(i) Encourage small offices and home offices, or small commercial suites in terraces on residential streets.	Not applicable. The proposed infill development is for a purpose-built theatre that replaces the existing SBW Stables Theatre.
(j) Encourage active retail uses and outdoor dining on Liverpool Street and McLachlan Avenue.	Not applicable.
(k) Support specialty services and showrooms located along the northern part of McLachlan Avenue.	Not applicable.

7.3.2 Heritage Objectives and Provisions

CLAUSE SYDNEY DCP 2012	COMMENT
Section 3.9 - Heritage	
<p>Objective</p> <p>(a) Ensure that heritage significance is considered for heritage items, development within heritage conservation areas, and development affecting archaeological sites and places of Aboriginal heritage significance.</p>	<p>10 and 12 Nimrod Street are not identified as heritage items, nor are they identified as Contributory Buildings in the Barcom Avenue Heritage Conservation Area.</p> <p>The building at 10 Nimrod Street has been used as a theatre for the past 50 years. Including ‘entertainment facility’ as an additional permitted use for 10-12 Nimrod Street will formalise and extend this existing use with minimal impact on the heritage significance of the place.</p> <p>The fabric of the existing buildings on the site has been modified over time which has resulted in a loss of significance.</p> <p>The new infill building outlined in the Concept Proposal has been carefully designed to interpret the history of the site, to positively respond to the immediate context and to respect the heritage significance of the Conservation Area.</p> <p>There is also no known archaeology on the sites; however, a watching brief for an archaeologist is recommended during construction.</p>
<p>(b) Enhance the character and heritage significance of heritage items and heritage conservation areas and ensure that infill development is designed to respond positively to the heritage character of adjoining and nearby buildings and features of the public domain.</p>	<p>The proposal will maintain the theatre use of the site, which has operated at 10 Nimrod Street for over 50 years and extend it to include 12 Nimrod Street, respecting the historical and social associations with the place.</p> <p>The new infill development will provide a state-of-the-art theatre for the community which has been carefully designed to complement the character of adjoining and nearby buildings within the Barcom Avenue Heritage Conservation Area.</p> <p>The existing buildings on the site have been modified over time resulting in a loss of fabric and hence significance. Sydney DCP maps indicate that they both make a Neutral contribution to the Conservation Area. The proposal to remove these buildings and replace them with a new infill building that responds positively to its context will enhance the character and heritage significance of the conservation area. The reuse of salvaged brickwork and the interpretive treatments proposed for the facade of the new theatre building ensure that it fits into its immediate surroundings with minimal impact. Heritage interpretation is also proposed.</p>

CLAUSE SYDNEY DCP 2012	COMMENT
3.9.1 Heritage Impact Statements	
(1) A Heritage Impact Statement is to be submitted as part of the Statement of Environmental Effects for development applications affecting: (a) heritage items identified in the Sydney LEP 2012; or (b) properties within a Heritage Conservation Area identified in Sydney LEP 2012.	This Statement of Heritage Impact accompanies the Site Specific Planning Proposal. It addresses the heritage impacts of the proposal to include 'entertainment facility' as an additional permitted use and also assesses the works associated with the Concept Proposal, including the demolition of the existing buildings and construction of a new infill building, on the Barcom Avenue Heritage Conservation Area (C11) and concludes that they will be minimal.
(3) A Heritage Impact Statement is to be prepared by a suitably qualified person, such as a heritage consultant. Guidelines for the preparation of Statements of Heritage Impact are available on the website of the Heritage Branch, NSW Department of Planning at www.heritage.nsw.gov.au .	This report has been authored by Julie Mackenzie, BSc(Arch)BArchMHeritCons, John Taliva'a BASMArch(Hons) and Albie Christine Tenedora, B(ArchSt)MArch. It has been prepared in accordance with the guidelines provided by the NSW Heritage Branch.
(4) The Heritage Impact Statement is to address: (a) the heritage significance of the heritage item or the contribution which the building makes to the heritage significance of the heritage conservation area; (b) the options that were considered when arriving at a preferred development and the reasons for choosing the preferred option; (c) the impact of the proposed development on the heritage significance of the heritage item, heritage items within the vicinity, or the heritage conservation area; and (d) the compatibility of the development with conservation policies contained within an applicable Heritage Conservation Management Plan or Conservation Management Strategy, or conservation policies within the Sydney Heritage Inventory Report.	This Statement of Heritage Impact addresses: (a) the heritage significance of the existing buildings at 10-12 Nimrod Street and their contribution to the significance of the Barcom Avenue Conservation Area (C11) , (b) the options considered during design development and the reasons for choosing the preferred option, (c) the heritage impact of the proposal to include 'entertainment facility' as an additional permitted use and of the concept proposal. (d) the compatibility of the proposal with the recommended management contained in the Heritage Inventory listing for the Barcom Avenue Heritage Conservation Area.
(5) Where the site adjoins another local government area, the Heritage Impact Statement is to address the potential impact on adjoining or nearby heritage items or heritage conservation areas in the adjoining local government area.	Not applicable. The site and immediate vicinity are all within the City of Sydney LGA.
3.9.2 Conservation Management Plans	Not applicable.
3.9.3 Archaeological assessments	Not applicable.
3.9.4 Development of sites of State heritage significance or containing more than one heritage item	Not applicable.
3.9.5 Heritage Items	Not applicable.

CLAUSE SYDNEY DCP 2012	COMMENT
3.9.6 Heritage conservation areas	
<p>(1) Development within a heritage conservation area is to be compatible with the surrounding built form and urban pattern by addressing the heritage conservation area statement of significance and responding sympathetically to:</p> <p>(a) topography and landscape;</p>	<p>The site is located within the Barcom Avenue Heritage Conservation Area, and care has been taken to ensure that the new infill development is compatible with the surrounding built form and urban pattern in terms of character, scale, form, materials and colours and detailing.</p> <p>The existing topography and landscape are unaffected by the proposal.</p>
<p>(b) views to and from the site;</p>	<p>The existing brick warehouse building located at 10 Nimrod Street terminates the row of terrace houses. Views to and from the site are respected by the proposal to salvage and reuse the existing brickwork in the façades of the new infill development.</p>
<p>(c) significant subdivision patterns and layout, and front and side setbacks;</p>	<p>10 Nimrod Street currently occupies a triangular block of land made up of two lots. The substandard terrace house at 12 Nimrod Street currently occupies the adjacent lot which completes the triangle at the intersection of Caldwell Street. The proposal to construct a building over all three lots will have minimal impact on significant subdivision patterns in the Conservation Area.</p> <p>The building at 10 Nimrod Street is currently constructed to all three boundaries with no setbacks, whilst 12 Nimrod Street adopts a terrace house footprint on an oddly shaped lot. The proposal to extend the theatre to the boundaries and to include 12 Nimrod Street will have minimal impact on the Conservation Area.</p> <p>The significant subdivision pattern and setbacks established along Caldwell Street, where larger, more prominent terrace houses and heritage items are located, will not be impacted by the proposal.</p>
<p>(d) the type, siting, form, height, bulk, roofscape, scale, materials and details of adjoining or nearby contributory buildings;</p>	<p>The siting, bulk, form, scale, materials and roofscape of the proposed infill building have been designed to have a relationship with those of the neighbouring buildings. The recycled brick facade interprets the recognisable form of 10 Nimrod Street which terminates the streetscape. The concrete addition rises up to accommodate the functions of the new theatre. This element is curved away from the street to reduce its apparent bulk and scale and to respond to nearby contributory buildings in a sympathetic, yet contemporary, manner. Roof plant is set back from the parapet to minimise visual impacts.</p>
<p>(e) the interface between the public domain and building alignments and property boundaries; and</p>	<p>The building at 12 Nimrod Street has an awkward relationship to the street due to its corner location. The interface between the public domain and building alignments and property boundaries are arguably improved by the proposal.</p>

