

Attachment A

Recommended Conditions of Consent
--

PART A – DEFERRED COMMENCEMENT CONDITIONS

The following deferred commencement conditions must be satisfied prior to the consent becoming operative:

(A) PART A – DEFERRED COMMENCEMENT CONDITIONS (CONDITIONS TO BE SATISFIED PRIOR TO CONSENT OPERATING)

The consent is not to operate until the following condition is satisfied, within 24 months of the date of this determination:

- (1) STAGED APPROVAL – D/2023/850 & D/2023/962**
 - (a) This development consent is the detailed design development consent D/2023/842.
 - (b) The following development applications are to be determined prior to the commencement of this consent:
 - (i) Early works development application D/2023/850; and
 - (ii) Public domain works development application D/2023/962.
- (2) Evidence that will sufficiently enable Council to be satisfied as to those matters identified in deferred commencement conditions, as indicated above, must be submitted to Council within 24 months of the date of determination of this deferred commencement consent failing which, this deferred development consent will lapse pursuant to section 4.53(6) of the Environmental Planning and Assessment Act 1979.**
- (3) The consent will not operate until such time that the Council notifies the Applicant in writing that deferred commencement consent conditions, as indicated above, have been satisfied.**
- (4) Upon Council giving written notification to the Applicant that the deferred commencement conditions have been satisfied, the consent will become operative from the date of that written notification, subject to the conditions of consent, as detailed in Part B Conditions of Consent (Once the Consent is Operation).**

PART B – CONDITIONS OF CONSENT

GENERAL CONDITIONS

(1) APPROVED DEVELOPMENT

- (a) Development must be in accordance with Development Application No. D/2023/842 dated 27 September 2023 and the following drawings prepared by Silvester Fuller:

Drawing Number	Drawing Name	Date
A DA 0001 Rev. B	Project Information Cover Page	29 May 2024
A DA 1101 Rev. B	GA Plan Basement 02	29 May 2024
A DA 1102 Rev. B	GA Plan Basement 01	29 May 2024
A DA 1103 Rev. B	GA Plan Ground	29 May 2024
AR-Z-1103 Rev. D	GA Plan Ground	30 April 2024
A DA 1104 Rev. B	GA Plan Level 01	29 May 2024
A DA 1105 Rev. B	GA Plan Level 02	29 May 2024
A DA 1106 Rev. B	GA Plan Level 03	29 May 2024
A DA 1107 Rev. B	GA Plan Level 04	29 May 2024
A DA 1108 Rev. B	GA Plan Level 05	29 May 2024
A DA 1109 Rev. B	GA Plan Level 06	29 May 2024
A DA 1110 Rev. B	GA Plan Level 07	29 May 2024
A DA 1111 Rev. B	GA Plan Services	29 May 2024
A DA 1112 Rev. B	GA Plan Roof	29 May 2024
A DA 1301 Rev. B	Home Type Terrace Houses 1/2	29 May 2024
A DA 1302 Rev. B	Home Type Terrace Houses 2/2	29 May 2024
A DA 1303 Rev. B	Home Type Park Houses 1/5	29 May 2024
A DA 1304 Rev. B	Home Type Park Houses 2/5	29 May 2024

Drawing Number	Drawing Name	Date
A DA 1305 Rev. B	Home Type Park Houses 3/5	29 May 2024
A DA 1306 Rev. B	Home Type Park Houses 4/5	29 May 2024
A DA 1307 Rev. B	Home Type Park Houses 5/5	29 May 2024
A DA 1308 Rev. B	Home Type Roof Houses 1/4	29 May 2024
A DA 1309 Rev. B	Home Type Roof Houses 2/4	29 May 2024
A DA 2001 Rev. B	Elevation North	29 May 2024
A DA 2002 Rev. B	Elevation East	29 May 2024
A DA 2003 Rev. B	Elevation South	29 May 2024
A DA 2004 Rev. B	Elevation West	29 May 2024
A DA 2005 Rev. B	Elevation Internal North	29 May 2024
A DA 2006 Rev. B	Elevation Internal South	29 May 2024
A DA 3001 Rev. B	Section A	29 May 2024
A DA 3002 Rev. B	Section B	29 May 2024
A DA 3003 Rev. B	Section C	29 May 2024

and as amended by the conditions of this consent.

- (b) In the event of any inconsistency between the approved plans and supplementary documentation, the drawings will prevail.

Reason

To ensure all parties are aware of the approved plans and supporting documentation that applies to the development.

(2) STAGED CONSTRUCTION

The works may be carried out in stages, with relevant conditions being satisfied prior to the issue of a relevant Construction Certificate, where specified in the conditions of consent, for each stage as detailed in the table below.

Construction Certificate Stage	Description
Stage 1	Substructure and basement level 1 slab and fit-out
Stage 2	Structure
Stage 3	Facade and fit-out

Reason

To set out the staging of works for this consent.

(3) MATTERS NOT APPROVED

The following items are not approved and do not form part of this consent:

- (a) Demolition
- (b) Excavation
- (c) Installation of shoring walls, retention systems, anchors and associated piles
- (d) Remediation and
- (e) Construction of foundations, basement slab and basement walls.

Reason

To clarify what works are not approved under this consent.

(4) MATERIALS AND FINISHES

A comprehensive physical materials sample board and schedule detailing all proposed finishes must be submitted to and approved by Council's Director City Planning, Development & Transport prior to the issue of any Construction Certificate.

Actual manufacturer's products and finishes are to be specified and no generic colours or finishes accepted.

The materiality and finish of the proposed 'scoop' bark texture is to be included. The roof floor tiles are to have a slip resistance rating of at least P4-P5.

The materials sample board must be cross-referenced with the Architectural drawings.

Reason

To require amendments to the materials and finishes that apply to the development.

(5) DESIGN MODIFICATIONS

The design of the development must be modified as follows:

- (a) Seating areas within publicly accessible areas at ground level are to include a pergola.
- (b) The 1.25m high balustrade around the Level 7 communal open space is to have a porosity of less than 25% to mitigate wind impacts. A detail of the balustrade indicating height and porosity is to be submitted.
- (c) The individual entries to apartments facing Kooka Walk (east elevation) at ground floor are to be redesigned so that they are either consolidated or relocated internally to minimise impacts to the continuous deep soil planting zone.
- (d) The building footprints are to align with the public domain boundaries at ground floor, with any wedged shaped gaps and pocket spaces at these boundaries eliminated to provide a clear and consistent boundary between private and public domains.
- (e) The sloping surfaces of the mansard roof are to incorporate air vents for air circulation that is typically required for air conditioning condenser units.
- (f) Privacy screens throughout the development must be designed using high quality materials that are consistent with the overall building design. The materiality and finish of the vertical privacy screens are to be specified, with privacy fin details at a scale of 1:20. This includes details of the screen sizing, spacing and method of fixture.
- (g) A minimum 1m wide landscaped planter is to be provided along the western edge of the rooftop common open space to provide privacy.
- (h) A linear track system for waste chutes and an area in the loading dock at ground floor for a bin tipper and presentation area for the collection of bulky waste are to be incorporated into the architectural drawings.

The modifications are to be submitted to and approved by Council's Director City Planning, Development & Transport prior to the issue of any Construction Certificate.

Reason

To require amendments to the approved plans and supporting documentation following assessment of the development.

(6) THROUGH-SITE LINK DESIGN

The east-west through-site link is to be redesigned/refined to provide additional amenity and embellishments (including trees, larger areas of greening, along with opportunities for rest). The design is to be consistent across the architectural and landscape drawings.

Following consultation, modifications are to be submitted to and approved by Council's Director City Planning, Development & Transport prior to the issue of any Construction Certificate.

Reason

To require amendments to the approved plans and supporting documentation following assessment of the development.

(7) LANDSCAPING OF THE SITE

A detailed landscape design package and technical specification by a registered landscape architect that is suitable for construction, must be submitted to and approved by Council's Area Planning Manager prior to the issue of any Construction Certificate. The plan must include:

- (a) The following design modifications:
 - (i) Replace any PV.1 unit paving over deep soil areas with PV.3 permeable paving.
 - (ii) Coordinated through-site link design with the architecture package and public art, with increased overall greening, visual interest in pavement design and providing moments of rest.
 - (iii) Additional planters at the western boundary of the rooftop communal open space at level 7.
 - (iv) An extensive green roof across the entire rooftop of the ground floor communal facility.
- (b) Location of existing and proposed planting on the site including existing and proposed trees, planting in natural ground, and planting on structure.
- (c) Location and details of existing and proposed structures on the site including, but not limited to, paving walls, services, furniture, shade structures, lighting and other features.
- (d) Details of earthworks and soil depths including finished levels and any mounding. The minimum soil depths for planting on structure must be 1000mm for trees, 450mm for shrubs and 200mm for groundcovers, excluding mulch and drainage layers.
- (e) Details of deep soil in accordance with the approved stamped plans. Where relatively natural soil does not exist or the land is contaminated, provide details of clean fill including topsoil and topsoil layers in accordance with a Remediation Action Plan.

- (f) Planting details, and location, numbers, type and supply size of plant species, with reference to Australian Standards and preference for drought resistant species that contribute to habitat creation and biodiversity.
- (g) Details of drainage, waterproofing and watering systems.
- (h) Landscape maintenance plan outlining maintenance procedures required post construction. This plan is to be complied with during occupation of the property.

Prior to the issue of any Occupation Certificate, the deep soil area must be constructed as approved. Where relatively natural soil does not exist, photographic evidence of installation of clean fill, in accordance with approved details, must be submitted to and approved by Council's Area Planning Manager prior to the issue of an Occupation Certificate.

All landscaping in the approved plan is to be complete prior to any Occupation Certificate being issued.

Reason

To ensure that the development is supported by a good quality, buildable landscape scheme that meets the City's controls.

(8) AFFORDABLE HOUSING CONTRIBUTION – RESIDUAL LAND OR CENTRAL SYDNEY – PAYMENT IN LIEU OF FLOOR SPACE CONTRIBUTION – PRIOR TO CONSTRUCTION CERTIFICATE

- (a) In accordance with the City of Sydney Affordable Housing Program and prior to the issue of any Construction Certificate or commencement of works, whichever is earlier, the applicant must provide evidence that a monetary contribution towards the provision of affordable housing has been paid to the City of Sydney Council.
- (b) The contribution is \$6,642,028.87 (indexed at 15 August 2024). This is calculated by establishing the sum of the equivalent monetary contribution \$11,176.22 multiplied by 3% of the total floor area for residential development (19,810sqm).
- (c) If the contribution is paid after the indexation period in which the consent is granted, being 1 March 2024 to 28 February 2025, the above contribution will be adjusted according to the Sydney LGA median strata dwelling price ('MDP') using the following formula.
- (d) Contribution payable at Time of Payment = $C \times \text{MDP2} / \text{MDP1}$, where:
 - (i) C is the original total contribution amount payable to the City of Sydney as shown above;
 - (ii) MDP2 is the Median Strata Dwelling Price in Sydney LGA taken from the most recent NSW Government Rent and Sales Report at the time of indexation of the equivalent monetary contribution rate; and

- (iii) MDP1 is the Median Strata Dwelling Price in Sydney LGA taken from the NSW Government Rent and Sales Report used to establish the current equivalent monetary contribution rate, being 1 March 2024 to 28 February 2025.

Contact Council's Planning Assessment Unit at planningsystemsadmin@cityofsydney.nsw.gov.au for written confirmation of the amount payable, with indexation as necessary, prior to payment.

Reason

To ensure development contributions are paid to contribute to the provision of essential affordable rental housing infrastructure.

