

Attachment A

Recommended Conditions of Consent
--

GENERAL CONDITIONS

(1) APPROVED DEVELOPMENT

- (a) Development must be in accordance with Development Application No. D/2023/702 dated 4 August 2023 and the following drawings prepared by Loop Creative:

Drawing Number	Drawing Name	Date
DA-02 Rev 01	Overall Plan – Tenancy Location	29.05.23
DA-03 Rev 01	General Arrangement Plan	29.05.23
DA-04 Rev 03	General Arrangement Plan	16.10.23
DA-300 Rev 01	Sections	29.05.23

and as amended by the conditions of this consent.

- (b) In the event of any inconsistency between the approved plans and supplementary documentation, the drawings will prevail.

Reason

To ensure all parties are aware of the approved plans and supporting documentation that applies to the development.

(2) APPROVED USE

The approved use of the site is for markets with ancillary licensed food and drink premises.

Reason

To ensure all parties are aware of the approved use.

(3) GENERAL HERITAGE

- (a) The proposed works are to be carried out in a manner that minimises demolition, alterations and new penetrations/fixings to the significant fabric of the existing building which is listed as a Heritage Item.
- (b) The fabric and features to be retained by the proposal must be properly protected during the process of demolition and construction. The protection measures are to be specified in the construction management plan.

- (c) All conservation and adaptation works are to be in accordance with the Articles of the Australian ICOMOS Burra Charter 2013.
- (d) New services are to be surface mounted rather than chased-in to existing external walls to minimise impact on heritage fabric.
 - (i) New services must use existing service runs;
 - (ii) Where this is not possible, details of an alternative solution must be shown on drawings at a suitable scale and submitted and approved by Council's Urban Design and Heritage Manager / Area Planning Manager prior to the issue of any Construction Certificate.
- (e) Appropriately qualified tradespersons (as appropriate) are to be commissioned who are skilled in traditional building and engineering trades to carry out the proposed scope of works.

Reason

To ensure that the development does not result in adverse heritage impacts.

(4) WASTE AND RECYCLING MANAGEMENT - GENERAL

The proposal must comply with the relevant provisions of Council's *Guidelines for Waste Management in New Developments 2018* which requires facilities to promote the efficient storage, separation, collection and handling of waste to maximise resources recovery.

Reason

To ensure that waste and recycling is appropriately managed.

BUILDING WORK

BEFORE ISSUE OF A CONSTRUCTION CERTIFICATE

(5) COMPLIANCE WITH THE ACOUSTIC REPORT PRIOR TO CONSTRUCTION AND OR OCCUPATION CERTIFICATES

- (a) All relevant performance parameters (including but not limited to requirements, engineering assumptions and recommendations) in the DA Acoustic Report prepared by Renzo Tonin & Associates dated 16 October 2023, Ref: TN233-01F02 titled 'DA Acoustic Assessment' (Council Ref 2023/597896) and the letter prepared by Renzo Tonin & Associates Dated 9 November 2023 (Council Ref:2023/648353) must be implemented in the development prior to the commencement of its use.
- (b) Prior to the issue of any relevant Construction Certificate, the final construction drawings and final construction methodology must be assessed and reported to be in accordance with the requirements of the DA Acoustic Report in (a) above, with reference to relevant documentation. This must be done by a Suitably Qualified Acoustic Consultant* (see definition below). This work will be to the satisfaction of the Registered Certifier.
- (c) Prior to the issue of any Occupation Certificate, a Suitably Qualified Acoustic Consultant* is to provide a written Acoustic Verification Report to the satisfaction of the Principal Certifier that the development complies with the requirements set out in the Report and in (a) and (b) above.

Note: Suitably Qualified Acoustic Consultant means a consultant who possesses the qualifications to join the Australian Acoustical Society, Institution of Engineers Australia (grade of member) or the Association of Australasian Acoustical Consultants (grade of member firm).

- (d) All physical aspects of the building's structure installed in order to meet performance parameters in accordance with this condition must be maintained at all times.

Reason

To ensure all parties are aware of the supporting documentation that applies to the development.