CLAUSE SYDNEY DCP 2012	COMMENT
(f) colour schemes that have a hue and tonal relationship with traditional colour schemes.	A neutral colour palette is proposed for the exterior of the new infill building, which includes reuse of salvaged brickwork and concrete, and will have a sympathetic hue and tonal relationship with the traditional colour schemes in the conservation area.
(4) Development within a heritage conservation area is to be consistent with policy guidelines contained in the Heritage Inventory Assessment Report for the individual conservation area.	The proposal is generally consistent with the policy guidelines contained in the Barcom Avenue Conservation Area Heritage Inventory.
3.9.7 Contributory buildings	Not applicable.
3.9.8 Neutral and appropriate infill buildings	
Neutral buildings are buildings that do not contribute nor detract from the significant character of the heritage conservation area. Neutral buildings are: – From a significant historical period, but altered in form, unlikely to be reversed; – Sympathetic contemporary infill; or – From a non-significant historical period but do not detract from the character of the Heritage Conservation Area.	The buildings at 10 and 12 Nimrod Street are identified as Neutral buildings on the DCP Contributions Map. Both buildings have been substantially altered.
(1) Demolition of neutral buildings will only be considered where it can be demonstrated that: (a) restoration of the building is not reasonable; and	Demolition of both buildings is proposed along with construction of a new infill building to house a new state of the art theatre. The SBW Stables Theatre has outgrown the existing building at 10 Nimrod Street. Restoration of the building was considered, however, construction of a new building is required to provide a compliant universally accessible theatre and rehearsal space with associated rehearsal, ancillary spaces and public amenities. The terrace house at 12 Nimrod Street has been substantially altered over time. Restoration is not considered a reasonable alternative.
(b) the replacement building will not compromise the heritage significance of the heritage conservation area.	The proposed infill building includes the reuse of salvaged brickwork and interpretation of the former stables building and will not compromise the heritage significance of the heritage conservation area.
(2) Where demolition of a neutral building is allowed, a photographic record of the building may be required to be submitted to the City.	A photographic archival record will be prepared if required.

CLAUSE SYDNEY DCP 2012	COMMENT
<p>(3) Alterations and additions to a neutral building are to:</p> <p>(a) remove unsympathetic alterations and additions, including inappropriate building elements;</p> <p>(b) respect the original building in terms of bulk, form, scale and height;</p> <p>(c) minimise the removal of significant features and building elements; and</p> <p>(d) use appropriate materials, finishes and colours that do not reduce the significance of the Heritage Conservation Area.</p>	<p>Not applicable. The concept proposal involves demolition of both buildings and salvage of materials for reuse in the new infill development proposed for the combined site.</p>
<p>3.9.9 Detracting buildings</p>	<p>Not applicable, although it could be argued that the building at 12 Nimrod Street is Detracting.</p>
<p>3.9.10 Building materials for heritage items and buildings within heritage conservation areas</p>	
<p>(1) Where residential flat buildings have foyers or other significant interior features, including hallway detailing, panelling and significant staircases, that are designed to be visible from the street, these are to be retained.</p>	<p>Not applicable.</p>
<p>(2) Existing face brickwork and stone walls are not to be coated, rendered or painted.</p>	<p>The proposed reuse of salvaged brickwork incorporated in the Nimrod Street facade will be maintained as face brickwork</p>
<p>(3) Original materials are to be retained, unless it can be demonstrated that significant deterioration has occurred and repair is not practical. Any replacement should be with similar materials.</p>	<p>Original materials will be salvaged and wherever possible, reused in the new infill building. Salvaged bricks are proposed to be used in the facade which interpret the primary form of the former stables building. Timber elements including barn doors and extant timber beams and columns will also be salvaged for possible reuse.</p>
<p>(4) New materials are to complement the colour, finishes and proportion of existing materials on the building and be identifiable as new on close inspection without detracting from the character and heritage significance of the building.</p>	<p>A simple palette of materials has been selected for the new infill building that responds sympathetically to the character of the conservation area, whilst being recognisably contemporary. Recycled bricks are used for the base of the facade, which interpret the former stables building, whilst concrete is proposed for the curved roof addition with glazed elements at the entrances.</p>
<p>3.9.11 Conservation of public domain features in heritage conservation areas</p>	<p>Not applicable.</p>
<p>3.9.12 Reduction of rising damp and salt attack in buildings constructed prior to 1920</p>	<p>Not applicable.</p>
<p>3.9.13 Excavation in the vicinity of heritage items and in heritage conservation areas</p>	
<p>(1) Excavation beneath, or adjacent to heritage items and/or buildings in heritage conservation areas will only be permitted if it is supported by both a Geotechnical Engineering report and a Structural Engineering report.</p>	<p>A Geotechnical Investigation and Structural Engineering Report will be prepared to accompany the Development Application.</p>

CLAUSE SYDNEY DCP 2012	COMMENT
(2) Excavation will not be permitted if:	
(a) it will occur under common walls and footings to common walls, or freestanding boundary walls, or under any other part of adjoining land; and	The proposed excavation will be contained within the site boundary.
(b) it will occur under or forward of the front facade.	No excavation will occur under, or forward of, the front façades.
3.9.14 Heritage inventory assessment reports	
(1) Development to a heritage item or within a heritage conservation area or special character area is to be consistent with the policy guidelines contained within the Heritage Inventory Assessment Report.	The proposal is generally consistent with the policy guidelines contained in the Heritage Inventory Assessment Report for the Barcom Avenue Heritage Conservation Area.
3.10.1 Warehouses and Industrial buildings older than 50 years	The two storey brick building at 10 Nimrod Street has been used as a theatre for the past 50 years. The building is not identified as a Heritage Item.
Objectives	The proposal retains the historic use of the site as a theatre.
The objectives of this clause are as follows:	The existing buildings on the subject site do not comply with current codes and standards and the required upgrades are not possible within the spatial constraints of the building.
(a) Conserve warehouse and industrial buildings older than 50 years and ensure that alterations, additions and adaptive reuse maintain the legibility of the historic use.	The proposal involves their removal and construction of a purpose-built theatre that is BCA and DDA code compliant. Salvage and reuse of brickwork from the existing building in the new facade is proposed to maintain the legibility of the historic use of the site, and to respect the character of the conservation area, whilst the curved roof addition allows for an upgraded theatre contained within.
(b) Encourage the conservation of existing warehouse buildings and fabric and ensure that alterations and additions are sympathetic in scale and style to the existing building.	Archival recording of the current condition and preparation of a salvage and reuse schedule will be conducted prior to the removal and/or storage for future use.
Provisions	
(1) Alterations and additions are to be supported by a report, prepared by a suitably qualified and practising engineer, certifying that the works will not jeopardise the structural integrity of the building.	The development application will be accompanied by a Structural Engineer's Report.
(2) Alterations and additions are to maintain significant fabric and building elements.	The proposal includes the salvage and reuse of significant fabric in the facade of the new theatre including face brickwork and decorative metal ventilation grilles. Timber elements associated with the original building will also be salvaged for potential reuse.
(3) A proposed change of use must not compromise the significant fabric and building elements.	The building at 10 Nimrod Street has been used as a theatre for the past 50 years. The proposal to include 'entertainment facility' as an additional permitted use for 10-12 Nimrod Street would facilitate construction of a new improved theatre on the site. Significant fabric is proposed to be salvaged and incorporated in the new infill building.

