

Investments Held as at 31 December 2022

File No: X020701

Summary

This report provides details of the City's investment portfolio and performance to 31 December 2022.

The City's total Investment and Cash position was \$707.7M at 31 December 2022, with investments earning interest of approximately \$2.0M for the month.

The Covid-19 pandemic has created significant uncertainty in financial markets. The Reserve Bank of Australia (RBA) responded to that crisis by reducing the official cash rate in a series of steps down to an official cash rate of 0.10 per cent by November 2020. However, the annual inflation rate in Australia has since increased significantly, to 7.8 per cent for the full year to December 2022, and while global factors explain much of the increase in inflation, domestic factors also play a role. There are widespread upward pressures on prices from strong demand, a tight labour market and capacity constraints in some sectors of the economy.

The RBA responded by increasing the official cash rate to 0.35 per cent on 3 May 2022, by a further 0.5 per cent at each of the next four RBA monthly board meetings, and still further increases of 0.25 percent in the last three RBA monthly board meeting, up to 3.10 per cent. Additional increases have been foreshadowed by the RBA Governor, in an attempt to curb inflation.

The City's cash inflows have been negatively impacted as the economic consequences of the pandemic continue to reduce major revenue streams, in particular commercial property income receipts, but also parking related, venue hire and other activity based revenues.

The City's cash and investments portfolio is substantially restricted in both internal (\$252.9M) and external (\$91.0M) cash reserves, to satisfy the City's legislative responsibilities and to set aside specific funds for Council's funding commitments to the major initiatives within the Community Strategic Plan Delivering Sustainable Sydney 2030-2050 Continuing the Vision.

Key commitments within the City's Long Term Financial Plan include public domain works in the CBD, infrastructure and community facilities in the Green Square urban renewal area and commercial property and open space acquisitions. The balance of investment funds represents working capital and funding required for the City's operating and capital expenditure commitments.

The City achieved an annualised monthly return of 3.36 per cent for December which remains above the 30 Day Bank Bill Rate (BBR) of 3.01 per cent and the latest AusBond Bank Bill Index (published by Bloomberg) of 3.00 per cent, however remains just below the strategic enhanced benchmark (or stretch target) of 3.46 per cent (BBR + 0.45 per cent). While the City has historically outperformed this enhanced benchmark, the current monthly returns reflect the purchase of fixed term investments on offer earlier in the year, prior to the recent series of unprecedented rate increases imposed by the RBA during 2022.

The City's annual rolling return of 2.99 per cent continues to exceed the 12 month average 30 Day Bank Bill Rate of 1.32 per cent, the latest AusBond Bank Bill Index of 1.25 per cent and the enhanced benchmark of 1.77 per cent (BBR + 0.45 per cent). The benchmarks were endorsed in the revised Investment Strategy which was approved by Council in October 2022.

While the returns remain below longer-term trends, the recent increases to official cash rates have seen substantial improvements in rates of return offered by the market which will allow future maturing deposits and surplus funds to be re-invested at higher rates. This trend is anticipated to continue beyond the current financial year.

It is worth noting that Council's investment opportunities are constrained by a combination of legislation, regulation and any directions and guidelines issued by the Minister or the Office of Local Government. These guidelines were developed, in large part, as a response to the Global Financial Crisis and its impact on the local government sector's investments. They effectively limit the City's investment profile to something similar to a cash managed fund, which generally produce lower returns but provide a high level of security. The City's returns from the investment portfolio remain in line with cash managed funds in the market.

This report includes graphs demonstrating that the City's liquidity profile continues to satisfy the requirements of the Policy, and charts that identify the distribution of the City's portfolio across credit ratings, investment product types and financial institutions. Separate charts depicting the City's cumulative portfolio returns over and above both the 90 day Bloomberg AusBond and 30 day Bank Bill Rate benchmarks have also been included to provide further insight into the City's total investment portfolio performance.

The structure of the City's investment portfolio continues to reflect the conservative approach outlined in the Investment Policy and Strategy, which remains appropriate for the current global and domestic economic conditions. The Policy and Strategy also maintain the City's commitment to sustainable investments where returns and risks are equivalent, under the environmentally and socially responsible investment criteria.

Recommendation

It is resolved that the Investment Report as at 31 December 2022 be received and noted.