(9) SECTION 7.11 CONTRIBUTIONS PAYABLE - CONTRIBUTION TOWARDS PUBLIC AMENITIES – CITY OF SYDNEY DEVELOPMENT CONTRIBUTIONS PLAN 2015 – SOUTH PRECINCT

Council has identified the development will increase demand for public amenities and facilities. Pursuant to Section 7.11 of the Environmental Planning and Assessment Act, 1979 (as amended), and the City of Sydney Development Contributions Plan 2015 the following monetary contributions are required towards the cost of public amenities.

<u>Contribution Category</u>	<u>Amount</u>
Open Space	\$1,805,319.61
Community Facilities	\$359,419.94
Traffic and Transport	\$458,407.38
Stormwater Drainage	\$181,299.77
Total	\$2,804,446.70

The City of Sydney will index the above contribution for inflation at the time of payment using the following formula.

$$C_{\text{payment}} = C_{\text{consent}} \times (CPI_{\text{payment}} \div CPI_{\text{consent}})$$

Where:

C_{payment} = Is the contribution at time of payment;

C_{consent} = Is the contribution at the time of consent, as shown above;

CPI_{payment} = Is the Consumer Price Index (All Groups Index) for Sydney published by the Australian Bureau of Statistics that applies at the time of payment; and

CPI_{consent} = Is the Consumer Price Index (All Groups Index) for Sydney at the date the contribution amount above was calculated being – 139.1 for June 2024.

The contribution must be paid prior to the issue of any Construction Certificate, or commencement of works, whichever is earlier, in relation to this development.

Please contact Council's Planning Administration staff at planningsystemsadmin@cityofsydney.nsw.gov.au to request a letter confirming the indexed contribution amount payable.

Once the letter confirming the indexed contribution is obtained, payment may be made at any of the City's Neighbourhood Service Centres or the One Stop Shop at Town Hall House. Acceptable payment methods are EFTPOS (debit card only), cash (up to 10K only), Credit Card (up to 50K only) or a bank cheque made payable to the City of Sydney. Personal or company cheques will not be accepted.

The contribution may be offset in accordance with the requirements and obligations identified in the Planning Agreement dated 25 July 2017 and amended 12 September 2019.

Reason

To ensure development contributions are paid to address the increased demand for public amenities and services resulting from the approved development.

(10) COMPLIANCE WITH VOLUNTARY PLANNING AGREEMENT

The terms of the planning agreement dated 25 July 2017 and amended 12 September 2019 are to be complied with.

Reason

To ensure the development complies with all terms of the planning agreement.

(11) APPROVED DESIGN ROOF - TOP PLANT

All roof-top plant and associated equipment must be located within the approved building envelope.

Reason

To ensure the constructed development complies with the approved height.

(12) BUILDING HEIGHT

- (a) The height of the building must not exceed RL 39.04 (AHD) to the top of the building and RL 33.49 (AHD) to the parapet of the building.
- (b) Prior to an Occupation Certificate being issued, a Registered Surveyor must provide certification that the height of the building accords with (a) above, to the satisfaction of the Principal Certifier.

Reason

To ensure the constructed development complies with the approved height.

(13) DESIGN QUALITY EXCELLENCE

- (a) As the proposal is the winning scheme of a competitive design process and in order to ensure the design quality excellence of the development is retained to completion:
 - (i) The design architect comprising Silvester Fuller is to have direct involvement in the design documentation, contract documentation and construction stages of the project including signing off any required certifications at DA, S4.55 applications, Construction Certificate and Occupation Certificate stages;
 - (ii) The design architect is to have full access to the site and is to be authorised by the applicant to respond directly to Council where information or clarification is required in resolving design issues throughout the life of the project;
 - (iii) Evidence of the design architect's commission must be provided to the Council prior to release of any Construction Certificate.
- (b) The design architect of the project is not to be changed without prior notice and approval of the Council's Director Planning, Development & Transport.

The Registered Certifier and Principal Certifier must be satisfied that the above matters are complied with prior to the issue of a relevant Construction and Occupation Certificates, in accordance with written confirmation from Council.

Reason

To ensure the development maintains design quality excellence throughout all phases of the development.

(14) GROSS FLOOR AREA

- (a) The development is not to exceed 14,011sqm calculated in accordance with the definition of gross floor area under the Sydney Local Environmental Plan 2012.
- (b) Prior to an Occupation Certificate being issued, a Registered Surveyor must provide certification of the total gross floor area in the development, utilising the definition under the Sydney Local Environmental Plan 2012, applicable at the time of development consent, to the satisfaction of the Principal Certifier.

Reason

To ensure the constructed development complies with the approved floor space ratio.

(15) ALLOCATION FOR CAR WASH BAYS

If car wash bays are provided, spaces must not at any time be allocated, sold or leased to an individual owner/occupier and must be strictly retained as common property by the Owners Corporation for use by all tenants.

Reason

To ensure designated areas within the development are maintained as common property.

(16) ALLOCATION FOR VISITOR PARKING

Visitor parking spaces must not at any time be allocated, sold or leased to an individual owner/occupier and must be strictly retained as common property by the Owners Corporation for use by building visitors.

All spaces must be clearly marked 'visitor' prior to the issue of any occupation certificate or the use commencing, whichever is earlier. All signs must be maintained in good order at all times.

Reason

To ensure designated areas within the development are maintained as common property.

(17) ALLOCATION OF ACCESSIBLE CAR PARKING SPACES

For residential development, accessible car parking spaces for people with mobility impairment are only to be allocated as visitor parking or to adaptable units. Where allocated to adaptable units, the unit(s) and car spaces must be assigned to the unit in any future strata subdivision of the building.

Reason

To ensure accessible vehicle parking spaces are allocated to adaptable units.

(18) ASSOCIATED ROADWAY COSTS

All costs associated with the construction of any new road works including kerb and gutter, road pavement, drainage system and footway shall be borne by the developer. The new road works must be designed and constructed in accordance with the City's "Sydney Streets Technical Specification" including amendments and "Sydney Streets Design Code".

Reason

To ensure all roadway works are designed and constructed in accordance with Council requirements.

(19) COST OF SIGNPOSTING

All costs associated with signposting for any kerbside parking restrictions and traffic management measures associated with the development shall be borne by the developer.

Reason

To ensure all associated roadway works costs are borne by the developer.

(20) INTERCOM FOR VISITORS

Where a boom gate or barrier control is in place, the visitor spaces must be accessible to visitors by the location of an intercom (or card controller system) at the car park entry and at least 4m clear of the property boundary, wired to all units. The intercom must comply with *Australian Standard AS 1428.2-1992: Design for access and mobility - Enhance and additional requirements - Building and facilities Sections 22 and 23.*

Reason

To maintain the orderly operation of vehicle parking areas.

(21) PARKING ON COMMON PROPERTY AREAS

No part of the common property, apart from the visitor vehicle spaces which are to be used only by visitors to the building, and service vehicle spaces which are to be used only by service vehicles, is to be used for the parking or storage of vehicles or boats. The strata subdivision of the building is to include an appropriate documentary restriction pursuant to Section 88B of the Conveyancing Act 1919, so burdening common property, with the Council being the authority to release, vary or modify the restriction.

Reason

To ensure designated areas within the development are maintained as common property.

(22) SECURITY GATES

Where a car park is accessed by a security gate, that gate must be located at least 6 metres within the site from the street front property boundary.

Reason

To ensure the public domain is kept free from physical obstructions.

(23) SERVICE VEHICLE SIZE LIMIT

The size of vehicles servicing the property must be a maximum length of 10.6m.

Reason

To maintain the orderly operation of vehicle parking and loading areas.

(24) SIGNS AT EGRESS

The following signs must be provided and maintained within the site at the point(s) of vehicle egress:

- (a) Compelling drivers to stop before proceeding onto the public way
- (b) Compelling drivers to "Give Way to Pedestrians" before crossing the footway; or compelling drivers to "Give Way to Pedestrians and Bicycles" before crossing a footway on an existing or identified shared path route.

Reason

To ensure the safety of surrounding pedestrians and cyclists.

(25) VEHICLE ACCESS

All vehicles are to enter and depart the site travelling in a forward direction.

Reason

To increase pedestrian safety at the site access.

(26) TRANSPORT ACCESS GUIDE

A Transport Access Guide must be implemented and maintained by the operators of the premises and be made available to residents and visitors at all times. The following information shall be submitted to and approved by Council prior to the issue of an Occupation Certificate for the site:

- (a) A Transport Access Guide detailing sustainable transport options to access the site including public transport, cycling and walking or a combination of these modes, and
- (b) Communication methods by which the Transport Access Guide will be made available to residents and visitors.

Reason

To encourage the use sustainable/active/alternative transport modes.

(27) LOADING DOCK SCHEDULE/REGISTER

The on-site loading dock is also to be made available for all residents for use by removal vehicles, bulky good deliveries and similar. This shall be managed either by a schedule showing residents when they can use the dock, or by a register managed on site to allow residents to reserve a time period for their deliveries. This information is to be made available to all residents/tenants of the building.

Reason

To ensure the availability and orderly operation of the on-site loading dock.

(28) TREES THAT MUST BE RETAINED

The existing trees detailed in Table 2 below be retained and protected in accordance with the conditions throughout construction and development.

Table 2 – Tree Retention:

Approval is NOT granted for the removal of the following trees, which Council has determined to be prominent landscape elements.

Tree No	Species:	Location
1 - 3	<i>Eucalyptus microcorys</i> (Tallowwood)	155 Mitchell Road (adjacent to Ashfield Street and new Kooka walk)
4 - 7	<i>Acer buergeranum</i> (Trident Maple)	Macdonald Street (street trees)
8 - 13	<i>Agathis robusta</i> (Kauri Pine)	
14 - 21	<i>Brachychiton acerifolius</i> (Flame Tree)	
22 - 29	<i>Jacaranda mimosifolia</i> (Jacaranda)	Metter Street (street trees)
30 & 31	<i>Platanus acerifolia</i> (London Plane)	Mitchell Street (street trees)
32 & 33	<i>Platanus orientalis Digitata</i> (Oriental Plane)	
34 & 35	<i>Fraxinus pennsylvanica</i> (Green Ash)	

Reason

To identify the trees that cannot be removed, must be retained and protected.

(29) TREE PLANTING CONSIDERATIONS

The design should include the use of continuous trenches for tree pits and the installation of all services to be underground.

Special consideration must be given to soil depth and quality for tree planting. The City considers the following soil volume requirements must be included in the design for successful long-term tree establishment:

- (a) Large Trees (canopy diameter of up to 16 metres at maturity) require a minimum soil volume of 150 cubic metres, minimum soil depth of 1.5 metres and minimum soil area 10 metres x 10 metres.
- (b) Medium Trees (canopy diameter of up to 8 metres at maturity) require a minimum soil volume of 35 cubic metres, minimum soil depth of 1.2 metre and minimum soil area 6 metres x 6 metres.
- (c) Small Trees (canopy diameter of up to 4 metres at maturity) require a minimum soil volume of 9 cubic metres, minimum soil depth of 1.2 metre and minimum soil area 4 metres x 4 metres.

Reason

To ensure the development is appropriately designed to accommodate adequate tree planting.

(30) STRATA SUBDIVISION – APPROVAL OF STRATA PLAN REQUIRED

A separate application must be made to Council or an Registered Strata Certifier to obtain approval of the Strata Plan and issue of a Strata Certificate under the *Strata Schemes Development Act 2015*.

Reason

To ensure separate approval is obtained for approval of the Strata Plan.