CLAUSE SYDNEY DCP 2012	COMMENT
(4) A proposed increase in floor space outside the existing building envelope is not permitted where it would compromise the significant fabric and building elements.	The proposal involves construction of a larger theatre to allow for an increase in seating capacity. The new theatre is proposed to occupy the full site at No's 10 and 12 Nimrod Street.
(5) The provision of car parking within the existing building is not an acceptable justification for creating additional storeys above the height of the existing roof.	Not applicable.
(6) Where scope exists for a roof addition, it is to be complementary to, rather than dominate the original building; be simple in form; and able to be distinguished as new work.	The façades of the new infill building include salvaged brickwork at the base, interpreting the form of the existing building, with a simple curved concrete form rising above it to accommodate the upgraded theatre housed within.
(7) Additional storeys or roof additions must not result in the removal of the original roof structure where that roof is an essential component of the original building form.	The existing theatre building and adjacent terrace house has been modified many times throughout the years. The roof structures at both properties are not an essential component of the original building form.
(8) Alterations and additions are to: (a) retain the essential geometric form of the existing building when viewed from the public domain; and (b) complement the materials and articulation of existing façade elevations, including distinguishing features that occur at regular intervals.	The proposal generally retains the essential geometric form of the existing building when viewed from the public domain at the base. The new development interprets the brick facade elevations of the existing building.
(9) The original or significant pattern of windows and openings is to be retained.	The buildings have undergone many modifications over time including changes to windows and facade openings. No original or significant pattern of windows and openings remain.
(10) All original window frames, sashes and lights are to be retained on prominent elevations and on secondary elevations where considered critical to the significance of the building.	The window frames, sashes and lights are not considered critical to the significance of the building. Archival photography is recommended prior to demolition.
(11) Work to the facade is to: (a) retain original and significant elements and finishes including catheads, hoists and face brick detailing; (b) reinstate or restore missing original elements; (c) remove detracting elements; (d) minimise new elements; and (e) not obscure original elements.	Face brick will be carefully salvaged and reused in the facade treatment of the new theatre. Both buildings have been significantly modified throughout the years. Timber elements from the building will be salvaged for reuse in the project. Not applicable. Not applicable.
(12) Street level doors, gates or grilles should, where possible be set back a minimum of 200mm from the external face of the building, if not, detailed in a manner that makes them recessive.	Street level doors are set back from the external face of the building so they appear recessive.

CLAUSE SYDNEY DCP 2012	COMMENT
(13) External awnings, hoods and other overhanging devices are not to be attached to the building façades where they detract from the overall building form.	No external awnings or hoods are proposed.
(14) Face brick and sandstone must not be rendered, painted or otherwise coated.	The reused face brick is not proposed to be painted.
(15) Existing floor levels are to be maintained. Mezzanine or loft areas may be acceptable where they have minimal heritage impact, including on any significant structure and significant views into the interior.	Not applicable. The existing building is proposed to be demolished to allow for construction of an upgraded theatre which complies with BCA and DDA requirements. A memory of the existing building is retained in the salvaged brick work facade to minimise impacts of this change.
(16) Any internal subdivision and change to the layout of floor areas such as the creation new units, is to respect the existing pattern of windows and openings and have minimal heritage impact including on significant structure and views into the interior.	As above.
(17) Significant original elements, fabric and features that are characteristic of the former use of the building are to be: (a) retained; (b) generally not obscured by new elements; and (c) where retained, be adapted to meet contemporary needs or safety standards, alterations must be reversible and minimal, where possible.	The proposal includes the salvage and reuse of brickwork in the facade of the new theatre which references the existing building and reads as the dominant element. Timber elements from the original building will also be salvaged for potential reuse. Precast concrete has been chosen for the upper level addition to complement the salvaged brickwork. It is not possible to upgrade the existing building to meet current standards and improve the offerings of the theatre.
(18) Active street frontages in the form of a retail or studio space are encouraged to help screen visible car park levels and ventilation openings. Detracting blank street walls are to be avoided at street level.	No car parking is proposed. The recycled brickwork interprets the façades of the existing building on the site. No car park levels or ventilation openings are proposed towards Nimrod Street on ground level. A public entry to the theatre is located to the northern corner of the site while a small courtyard is proposed for the southern corner of the site, helping to activate the street frontage.
(19) Active frontages are to be integrated into the existing fabric to ensure that entrances and display windows do not alter the regularity of façade elements or compromise the external appearance.	Active frontages are integrated into the facade.
(20) Where existing or amalgamated sites contain significant buildings of a different character, form, size and finish which reflect former uses, this difference is to be retained.	The existing terrace house at 12 Nimrod Street has been modified over time which has resulted in a loss of significance. It is not possible to retain the terrace house form and achieve the required upgrades to the theatre.
(21) Existing painted signs that relate to the history of the building, or to the surrounding area are to be retained and kept visible where possible.	There are no existing painted signs of significance. Existing interpretation will be salvaged for reuse in the new building.

CLAUSE SYDNEY DCP 2012	COMMENT
<p>(22) Development proposals that relate to warehouse and industrial buildings with courtyards are to:</p> <p>(a) retain the courtyard at its existing size, with:</p> <p>(i) the buildings defining the courtyard and opening onto the courtyard at all levels; and</p> <p>(ii) the courtyard remaining open to sky (although a glazed roof structure may be acceptable if it does not obscure views in and out);</p> <p>(b) maximise opportunities for active uses within the buildings defining the courtyard and within the courtyard itself; and</p> <p>(c) preserve original vertically aligned openings to the courtyard and replace later unsympathetic openings with reconstructed original or similarly proportioned openings.</p>	<p>The existing building does not contain a courtyard.</p>
<p>3.10.5 Public and community buildings older than 50 years</p>	
<p>Objectives</p> <p>(a) Ensure alterations, additions and change of use of current and former public and community buildings:</p> <p>(i) are sympathetic to the existing fabric and design of the building and do not compromise its particular qualities from all periods of construction;</p> <p>(ii) allow for and encourage, the ongoing public or community use for which the building was constructed;</p> <p>(iii) retain significant fabric and building elements; and</p> <p>(iv) retain significant internal features and spaces.</p>	<p>The existing two storey brick building at 10 Nimrod Street terminates the row of terrace houses, provides a landmark within the streetscape and is of social significance related to its use as a theatre for the past 50 years. The proposal retains this use and extends it to the neighbouring site at 12 Nimrod Street. Unfortunately, the existing building is no longer capable of housing the functions required for a contemporary, compliant theatre. The proposal involves construction of a new theatre on the expanded site which seeks to retain a sense of the DNA of the original theatre. This is achieved by reusing salvaged brickwork in the façades of the new infill building and by adopting a similar seating arrangement in the theatre.</p>
<p>Provisions</p> <p>(1) Alterations and additions to current and former public and community buildings are to retain:</p> <p>(a) significant external fabric or building elements including original design details like lead lighting, doors, windows and joinery;</p> <p>(b) significant internal fabric and building elements including original design details, structural elements associated with roofing, fixed joinery, galleries, lighting and fixtures; and</p> <p>(c) sufficient evidence of the significant internal layout to enable interpretation.</p>	<p>The proposed new infill building retains the existing significant use of the site at 10 Nimrod Street and extends it to include 12 Nimrod Street. This is required to create a state of the art universally accessible and compliant theatre with an increased capacity.</p> <p>The primary brickwork elements of the former stables building are interpreted in the new facade, providing a tangible link to the past use of the site. Timber elements such as the stable doors, beams and columns will also be salvaged for potential reuse in the new building.</p> <p>Interpretation will be included within the public spaces of the new theatre building.</p>
<p>(2) External stone and face brickwork are not to be painted over or otherwise obscured.</p>	<p>External face brickwork is proposed to be salvaged and reused in the facade of the new infill building. The brickwork will remain unpainted.</p>
<p>(3) New colour schemes are to reflect the most significant design period of the building.</p>	<p>A neutral colour scheme is proposed that is sympathetic to the conservation area.</p>

8.0

Assessment of Heritage Impact

8.1 Assessment against Heritage Listings

8.1.1 LEP Listing - Barcom Avenue Heritage Conservation Area (C11)

The site is located within the Barcom Avenue Heritage Conservation Area which is of local heritage significance. The table below assesses the impact of the proposal against the statement of significance contained in the listing.

