**Advice**

Advice will be updated after the meeting.

**Background**

The City has received concerns about speeding and Brougham Lane and residents have requested for traffic calming measures in the laneway.

**Comments**

Brougham Lane, between Brougham and McElhone Streets is a Shared Zone and approximately 3.3 metre wide. It is a one-way westbound road and vehicles are observed to travel down slope at speeds higher than 10km/h in the Shared Zone.

The proposal to install speed cushion in Brougham Lane, would help to improve general safety in the area by reducing the speed of traffic travelling along the Shared Zone. This measure is part of the City's commitment to calm traffic and improve residential amenity.

**Consultation**

The City consulted local residents and businesses in the area. There were 233 letters sent out with six responses supporting the proposal and no responses objecting the proposal.

**Financial**

Appropriate funding for the proposal will be secured once greater certainty on the construction timeline is reached.