(31) LAND SUBDIVISION – SEPARATE DA REQUIRED

- (a) Any proposal for land subdivision will require a separate application to Council to obtain development consent and the subsequent approval of the plan of subdivision and issue of a Subdivision Certificate under Section 6.15 of the *Environmental Planning and Assessment Act 1979*.
- (b) Prior to the issue of any type of Occupation Certificate for the subject building, the components of the land identified as Kooka Walk (central) being approximately 2,083 m² in area, and the proposed extension of MacDonald Street being approximately 3,527 m² in area, must be dedicated as public road. A copy of the registered subdivision must be provided to the Principal Certifier prior to the issue of any type of Occupation Certificate for the building.
- (c) Prior to the issue of any type of Occupation Certificate for the subject building, the components of the land identified as McPherson Park approximately 7,446m² must be dedicated as public reserve.
- (d) Public domain works, including kerbs, medians, footpaths, street lighting within the road lots, and works within the park must be completed to the satisfaction of the Area Planning Manager prior to dedication.
- (e) All easements, (other than the existing easements for water supply purposes), restrictions on the use of land, positive covenants, leases (other than those associated with the existing easements for water supply purposes) and other affectations must be released either prior to, or in conjunction with, the registration of the subdivision dedicating the land.

Reason

Reason: To ensure separate development consent is sought for land subdivision, and the requirements of the VPA for the site are met

(32) THROUGH-SITE LINK – EASEMENT FOR PUBLIC ACCESS

- (a) An Easement for Public Access of 6 metres minimum width, unlimited in height, and limited in stratum where covered, must be created pursuant to Section 88B of the *Conveyancing Act, 1919* with the subdivision. The easement must extend between the buildings from the future Kooka Walk to the pedestrian pathway to the west. Offsets from the easement to the building must be shown on the plan creating the easement, where the building is within 1 metre of the easement.
- (b) The lower limit of the easement shall be 0.05 metres above the waterproofing membrane of the basement ceiling below. Offsets to the basement ceiling from the easement should be shown on the plan
- (c) The terms of the Easement for Public Access must be to the satisfaction of Council and can be provided by the Area Planning Manager upon request.
- (d) A Positive Covenant must be created pursuant to Section 88B of the *Conveyancing Act, 1919* with the subdivision. The terms of the positive covenant must include obligations for maintenance of the above easement sites, indemnify Council against loss or damage or liability, and include a requirement for public liability insurance in the amount of \$20 million for any one occurrence.

The terms of the above easements and positive covenant must be to the satisfaction of Council and can be provided by the Area Planning Manager upon request.

Reason

To formalise public access to the through site link and provide requirements for maintenance and public liability insurance

(33) PUBLIC ART

Public art must be installed to the City's satisfaction prior to the issue of any Occupation Certificate.

- (a) A revised Preliminary Public Art Plan is to be submitted to, and approved by Council's Director City Planning, Development and Transport prior to issue of any Construction Certificate. The Preliminary Public Art Plan is to incorporate the changes to the building design (i.e. the introduction of lighting / deletion of tree pods), feedback from the Public Art Advisory Panel, and that the artworks for McPherson Park and Block E will be developed in tandem.
- (b) A Detailed Public Art Plan with final details of the proposed public artwork must be submitted to and approved by Council's Director City Planning, Development and Transport prior to issue of the Stage 2 Construction Certificate for above ground works.
- (c) Public artwork must be installed to the City's satisfaction, inspected and approved and the Final Public Art Report submitted and approved by Council's Area Planning Manager prior to the issue of any Occupation Certificate.

Note: Public Art must be reviewed and endorsed by the City's Public Art Team and/or the Public Art Advisory Panel prior to submission for Council approval. Further information is available online at <http://www.cityofsydney.nsw.gov.au/explore/arts-and-culture/public-art> Please contact the Public Art Team at publicartreferrals@cityofsydney.nsw.gov.au for further information.

Reason

To ensure public art is installed to the City's satisfaction.

(34) AIR CONDITIONERS GENERALLY

No air-conditioning equipment is to be visible from the public domain. Equipment and associated wiring must:

- (a) Not be located on awnings or attached to the face of the building
- (b) Not be located on roofs in such a way that it is visible from any street, footpath or park
- (c) Be visually screened if located 1.8 metres above ground level in other locations
- (d) Wiring must be fully concealed.

Reason

To ensure the visual impact of air conditioners is minimised.

(35) NO AIR CONDITIONING UNITS TO FACADE OR BALCONIES OF BUILDING

Approval is not granted for the installation of individual air conditioning units to the facade or balconies of the building.

Reason

To clarify the scope of the consent.

(36) SWINGING DOORS OVER PUBLIC WAY

Any access doors to enclosures housing building services and facilities, such as hydrant and sprinkler booster assemblies or the like, must not open over the footway/roadway.

Reason

To ensure no element of the development obstructs the use of the public way.

(37) SIGNAGE STRATEGY

A signage strategy for the building is to be submitted to and approved by Council's Area Planning Manager prior to the Stage 3 Construction Certificate. The signage strategy must include information and scale drawings of the location, type, construction, materials and total number of signs appropriate for the buildings.

Reason

To require details for a signage strategy.

(38) CONTROL OF LIGHT INTO THE ENVIRONMENT

Lighting installed in the open and/or public spaces must comply with AS1158 series-lighting for roads and public spaces. The design and placement must be so that lighting does not create a nuisance or negatively affect the amenity of the surrounding neighbourhood, for that purpose lighting must comply with AS/NZS 4828.

Reason

To ensure signage illumination is designed in accordance with the Australian Standards.

(39) TELECOMMUNICATIONS PROVISIONS

Appropriate space and access for ducting and cabling is to be provided within the plant area and to each apartment within the building within for a minimum of three telecommunication carriers or other providers of broad-band access by ground or satellite delivery. The details must be submitted for the approval of the Registered Certifier prior to a Stage 2 Construction Certificate being issued.

Reason

To ensure the development adequately provides for telecommunications.

(40) WASTE AND RECYCLING MANAGEMENT - GENERAL

The proposal must comply with the relevant provisions of the Sydney Development Control Plan 2012 and Council's *Guidelines for Waste Management in New Developments 2018*, which requires facilities to promote the safe and efficient storage, separation, collection and handling of waste to maximise resource recovery.

Reason

To ensure that waste and recycling is appropriately managed throughout all phases of the development.

(41) TACTILE GROUND SURFACE INDICATORS AND HANDRAILS

All tactile ground surface indicators, handrails and other elements required to provide access into the building / property must be located entirely within the private property boundary.

Reason

To ensure ground surface indicators, handrails and other elements required to provide access into the building/property are appropriately located.

(42) NO OBSTRUCTIONS

All public footways and paths of travel must be free from obstructions. If services are required to be relocated to clear paths of travel, then this must be undertaken at the developer's expense. All obstructions are to be removed prior to the issue of any Occupation Certificate.

Reason

To ensure there are no obstructions on public footways and paths of travel.

(43) PAVING MATERIALS

The surface of any material used or proposed to be used for the paving of colonnades, thoroughfares, plazas, arcades and the like which are used by the public must comply with AS/NZS 4586:2004 (including amendments) "Slip resistance classification of new pedestrian surface materials".

Reason

To ensure appropriate and safe paving materials are used.

BUILDING WORK

BEFORE ISSUE OF A CONSTRUCTION CERTIFICATE

(44) ADAPTABLE HOUSING

Prior to a Stage 2 Construction Certificate being issued, information from an appropriately qualified access consultant is to be submitted to the Registered Certifier:

- (a) Confirming that 22 residential units are able to be adapted for people with a disability in accordance with the *Building Code of Australia*.
- (b) Demonstrating (in a checklist) compliance with Australian Standard AS4299.

Reason

To ensure the provision of adaptable housing.

(45) BASIX CERTIFICATE – DETAILS TO BE LODGED WITH A CC

A copy of the required completed BASIX certificate accepted as part of this Development Consent with respect to the proposed residential building works, must be lodged with an application for a construction certificate and the items nominated as part of the subject BASIX certificate must be specified on the plans submitted with the construction certificate application. – See Note.

IMPORTANT NOTE:

Any requirement detailed in the accompanying BASIX Certificate, MUST be included as a specific notation or inclusion on any future Construction Certificate plans and specification in accordance with Part 3 of Schedule 1 of the EP&A Regulation, 2021.

Reason

To ensure BASIX commitments are fulfilled in accordance with the BASIX certificate (prescribed condition under clause 75 EP&A Regulation, 2021).

(46) ALLOCATION OF PARKING

The number of car parking spaces to be provided for the development must comply with the table below. Details confirming the parking numbers must be submitted to the satisfaction of the Registered Certifier prior to the issue of a Stage 1 Construction Certificate.

Car Parking Type	Number
Residential spaces	76
Accessible residential spaces	22
Residential visitor spaces	12

Car Parking Type	Number
Accessible residential visitor spaces	1
Car share parking	2
Motorcycle parking	11
Car wash bay	1
Service vehicle spaces	2
Medium Rigid Vehicle loading dock(s)	1

Reason

To ensure the allocation of parking is in accordance with the Council's LEP and DCP.

(47) BICYCLE PARKING AND END OF TRIP FACILITIES

- (a) The minimum number of bicycle parking spaces and end of trip facilities to be provided within the site boundary for the development must comply with the table below.

Bicycle Parking Type	Number	Requirements
Residential	141	Spaces must be a class 1/2 bicycle locker [1]
Residential visitor	15	Spaces must be Class 3 bicycle rails

All bicycle parking spaces and end of trip facility must be provided on private land. The public domain cannot be used to satisfy this condition.

Notes:

- (i) If a basement storage area on title that is large enough to store a bike and is no smaller than a class 1 bike locker this can be counted as a space.
- (b) The layout, design and security of bicycle facilities must comply with the minimum requirements of Australian Standard AS 2890.3 Parking Facilities Part 3: Bicycle Parking Facilities. The details must be submitted to and approved by the Registered Certifier confirming prior to and form part of the Stage 1 Construction Certificate being issued.

Reason

To ensure the allocation of bicycle parking onsite that is in accordance with Australian Standards and the Council's DCP.

(48) CAR SHARE SPACES

- (a) A minimum of 2 car parking spaces for the exclusive use of car share scheme vehicles are to be provided.
- (b) The spaces must be retained as common property of the Owners Corporation of the site, and not sold or leased to an individual owner/occupier at any time.
- (c) The spaces must be made available to car share operators without a fee or charge and be accessible to members of the car share scheme at all times.
- (d) The spaces must be sign posted for use only by car share vehicles and well lit.
- (e) The car share spaces are to be available at the same time that the car park commences operation.

Reason

To ensure car share spaces are provided within the development are maintained as common property.

(49) PARKING DESIGN

The design, layout, signage, line marking, lighting and physical controls of all off-street parking facilities must comply with the minimum requirements of Australian Standard AS/NZS 2890.1 Parking facilities Part 1: Off-street car parking, AS/NZS 2890.2 Parking facilities Part 2: Off-commercial vehicle facilities and AS/NZS 2890.6 Parking facilities Part 6: Off-street parking for people with disabilities. The details must be submitted to and approved by the Registered Certifier prior to a Stage 1 Construction Certificate being issued.

Reason

To ensure parking facilities are designed in accordance with the Australian Standards.

(50) CONSTRUCTION ENVIRONMENTAL MANAGEMENT PLAN

Prior to the issue of any Construction Certificate a Construction Environmental Management Plan (CEMP) must be prepared by appropriately qualified person for the site and submitted to Council's Area Planning Coordinator | Area Planning Manager for written approval. The CEMP must consider all potential environmental impacts from the approved works including but not limited to sedimentation control, contamination containment, stockpiles, noise and vibration, odours and dust emissions.