SYDNEY LEP HERITAGE LISTING BARCOM AVENUE HERITAGE CONSERVATION AREA		
CRITERION	ASSESSMENT OF SIGNIFICANCE	COMMENT
SHR Criteria a) [Historical significance]	<p>Including part of Thomas West's Barcom Glen, the area represents a later residential subdivision with a high proportion of industry reflecting early use of the land. The subdivision of Craigend Estate illustrates the developmental overlays that follow the incremental subdivision of Darlinghurst's villa estates.</p> <p>Meets this criteria at a local level.</p>	<p>The new infill building references the former stables building located on the site through the use of recycled brickwork in the facade.</p> <p>The proposed development will have minimal impact on the historic overlays related to the subdivision of the Craigend Estate following the incremental subdivision of the Darlinghurst villa estates. Interpretation related to the history and significance of the place will be included in the public spaces of the theatre.</p>
SHR Criteria b) [Associative significance]	Not applicable.	
SHR Criteria c) [Aesthetic significance]	<p>Rows of highly intact terrace housing overlaid on sloping topography create coherent and picturesque streetscapes. The area incorporates a diverse range of housing types from 1850s - 1930s.</p> <p>Meets this criteria at a local level.</p>	<p>The terrace house at 12 Nimrod Street has been modified over time and is no longer intact. Constructed as a weatherboard house circa 1880, the house was clad in brickwork in the 1970s, which has resulted in a loss of significance.</p> <p>The design of the proposed infill building responds to the context of the heritage conservation area in terms of character, scale, form, materials and colours and detailing. The proposal bookends the rows of highly intact terrace houses that run along Caldwell Street and will have minimal heritage impact on the aesthetic significance of the conservation area.</p>
SHR Criteria d) [Social significance]	-	
SHR Criteria e) [Research potential]	-	
SHR Criteria f) [Rarity]	-	

SYDNEY LEP HERITAGE LISTING BARCOM AVENUE HERITAGE CONSERVATION AREA		
CRITERION	ASSESSMENT OF SIGNIFICANCE	COMMENT
SHR Criteria g) [Representativeness]	<p>Representative of a later wave of residential development of East Sydney, with mix of industrial sites.</p> <p>Meets this criteria at a local level.</p>	<p>The history of residential development in East Sydney is not affected by the proposal. The proposed development will retain the use of the site as a theatre. Bricks from the former stables building at 10 Nimrod Street will be salvaged and reused in the facade of the new infill building to minimise the impact of the development. The terrace at 12 Nimrod Street has been altered and is no longer considered representative.</p>
Integrity/Intactness	<p>The area retains a high degree of integrity.</p>	<p>The existing buildings on the site have been extensively modified in the past which has led to a loss of original fabric and hence integrity.</p> <p>Removal of the existing buildings will have a minor impact on the integrity and intactness of the Heritage Conservation Area however, these impacts will in part be mitigated through reuse of salvaged materials in the new façades.</p>
Statement of Significance	<p>The Barcom Glen Estate was a predominantly industrial and rural area until the nineteenth century, subdivided for residential development later than surrounding districts. It therefore has historical significance for its ability to evidence the industrial history of Darlinghurst. The area also has high aesthetic values for its fine coherent streetscapes representing middle class, residential development of the late Victorian period, Federation and inter-war periods. The topography and street plantings enhance the picturesque qualities of the highly intact streetscapes.</p>	<p>The proposal respects the historical development patterns of Darlinghurst and the ability of the area to evidence its industrial history. The topography and plantings, that enhance the picturesque streetscapes, are not affected by the proposal.</p> <p>Although the proposal involves removal of the existing structures on 10 and 12 Nimrod Street, the historic theatre use of the site is maintained and enhanced. The proposed infill development will facilitate the expansion and upgrade of a new purpose-built theatre that meets all the safety requirements, accessibility regulations and building compliance.</p> <p>The new infill development has been carefully designed to reference the character of the SBW Stables Theatre building in its late Victorian setting through the use of salvaged brickwork that references the buildings form. The scale, form, materials and colours and detailing of the new elements have been carefully considered to minimise impacts of the development on the significance of the Barcom Avenue Heritage Conservation Area.</p>

Barcom Avenue Heritage Conservation Area (C11) COS Policy Recommendations

The listing for the Barcom Avenue Heritage Conservation Area contains management recommendations, which are discussed in relation to the proposal in the following table.

BARCOM AVENUE HERITAGE CONSERVATION AREA (C51)	
POLICY RECOMMENDATIONS	COMMENT
<p>1. Protection of Significance</p> <p>(a) Subdivision</p> <ul style="list-style-type: none"> - Retain Victorian subdivision - Do not allow amalgamation of sites 	<p>The Victorian subdivision is unaffected.</p> <p>The Site Specific Planning Proposal does not involve amalgamation of sites, however the Concept Proposal involves construction of a new infill building spanning 10 and 12 Nimrod Street. The existing terrace at 12 Nimrod Street, on the corner of Caldwell Street, has been modified over time which has resulted in a loss of integrity and hence significance. Combining the two sites to form a triangle in plan provides enough space to accommodate an upgraded theatre and will have minimal impact on the significance of the heritage conservation area. Interpretation related to the original subdivision will be included in the foyer of the theatre.</p>
<p>(b) Key Period Significant (Contributory) Development:</p> <ul style="list-style-type: none"> - Retain 1-3 Storey Victorian terraces - Retain integrity of cohesive terrace groups. - Retain Victorian Inter-war Public Buildings - Retain Interwar residential development - Retain Scale - Maintain building alignment - Retain form - Retain finishes and details including now rare slate roofing - Reinstate verandahs, front fences, lost detail - Protect intact rear lane - Additions to rear not to exceed ridge height and retain original roof form - Promote public buildings - Use varying colour schemes for terrace groups (Leichhardt Street groups). 	<p>Not applicable.</p> <p>10 and 12 Nimrod Street are not identified as Contributory to the Barcom Avenue Heritage Conservation Area.</p> <p>Nevertheless, the proposed infill development has been carefully designed as a sympathetic building which complements the scale, form and finish of adjacent significant development. The proposal also maintains the use as a public theatre and retains the right of way at the rear of the subject site.</p>
<p>(c) Other Significant Development</p> <ul style="list-style-type: none"> - Retain Federation/inter-war terraces - Retain industrial development pre 1940s - Do not exceed scale - Limit redevelopment to existing volume 	<p>Not applicable.</p> <p>10 and 12 Nimrod Street are not identified as Contributory to the Barcom Avenue Heritage Conservation Area.</p>

BARCOM AVENUE HERITAGE CONSERVATION AREA (C51)	
POLICY RECOMMENDATIONS	COMMENT
<p>2. Redevelopment of Non Contributing Sites</p> <ul style="list-style-type: none"> - Encourage reinterpretation of Victorian Subdivision - Respect scale and form of significant development - Respect building line of significant development - Encourage rendered and painted finishes - Encourage contemporary detail - Provide landscape screening - Limit carparking access from street 	<p>The sites are identified as having a Neutral contribution to the conservation area.</p> <p>The proposal involves removal of the existing buildings at 10 and 12 Nimrod Street and construction of a new infill building to provide a purpose-built theatre that is universally accessible with additional rehearsal and ancillary spaces.</p> <p>To minimise impacts, the facade of the proposed infill development has been designed to incorporate salvaged brickwork which interprets the scale and form of the existing building including the parapet line. The roof addition rises above this and adopts a curved form to soften its impact and to signify it as a contemporary intervention.</p> <p>The simple palette of materials, including salvaged face brickwork and precast concrete, as well as the contemporary detailing of the new theatre building will work in harmony with the materiality of significant development within the Heritage Conservation Area.</p> <p>The proposed development is screened on the southern corners of the triangular site which adjoins the grouping of terraces along Caldwell Street and rear laneway.</p>
<p>3. Enhance Significance of Area</p> <ul style="list-style-type: none"> - Establish/maintain and enhance street planting to unify streetscapes - Encourage render/paint finishes to detracting developments - Discourage reproduction of Victorian detail in contemporary development - Interpret villa estates - Enhance vistas - Provide landscape screening to detracting sites, ie hospital, Kings Cross Road and Barcom Avenue South (east end) 	<p>Where possible, existing trees along Nimrod Street are retained by the proposal.</p> <p>The simple palette of materials complements the surrounding development.</p> <p>The proposal does not reproduce any Victorian detailing; the design of the new theatre building is contemporary, yet interprets the simple forms of the existing building through the reuse of salvaged brickwork.</p> <p>Interpretation of villa estates is outside the scope of the project.</p> <p>Vistas to and from the site are enhanced by the proposal. The openings on the northern corner of the site encourage views between Nimrod and Craighend Streets.</p> <p>Not applicable.</p>