(6) ODOUR ASSESSMENT REPORT

- (a) Prior to the issue of a Construction Certificate, an updated odour assessment and odour management plan (OMP) is to be prepared by a suitably qualified person and be submitted to Council's Area Planning Manager for approval. The report is to address / include the following:
 - (i) Assign managerial and operational responsibilities for maintaining the OMP, implementing the OMP and responding to odour related incidents.
 - (ii) Specify the filters required, frequency of cleaning / maintenance and operating parameters.

- (iii) Specify all equipment for the design of the mechanical ventilation system.
 - (iv) Confirm the provision of double pass ESP for horizontal discharge.
 - (v) Confirm that there is adequate ducting to allow for a 2 second contact time with the ozone odour abatement technology at the point at which the ozone gas is introduced.
 - (vi) Demonstrate the performance of the design via modelling and references to test cases, and provide a test certificate for the design.
 - (vii) Confirm the combined air flow rate at the discharge point of each system.
- (b) All approved measures are to be installed prior to the issuing of any Occupation Certificate.

Reason

To ensure the development does not result in adverse odour emissions.

(7) CONSTRUCTION AND FITOUT OF FOOD PREMISES

The construction, fit-out and finishes of the food premises must comply with Standard 3.2.3 of the Australian and New Zealand Food Standards Code under the *Food Act 2003* and AS 4674 – 2004 Design, Construction and Fit-out of Food Premises.

Note: Copies of AS 4674-2004 may be obtained from the Standards Australia Customer Service on telephone 1300 65 46 46 or by visiting the website www.standards.com.au.

Copies of the Food Standards Code (Australia) may be obtained by contacting the Food Standards Australia and New Zealand Authority on telephone (02) 6271 2222, email info@foodstandards.gov.au or by visiting the website www.foodstandards.gov.au

Reason

To ensure the construction, fitout and finishes of the food premises comply with relevant standards.

(8) COOLROOMS

Coolrooms, refrigerated chambers and strong-rooms must be constructed in accordance with G 1.2 of the *National Construction Code (previously known as Building Code of Australia)*, and:(a) The floor of the coolroom must be graded to the door and a floor trapped waste outlet must be located outside the coolroom as near as possible to the door opening.

- (b) All proposed shelving in the coolroom must be free-standing, constructed of galvanised steel angle section or other approved material with the lowest shelf at least 150mm clear of the floor.

- (c) The floor of the coolroom must be constructed of impermeable concrete or coated, topped or otherwise finished with an impervious material to a smooth even surface and coved at the intersections with the walls to a minimum radius of 25mm.
- (d) Must be fitted with a door that can be opened at all times from inside without a key.
- (e) An approved audible alarm device must be located outside the coolroom(s) but controllable only from within the coolroom(s) and must be able to achieve a sound pressure level outside the chamber or coolroom(s) of 90 dB(A) when measured 3 metres from a sounding device.

Reason

To ensure coolrooms are constructed appropriately in accordance with relevant standards.

(9) TOILETS FOR FOOD HANDLERS

- (a) Adequate toilet facilities must be available for food handlers working for the food business. Toilets and associated facilities must be provided in accordance with *AS4674 – Design, Construction and Fit-out of Food Premises* and the *Australia New Zealand Food Standards Code, 3.2.3 - Food Premises and Equipment*.
- (b) Details of the location of toilets which are provided exclusively for the use of food handlers and staff working at the business must be submitted for the approval of the Registered Certifier prior to the issue of a Construction Certificate.
- (c) The toilet(s) must be provided with a hand wash basin, with hot and cold running water mixed through a common spout, hand wash soap, hygienic hand drying facilities and hands-free taps.

Reason

To ensure food handlers have access to adequate toilet facilities.

BEFORE BUILDING WORK COMMENCES

There are no conditions.