All works must be undertaken onsite in accordance with the approved Construction Environmental Management Plan.

Reason

To ensure that construction is appropriately managed.

(51) CONSTRUCTION TRAFFIC MANAGEMENT PLAN

- (a) A Construction Traffic Management Plan must be submitted to and approved by Council prior to any Construction Certificate being issued.
- (b) The approved plan must be complied with during any demolition and/or construction work.

Reason

To ensure that the impacts of construction traffic is appropriately managed.

(52) REFLECTIVITY

Prior to issue of the Stage 2 Construction Certificate the Registered Certifier must ensure that the visible light reflectivity from building materials used on the facade of the building does not exceed 20%.

Reason

To ensure the development does not result in adverse reflectivity impacts and to protect the amenity of the public domain.

(53) COMPLIANCE WITH THE ACOUSTIC REPORT PRIOR TO CONSTRUCTION AND OR OCCUPATION CERTIFICATES

- (a) All relevant performance parameters (including but not limited to requirements, engineering assumptions and recommendations) in the DA Acoustic Report prepared by JHA dated 8 Sept 2023, ref 220402-AC-RPT-DA [B], Council Ref 2023/559163 must be implemented in the development prior to the commencement of its use.
- (b) Prior to the issue of the Stage 2 Construction Certificate, the final construction drawings and final construction methodology must be assessed and reported to be in accordance with the requirements of the DA Acoustic Report in (a) above, with reference to relevant documentation. This must be done by a Suitably Qualified Acoustic Consultant* (see definition below). This work will be to the satisfaction of the Registered Certifier.
- (c) Prior to the issue of any Occupation Certificate, a Suitably Qualified Acoustic Consultant* is to provide a written Acoustic Verification Report to the satisfaction of the Principal Certifier that the development complies with the requirements set out in the Report and in (a) and (b) above.

Note: Suitably Qualified Acoustic Consultant means a consultant who possesses the qualifications to join the Australian Acoustical Society, Institution of Engineers Australia (grade of member) or the Association of Australasian Acoustical Consultants (grade of member firm).

- (d) All physical aspects of the building's structure installed in order to meet performance parameters in accordance with this condition must be maintained at all times.

Reason

To ensure all parties are aware of the supporting documentation that applies to the development.

(54) DEMOLITION, EXCAVATION AND CONSTRUCTION NOISE AND VIBRATION MANAGEMENT PLAN

A site-specific noise management plan must be submitted to the Council for comment and approval prior to issue of any Construction Certificate.

The Plan must be prepared by a suitably qualified acoustic consultant who is a person who possesses the qualifications to join the Australian Acoustic Society, Institution of Engineers Australia (grade of member) or the Association of Australasian Acoustic Consultants (grade of member firm).

The plan must include but not be limited to the following:-

- (a) Identification of noise sensitive receivers near to the site.
- (b) A prediction as to the level of noise impact likely to affect the nearest noise sensitive receivers from the use and proposed number of high noise intrusive appliances intended to be operated onsite. A statement should also be submitted outlining whether or not predicted noise levels will comply with the noise criteria stated within the *City of Sydney Construction Hours /Noise Code of Practice 1992* for the typical construction hours of 07.00am to 7.00pm. Where resultant site noise levels are likely to be in exceedance of this noise criteria then a suitable proposal must be given as to the duration and frequency of respite periods that will be afforded to the occupiers of neighbouring property.
- (c) A representative background noise measurement ($L_{A90, 15 \text{ minute}}$) should be submitted, assessed in the vicinity of any potentially affected receiver locations and measured in accordance with AS 1055:1.2.1997.
- (d) Confirmation of the level of community consultation that has/is and will be undertaken with Building Managers/ occupiers of the main adjoining noise sensitive properties likely to be most affected by site works and the operation of plant/machinery.
- (e) Confirmation of noise monitoring methodology that is to be undertaken during the main stages of work at neighbouring noise sensitive properties in order to keep complaints to a minimum and to ensure that noise from site works complies with the noise criteria contained within City's Construction Noise Code.
- (f) What course of action will be undertaken following receipt of a complaint concerning offensive noise.
- (g) Details of any noise mitigation measures that have been outlined by an acoustic consultant or otherwise that will be deployed on site to reduce noise impacts on the occupiers of neighbouring noise sensitive property to a minimum.

- (h) What plant and equipment is to be used on site, the level of sound mitigation measures to be undertaken in each case and the criteria adopted in their selection taking into account the likely noise impacts on the occupiers of neighbouring property and other less intrusive technologies available.

Reason

To ensure an adequate construction noise and vibration management plan is prepared.

(55) FLOOR TO CEILING HEIGHT

Prior to a Stage 2 Construction Certificate being issued, the Registered Certifier must ensure that all living rooms and bedrooms in sole occupancy units must have a minimum finished floor to ceiling height of not less than 2.7 metres.

Reason

To ensure an adequate minimum floor to ceiling height to provide an acceptable level of amenity.

(56) VENTILATION SECURITY AND WEATHER PROTECTION

All habitable rooms must have a combination of openable sashes and/or louvres that ensure a minimum Effective Openable Area (EOA) for ventilation purposes as required by the NCC and the Apartment Design Guide (ADG) when opened to the maximum dimension permitted under the NCC provisions for *Protection of Openable Windows*.

The sashes and/or louvres must provide the minimum EOA under most wet weather conditions and must also be securable to prevent unauthorised entry when open. The minimum EOA must be provided in addition to any external doors as these cannot be adequately weather-protected or secured when left partially open. A reduction for fly screens must be taken into consideration to account for any future installation.

The method of measurement must be in accordance with the definition of EOA as defined by the Apartment Design Guide, which is:

'the minimum area of clear opening of a window that can take part in providing natural ventilation. The effective openable area of a sliding or hung sash window can be measured in elevation. Hinged windows such as casement, awning and hopper windows may measure the diagonal plane from the sash to the jamb and add the triangles at either end up to a total area of the window opening in the wall. Obstruction within 2m of a window reduce the effective openable area as measured in elevation. Fly screens and security screen will reduce the effective openable area by half.'

- (a) Prior to the issue of a Stage 2 Construction Certificate, the following details of the proposed fenestration must be submitted to, and approved by Council's Area Coordinator Planning Assessments / Area Planning Manager:

- (i) Detailed elevation drawings and a window schedule which show the size, type and location of all openable sashes / louvres in relation to the floor area served by those sashes;
 - (ii) Details of any proposed insect screens or other barriers to free air flow;
- (b) Evidence that all fenestration details shown in the approved drawings described in part (a) above have been completed is to be provided to the Principal Certifier prior to any Occupation Certificate being issued.

Reason

To ensure adequate ventilation to provide an acceptable level of amenity.

(57) DESIGN FOR ENVIRONMENTAL PERFORMANCE

- (a) Prior to the issue of any Construction Certificate, the Registered Certifier must be satisfied that those matters listed in the approved Design for Environmental Performance report prepared by JHA Engineers dated 30 August 2023 (Council Ref: 2023/559145) are incorporated into the relevant construction plans and accompanying documentation.

- (b) Section 3 – BASIX

A copy of the required completed BASIX certificate(s) accepted as part of this consent must be lodged with an application for any construction certificate and the items nominated as part of the subject BASIX certificate(s) must be specified on the plans submitted with the Construction Certificate application.

Note: Any requirement detailed in the accompanying BASIX Certificate must be included as a specific notation or inclusion on any future Construction Certificate plans and specification in accordance with Division 1 of Part 6 of the EP&A Regulation, 2021.

- (ii) Section 4 – Energy Efficiency and Greenhouse Gas Emissions Abatement
- (iii) Section 5 – Passive Design for Thermal Performance – Building Envelope Design
- (iv) Section 6 – On site Renewable Energy Generation and Storage
- (v) Section 7 – Design for Resilience to Climate Change
- (vi) Section 8 – Designing for mains potable water savings and water efficiency
- (vii) Section 9 – Storm water quality
- (viii) Section 10 – City Greening
- (ix) Section 11 – Promoting Active Transport and Reducing Transport Emissions

- (x) Section 12 – Materials, Embodied Carbon and Circularity
 - (xi) Section 13 – Waste Management and Resource Recovery
 - (xii) Section 14 – Third Party Certification and Design, Construction or Technology Innovations
- (c) Changes to any commitments as listed in the approved Design for Environmental Performance report must be submitted to and approved by Council’s Area Planning Manager/Coordinator prior to the issue of any Construction Certificate.

Reason

To ensure the environmental performance of the development.

(58) SITE AUDIT STATEMENT

Prior to the issue of any construction certificate associated with the built form of the development (excluding building work directly related to remediation), a Section A Site Audit Statement must be obtained from a NSW Environment Protection Authority accredited Site Auditor and submitted to the Council's Area Planning Manager at email address:-

hbapplications@cityofsydney.nsw.gov.au

The Site Audit Statement must confirm that the site has been remediated in accordance with the approved Remedial Action Plan and clearly state that site is suitable for the proposed use.

- (a) In circumstances where the Site Audit Statement is subject to conditions that require ongoing review by the Auditor or Council, these must be reviewed and must be approved by the Council's Health and Building Unit in writing through the Area Planning Manager before the Site Audit Statement is issued.
- (b) In circumstances where the Site Audit Statement conditions (if applicable) are not consistent with the consent, the development must not proceed until the inconsistency has been resolved to the satisfaction of Council (such as via a S4.55 modification of the consent pursuant to the provisions of the *Environmental Planning & Assessment Act 1979*).
- (c) **No Occupation Certificate is to be issued** by the Principal Certifier unless a Site Audit Statement has been submitted to and approved by Council in accordance with this condition.

Reason

To ensure that the site is appropriately remediated.

(59) LANDSCAPING OF THE SITE (TREES)

- (a) A detailed landscape plan, drawn to scale, by a qualified landscape architect or landscape designer, must be submitted to and approved by Council's Director City Planning Development & Transport prior to the issue of any Construction Certificate. The plan must include:
- (i) Location of existing and proposed structures on the site including, but not limited to, existing and proposed trees, paved areas, planted areas on slab, planted areas in natural ground, lighting and other features.
 - (ii) Details of earthworks and soil depths including mounding and retaining walls and planter boxes (if applicable). The minimum soil depths for planting on slab must be 1000mm for trees, 450mm for shrubs and 200mm for groundcovers.
 - (iii) Location, numbers, type and supply of plant species, with reference to the relevant Australian Standard.
 - (iv) The design must provide a minimum 15% canopy cover across the site, provided by 30% of the species having a mature height of 6-8 metres, 30% mature heights of 10-15 metres and 40% mature heights of 20-30 metres.
 - (v) Tree selection shall include a diverse range of species which must be consistent with the expected mature heights and growth within the Sydney area (mature heights must not solely rely on plant literature);
 - (vi) New trees must be planted in natural ground with adequate soil volumes to allow maturity to be achieved. Planter boxes will not be accepted for tree planting.
 - (vii) New trees must be appropriately located away from existing buildings and structures to allow maturity to be achieved without restriction.
 - (viii) New trees must be appropriately spaced to allow maturity to be achieved without restriction. Refer to City's Tree Species list for tree dimensions and characteristic.
 - (ix) Details of planting procedure and maintenance.
 - (x) Details of drainage, waterproofing and watering systems.
 - (xi) Prior to the issue of a Stage 3 Construction Certificate, a maintenance plan is to be submitted to and approved by the Principal Certifying Authority. The maintenance plan is to be complied with during occupation of the property.
 - (xii) All landscaping in the approved plan is to be completed prior to an Occupation Certificate being issued.