BARCOM AVENUE HERITAGE CONSERVATION AREA (C51)	
POLICY RECOMMENDATIONS	COMMENT
<p>4. FSR and Height Controls</p> <p>Controls to reflect desired future character of area.</p> <ul style="list-style-type: none"> - Revise height controls to area bounded by Barcom, Boundary and West Streets Viaduct and block bound by Liverpool Street and Little Surrey Street to reflect scale of significant development and to encourage retention of significant development. - Revise FSR controls to area bounded by Barcom, Boundary and West Streets Viaduct and block bound by Liverpool Street and Little Surrey Street to encourage retention of significant development. - Restrict height control along Surrey Street to 9m. 	<p>10 and 12 Nimrod Street are not located within the areas subject to revised FSR and Height controls however, the scale of the proposed infill building is considered sympathetic to that of its surroundings. The proposed development is generally contained within the existing prescribed height limit with the exception of the new roof structure, which is required to be raised to create a state-of-the-art theatre with an increased seating capacity. The planning proposal seeks to amend the height of the building to accommodate the height of the roof structure.</p>
<p>5. Boundary Adjustment</p> <ul style="list-style-type: none"> - Maintain current Conservation Area boundary 	<p>The boundary for the Barcom Avenue Heritage Conservation Area is unchanged by the proposal.</p>
<p>6. Contributory buildings</p> <ul style="list-style-type: none"> - These should be retained and conserved. A Heritage Assessment and Heritage Impact Statement should be prepared for contributory buildings prior to any major works being undertaken. There shall be no vertical additions to such buildings and no alterations to the façade of the building other than to reinstate original features. Any additions and alterations should be confined to the rear in areas of less significance, should not be visibly prominent and shall be in accordance with the relevant planning controls. 	<p>Not applicable.</p> <p>The subject site does not contain Contributory buildings.</p>
<p>7. Neutral and detracting buildings</p> <ul style="list-style-type: none"> - These should where possible be enhanced. Replacement of such buildings should be of a sympathetic scale and character, and in accordance with the infill provisions of the relevant planning controls. 	<p>The subject site is currently occupied by buildings that are graded as Neutral which are proposed to be removed for the construction of a new infill development which is sympathetic in scale to other built form in the vicinity. The new building has been carefully designed to enhance the presentation of the site within the conservation area and to provide an upgraded theatre venue for the Griffin Theatre Company.</p> <p>The character of the proposed infill building is harmonious with those that represent the industrial history of the conservation area. This is reflected in the material selection for the facade which combines a mix of reused salvaged bricks and precast concrete. This key design approach points to the historic significance of the area and it's ability to evidence its industrial development.</p>

8.2 Assessment against Statements of Significance

8.2.1 10 Nimrod Street

10 NIMROD STREET		
CRITERION	ASSESSMENT OF SIGNIFICANCE	COMMENT
SHR Criteria a) [Historical significance]	Originally the site of a stables, the existing building had a variety of uses prior to its conversion to a theatre in 1970. The site has local historical value as a theatre which showcases innovative Australian plays.	<p>The proposed infill building includes salvaged brickwork in the facade which references the form and materiality of the existing former stables building.</p> <p>The name SBW Stables Theatre is retained.</p> <p>The new theatre will continue to showcase innovative Australian plays, continuing the historical tradition established on the site over 50 years ago.</p>
SHR Criteria b) [Associative significance]	The site has special associations with John Bell, Ken Horler and Richard Wherrett and their friends who established the building as the Nimrod St Theatre in 1970, Bob Ellis and Anne Brooksbank who purchased the building in 1976 and the Griffin Theatre Company who took over occupancy as the resident theatre company in 1979. It also has special associations Dr Rodney Seaborn who established the Seaborn, Broughton & Walford Foundation in 1986 to guarantee the venue's future for the Griffin Theatre Company, as a low cost theatre which showcases innovative Australian plays.	Special associations with people instrumental in the creation of the theatre will be interpreted in the foyer of the building.
SHR Criteria c) [Aesthetic significance]	-	Although the existing building does not meet this criterion, it's strong form bookends the row of terrace houses and will be interpreted in the new design. Reuse of salvaged brickwork retains the materiality and character of the existing building, which is associated with its use as the SBW Stables Theatre and reinforces this concept.
SHR Criteria d) [Social significance]	The site has a strong, ongoing association with the Griffin Theatre Company who took over occupancy of the building from 1979. It was also known as the 'Nimrod St Theatre' between 1970-1974, 'The Stables Theatre' in 1976, was briefly known as 'The Loft', and finally the 'SBW Stables Theatre' from 1986 until the present time. It also has special associations with Australian play writers, actors and audiences.	The proposed infill building provides an improved theatre for the Griffin Theatre Company, who will continue to produce innovative Australian plays on the site.
SHR Criteria e) [Research potential]	-	
SHR Criteria f) [Rarity]	-	

10 NIMROD STREET		
CRITERION	ASSESSMENT OF SIGNIFICANCE	COMMENT
SHR Criteria g) [Representativeness]	-	
Integrity/Intactness	-	
Statement of Significance	<p>The site at 10 Nimrod Street has historical significance for its past uses as a stable and has social significance associated with its use as a theatre over the past 50 years.</p> <p>The Stables Theatre has special associations with John Bell, Ken Horler and Richard Wherrett and their friends who established the building as the Nimrod St Theatre in 1970, Bob Ellis and Anne Brooksbank who purchased the building in 1976 as well as the Griffin Theatre Company who took over occupancy as the resident theatre company. The site also has special associations with many play writers, actors and their audiences, along with the philanthropists who supported them including Dr Rodney Seaborn who established the Seaborn, Broughton & Walford Foundation in 1986 to guarantee the venue's future for the Griffin Theatre Company, as a low cost theatre which showcases innovative Australian plays.</p> <p>The existing building is a simple, utilitarian, two storey brick building which does not meet the guidelines for inclusion as a heritage item for its aesthetic values, rarity or representativeness.</p>	<p>The Site Specific Planning Proposal retains and extends the historic use of the site as a theatre, respecting the site's historic, associative and social significance.</p> <p>The proposed infill building provides a new state of the art, universally accessible theatre which will enable the Griffin Theatre Company to continue the historic tradition of showcasing innovative Australian plays on the site into the future. The use of salvaged brickwork in the facade, which references the existing SBW Stables Theatre building, interprets the history of the site and ensures that the new building fits into the character of the existing streetscape.</p> <p>Internally, the intimate layout of the existing SBW Stables Theatre, which is integral to the experience of the building in terms of the relationship between the audience and the stage, is retained and improved despite the proposed expansion.</p> <p>Associations with significant people will be interpreted within the publicly accessible foyer.</p>

8.2.2 12 Nimrod Street

12 NIMROD STREET		
CRITERION	ASSESSMENT OF SIGNIFICANCE	COMMENT
Statement of Significance	<p>The existing terrace house at 12 Nimrod Street, Darlinghurst has been substantially altered and does not meet the guidelines for inclusion as a heritage item.</p>	<p>The existing terrace house has been so altered that it could be considered Detracting within the conservation area.</p> <p>Interpretation relating to the original terrace house on this site will be included in the foyer of the theatre.</p>

8.3 Discussion of Heritage Impacts

This following discussion of heritage impacts uses to the terms *Major*, *Moderate*, *Minor*, *Negligible* and *Neutral* to describe their extent.

These terms are based on the *ICOMOS Guidelines on Heritage Impact Assessments* (2011) and is in accordance with Heritage NSW guidelines for Statements of Heritage Impact.

GRADING	DEFINITION
Major	<p>Actions that would have a long-term and substantial impact on the significance of a heritage item. Actions that would remove key historic building elements, key historic landscape features, or significant archaeological materials, thereby resulting in a change of historic character, or altering of a historical resource.</p> <p>These actions cannot be fully mitigated.</p>
Moderate	<p>Actions involving the modification of a heritage item, including altering the setting of a heritage item or landscape, partially removing archaeological resources, or the alteration of significant elements of fabric from historic structures.</p> <p>The impacts arising from such actions may be able to be partially mitigated.</p>
Minor	<p>Actions that would result in the slight alteration of heritage buildings, archaeological resources, or the setting of an historical item.</p> <p>The impacts arising from such actions can usually be mitigated.</p>
Neutral	<p>Actions that would have no heritage impact.</p>
Positive	<p>Actions that would be beneficial to the significance of heritage buildings, archaeological resources, or the setting of an historical item.</p>

Table 10: Terminology for assessing the severity of heritage impacts.