DURING BUILDING WORK

(10) HOURS OF WORK AND NOISE – OUTSIDE CBD

The hours of construction and work on the development must be as follows:

- (a) All work, including building/demolition and excavation work, and activities in the vicinity of the site generating noise associated with preparation for the commencement of work (eg. loading and unloading of goods, transferring of tools etc) in connection with the proposed development must only be carried out between the hours of 7.30am and 5.30pm on Mondays to Fridays, inclusive, and 7.30am and 3.30pm on Saturdays, with safety inspections being permitted at 7.00am on work days, and no work must be carried out on Sundays or public holidays.
- (b) All work, including demolition, excavation and building work must comply with the City of Sydney Code of Practice for Construction Hours/Noise 1992 and Australian Standard 2436 - 2010 Guide to Noise Control on Construction, Maintenance and Demolition Sites.
- (c) Notwithstanding the above, the use of a crane for special operations, including the delivery of materials, hoisting of plant and equipment and erection and dismantling of on-site tower cranes which warrant the on-street use of mobile cranes outside of above hours can occur, subject to a separate application being submitted to and approved by Council under Section 68 of the Local Government Act 1993 and Sections 138/139 of the Roads Act 1993.

Note: Works may be undertaken outside of hours, where it is required to avoid the loss of life, damage to property, to prevent environmental harm and/or to avoid structural damage to the building. Written approval must be given by the Construction Regulation Team, prior to works proceeding.

The *City of Sydney Code of Practice for Construction Hours/Noise 1992* allows extended working hours subject to the approval of an application in accordance with the Code and under Section 4.55 of the *Environmental Planning and Assessment Act 1979*.

Reason

To protect the amenity of the surrounding area.

(11) SYDNEY WATER CERTIFICATE (TAP-IN)

- (a) The approved plans must be submitted to Sydney Water's "Tap-in" online service to determine whether the development will affect Sydney Water's sewer and water mains, stormwater drains and/or easements, and if further requirements need to be met. Sydney Water's "Tap-in" online service is available at www.sydneywater.com.au, (see Plumbing, Building & Development and then Sydney Water "Tap-in").
- (b) The Consent Authority or a Principal Certifier must ensure that Sydney Water has appropriately stamped the plans before the commencement of work.

Reason

To ensure the development satisfies Sydney Waters requirements.

(12) WASTE AND RECYCLING MANAGEMENT - COMMERCIAL

- (a) The Waste and Recycling Management Plan accompanying this Development Application has been approved by this consent.
- (b) All requirements of the approved Waste and Recycling Management Plan must be implemented during construction and operation of the development and include:
 - (i) Dedicated space to be provided within the development for the storage and recycling of bulky waste, problem waste, strip out and food waste.
 - (ii) Collection points for waste and recycling must be wholly located within the boundary of the development.
 - (iii) The nominated waste and recycling storage areas must be constructed to meet the relevant conditions required by the City's *Guidelines for Waste Management in New Developments 2018*.
 - (iv) Provision and storage within the boundary of the development of waste and recycling receptacles and any bulky waste at all times.
 - (v) Commercial tenancies must have a commercial waste contract(s) in place prior to commencement of business trading.
 - (vi) The path of travel between the bin storage areas/bulky waste storage areas and the designated waste/recycling collection point is to have a minimum 1,200mm wall-to-wall clearance, be slip-proof, of a hard surface, be free of obstructions and at no point have a gradient exceeding 1:14.

UPON COMPLETION OF THE DEVELOPMENT

- (d) Prior to any Occupation Certificate being issued or the use commencing, whichever is earlier, the Principal Certifier must ensure that waste handling works have been completed in accordance with: the Waste and Recycling Management Plan; other relevant development consent conditions; and Council's *Guidelines for Waste Management in New Developments 2018*.

Reason

To ensure that waste and recycling is appropriately managed.

(13) LOADING AND UNLOADING DURING CONSTRUCTION

The following requirements apply:

- (a) All loading and unloading associated with construction activity must be accommodated on site, where possible.