Reason

To ensure sufficient canopy cover is provided and healthy trees are established and maintained on the site.

(60) PUBLIC DOMAIN TREE PLANTING AND MAINTENANCE

(a) A Tree Planting Plan must be submitted and approved by the City's Public Domain Unit prior to the issue of any Construction Certificate. The plan must include and be consistent with the following requirements:

- (i) Tree species shall be consistent with the City's Street Tree Master Plan (refer to relevant precinct plans) or other relevant guidance document. Species substitutes will not be accepted.
- (ii) Tree pits must be located and constructed in accordance with the City's Street Tree Master Plan (Technical Guidelines) or other relevant guidance document.
- (iii) The tree pit design must include structural soils or structural cells to support pavements in accordance with the Street Tree Master Plan (Technical Guidelines).
- (iv) Indicate the chosen tree planting arrangement, being a choice of one of two options, being:

Undertake all tree supply, planting, and maintenance requirements to the required standards and to the satisfaction of the City's Tree Management.

OR

Pay a fee for the City to supply, plant, and maintain each required tree on the applicant's behalf. The fee is consistent with the City's Schedule of Fees and Charges.

(b) If opting to undertake all tree supply, planting, and maintenance requirements, the following requirement must be met:

- (i) The trees must be a minimum container size of (insert size) litres at the time of planting.
- (ii) All new trees must be grown in accordance with the Australian Standard 2303:2015 'Tree stock for landscape use' and meet the requirements of this standard at the time of planting.
- (iii) Certification from the tree supplier must be submitted to the City's Tree Management Officer and Public Domain Officer, prior to the trees being planted. The certification must confirm the tree(s) have been grown and comply with the requirements of AS2302. Any new trees that do not conform will be rejected by the City.
- (iv) The trees must be planted by an Arborist or Horticulturist with a minimum AQF Level 3 qualification and be planted before the issuing of the final Occupation Certificate.

- (v) All new trees must be inspected and approved by the City's Tree Management Officer (or their representative) at the following milestones: before planting with planting pits excavated; after planting; and at the end of the maintenance period.
- (vi) All trees planted in accordance with the approved Tree Planting Plan must be maintained by an Arborist or Horticulturist with a minimum AQF Level 3 for a minimum period of twelve (12) months, commencing from the date of planting. Maintenance includes, but is not limited to, watering, weeding, removal of rubbish from tree base, pruning, fertilizing, pest and disease control and any other operations to maintain a healthy robust tree.
- (vii) At the end of the twelve (12) month maintenance period, written acceptance of the tree/s must be obtained from the City before release of the public domain bond.
- (viii) If a tree fails to thrive and successfully establish during the maintenance period, then City will request payment for a replacement tree and establishment period according to the City's Schedule of Fees and Charges.

Reason

To ensure that details of street trees to be planted are approved, the works are carried out in an appropriate manner and the trees are maintained following installation.

(61) ELECTRICITY TURRET AND SUBSTATION LOCATIONS - PRIOR TO CONSTRUCTION CERTIFICATE

- (a) Prior to the issue of a Stage 1 Construction Certificate, guidance must be sought from an accredited Level 3 designer in order to locate any required electricity turrets and substations within the site boundaries, rather than the footway areas surrounding the site.
- (b) Where necessary, an easement for electricity purposes must be created burdening the site, with terms to the satisfaction of Ausgrid.
- (c) A letter from Ausgrid must be obtained prior to a Stage 1 Construction Certificate being issued, confirming that the Construction Certificate plans have appropriately provided for any necessary substations and electricity turrets to be located within the property boundaries.

Reason

To ensure that the provision of a substation to service the development is appropriately incorporated into the design of the building in a manner that minimises streetscape impacts.

(62) TELECOMMUNICATIONS IN NEW DEVELOPMENTS

Prior to the issue of the Subdivision or Stage 2 Construction Certificate in connection with a development, the developer (whether or not a constitutional corporation) is to provide evidence satisfactory to the Registered Certifier that arrangements have been made for:

- (a) the installation of fibre-ready facilities to all individual lots and/or premises in a real estate development project so as to enable fibre to be readily connected to any premises that is being or may be constructed on those lots. Demonstrate that the carrier has confirmed in writing that they are satisfied that the fibre ready facilities are fit for purpose; and
- (b) the provision of fixed-line telecommunications infrastructure in the fibre-ready facilities to all individual lots and/or premises in a real estate development project demonstrated through an agreement with a carrier.

Note: real estate development project has the meanings given in section 372Q of the Telecommunications Act.

Reason

To ensure the development adequately provides for telecommunications.

(63) UTILITY SERVICES

To ensure that utility authorities are advised of the development:

- (a) Prior to the issue of any Construction Certificate a survey is to be carried out of all utility services within and adjacent to the site including relevant information from utility authorities and excavation, if necessary, to determine the position and level of services.
- (b) Prior to the commencement of work the applicant is to obtain written approval from the utility authorities (e.g. Energy Australia, Sydney Water, and Telecommunications Carriers) in connection with the relocation and/or adjustment of the services affected by the construction of the underground structure. Any costs in the relocation, adjustment or support of services are to be the responsibility of the developer.

Reason

To ensure that utility authorities are advised of the development and their approval is obtained in connection with the relocation and/or adjustment of services affected by the development.

(64) WASTE AND RECYCLING MANAGEMENT – RESIDENTIAL

The Operational Waste Management Plan accompanying this Development Application has not been approved by this consent. An Operational Waste Management Plan is to be submitted to and reviewed by Council's City Cleansing & Resource Recovery Unit and approved by Council's Area Planning Manager prior to the issue of any Construction Certificate. The plan must comply with Council's Development Control Plan and *Guidelines for Waste Management in New Developments*. The plan must be updated to address the following:

- (a) Exclude reference to the schedule of waste collection outside of peak visiting hours and operating hours. Waste collection hours will be anytime between 6.00am and 6.00pm on scheduled collection days;
- (b) Require waste and recycling storage areas to have:
 - (i) Hot and cold water wash system; and
 - (ii) Waterproofing throughout all intersections and extending 1200mm high on walls.

Reason

To document agreed waste management facilities and arrangements and ensure good waste management outcomes.

(65) CERTIFICATION OF PIERING DEPTH - PRIOR TO CONSTRUCTION CERTIFICATE

Prior to the issue of any Construction Certificate:

- (a) A structural engineer registered with the National Engineering Register (NER) must provide unqualified certification that the design depth of any piling and foundations for the building will extend for an appropriate depth below the zone of influence for the desalination pipeline located with the adjacent easements for water supply purposes.
- (b) Early contact should be made with the Sydney Desalination Plant Pty Limited to ascertain any requirements they may have in relation to protection of the pipeline, and to obtain any works as executed information that may be available for the pipeline to assist in the piling design and certification
- (c) The design of piers and foundations should incorporate reasonable requirements of the Sydney Desalination Plant Pty Limited

Reason

To ensure that the building's future structural integrity is not compromised by excavations associated with future maintenance and repair of the desalination pipeline

(66) REGISTRATION OF PLAN OF SUBDIVISION DEDICATING PART OF MACDONALD STREET - PRIOR TO CONSTRUCTION CERTIFICATE

Prior to the issue of any Construction Certificate for the building, the Plan of Subdivision dedicating parts of MacDonal Street with subdivision certificate number 2021/33 dated 19 January 2022 must be registered with the office of NSW Land Registry Services. A copy of the registered subdivision must be provided to the Principal Certifier prior to the issue of a Stage 1 Construction Certificate for the building

Reason

To dedicate constructed components of MacDonald Street currently in use by the public, and to provide access to the development

(67) DILAPIDATION REPORT - PUBLIC DOMAIN

Prior to an approval for demolition and preparatory works being granted or the issue of any Construction Certificate, whichever is earlier, a photographic recording of the public domain site frontages is to be prepared as described in the Public Domain Manual and submitted for approval by Council's Public Domain Unit. The City's *Public Domain Manual* is available for download from the City's website at <https://www.cityofsydney.nsw.gov.au/>

The submission is to include written confirmation, issued with the authority of both the applicant and the photographer that the City of Sydney is granted a perpetual non-exclusive license to make use of the copyright in all images supplied, including the right to make copies available to third parties as though they were Council images. The signatures of both the applicant and the photographer must be included.

Reason

To establish and document the condition of the public domain for comparison as building work progresses and is completed.

(68) FLOOD PLANNING LEVELS

The development must be constructed to comply with the recommended flood planning levels indicated in Table D1 of the report titled 'Flooding Assessment for 155 Mitchell Road, Erskineville (Stage 2 Report)', Ref no.300203763, dated 25 July 2024, prepared by Venus Jofreh and dated 25/7/2024.

Details must be submitted to the Registered Certifier prior to the issue of any Construction Certificate demonstrating that the development will comply with the recommended flood planning levels.

Reason

To ensure the development complies with the recommended flood planning levels.

(69) PUBLIC DOMAIN CONCEPT PLAN

A public domain concept plan, showing all the site frontages and extending a minimum of 5m past the boundary and to the road centreline, must be prepared in accordance with the City's *Public Domain Manual* and *Sydney Streets Code*. It must be submitted to the City's Public Domain Unit and approved by the Director City Planning Development & Transport prior to the issue of any Construction Certificate for the development other than for demolition or excavation.

Note: A detailed Public Domain Plan will be required prior to construction (refer to Public Domain Plan Detailed Documentation for Construction condition).

Reason

To ensure public domain works comply with Council's requirements.

(70) PUBLIC DOMAIN LEVELS AND GRADIENTS

Prior to the issue of any Construction Certificate, a Public Domain Levels and Gradients submission for the building and site frontages must be submitted to and approved by the City's Public Domain Unit. The submission must be prepared in accordance with the City's *Public Domain Manual* and submitted with a completed Application for *Public Domain Levels and Gradients*. Information on how to complete the submission can be downloaded from the City's website at <https://www.cityofsydney.nsw.gov.au/development/public-domain-works/da-associated-works>.

Any requirements to comply with Disability Discrimination Act at the entrance to a building or publicly accessible space must be resolved inside the site boundary.

Note: Public Domain Levels and Gradient plans are to be included with the Public Domain Plan – Detailed Documentation for Construction condition submission.

Reason

To ensure public domain levels and gradients comply with Council's requirements.

(71) STORMWATER DRAINAGE DESIGN

Prior to issue of any Construction Certificate a detailed stormwater management plan prepared by suitable qualified and experienced professional must be submitted to and approved by the City's Public Domain Unit and must include a certified stormwater drainage design complying with:

- (i) Council's Sydney Streets Technical Specifications, Part A4 Drainage Design;
- (ii) Council's Sydney Streets Technical Specifications, Standard Drawings;
- (iii) Council's Sydney Streets Technical Specifications, Part B10: Stormwater Drainage Construction;
- (iv) Council's Stormwater Drainage Manual; and
- (v) All relevant Australian Standards.

This information is available for download from the City's website at <https://www.cityofsydney.nsw.gov.au/development/public-domain-works/da-associated-works>.

Note: A Deed of Agreement (Stormwater Deed) for all proposed connections to the City's drainage system, and a Positive Covenant for all OSD systems may be required prior to issue of any Occupation Certificate.

Reason

To ensure stormwater drainage design complies with Council's requirements.

(72) STORMWATER ON-SITE DETENTION

The requirements of Sydney Water with regard to the on-site detention (OSD) of stormwater must be ascertained and complied with. Evidence of the approval must be submitted to Council prior to issue of any Construction Certificate other than demolition.

Where an OSD is not required by Sydney Water one may still be required by the City.

Reason

To ensure the requirements of Sydney Water are complied with.