Source: Based on ICOMOS, *Guidance on Heritage Impact Assessments for Cultural*

PROPOSAL	DISCUSSION OF HERITAGE IMPACT	HERITAGE IMPACT
Infill Development		
Excavation and/or demolition		
Removal of extant structures on the subject site.	<p>The existing buildings located at 10 and 12 Nimrod Street are not Heritage Items, do not meet the criterion for heritage listing and are identified as having a Neutral contribution to the Barcom Avenue Heritage Conservation Area. Removal of these structures will have minimal impact on the heritage significance of the Conservation Area and the existing streetscape.</p> <p>The proposed demolition will facilitate construction of a purpose-built, state of the art theatre which maintains the historic use of the site and complies with the relevant BCA requirements and DDA regulations. A memory of the SBW Stables Theatre building at 10 Nimrod Street is retained through the reuse of salvaged materials in the facade of the new infill building.</p>	<p>Neutral</p> <p>Positive</p>
Salvage and reuse opportunities		
Interpretation incorporated in the design of the new façades.	<p>Incorporating salvaged brickwork into the design of the new theatre façades provides the opportunity to interpret the history of the site and retain its character. Other salvage and reuse opportunities include:</p> <p>10 Nimrod Street</p> <ul style="list-style-type: none"> – Metal ventilation grilles in the façades. – Timber elements associated with the stables including barn doors, beams and columns. <p>12 Nimrod Street</p> <ul style="list-style-type: none"> – Remnant timber weatherboards from the side elevations of the building. 	Positive
Basement Levels		
Excavation and/or demolition		
Excavation below the existing ground level.	The proposed excavation is contained within the boundary of the subject site. A Structural Engineering and Geotechnical Report will be prepared to accompany the Development Application. These will outline appropriate construction methodologies that ensure the structural integrity of adjacent buildings is maintained throughout demolition, excavation and construction.	Minor
New works		
New basement level.	The construction of a new basement will provide much needed additional area for a rehearsal space which connects to a sunken courtyard and required amenities with minimal impact on the surrounding conservation area. This space has been designed so that it is flexible and can be used to provide additional office space if required.	Minor
New passenger lift and egress stairs.	<p>The existing theatre does not have a passenger lift. The new lift and egress stairs are required to provide universal access and compliant egress to the upgraded theatre.</p> <p>The vertical circulation for the new theatre is located along Nimrod Street within the footprint of the existing building. The new lift is articulated as a simple concrete form which wraps around the new fire stairs and reads as a contemporary element which complements the salvaged brickwork.</p>	<p>Positive</p> <p>Minor</p>

PROPOSAL	DISCUSSION OF HERITAGE IMPACT	HERITAGE IMPACT
Ground Floor		
Entrance forecourt	<p>The form of the new building is pulled back from the corners of the site to provide an entrance forecourt at either end towards Nimrod Street. The northern forecourt extends towards Craigend Street and is integrated into the public domain, whilst the secondary entrance to the south is screened by a small garden to respect the residential setting of the neighbouring terraces on Caldwell Street.</p>  <p style="text-align: center;">Craigend View Nimrod View</p> <p>Figure 200: View of the main entrance from Craigend Street and the secondary entrance on Nimrod Street. Source: TZG Architects, 2022.</p>	Minor
New foyer and bar	<p>The ground floor of the new theatre building has been designed as a flexible foyer space with direct access to the street which celebrates the experience of going to the theatre.</p>	Neutral
Interpretation Panels	<p>The off form concrete panels on the western elevation of the new theatre building reference the former stables at 10 Nimrod Street. Timber elements associated with the stables including the barn doors are incorporated into a pattern motif which is proposed to be cast into the concrete panels.</p>  <p>Figure 201: Proposed interpretation panels on Nimrod Street. Source: TZG Architects, 2022.</p>	Positive

PROPOSAL	DISCUSSION OF HERITAGE IMPACT	HERITAGE IMPACT
Upper Levels		
Main theatre with stepped seating.	The new theatre is located on the upper levels at the centre of the triangular site to maintain the opposing seating and stage configuration, characteristic of the existing SBW Stables Theatre. Equitable access for patrons and actors is provided, with additional balcony seating on the upper level of the theatre. The design of the new theatre aims to retain a memory of the intimacy of the existing performance space whilst increasing the seating capacity and improving its operation.	Positive
Additional height	The upgrades to the theatre require a raised roof height. The form of this addition has been curved away from the street to minimise visual impacts on the streetscape within the context of the Barcom Avenue Heritage Conservation Area whilst providing the required internal volume.	Minor
Dedicated back stage area including dressing room and accessible amenities and safe access to Biobox.	The existing theatre has substandard back stage facilities. The proposal includes a dedicated back stage area with separate entrance, crossover access to the stage, dressing rooms and accessible amenities meaning the theatre will be able to operate on the site in the future in a compliant manner.	Minor
New services and equipment.	The upper level of the theatre contains services and equipment to the north. The location of these services, concealed behind the brick facade, has been selected to minimise their visual impact.	Minor
External walls		
Salvaged brickwork	<p>The proposal includes the reuse of salvaged bricks from the existing SBW Stables Theatre building. The brickwork in the new facade interprets the elevation of the former stables building, referencing the history of the site, with a distinctly contemporary addition over to house the improved theatre offering.</p>  <p>Figure 202: West Elevation of new infill building reusing salvaged brickwork (1). Source: TZG Architects, 2022.</p>	Positive

PROPOSAL	DISCUSSION OF HERITAGE IMPACT	HERITAGE IMPACT
<p>New concrete cladding.</p>	<p>A simple palette of materials is proposed for the facade of the new infill building which is compatible with its historic context. Concrete has been chosen as the material for the contemporary elements of the facade to signify the upgraded theatre within, and to minimise acoustic impacts on, neighbouring residential properties.</p> <p>Off form concrete panels rise up from the centre of the salvaged brick facade and curve towards the centre of the site, away from the street, to soften their visual impact. The use of concrete also provides the opportunity to interpret aspects of the history of the site on the facade.</p>  <p>Figure 203: West Elevation of new infill building incorporating off form concrete panels (2). Source: TZG Architects, 2022.</p>	<p>Minor</p> <p>Positive</p>
<p>Roof</p>		
<p>New roof.</p>	<p>The proposed new roof is setback from the boundaries of the triangular site and generally concealed behind the curved concrete cladding. The new roof provides the opportunity to install renewable energy systems, including photovoltaic panels whilst minimising their visual impacts on the existing streetscape and Heritage Conservation Area.</p>  <p>Figure 204: Environmentally Sustainable Design Principles. Source: TZG Architects, 2022.</p>	<p>Minor</p>

8.4 Heritage Impact Assessment

The existing buildings located at 10 and 12 Nimrod Street are not listed as Heritage Items on Schedule 5 of Sydney LEP 2012. Located within the Barcom Avenue Heritage Conservation Area, the buildings are shown to make a 'Neutral' contribution on the DCP map.