Attachments

Attachment A. Register of Investments and Cash as at 31 December 2022

Attachment B. Investment Performance as at 31 December 2022

Background

1. In accordance with the principles of financial management, cash that is surplus to the City's immediate requirements is invested within acceptable risk parameters to optimise interest income while ensuring the security of these funds.
2. Surplus cash is only invested in authorised investments that comply with governing legislation and the City's Investment Policy and Strategy.
3. The benchmark performance goal of the City's Investment Policy and Strategy is to surpass the 30 Days Bank Bill Rate (BBR) by 45 basis points while performance also continues to be measured against the Bloomberg AusBond Bank Bill Index.
4. The City's total Investment and Cash position as at 31 December 2022 is \$707.7M, a decrease of \$40.2M from the \$747.9M reported as at 30 November 2022. The monthly movement reflects capital works expenditure and other operational payments for the period in excess of operating income, consistent with historical seasonal trends. A schedule detailing all of the City's investments as at the end of December is provided at Attachment A.
5. A substantial portion of the City's cash and investments portfolio is held as internally restricted (\$252.9M) or externally restricted (\$91.0M) cash reserves, to satisfy the City's legislative responsibilities and to set aside specific funds for Council's funding commitments to the major initiatives within the Community Strategic Plan Delivering Sustainable Sydney 2030-2050 Continuing the Vision.
6. Key commitments within the City's Long Term Financial Plan include public domain works in the CBD, infrastructure and community facilities in the Green Square urban renewal area and the acquisition of open space. The balance of investment funds represents working capital and funding required for the City's operating and other capital expenditure commitments.
7. The City achieved an annualized monthly return of 3.36 per cent for December which remains above the 30 Day Bank Bill Rate (BBR) of 3.01 per cent and the latest AusBond Bank Bill Index (published by Bloomberg) of 3.00 per cent.
8. Since 2015, the City has utilised an additional strategic benchmark rate to measure its investment performance, aiming to exceed the 30 day benchmark returns by at least 45 additional basis points (0.45 per cent p.a.). The 45 basis point increase is based on observed historical average increased credit spreads (or margins) over bank bill rates on offer in relation to 30-90 day investments.
9. Investment returns as at 31 December 2022 are slightly below the enhanced benchmark of 3.46 per cent (BBR + 0.45 per cent). These returns reflect holdings of fixed term investments purchased earlier in the year, at prevailing interest rates, prior to the recent series of rate increases. The pace of rates increases by the RBA during 2022 is unprecedented. It is anticipated that the City's portfolio returns will exceed the benchmark by the end of the financial year.
10. The City aims to achieve returns equal to or above these benchmark rates for the period. However, this achievement remains secondary to the critical strategies of maintaining a prudent and conservative risk profile and ensuring adequate liquidity for operational purposes.

11. The City's annual rolling return of 2.99 per cent continues to exceed the 12 month average 30 Day Bank Bill Rate of 1.32 per cent, the latest AusBond Bank Bill Index of 1.25 per cent and the enhanced benchmark of 1.77 per cent (BBR + 0.45 per cent).
12. It is worth noting Council's investment opportunities are constrained by a combination of legislation, regulation and any directions and guidelines issued by the Minister or the Office of Local Government. These guidelines were developed, in large part, as a response to the Global Financial Crisis and its impact on the local government sectors investments. They effectively limit the City's investment profile to something similar to a cash managed fund, which produces lower returns but provides a high level of security.
13. The City's returns from the investment portfolio are line with cash managed funds in the market. The recent increases to official cash rates have seen improvements in rates of return offered by the market, allowing maturing deposits to be re-invested at higher rates. This trend is anticipated to continue as investments placed during the period of suppressed interest rates reach maturity and are re-invested.
14. In response to the global Covid-19 pandemic, the Reserve Bank of Australia (RBA) adjusted the official cash rate on 3 March 2020, again on 20 March 2020, and in November 2020 down to 0.10 per cent. However, this calendar year, inflation has increased significantly as a combination of global factors, and domestic capacity constraints have lifted costs and ultimately consumer prices.
15. The annual inflation rate in Australia increased to 7.8% in the year to December 2022, exceeding market forecasts. Global factors explain much of the increase in inflation, but domestic factors are also playing a role. There are widespread upward pressures on prices from strong demand, a tight labour market and capacity constraints in some sectors of the economy along with recent weather events.
16. In response, the RBA increased the official cash rate to 0.35 per cent on 3 May 2022. Rates were further increased by 0.5 per cent at each of the next four RBA monthly board meetings, to 2.35 per cent on 6 September 2022. The rate was further increased to by 0.25 percent in the last three RBA monthly board meeting to 3.10 per cent. Additional increases have been foreshadowed by the RBA Governor.
17. Despite these recent increases in interest rates, low investment yields on existing investments are expected to continue to adversely impact the City's portfolio return over the next twelve months. Most of the investment portfolio (currently 73.05 per cent) is held in fixed return term deposits. Improved returns are anticipated as these investments mature and are reinvested in products offering higher rates where the funds are not otherwise required for operating purposes. As around 72 per cent of the portfolio is due to mature in the coming year, the City will be able to take advantage of improving returns.
18. The City's cash inflows, whilst reasonably resilient, have been negatively impacted for a prolonged period, as the economic consequences of the pandemic have continued to affect major revenue streams, in particular commercial property income receipts.
19. The report includes graphs depicting that the City's cumulative portfolio returns over and above both the 90 day Bloomberg AusBond, and 30 day Bank Bill Rate benchmarks have also been included to provide further insight into the City's total investment portfolio performance.