(73) STORMWATER QUALITY ASSESSMENT

The development must comply with report titled 'Building E, 155 Mitchell Road, Erskineville, NSW 2043', Project Number S22167, Version C, prepared by BG&E and dated 4 September 2023, approved with this development application.

Prior to issue of any Construction Certificate a design certification report prepared by a suitably qualified practitioner engineer (NPER) demonstrating compliance with approved music link targets and parameters must be submitted to and approved by the City's Public Domain Unit.

The report must include a response to all stormwater quality improvement devices structural integrity, treatment train and their treatment properties demonstrating compliance with the approved MUSIC link reports.

Reason

To ensure appropriate stormwater quality on the site.

(74) SURVEY INFRASTRUCTURE – IDENTIFICATION AND RECOVERY

Under Section 24 of the Surveying and Spatial Information Act 2002, it is an offence to remove, damage, destroy, displace, obliterate or deface any survey mark unless authorised to do so by the Surveyor-General. Accordingly, the applicant must, where possible, ensure the preservation of existing survey infrastructure undisturbed and in its original state or else provide evidence of the Surveyor-General's authorisation to remove or replace marks.

Prior to the issue of any Construction Certificate, documentary evidence must be prepared by a Registered Surveyor and submitted to and approved by Council's Area Planning Manager / Coordinator. This evidence must include either:

- (a) A copy of any Surveyor-General's Approval for Survey Mark Removal granted by NSW Spatial Services for the subject site, including all documentation submitted as part of that application (for example the survey mark audit schedule, strategy plan and strategy report); or

- (b) A letter, signed by a current NSW Registered Land Surveyor and including his or her Board of Surveying and Spatial Information (BOSSI) identification number, stating that all investigations required under Surveyor-General's Direction No.11 have been made for the subject site and that no survey infrastructure will be affected by the proposal.

Council's Principal Surveyor may request further information and/or add conditions to any Surveyor-General's Approval at their discretion.

Reason

To ensure the preservation of existing survey infrastructure.

(75) TEMPORARY DEWATERING DURING CONSTRUCTION

Prior to discharging any water collected during excavation and construction into the City's stormwater drainage system, approval must be sought from the City's Public Domain Unit. A dewatering management plan must be submitted with an *Application for Temporary Dewatering* available to download on the City's website.

Other options for dewatering include disposal to sewer with prior approval from Sydney Water, or off-site disposal by a liquid waste transporter for treatment/disposal to an appropriate waste treatment/processing facility.

Reason

To ensure dewatering is managed appropriately.

BEFORE BUILDING WORK COMMENCES

(76) OPERATING HOISTING DEVICES INCLUDING BUILDING MAINTENANCE UNITS OVER A PUBLIC ROAD

If it is proposed to install a building maintenance unit or operate a hoisting device above a road (footpath) including swinging, hoisting material/equipment and slewing any part of the device, a separate application under Section 68 of the *Local Government Act 1993* and Sections 138/139 of the *Roads Act 1993* must be submitted to and approved by Council prior to the installation of such devices.

Note: Building maintenance unit means a power operated suspended platform and associated equipment on a building specifically designed to provide permanent access to the faces of the building for maintenance (*Work Health and Safety Regulation 2017*).

Reason

To ensure appropriate approvals are sought for operating hoisting devices.

(77) TRAFFIC WORKS

Any proposals for alterations to the public road, involving traffic and parking arrangements, must be designed in accordance with RMS Technical Directives and must be referred to and agreed to by the Local Pedestrian, Cycling and Traffic Calming Committee.

A Traffic Works Plan is to be prepared and must include:

- (a) Road, parking and traffic arrangements;
- (b) Signs;
- (c) Pedestrian crossings;
- (d) Traffic signals; and
- (e) Any relevant approvals from Transport for NSW.

The Traffic Works Plan is to be submitted to publicdomain@cityofsydney.nsw.gov.au for approval.

The necessary referral and advice of the Local Pedestrian, Cycling and Traffic Calming Committee must be obtained prior to the commencement of any construction works within the site (for development that includes the construction of new roads.

Note: Referral to the Local Pedestrian, Cycling and Traffic Calming Committee may take a few months and it is recommended that the Traffic Works Plan submission is initiated early in the project.

Reason

To ensure all relevant approvals for traffic and parking works are obtained and designed in accordance with relevant requirements.

(78) CONSTRUCTION LIAISON COMMITTEE – ASHMORE PRECINCT

- (a) Prior to the commencement of any work, a Construction Liaison Committee or an alternative approved in writing by Council's Director City Planning, Development and Transport, is to be established by the developer to ensure that demolition and construction related impacts (including construction noise and vibration, loading, issues associated with construction workers and vehicles, traffic issues and management of the construction site) can be dealt with expeditiously and cooperatively.
- (b) The Committee is to be comprised of interested parties representing potentially affected properties adjacent to and surrounding the site and any interested group. A nominated representative of the Council may be an observer from time to time.

- (c) The Committee shall meet prior to the commencement of works on the site and prior to the submission of the final Construction Management Plan to Council to address initial areas of concern, and then at monthly intervals or as considered appropriate by the Committee throughout the construction process.
- (d) Prior to the commencement of work, the Site Manager is to provide the members of the Committee and Council with 24 hour contract details (including location of site offices and a 24 hour phone number) to ensure that any matters which arise during the construction process are addressed immediately. The Site Manager shall be available during normal business hours to provide information to the public about activities on site and to bring any complaints to the attention of the Applicant.
- (e) A register of all complaints shall be kept by the Applicant throughout the duration of the project and shall be made available to Council Officers on request.
- (f) The Committee meetings are to be recorded/minuted and such records/minutes are to be provided to Council within 14 days of the meeting.
- (g) The first Committee meeting should establish Terms of Reference, including purpose, size and membership, quorum, meeting frequency and duration, procedures for meetings, recording/distribution of comments and outcomes and the like.
- (h) The initial call for resident/worker nominations to be sent to the adjacent and adjoining property owners and tenants must be submitted to and approved by the Director City Planning, Development and Transport prior to sending.
- (i) The Site Manager is to inform each Committee meeting about the construction program, progress reports and impending work.

Reason

To ensure that a Construction Liaison Committee (or alternative) is established and operates to ensure that demolition and construction related impacts can be dealt with expeditiously and cooperatively.

(79) EROSION AND SEDIMENT CONTROL - MORE THAN 2,500SQM

Prior to the commencement of any works on site, including, but not limited to demolition, excavation or construction work, a Soil and Water Management Plan (SWMP) must be submitted to and be approved by the Principal Certifier.

- (a) The SWMP must identify and respond to all items for Erosion and Sediment Control Plans listed in the condition above, as well as:
 - (i) existing site contours;
 - (ii) location and diagrammatic representation of all necessary erosion and sediment control systems or structures used to mitigate or prevent pollution to stormwater;

- (iii) location and engineering details with supporting design calculations for all necessary sediment basins, constructed wetlands, gross pollutant traps, trash racks or biofiltration swales (as relevant).

Reason

To ensure that appropriate erosion and sediment control measures are put in place during construction to protect the environment.

(80) OTHER REQUIRED APPROVALS

Any structure, attachment or activity which is proposed to be undertaken in, on or above a road reserve or the public domain (including a public footway) must have separate approval(s) obtainable through the lodgement of an application under Section 68 of the Local Government Act 1993 and/or Section 138/139 of the Roads Act 1993 prior to the commencement of work/activities within the road reserve/public domain. Such activities include but not limited to:

- (a) installation of construction-related temporary structures including hoardings/scaffolding;
- (b) installation and/or alterations to advertising/business signs;
- (c) installation and/or alterations to street awnings;
- (d) crane operation and other hoisting activities;
- (e) temporary works (e.g. barricading, road openings, mobile hoisting devices);
- (f) works zones (for loading and unloading from the roadway); and
- (g) temporary ground anchoring and shoring to support a roadway when excavating; and
- (h) any other structure or encroachment including facade elements/architectural features.

Reason

To ensure use of a public place is managed appropriately.

(81) TREE PROTECTION ZONE

- (a) Before the commencement of works, Tree Protection Zone/s (TPZ) must be established around all trees to be retained not less than the distance indicated in the TPZ schedule below.
- (b) Tree protection must be installed and maintained in accordance with the Australian Standard 4970 Protection of Trees on Development Sites and with the following schedule:

TPZ Schedule

Tree No.	Species Name	Location	Radius (m) From Trunk
1-3	<i>Eucalyptus microcorys</i> (Tallowwood)	155 Mitchell Road (adjacent to Ashmore Street and new Kooka Walk)	8

Note: The work within the TPZ and installation of tree protection measures is only applicable within the subject development site and the public domain.

- (c) Tree protection fencing must be installed and maintained within the subject development site prior to the commencement of works and in accordance with the following:
- (i) A 1.8m high fully supported chainmesh protective fencing. The fencing, secured and fastened to prevent movement, must be installed five (5) metres around the garden area surrounding trees. Woody roots must not be damaged or destroyed during the establishment or maintenance of the fencing.
 - (ii) The area within the fencing must be mulched to a depth of 75mm and kept free of weeds and grass for the duration of works.
 - (iii) Tree Protection Signage must be attached facing outwards in a visible position identifying the name and contact details of the Project Arborist. All signs must remain in place throughout all work on site.
 - (iv) Tree protection fencing must not be moved or relocated unless written approval is obtained from the Project Arborist and a copy is provided to Council's Tree Management Officer which outlines alternate protection measures and that the relocated fencing will not impact the viability and retention of the tree/s.
- (d) Ground surface protection must be installed if construction access is required through any TPZ where the existing ground surface material is not a hard surface or paving. The ground protection must be:
- (i) Protected with boarding (ie scaffolding board or plywood sheeting or similar material), placed over a layer of mulch to a depth of at least 75mm and geotextile fabric.
 - (ii) The protective boarding must be left in place for the duration of the construction and development.
- (e) The following works must be excluded from within any TPZs:
- (i) Excavation;
 - (ii) Soil cut or fill including trenching;

- (iii) Soil cultivation, disturbance or compaction;
 - (iv) Stockpiling, storage or mixing of materials;
 - (v) The parking (except existing on street parking), storing, washing and repairing of tools, equipment and machinery;
 - (vi) The disposal of liquids and refuelling;
 - (vii) The disposal of building materials;
 - (viii) The siting of offices or sheds;
 - (ix) Any action leading to the impact on tree health or structure.
- (f) Any trenching works for services / hydraulics / drainage etc must not be undertaken within any TPZ. Alternative installation methods for services, such as directional boring/drilling, or redirection of services must be employed.
- (g) All work undertaken within or above the TPZ must be:
- (i) Carried out in accordance with a work methodology statement prepared by an Arborist with a minimum AQF Level 5 qualification in arboriculture and written approval is obtained from Council's Tree Management Officer before its implementation; and
 - (ii) Supervised by a Project Arborist with a minimum AQF Level 5 qualification in arboriculture.

Reason

To ensure the protection and ongoing health of trees.

(82) TREE TRUNK PROTECTION

The tree/s must be protected in accordance with the Australian Standard AS4970 Protection of Trees on Development Sites. All trees must be protected during the construction works as follows:

- (a) Tree trunk and major branch protection must be undertaken prior to the issuing of any Construction Certificate. The installation of trunk protection must be supervised and certified by the Project Arborist with a minimum AQF Level 5 qualification in arboriculture and must include:
 - (i) Tree trunk/s and/or major branches to a height of two metres must be protected by wrapped thick carpet underlay or similar padding material to limit damage;
 - (ii) Timber planks (50mm x 100mm or similar) must be placed around tree trunk/s. The timber planks must be spaced at 100mm intervals and must be fixed against the trunk with tie wire, or strapping. The thick carpet underlay or similar padding material and timber planks must not be fixed to the tree in any instance, or in any fashion;

- (iii) Tree trunk and major branch protection is to remain in place for the duration of construction and development works and must be removed at the completion of the project.