General - City of Sydney Council Policies

- The Planning Proposal seeks to formalise the existing historic use of the site at 10 Nimrod Street as a place of entertainment, respecting the site's historic, associative and social significance, and extend this permitted use to the adjoining site at 12 Nimrod Street in order to facilitate construction of an upgraded theatre.
 - This Heritage Assessment and Statement of Heritage Impact will accompany any future Development Application in accordance with Council requirements.
 - Demolition of the existing buildings will have minimal impact on the heritage significance of the conservation area.
 - The Concept Proposal generally complies with the management recommendations contained in the heritage listing for the Barcom Avenue Heritage Conservation Area, Sydney LEP 2012 and Sydney DCP 2012.
 - The proposed infill building provides a new state of the art, universally accessible, theatre which will enable the Griffin Theatre Company to continue the historic tradition of showcasing innovative Australian plays on the site into the future.
 - The siting, bulk, form, scale, materials and roofscape of the proposed infill building have been carefully considered to minimise impacts on the historic context of the heritage conservation area. The concrete addition rises up to accommodate the functions of the new theatre. This element is curved away from the street to reduce its apparent bulk and scale and to respond to nearby contributory buildings in a sympathetic, yet contemporary, manner. Roof plant is set back from the boundaries to minimise its visual impact.
 - The use of salvaged brickwork in the facade, which references the existing SBW Stables Theatre building, interprets the history of the site and ensures that the new building fits into the character of the existing streetscape of the conservation area. Interpretation of timber elements associated with the former stables building are also incorporated into the design of the new facade on Nimrod Street.
 - The proposal is supported and recommended for approval.
- The following aspects of the proposal respect or enhance the heritage significance of the item or conservation area for the following reasons:*
- The existing building at 10 Nimrod Street has been used as a theatre for over 50 years. The proposal to include 'entertainment facility' as a permitted use within the current zoning will ensure this historic use and public access to the site is maintained.
 - Salvage and reuse of the brickwork from the former stables building in the new theatre façades interprets the history of the site and ensures that the building fits into its historic context.
 - The proposed concrete addition curves away from the street in order to minimise its apparent bulk and scale and to respond to the neighbouring context. The former stable doors are also referenced at street level.
 - The improved facilities offered by the proposed new theatre building will ensure that this historic use can continue to operate on the site. The proposal will ensure the ongoing contribution of the theatre as a small, but vibrant, venue which supports innovative Australian productions.
 - Housing the new rehearsal space and accessible patron amenities in a new basement reduces the height, bulk and scale of the proposed new infill building.
 - Locating the foyer and bar on ground level, with the theatre over retains the original disposition of primary spaces within the building and provides opportunities for publicly accessible interpretation.
 - Upstairs, the design of the new theatre aims to retain a memory of the intimacy of the existing performance space whilst increasing the seating capacity and improving its operation.
 - The proposed development retains the name 'SBW Stables Theatre' to celebrate both the original use of the site and the rich theatrical history of the past 50 years.

The following aspects of the proposal have an impact on heritage significance. The reasons are explained as well as the measures to be taken to minimise impacts:

- Although the existing buildings are not heritage items, the removal of the brick building at 10 Nimrod Street will have a minor impact on the existing streetscape within the Barcom Avenue Heritage Conservation Area. To mitigate this, salvaged brickwork from the former stables building is proposed to be reused in the new infill building, respecting the character of the conservation area. Archival photographic recording is recommended prior to demolition.
- The proposed excavation below ground level could be considered to have a negative impact on the significance of the site; however, the proposed area of excavation is contained within the site boundaries and will be conducted in accordance with detailed structural and geotechnical specifications to minimise the potential for impacts. A watching brief for an archaeologist during construction is also recommended.
- The height of the proposed infill building extends above the existing buildings to provide sufficient height and volume for the new theatre. The concrete addition rises above the salvaged brick base and curves away from the street to reduce its apparent bulk and scale and to mitigate the impacts of this addition to the streetscape and adjoining properties. Roof plant is set back from the boundaries to minimise visual impacts.
- Use of concrete for the addition may be considered inappropriate; however, it includes an interpretive treatments which references the former stable doors set into salvaged brickwork at the base. This ensures that the character of the conservation area is respected at street level. A simple palette of materials and colours are proposed for the infill building which are neutral in tone and hue to ensure that they are compatible with those used in the conservation area.

The following sympathetic solutions have been considered and discounted for the following reasons:

- The proposed upgrades are not possible within the spatial constraints of the existing building which include new theatre spaces, a rehearsal space, accessible lift and increased seating capacity.
- Options were considered that proposed an upper level of residential development, in keeping with the current zoning and relocation of the theatre to the basement. However, this would have resulted in issues with stage access on this compact, triangular site and was hence discounted.
- Of the options considered, the final proposal, which retains the foyer and theatre spaces in their current configuration, is considered to have the least heritage impact.
- The new infill building could have been designed in a faux heritage style, however this would have confused the fabric and made interpretation by future generations difficult. The contemporary language proposed for the new theatre building, which incorporates salvaged brickwork and includes a memory of the former SBW Stables Theatre building, is supported.

Change of Use

The building at 10 Nimrod Street has operated as a theatre for the past 50 years. The Site Specific Planning Proposal seeks to include 'entertainment facility' as an additional permitted use for the sites at 10 and 12 Nimrod Street.

Heritage impact of change of use.

Has the advice of a heritage consultant or structural engineer been sought? Has the consultant's advice been implemented?

The proposal has been developed in collaboration with TZG Heritage.

Does the existing use contribute to the significance of the heritage item?

The building at 10 Nimrod Street has operated as a theatre for the past 50 years. This use contributes to the historical, associative and social significance of the site. The proposal seeks to formalise this existing historic use and extend this permitted use to the neighbouring property at 12 Nimrod Street.

12 Nimrod Street has been used for residential purposes since the 1880s; however, the existing freestanding terrace house has been substantially altered which has resulted in a loss of fabric and hence significance. The site is located at the bend of Caldwell Street and, together with 10 Nimrod Street, makes up a neat triangle in plan. The proposal to extend the entertainment facility use to include this site will have minimal impact on the significance of the heritage conservation area.

Why does the use need to be changed?

10 and 12 Nimrod Street are currently zoned R1 General Residential. The proposal to include 'entertainment facility' as an additional permitted use would allow construction of an upgraded new theatre for the Griffin Theatre Company.

What changes to the fabric are required as a result of the change of use?

Removal of the existing structures at 10 and 12 Nimrod Street is necessary to facilitate the construction of a purpose-built state of the art theatre that complies with BCA and DDA requirements.

What changes to the site are required as a result of the change of use?

The change of use would facilitate construction of a new theatre building spanning both sites. The public entrance is proposed to the north, adjacent to where the footpath is widened to form a paved area. The proposed secondary entrance from Nimrod Street is screened by a small garden to reflect the residential setting on Caldwell Street. The right of way along the eastern boundary is retained by the proposal.

Excavation and demolition

The proposal involves the demolition of the existing buildings located as 10-12 Nimrod Street. Bulk excavation is proposed below the existing ground level to allow for the construction of a new basement level to accommodate a rehearsal space and required amenities.

Heritage impact of demolition.

Is the demolition essential for the heritage item to function?

The proposed upgrades are not possible within the spatial constraints of the existing buildings. Demolition of the existing buildings and construction of a new infill building are required to provide a state of the art universally accessible theatre on the site with improved facilities.

Are important features of the item affected by the demolition (e.g. fireplaces in buildings)?

The buildings are not listed as heritage items; however the brick facades of 10 Nimrod Street contribute to the character of the conservation area. The proposal includes salvage of brickwork for reuse in the design of the new theatre façades. Other opportunities to salvage materials for reuse include the metal ventilation grilles and timber elements such as barn doors, columns and beams from 10 Nimrod Street.

Is the resolution to partially demolish sympathetic to the heritage significance of the item?

Not applicable. The buildings are not listed as heritage items and have been substantially modified over time leading to a loss of fabric and hence significance. The primary significance of 10 Nimrod Street relates to its use as a theatre. The proposed areas of demolition and excavation are essential to the upgrade and expansion of the theatre offering on the site.

If the partial demolition is a result of the condition of the fabric, is it certain that the fabric cannot be repaired?

Not applicable.

New Services

The site has mains water, electrical and gas supply. These services will need to be modified to suit the design of the new infill building. This work includes the provision of new electrical fittings, security sensors, general power outlets, smoke detectors, theatre lighting, air conditioning and sanitary fittings and fixtures.

Detailed services design will aim to minimise heritage impacts.

Heritage impact of new services.

How has the impact of the new services on the heritage significance of the item been minimised?

The new services have been carefully located behind the new façades on Level 1 and on the roof top, set back from the boundaries, to minimise visual impacts on the existing streetscape within the Barcom Avenue Heritage Conservation Area.

Are any of the existing services of heritage significance? In what way? Are they affected by the new work?

No. The services with the building have evolved over time to suit its use as a theatre.

Has the advice of a conservation consultant (e.g. architect) been sought? Has the consultant's advice been implemented?

TZG Heritage have been engaged as the heritage consultants and have been involved in the project since its inception.

Are any known or potential archaeological deposits (underground and under floor) affected by the proposed new services?

There is no known archaeology on either property; however, a watching brief for an archaeologist is recommended during construction.