- (b) If, it is not feasible for loading and unloading to take place on site, a Works Zone on the street may be considered by Council.
- (c) A Works Zone may be required if loading and unloading is not possible on site. If a Works Zone is warranted an application must be made to Council at least 8 weeks prior to commencement of work on the site. An approval for a Works Zone may be given for a specific period and certain hours of the days to meet the particular need for the site for such facilities at various stages of construction. The approval will be reviewed periodically for any adjustment necessitated by the progress of the construction activities.
- (d) Where hoisting activity over the public place is proposed to be undertaken including hoisting from a Works Zone, a separate application under Section 68 of the Local Government Act 1993 and Sections 138/139 of the Roads Act 1993 must be submitted to and approved by Council.

Reason

To protect the amenity of the public domain.

(14) NO OBSTRUCTION OF PUBLIC WAY

Unless otherwise approved by Council, the public way must not be obstructed by any materials, vehicles, waste receptacles, skip-bins or the like. Non-compliance with this requirement may result in the issue of a notice by Council to stop all work on the site.

Reason

To protect the amenity of the public domain.

BEFORE ISSUE OF AN OCCUPATION CERTIFICATE

(15) WASTE AND RECYCLING COLLECTION CONTRACT

Prior to any Occupation Certificate being issued, the building owner must ensure that there is a contract with a licensed contractor for the removal of **all waste**. Waste is to be stored and collected from within the curtilage of the site at all times.

Reason

To ensure that waste and recycling is appropriately managed.

(16) SECURITY MANAGEMENT PLAN

Prior to any Occupation Certificate being issued, a security management plan for the whole of the ground floor market building is to be submitted to the Certifier for approval.

Reason

To ensure the safety and security of staff, patrons and the surrounding neighbourhood is adequately monitored and maintained.

(17) NOTIFICATION OF CONDUCT OF FOOD BUSINESS

- (a) The use must not commence until the food business has notified Council with their food business details in accordance with the *Food Act 2003* and *The Australia New Zealand Food Standards Code – 3.2.2 – Food Safety Practices and General Requirements, Clause 4*.
- (b) An Occupation Certificate must not be issued until such notification has been received by Council in accordance with Clause (a) of this condition.

Note: Registration forms are available on Council's website www.cityofsydney.nsw.gov.au.

Reason

To ensure Council is notified of food business details.

OCCUPATION AND ONGOING USE

(18) OCCUPATION CERTIFICATE TO BE SUBMITTED

An Occupation Certificate must be obtained from the Principal Certifier and a copy submitted to Council prior to commencement of occupation or use of the whole or any part of a new building, an altered portion of, or an extension to an existing building.

Reason

To ensure the site is authorised for occupation.

(19) HOURS OF OPERATION

The hours of operation are restricted to between 7.30am and 12.00 (midnight) Monday to Saturday, and 7.30am to 10.00pm Sundays (and public holidays).

The three glass doors to Hay Street (shown in Appendix D of the approved acoustic report) are to be closed from 6.00pm daily.

Reason

To ensure the premises operates within the approved hours of operation.

(20) PLAN OF MANAGEMENT

The use must always be operated / managed in accordance with the Plan of Management, prepared by Planning Lab dated 1 June 2023 that has been approved by Council. In the event of any inconsistency, the conditions of this consent will prevail over the Plan of Management.

Reason

To ensure all parties are aware of the approved supporting documentation that applies to the development.

(21) SURVEILLANCE CAMERAS – CONVENIENCE STORE/FAST FOOD VENUES

- (a) CCTV surveillance cameras shall be strategically installed, operated and maintained throughout the premises during all trading hours with particular coverage to:
 - (i) principal entrance/s and exits;
 - (ii) all areas within the premise occupied by the public (excluding toilets)
- (b) All CCTV recording equipment and cameras shall be of high grade digital quality capable of establishing the identification of patrons, offenders and incidents within the depth of field view of the cameras.
- (c) CCTV recordings shall have time and date auto recorded and be retained for 28 days before being re-used, destroyed or deleted. A digital copy must be handed to the Council or Police Officer on request.

- (d) All CCTV recording devices and cameras shall be checked daily to ensure the equipment is operating correctly. All reasonable steps must be taken to ensure repairs to the system are completed as soon as practicable within 24 hours.
- (e) The CCTV recording device must be kept in a secured location.