Reason

To ensure the protection and ongoing health of trees.

DURING BUILDING WORK

(83) HOURS OF WORK AND NOISE – OUTSIDE CBD

The hours of construction and work on the development must be as follows:

- (a) All work, including building/demolition and excavation work, and activities in the vicinity of the site generating noise associated with preparation for the commencement of work (eg. loading and unloading of goods, transferring of tools etc) in connection with the proposed development must only be carried out between the hours of 7.30am and 5.30pm on Mondays to Fridays, inclusive, and 7.30am and 3.30pm on Saturdays, with safety inspections being permitted at 7.00am on work days, and no work must be carried out on Sundays or public holidays.
- (b) All work, including demolition, excavation and building work must comply with the City of Sydney Code of Practice for Construction Hours/Noise 1992 and Australian Standard 2436 - 2010 Guide to Noise Control on Construction, Maintenance and Demolition Sites.
- (c) Notwithstanding the above, the use of a crane for special operations, including the delivery of materials, hoisting of plant and equipment and erection and dismantling of on-site tower cranes which warrant the on-street use of mobile cranes outside of above hours can occur, subject to a separate application being submitted to and approved by Council under Section 68 of the Local Government Act 1993 and Sections 138/139 of the Roads Act 1993.

Note: Works may be undertaken outside of hours, where it is required to avoid the loss of life, damage to property, to prevent environmental harm and/or to avoid structural damage to the building. Written approval must be given by the Construction Regulation Team, prior to works proceeding.

The *City of Sydney Code of Practice for Construction Hours/Noise 1992* allows extended working hours subject to the approval of an application in accordance with the Code and under Section 4.55 of the *Environmental Planning and Assessment Act 1979*.

Reason

To protect the amenity of the surrounding area.

(84) USE OF HIGH NOISE EMISSION APPLIANCES / PLANT

- (a) The operation of high noise emission appliances, plant and/or machinery such as pile – drivers, rock breakers and hydraulic hammers and those which are not listed in Groups B, C, D, E or F of Schedule 1 of the *City of Sydney Code of Practice for Construction Hours/Noise 1992* and Australian Standard 2436-2010 *Guide to Noise Control on Construction, Maintenance and Demolition Sites* is restricted to the hours of 08.30 - 11.30am and 12.30pm - 3.30pm Monday to Friday; 09.00 - 12.00am and 1.00pm - 3.00pm Saturdays.
- (b) All reasonable and feasible steps must be undertaken to ensure that the work, including demolition, excavation and building complies with the *City of Sydney Code of Practice for Construction Hours/Noise 1992* and Australian Standard 2436- 2010 *Guide to Noise Control on Construction, Maintenance and Demolition Sites*.

Reason

To protect the amenity of the surrounding area.

(85) NOTIFICATION OF USE OF HIGH NOISE EMISSION APPLIANCES/PLANT

The immediately adjoining neighbours must be given a minimum of 48 hours' notice that excavation, shoring or underpinning works or use of high noise emission appliances / plant are about to commence.

Reason

To protect the amenity of the surrounding area.

(86) SITE NOTICE OF PROJECTS DETAILS AND APPROVALS

A site notice is to be prominently displayed at the boundary to each frontage of the site for the purposes of informing the public of appropriate project details and relevant approvals. The notice(s) is to satisfy all of the following requirements:

- (a) Minimum dimensions of the notice are to measure 841mm x 594mm (A1) with any text on the notice to be a minimum of 30 point type size;
- (b) The notice is to be durable and weatherproof and is to be displayed throughout the construction period;
- (c) A copy of the first page of the development approval, building approval (including any modifications to those approvals) and any civic works approvals is to be posted alongside the notice in weatherproof casing;
- (d) The approved hours of work, the Principal Certifier including contact address and certification details, the name of the site manager, the responsible managing company, its address and 24 hour contact phone number for any enquiries, including construction/noise complaint, and the estimated date of completion of the project are to be displayed on the site notice;

- (e) The notice(s) is to be mounted at eye level on the perimeter hoardings and is also to state that unauthorised entry to the site is not permitted.
- (f) All notices and signs must be displayed in locations as specified in the City's Guidelines for Hoardings and Scaffolding.

Reason

(Prescribed condition EP&A Regulation, clauses 98A (2) and (3)).

(87) CLASSIFICATION OF WASTE

Prior to the exportation of waste (including fill or soil) from the site, the waste materials must be classified in accordance with the provisions of the Protection of the *Environment Operations Act 1997* and the *NSW EPA Waste Classification Guidelines, Part1: Classifying Waste (November 2014)*. The classification of the material is essential to determine where the waste may be legally taken. The *Protection of the Environment Operations Act 1997* provides for the commission of an offence for both the waste owner and the transporters if the waste is taken to a place that cannot lawfully be used as a waste facility for a particular class of waste. For the transport and disposal of industrial, hazardous or Group A liquid waste advice should be sought from the EPA.

Reason

To ensure that waste from site is classified and disposed of appropriately.

(88) COMPLIANCE WITH ACID SULFATE SOILS MANAGEMENT PLAN

All recommendations contained in the Acid Sulphate Soils Management Plan prepared by JBS&G reference 64092/149982 (Rev A) dated 8 March 2023, Council reference TRIM 2023/559219 must be implemented.

Reason

To ensure that Acid Sulphate Soils are appropriately managed.

(89) DISCHARGE OF CONTAMINATED GROUNDWATER

Contaminated groundwater must not be discharged into the City's stormwater drainage system.

Options for the disposal of groundwater include disposal to sewer with prior approval from Sydney Water or off-site disposal by a liquid waste transporter for treatment/disposal to an appropriate waste treatment/processing facility.

Reason

To ensure that the discharge of ground water is appropriately managed.

(90) IMPORTED FILL MATERIALS

All fill imported onto the site must be validated to ensure the imported fill is suitable for the proposed land use from a contamination perspective. Fill imported on to the site shall also be compatible with the existing soil characteristic for site drainage purposes.

The City may require details of appropriate validation of imported fill material to be submitted with any application for future development of the site. Hence all fill imported onto the site should be validated by either one or both of the following methods during remediation works:

- (a) Imported fill must be accompanied by documentation from the supplier which certifies that the material is not contaminated based upon analyses of the material for the known past history of the site where the material is obtained; and/or
- (b) Sampling and analysis of the fill material shall be conducted in accordance with NSW EPA (2022) Sampling Design Guidelines.

Reason

To ensure that imported fill is not contaminated.

(91) NOTIFICATION – NEW CONTAMINATION EVIDENCE

Council's Area Planning Manager and the Principal Certifier must be notified of any new information which comes to light during remediation, demolition or construction works which has the potential to alter previous conclusions about site contamination.

Reason

To ensure that the site is appropriately remediated.

(92) STOCKPILES

- (a) No stockpiles of soil or other materials must be placed on footpaths or nature strips unless prior approval has been obtained from the City's Construction Regulation Team.
- (b) All stockpiles of soil or other materials must be placed away from drainage lines, gutters or stormwater pits or inlets.
- (c) All stockpiles of soil or other materials likely to generate dust or odours must be covered.
- (d) All stockpiles of contaminated soil must be stored in a secure area and be covered if remaining more than 24 hours.

Reason

To ensure that stockpiles of soil or other materials are appropriately managed.

(93) SURVEY

All footings, walls and floor slabs adjacent to a boundary must be set out by a registered surveyor. On commencement of brickwork or wall construction a survey and report, prepared by a Registered Surveyor, must be submitted to the Principal Certifier indicating the position of external walls in relation to the boundaries of the allotment. Any encroachments by the subject building over adjoining boundaries or roads must be removed prior to continuation of building construction work.

Reason

To ensure the development does not encroach onto neighbouring properties.

(94) CHECK SURVEYS DURING CONSTRUCTION

Prior to the concrete pour of the main slab at each level, a survey shall be made by a surveyor registered under the Surveying & Spatial Information Act, 2002, confirming that the formwork adjacent to existing or proposed boundaries is clear of those existing or proposed boundaries and is in accordance with approved setbacks. This survey shall be provided to the Principal Certifier prior to the concrete pour. The concrete pour must not take place until the Principal Certifier receives a survey proving that the formwork has been constructed within the existing and proposed boundaries of the site, and is compliant with the setbacks approved under this consent.

Reason

To ensure the development does not encroach onto neighbouring properties.

(95) COVERING OF LOADS

All vehicles involved in the excavation and/or demolition process and departing the property with demolition materials, spoil or loose matter must have their loads fully covered before entering the public roadway.

Reason

To ensure loads are managed appropriately and do not impact local amenity.

(96) EROSION AND SEDIMENT CONTROL

The Soil and Water Management Plan (SWMP) or Erosion and Sediment Control Plan (ESCP) which has been approved by the Principal Certifier must be implemented in full during the construction period.

During the construction period:-

- (a) erosion and sediment controls must be regularly inspected, repaired and maintained in working order sufficient for a 10 year Average Recurrence Interval (ARI) rainfall event;
- (b) erosion and sediment control signage available from Council must be completed and attached to the most prominent structure visible at all times when entering the site for the duration of construction; and
- (c) building operations and stockpiles must not be located on the public footway or any other locations which could lead to the discharge of materials into the stormwater system.

Reason

To ensure no substance other than rainwater enters the stormwater system and waterways.

(97) HAZARDOUS AND INDUSTRIAL WASTE

Hazardous and/or industrial waste arising from the demolition/operational activities must be removed and/or transported in accordance with the requirements of the NSW Work Cover Authority pursuant to the provisions of the following:

- (a) *Protection of the Environment Operations Act 1997*
- (b) *Protection of the Environment Operations (Waste) Regulation 2005*
- (c) *Waste Avoidance and Resource Recovery Act 2001*
- (d) *Work Health and Safety Act 2011*
- (e) *Work Health and Safety Regulation 2017.*

Reason

To ensure hazardous/ industrial waste is managed appropriately.

(98) VEHICLE CLEANSING

Prior to the commencement of work, suitable measures are to be implemented to ensure that sediment and other materials are not tracked onto the roadway by vehicles leaving the site. It is an offence to allow, permit or cause materials to pollute or be placed in a position from which they may pollute waters.

Reason

To ensure sediment is not tracked onto the roadway.

(99) ARCHAEOLOGICAL DISCOVERY DURING EXCAVATION

- (a) Should any relics be unexpectedly discovered on the site during excavation, all excavation or disturbance to the area is to stop immediately and the Heritage Council of NSW should be informed in accordance with section 146 of the Heritage Act 1977.
- (b) Should any Aboriginal objects be unexpectedly discovered then all excavation or disturbance of the area is to stop immediately, and NSW Government Office of Environment and Heritage is to be informed in accordance with Section 89A of the *National Parks and Wildlife Act 1974*.
- (c) Should any archaeological remains or Aboriginal objects be discovered, a copy of recording of the finds and the final archaeological summary report is to be submitted to Council prior to the issue of any Occupational Certificate.
- (d) If the discovery is on Council's land, Council must be informed.

Reason

To ensure that the archaeology of the site is appropriately managed and protected.