New Infill Building

The proposal involves construction of a new purpose-built theatre building which spans the site from 10 to 12 Nimrod Street.

How is the impact of the new infill building minimised on the heritage significance of heritage items in the vicinity and the heritage conservation area?

- The new infill building retains the historic use of the site as a theatre and the 'SBW Stables Theatre' name, respecting the historical and social associations with the place.
- Incorporating salvaged face brickwork and metal ventilation grilles from the existing building as well as timber elements associated with the original stables building in the design of the new façades provides an opportunity to interpret the history of the site and to respect the character of the conservation area.
- The form of the new building is setback from the corners of the site to create two new entries into the theatre from Nimrod Street with direct access into the public foyer. The entrance to the north is integrated into the public domain whilst the southern entry is screened by a small garden to reflect the residential setting on Caldwell Street.
- The concrete rooftop addition curves away from the street to minimise its apparent bulk and scale and to relate to the roofscape of neighbouring historic development.
- Roof plant is contained within a curved enclosure and set back from the boundaries to minimise visual impacts.
- A simple palette of materials and colours are proposed for the new elements which are similar in hue and tone to traditional colour schemes to minimise the impact of the new building within the conservation area.
- The impact of the new building has been minimised through careful design that respects the historic context of the site in terms of scale, form, setbacks, materials and colours and detailing.

Design In Context

The proposed redevelopment of the site is considered appropriate in terms of the NSW Heritage Office *Design In Context* guidelines as set out below:

Character

The immediate context of the site comprises residential buildings which range from two storey Victorian terrace houses on Caldwell Street and low rise apartments on Nimrod Street. This is a reflection of the development of the area and contributes to the significance of the Barcom Avenue Heritage Conservation Area; a predominantly industrial area that was subdivided in the nineteenth century for residential development.

The subject site comprises a triangular piece of land spanning two lots. The brick facades of the two storey building located at 10 Nimrod Street contributes to the character of the area and bookends the rows of Victorian terraces that run up Caldwell Street. Since 1970, this building has been adapted for use as a theatre. The freestanding two storey house at 12 Nimrod Street has been substantially altered and is separated from the grouping of terrace houses on Caldwell Street, minimising its value to the conservation area.

The proposal maintains the historic theatre use of the site, which contributes to the livelihood of the neighbourhood, and proposes the expansion of this use across both sites.

Salvage and reuse of the brickwork in the facade of the new building, which references the former stables building, respects the character of the conservation area and minimises the impact of the development.

Scale

The scale of the new infill building is considered appropriate. The concrete addition required to house the theatre addition is set in from the ends of the building and curves away from the street to reflect the sloping roofs of neighbouring terrace houses and to minimise its apparent bulk. Roof plant is set back from the boundaries to minimise visual impacts.

With the exception of the roof structure, the new theatre building is generally contained within the maximum height controls prescribed by SLEP.

Form

The form of the new theatre interprets the former stables building and responds to its residential setting within the Barcom Avenue Heritage Conservation Area. The existing stables building is interpreted in the two storey recycled brickwork base with precast concrete panels rising above to signal the new theatre addition. The concrete curves away from the street to respond to the roofscape context of buildings within the conservation area.

Setbacks and orientation

The new theatre building maintains the front building line along Nimrod Street and is setback from the corners of the site to enhance integration into the public domain.

Materials and Colours

A sympathetic, yet distinctly contemporary, materials palette is proposed for the new building comprising of salvaged brickwork and concrete.

The selected materials and colours will be similar in hue and tone to traditional colour schemes to ensure that the development complements the visual character of the neighbouring context within the Barcom Avenue Heritage Conservation Area.

Detailing

The new theatre building has been designed to be distinctly contemporary, yet complementary to minimise the visual impact on the streetscape presentation and the Barcom Avenue Heritage Conservation Area.

The detailing of the new building will be contemporary, in contrast with the traditional detailing of its immediate context. A clear distinction between original and new elements is proposed to avoid confusion.

8.5 Statement of Heritage Impact

The existing buildings on the subject site, which comprises 10 and 12 Nimrod Street, are not listed as Heritage Items, nor have they been assessed as meeting the criterion for listing. The site is, however, located within the Barcom Avenue Heritage Conservation Area, to which the existing buildings are assessed as making a Neutral contribution.

The Site Specific Planning Proposal seeks to include 'entertainment facility' as an expressly permitted use. Formalising the permitted use as an entertainment facility for 10 and 12 Nimrod Street will enable the Griffin Theatre Company to upgrade and expand the SBW Stables Theatre, which has operated at 10 Nimrod Street for the past 50 years, and enable it to continue to serve the community in the future, respecting the site's historic, associative and social significance.

The existing SBW Stables Theatre at 10 Nimrod Street requires critical upgrades to ensure the historic use of the site as a theatre can be maintained. These upgrades, required to achieve DDA and BCA compliance, are not feasible within the spatial constraints of the existing building.

To achieve this, the concept proposal involves demolition of the existing structures at 10 and 12 Nimrod Street and excavation below the existing ground level to create a new basement level. The proposed excavation works will be conducted in accordance with structural engineer specifications to minimise potential impacts on the structural integrity of the adjacent buildings. To further mitigate potential heritage impacts, brickwork from the existing stables building will be salvaged and incorporated into the design of the new façades of the proposed infill building to interpret the history of the site.

The new infill building is proposed across the two lots to provide a state of the art, universally accessible theatre which respects the historical, associative and social significance of the site. The building has been designed to respond to the historic context of the Barcom Avenue Heritage Conservation Area in a sympathetic, yet contemporary, manner in terms of character, scale, materials and colours and detailing. Salvaged brickwork and interpretation of timber elements defines the base of the new facade and references the former stables building, whilst the concrete addition, required to house the increased theatre volume, lift and stairs, is curved away from the street to respond to the surrounding built form, and to soften its visual impact and perceived bulk and scale.

Internally, the building is organised over three levels which are connected via a new passenger lift and fire egress stairs located towards Nimrod Street. A rehearsal space and accessible patron amenities have been located underground, to minimise the height of the building. The ground floor has been designed to provide a flexible foyer space with a clear street connection, improving on the foyer arrangement in the existing building. Heritage interpretation related to the history and significance of the site will be included in this publicly accessible space.

The new theatre upstairs retains the intimacy of the existing SBW Stables Theatre which is integral to the experience of the existing building in terms of the relationship between the audience and the stage, with a range of improvements to both front of house and back of house areas. Additional seating is provided on the upper level, which also includes the Bio Box and dressing rooms and accessible amenities for the actors.

The proposed new infill building will enable the Griffin Theatre Company to upgrade and expand their theatre whilst retaining a memory of the history and significance of the place for future generations. Given its location within the heart of Darlinghurst, the proposed redevelopment of the SBW Stables Theatre site strikes a balance between providing a compliant state of the art theatre and achieving good heritage outcomes that are sustainable for the future.

The Site Specific Planning Proposal to include 'entertainment facility' as a permitted use for 10 and 12 Nimrod Street and the concept proposal involving construction of a new purpose-built theatre on the site generally complies with the City of Sydney Council Heritage Controls and will have minimal impact on the significance of the Barcom Avenue Heritage Conservation Area (C11), identified Heritage Items and Contributory buildings in the vicinity of the site.

Designed by Tonkin Zulaikha Greer Architects, the proposal aims to be an exemplar of design excellence. The proposal is supported and recommended for approval.

8.6 Recommendations

The following recommendations are suggested to further mitigate any potential heritage impacts:

- Undertake works in accordance with the principles of the Australia ICOMOS Burra Charter.
- Prepare a photographic and written recording of areas affected (archival recording) prior to carrying out the work.
- Prepare a Heritage Interpretation Strategy to outline further opportunities to celebrate the heritage significance of the site and the Griffin Theatre Company.
- Salvage removed materials for reuse within the project. Develop a salvage and reuse schedule as part of the detailed documentation for the project.
- A Watching Brief for an archaeologist is recommended during construction. If building fabric or potential archaeology is uncovered during the works that may have heritage significance, (previously unknown), stop work in that area, inform the project team immediately and seek guidance on how to proceed.