Reason

To ensure the safety and security of staff, patrons and the surrounding neighbourhood is adequately monitored and maintained.

(22) REMOVAL OF GLASS

Patrons must be prevented from removing glasses, opened cans, bottles or alcohol from the premises (except from any approved bottle shop area) or approved outdoor dining area included in the boundaries of the licensed premises.

Reason

To reduce waste generation within the public domain and to safeguard the amenity of the surrounding neighbourhood.

(23) NOISE FROM GLASS REMOVAL

Glass must not be emptied or transferred from one receptacle to another anywhere in a public place. All glass must be emptied / transferred inside of the building on the premises and removed in containers.

Reason

To safeguard the amenity of the surrounding neighbourhood.

(24) SECURITY – CATEGORY B LICENSED PREMISES

Security is to be provided at any time and in any manner specified in the Plan of Management prepared by Planning Lab dated 1 June 2023 that has been approved by Council.

Reason

To ensure the safety and security of staff, patrons and the surrounding neighbourhood is adequately monitored and maintained.

(25) CESSATION OF SERVICE

The premises may be open for business only between the operating hours in condition 19 above. The operator must cease providing food / alcohol / entertainment at the premises 15 minutes before the required closing time.

Reason

To ensure the development operates within the approved hours of operation.

(26) INCIDENTS – RECORDING AND NOTIFICATION

The manager/licensee must ensure that all incidents involving staff members (including security personnel) are recorded in the incident register maintained on site, including incidents involving physical contact between staff and patrons, physical restraint of patrons and/or the ejection of patrons from the premises.

Reason

To safeguard the amenity of staff, patrons and the surrounding neighbourhood.

(27) WASTE/RECYCLING COLLECTION - COMMERCIAL

- (a) Waste storage and the collection of waste and recycling must only occur during the designated zone collection times as outlined in the City's Waste Policy – Local Approvals Policy for Managing Waste in Public Places 2017.
- (b) Waste and recycling bins must not be placed on the street for collection. Services must be conducted within the property boundary or as a wheel-out/wheel-back service.
- (c) Unimpeded access must be provided for collection vehicles to set down within 10 metres of waste storage areas during zone collection times on collection days.

Reason

To ensure that waste and recycling is appropriately managed.

(28) HOT WATER SERVICE

The capacity of the hot water service must ensure that a constant supply of hot water is provided to the premises at all times for all sinks and basins including hand wash basin/s. The temperature of the hot water provided to the sinks must be in accordance with *AS4674 – Design, Construction and Fit-out of Food Premises* and the *Australia New Zealand Food Standards Code 3.2.2 - Food Safety Practices* and general requirements.

Reason

To ensure the food premises has a constant supply of hot water in accordance with relevant standards.

(29) NOISE – COMMERCIAL PLANT / INDUSTRIAL DEVELOPMENT

- (a) Noise from commercial plant and industrial development must not exceed a project amenity/intrusiveness noise level or maximum noise level in accordance with relevant requirements of the NSW EPA [Noise Policy for Industry 2017 \(NPfI\)](#) unless agreed to by the City's Area Planning Manager. Further:
 - (i) Background noise monitoring must be carried out in accordance with the long-term methodology in [Fact Sheet B](#) of the NPfI unless otherwise agreed by the City's Area Planning Manager.

- (ii) Commercial plant is limited to heating, ventilation, air conditioning, refrigeration and energy generation equipment.
- (b) An $L_{Aeq, 15 \text{ minute}}$ (noise level) emitted from the development must not exceed the $L_{A90, 15 \text{ minute}}$ (background noise level) by more than 3dB when assessed inside any habitable room of any affected residence or noise sensitive commercial premises at any time. Further:
- (i) The noise level and the background noise level must both be measured with all external doors and windows of the affected residence closed.
 - (ii) Background noise measurements must not include noise from the development but may include noise from necessary ventilation at the affected premises.
- (c) Corrections in [Fact Sheet C](#) of the NPfI are applicable to relevant noise from the development measured in accordance with this condition, however duration corrections are excluded from commercial noise.