20. The structure of the City's investment portfolio continues to reflect the conservative approach outlined in the Investment Policy and Strategy which was last revised and approved by Council in October 2022. It remains appropriate for the current global and domestic economic conditions.

Key Implications

Strategic Alignment - Sustainable Sydney 2030-2050 Continuing the Vision

21. The City's investments accord with all legislative and policy requirements, as detailed below, and aim to achieve returns above minimum benchmark rates.

Financial Implications

22. The City's investments earned interest of \$2.0M for the month of December 2022, which is above the monthly budgeted earnings of \$0.6M. The annual budget was set at \$7.5M prior to the escalation in the rate of inflation, and corresponding series of cash rate increases. Annual interest earnings are now forecast to be \$20.0M.

Relevant Legislation

23. Council is authorised to invest its surplus cash under section 625 of the Local Government Act 1993.
24. The Local Government (General) Regulation 2021 (section 212) requires the City to provide a written monthly report of all monies invested, under section 625 of the Act.
25. The Investment Policy and Strategy was last revised in October 2022, maintaining Council's commitment to give preference to sustainable investments where returns and risks are equivalent to other investments.
26. The City's investments accord with the Minister's Investment Order, the Office of Local Government's Investment Policy Guidelines, and the City's own Investment Policy and Strategy as adopted by Council on 31 October 2022.

Critical Dates / Time Frames

27. A monthly investment report must be submitted for Council's information and review within the following month.

Public Consultation

28. Consultation is regularly undertaken with a number of financial institutions and investment advisers to consider options and ensure the City continues to maximise its investment return within appropriate legislative and risk parameters.
29. City staff meet regularly with representatives of each of the 'Big 4' banks and NSW TCorp. At these meetings City staff actively advocate for Socially Responsible Investment (SRI) opportunities.

30. The banks acknowledge the appetite in the market for these products and they continue to investigate the development of suitable products, however it has been challenging to match the level of funds to available Socially Responsible Investment opportunities that meet the credit risk and maturity profile requirements of the City.
31. As noted in previous Investment Reports, Westpac were able to bring a Green Tailored Deposit product to market, which delivers a comparable return while achieving the City's preferred outcomes. The City currently holds \$65M in eleven tranches with this Green Tailored deposit.
32. The City has also invested a \$10M parcel with the Commonwealth Bank of Australia (CBA) in Environmental Social and Governance Term Deposit (ESGTDs) certified by Responsible Investment Association Australasia (RIAA), whilst also meeting the City's risk / return aims. RIAA is an active network of members engaged in responsible, ethical and impact investing across Australia and New Zealand. Their mission is to 'promote, advocate for and support approaches to responsible investment that align capital with achieving a healthy and sustainable society, environment and economy'. This includes investing in products that seek to mitigate environmental and social risks. ESGTDs provide the opportunity to allocate capital towards financing Sustainability-Linked Loans.
33. The City currently holds \$5M in FRN with Bank Australia due to mature on 24 November 2025. The City has invested another \$5M in a Floating Rate Note (FRN) / Sustainability Bond issued by Bank Australia, based on an investment framework that is in line with the 2021 versions of the ICMA Green Bond Principles (GBP), Social Bond Principles (SBP) and Sustainability Bond Guidelines (SBG). This Socially Responsible investment opportunity met both the credit risk and maturity profile requirement of the City.

BILL CARTER