Reason

To protect the acoustic amenity of surrounding properties.

(30) NOISE - ENTERTAINMENT

- (a) The $L_{Aeq, 15 \text{ minute}}$ noise level from the use must not exceed the background noise level ($L_{A90, 15 \text{ minute}}$) in any octave band (reference frequency 31.5 Hz to 8 kHz inclusive) by more than 5dB between 7.00am and 12.00 midnight when assessed at the boundary of any residential accommodation or tourist and visitor accommodation.
- (b) The $L_{Aeq, 15 \text{ minute}}$ noise level from the use must not exceed the background noise level ($L_{A90, 15 \text{ minute}}$) in any octave band (reference frequency 31.5 Hz to 8 kHz inclusive) between 12.00 midnight and 7.00am when assessed at the boundary of any residential accommodation or tourist and visitor accommodation.
- (c) Notwithstanding (a) above, the $L_{Aeq, 15 \text{ minute}}$ noise level from the use must not exceed the greater of the following levels between 7am and 12 midnight inside any habitable room of a residential accommodation or tourist and visitor accommodation, or at any time in an affected commercial premises:
- (i) The existing internal $L_{A90, 15 \text{ minute}}$ (from external sources excluding the use) in any octave band (reference frequency 31.5 Hz to 8 kHz inclusive). Or,
 - (ii) If the $L_{Z90, 15 \text{ minute}}$ background level is below the hearing threshold curve (Tf - Table 1 of ISO 226 : 2003) in an above octave band, the lowest audible sound level (L_p) of the Tf curve in that octave band shall become that octave's $L_{Zeq, 15 \text{ minute}}$ noise criteria level.

- (d) Notwithstanding (b) above, the $L_{A1\ 15\ \text{minute}}$ noise level from the use must not exceed the greater of the following sound pressure levels inside any habitable room between 12 midnight and 7am inside any habitable room of an affected residential accommodation or tourist and visitor accommodation:
- (i) The existing internal $L_{A90, 15\ \text{minute}}$ (from external sources excluding the use) minus 10 dB in any octave band (reference frequency 31.5 Hz to 8 kHz inclusive) inside a habitable room of an affected residential accommodation or tourist and visitor accommodation. Or,
 - (ii) If the $L_{Z90, 15\ \text{minute}}$ minus 10 dB level is below the hearing threshold curve (Tf - Table 1 of ISO 226 : 2003) in an above octave band, the lowest audible sound level (L_p) of the Tf curve in that octave band shall become that octave's $L_{Z1\ 15\ \text{minute}}$ noise criteria level.

Note: L_{eq} , L_{01} , and L_{90} , metrics and 'A' (weightings) are as per the definitions in the standard AS1055-20148. 'Z' means unweighted noise. An internal L_{A90} level must be determined in the absence of noise emitted by the use and be sufficiently representative of the receiver in a low noise level quiet state. External L_{A90} levels for planning must be established as per the long-term methodology in Fact Sheet B of the NPfl unless otherwise agreed by the City's Area Planning Manager.

Reason

To protect the acoustic amenity of surrounding properties.

(31) NOISE – INSTALLATION, SETUP, TESTING AND CALIBRATION OF LIMITER/S, PRIOR TO AN OCCUPATION CERTIFICATE

Prior to the issue of an Occupation Certificate, a Suitably Qualified Acoustic Consultant* is to provide a Noise Limiter/s Verification Report to the written satisfaction of the Principal certifying Authority that the development complies with the requirements set out as follows, and any relevant requirement in the COMPLIANCE WITH THE ACOUSTIC REPORT CONDITION PRIOR TO CONSTRUCTION OR OCCUPATION CERTIFICATES condition:

- (a) All sound amplification equipment in the premises must be controlled by a Root Mean Square (RMS) noise limiter with an attack time constant not exceeding 0.5 seconds, release time constant not less than 1 second and a compression ratio equal of at least 20:1. The limiter shall be set by a suitably qualified acoustic consultant* as per the manufacturer's specification. The consultant must ensure that resultant amplified sound complies with the Council's criteria for entertainment noise.
- (b) All Limiters and all post-limiter equipment including power amplifiers must be tamper proof and only operable by the acoustic consultant, a licensee and business owner who must keep a completed report on the premises.
- (c) This report must certify that limiter/s were installed, tested and calibrated so amplified noise will comply with the NOISE – ENTERTAINMENT Condition. The report will be prepared in accordance with and provide detail on the following requirements:

- (i) An initial calibration of the operation of the limiter with the sound amplification equipment is to be undertaken. This assessment must include setting of the amplification system in addition to a documented overview of the system so that compliance is achieved with the noise criteria as referenced in parts (a) to (c) above.
- (ii) Limiter settings and subsequent equipment must be benchmarked at the time of the above operational assessment. Pink noise and a swept sine wave signal must be fed into the amplification system and the level of the noise increased until the limiter operates continuously to comply with criteria. The L_{Aeq} , L_{A1} , L_{Ceq} and L_{C1} (1/1 octave bands - 31.5 Hz to 8 kHz centre frequencies) levels must be measured at suitable relevant reference location/s in the premises, with the premises empty other than essential staff. Correlating L_{Aeq}/L_{A1} and L_{Ceq}/L_{C1} measurements must be taken at identified nearby noise sensitive receivers during this process.
- (iii) Music must then be played through the sound system(s) with the limiter(s) in continuous operation to verify the limiters work correctly and meet noise criteria at the locations detailed above.
- (iv) The report will address the limiter installed within the premises (including but not limited to its brand, type specifications and location) including the noise control levels the limiter was set to (including a copy of the software configuration file for any digital signal processing device used). Furthermore, all post limiter equipment will be photographed, documented and catalogued in the report including location on a layout drawing.

Note: Suitably Qualified Acoustic Consultant means a consultant who possesses the qualifications to join the Australian Acoustical Society, Institution of Engineers Australia (grade of member) or the Association of Australasian Acoustical Consultants (grade of member firm).

Reason

To protect the acoustic amenity of surrounding properties.

(32) NOISE – AMPLIFIED SOUND AND THE UPKEEP AND OPERATION OF LIMITER/S

Following receipt of the report as per part (b) of the NOISE - INSTALLATION, SETUP, TESTING & CALIBRATION OF LIMITER/S, PRIOR TO AN OCCUPATION CERTIFICATE condition (and receipt of the a relevant occupation certificate, the report is to be kept on the premises at all times, signed and dated by the licensee and business owner. From this point forward the licensee and business owner must ensure the following:

- (a) The limiter/s and sound amplification system must be maintained and not tampered with. That unauthorised modifications are not made which are contrary to the report. Repairs and replacements may be made to the system as necessary with any like component but must not be capable of increasing the permitted noise amplification levels outlined in the report.

- (b) That additional amplification equipment must not be brought onsite which if used could cause cumulative entertainment noise (including amplified sound) from the development to exceed controls in this consent. This does not apply to:
 - (i) Equipment that is only used when routed through and controlled by the limiter/s, i.e. the limiters and amplified sound system on the premises are capable of receiving and controlling that equipment, and
 - (ii) Such that use of the equipment must not cause amplified sound which exceeds the cumulative entertainment noise controls in this consent.

Reason

To protect the acoustic amenity of surrounding properties.

General advisory notes

This consent contains the conditions imposed by the consent authority which are to be complied with when carrying out the approved development. However, this consent is not an exhaustive list of all obligations which may relate to the carrying out of the development under the EP&A Act, EP&A Regulation and other legislation. Some of these additional obligations are set out in the [Conditions of development consent: advisory notes](https://www.planning.nsw.gov.au/sites/default/files/2023-07/condition-of-consent-advisory-note.pdf). <https://www.planning.nsw.gov.au/sites/default/files/2023-07/condition-of-consent-advisory-note.pdf> The consent should be read together with the *Conditions of development consent advisory notes* to ensure the development is carried out lawfully.

The approved development must be carried out in accordance with the conditions of this consent. It is an offence under the EP&A Act to carry out development that is not in accordance with this consent.