(100) COMPLIANCE WITH DEMOLITION, EXCAVATION & CONSTRUCTION NOISE AND VIBRATION MANAGEMENT PLAN

- (a) All works conducted on site which form part of this development must be carried out in accordance with the Demolition, Excavation and Construction Management Plan, once approved by Council under this consent.
- (b) Where all such control measures have been implemented and the resultant noise and/ or vibration levels at any sensitive receiver still exceed the council's applicable criteria stated in the Construction Hours/Noise Code 1992 and are giving rise to sustained complaints then the contractor must provide regular, appropriate and sustained periods of respite in consultation with Council's Health and Building unit. Approval to vary the authorised noise and vibration levels must be received in writing by the proponent from Council prior to activities being undertaken that exceed sanctioned emission levels. (Use where respite periods not specified under the approved DEC NMP)

Such periods must be set and agreed to by Council's Health and Building Unit.

Reason

To ensure all parties are aware of the supporting documentation that applies to the development.

(101) STREET TREE PROTECTION

All street trees located directly outside the site must be retained and protected in accordance with the Australian Standard 4970 Protection of Trees on Development Sites. All street trees must be protected during the construction works as follows:

- (a) Tree trunk and major branch protection must be undertaken prior to the commencement of any works (including demolition). The protection must be installed and certified by an arborist with a minimum AQF Level 5 qualification in arboriculture and must include:
 - (i) An adequate clearance, minimum 250mm, must be provided between the structure and tree branches, and trucks at all times.
 - (ii) Tree trunk/s and/or major branches to a height of two metres, must be protected by wrapped thick underlay carpet or similar padding material to limit damage, and
 - (iii) Timber planks (50mm x 100mm or similar) must be placed around tree trunk/s. The timber planks must be spaced at 100mm intervals and must be fixed against the trunk with tie wire, or strapping. The thick underlay carpet or similar padding material and timber planks must not be fixed to the tree in any instance, or in any fashion.
 - (iv) Tree trunk and major branch protection is to remain in place for the duration of construction and development works and must be removed at the completion of the project.

- (b) Temporary signs, or any other items, shall not be fixed or attached to any street tree.
- (c) All hoarding support columns are to be placed a minimum of 300mm from the edge of the existing tree pits/setts, so that no sinking or damage occurs to the existing tree pits. Supporting columns must not be placed on any tree roots that are exposed.
- (d) Young street trees must be protected by installing three (3) wooden stakes around the edge of the tree pits or a minimum of 1 metre from the base of the trunk. Hessian must be wrapped around the stakes. If existing stakes or a metal tree guard are already in place, these suffice as tree protection.
- (e) Materials or goods, including site sheds, must not be stored or placed:
 - (i) around or under the tree canopy; or
 - (ii) within two (2) metres of tree trunks or branches of any street trees.
- (f) Any excavation within any area known to or suspected of having tree roots greater than 30mm diameter must be undertaken by hand.
- (g) Any trenching works for services, hydraulics, drainage etc. must not be undertaken within [specify] metres of the trunk of any street tree. Alternate installation methods for services such as directional boring/drilling or redirection of services must be employed where roots greater than 30mm diameter are encountered during installation of any services.
- (h) Existing sections of kerbs adjacent to any street tree must not be removed without approval from the Council's Tree Management Officer.
- (i) Any damage sustained to street tree/s as a result of the erection of any construction activities (including demolition) must be immediately reported to the Council's Tree Management Officer on 9265 9333. Any damage to street trees as a result of any construction activities may result in prosecution under the Local Government Act 1993 and the Environmental Planning and Assessment Act 1979.

Reason

To ensure the protection and ongoing health of the street trees.

(102) SYDNEY WATER CERTIFICATE

A Section 73 Compliance Certificate under the Sydney Water Act 1994 must be obtained from Sydney Water Corporation.

Application must be made through an authorised Water Servicing Coordinator. Please refer to the Building Developing and Plumbing section on the web site www.sydneywater.com.au then refer to "Water Servicing Coordinator" under "Developing Your Land" or telephone 13 20 92 for assistance.

Following application a “Notice of Requirements” will advise of water and sewer infrastructure to be built and charges to be paid. Please make early contact with the Coordinator, since building of water/sewer infrastructure can be time consuming and may impact on other services and building, driveway or landscape design.

The Section 73 Certificate must be submitted to Council or the Principal Certifier prior to any Occupation Certificate or subdivision/strata certificate being issued.

Reason

To ensure the requirements of Sydney Water are met.

(103) ACCESS DRIVEWAYS TO BE CONSTRUCTED

Approved driveways are to be constructed for all vehicular access to the construction site in accordance with the requirements of Council's “Driveway Specifications” to the satisfaction of Council.

Reason

To allow adequate vehicular access to the site.

(104) LOADING AND UNLOADING DURING CONSTRUCTION

The following requirements apply:

- (a) All loading and unloading associated with construction activity must be accommodated on site, where possible.
- (b) If, it is not feasible for loading and unloading to take place on site, a Works Zone on the street may be considered by Council.
- (c) A Works Zone may be required if loading and unloading is not possible on site. If a Works Zone is warranted an application must be made to Council at least 8 weeks prior to commencement of work on the site. An approval for a Works Zone may be given for a specific period and certain hours of the days to meet the particular need for the site for such facilities at various stages of construction. The approval will be reviewed periodically for any adjustment necessitated by the progress of the construction activities.
- (d) Where hoisting activity over the public place is proposed to be undertaken including hoisting from a Works Zone, a separate application under Section 68 of the Local Government Act 1993 and Sections 138/139 of the Roads Act 1993 must be submitted to and approved by Council.

Reason

To protect the amenity of the public domain.

(105) NO OBSTRUCTION OF PUBLIC WAY

Unless otherwise approved by Council, the public way must not be obstructed by any materials, vehicles, waste receptacles, skip-bins or the like. Non-compliance with this requirement may result in the issue of a notice by Council to stop all work on the site.

Reason

To protect the amenity of the public domain.

(106) USE OF MOBILE CRANES

The following requirements apply:

- (a) Mobile cranes operating from the road must not be used as a method of demolishing or constructing a building.
- (b) For special operations including the delivery of materials, hoisting of plant and equipment and erection and dismantling of on site tower cranes which warrant the on-street use of mobile cranes, permits must be obtained from Council for the use of a mobile crane. The permits must be obtained 48 hours beforehand for partial road closures which, in the opinion of Council will create minimal traffic disruptions and 4 weeks beforehand in the case of full road closures and partial road closures which, in the opinion of Council, will create significant traffic disruptions.
- (c) The use of a crane for special operations, including the delivery of materials, hoisting of plant and equipment and erection and dismantling of on site tower cranes which warrant the on-street use of mobile cranes outside of approved hours of construction can occur, subject to a separate application being submitted to and approved by Council under Section 68 of the Local Government Act 1993 and Sections 138/139 of the Roads Act 1993.

Reason

To ensure mobile cranes are used appropriately.

(107) HOLD POINTS

Prior to an approval being issued for the construction of public domain and / or planning agreement works, including civil, drainage and subsurface works, a set of hold points will be provided by the City's Public Domain Unit in accordance with the City's Public Domain Manual and Sydney Streets Technical Specification. The list of hold point inspections will be included in the Public Domain works approval letter.

Hold point inspections must be adhered to during construction works. Prior to the issue of any Occupation Certificate, confirmation from the City's Public Domain Unit, that hold point inspections have been completed and works have been accepted by the City must be provided to the Principal Certifier.

Reason

To ensure hold points are adhered to during construction works.

(108) STORMWATER DRAINAGE CONNECTION

For approval of a connection into the City of Sydney's drainage system an "Application for Approval of Stormwater Drainage Connections" must be submitted to the City, together with an application fee in accordance with the City of Sydney's adopted Schedule of Fees and Charges. This must be approved prior to approval being issued for the construction of public domain work.

Reason

To ensure approval of connection into the Council's drainage system is sought.

BEFORE ISSUE OF AN OCCUPATION CERTIFICATE

(109) BASIX

All commitments listed in each relevant BASIX Certificate for the development must be fulfilled prior to any Occupation Certificate being issued.

Reason

To ensure BASIX commitments are fulfilled in accordance with the BASIX certificate (prescribed condition under clause 75 EP&A Regulation 2021).

(110) PHYSICAL MODELS

- (a) Prior to the issue of any Occupation Certificate an accurate 1:500 scale model of the development as constructed must be submitted to and approved by Council's Area Coordinator Planning Assessments/Area Planning Manager for the City Model in Town Hall House.

Note:

- (i) The models must be constructed in accordance with the Model Specifications available online at <http://www.cityofsydney.nsw.gov.au/development/application-guide/application-process/model-requirements> Council's modellers must be consulted prior to construction of the model.
- (ii) The models are to comply with all of the conditions of the Development Consent.
- (iii) The models must be amended to reflect any further modifications to the approval (under Section 4.55 of the *Environmental Planning and Assessment Act*) that affect the external appearance of the building.

Reason

To ensure the provision of an appropriate physical model of the development.

(111) SUBMISSION OF ELECTRONIC CAD MODELS PRIOR TO OCCUPATION CERTIFICATE

- (a) Prior to any Occupation Certificate being issued, an accurate 1:1 electronic CAD model of the completed development must be submitted to and approved by Council's Area Coordinator Planning Assessments/Area Planning Manager for the electronic Visualisation City Model.
- (b) The data required to be submitted within the surveyed location must include and identify:
 - (i) building design above and below ground in accordance with the development consent;
 - (ii) all underground services and utilities, underground structures and basements, known archaeological structures and artefacts;
 - (iii) a current two points on the site boundary clearly marked to show their Northing and Easting MGA (Map Grid of Australia) coordinates, which must be based on Established Marks registered in the Department of Lands and Property Information's SCIMS Database with a Horizontal Position Equal to or better than Class C.

The data is to be submitted as a DGN or DWG file on a Compact Disc. All modelling is to be referenced to the Map Grid of Australia (MGA) spatially located in the Initial Data Extraction file.

- (c) The electronic model must be constructed in accordance with the City's 3D CAD electronic model specification. The specification is available online at <http://www.cityofsydney.nsw.gov.au/development/application-guide/application-process/model-requirements> Council's Modelling staff should be consulted prior to creation of the model. The data is to comply with all of the conditions of the Development Consent.

Reason

To ensure the provision of an appropriate electronic model of the development.

(112) RESTRICTION ON RESIDENTIAL DEVELOPMENT

The following restriction applies to buildings approved for residential use:

- (a) The accommodation portion of the buildings must be used as permanent residential accommodation only and not for the purpose of a boarding house or hostel, hotel or motel accommodation, serviced apartments, tourist and visitor accommodation or the like, other than in accordance with the *Sydney Local Environmental Plan 2012*.

- (b) A restrictive covenant is to be registered on the title of the development site in the above terms and restricting any change of use of those levels from 'residential accommodation' as defined in *Sydney Local Environmental Plan 2012*. The covenant is to be registered on title prior to any Occupation Certificate being issued or the use commencing, whichever is earlier. The covenant must contain terms reasonably required by Council and will be drafted by Council's solicitor, at the cost of the applicant, in accordance with the City's Fees and Charges.
- (c) If a unit contains tenants, it must be subject to a residential tenancy agreement for a term of at least three months.
- (d) No person can advertise or organise the use of residential apartments approved under this consent for short term accommodation or share accommodation.

Reason

To ensure the residential accommodation portion of the site is used for permanent residential purposes.

(113) RESTRICTION ON USE OF CAR SPACES - RESIDENTIAL

The following conditions apply to car parking:

- (a) The on-site car parking spaces are not to be used other than resident of the subject building for parking of vehicles related to residence in the unit with which the space is associated. No storage should take place for commercial businesses in car parking spaces.
- (b) The strata subdivision of the site is to include a restriction on user pursuant to Section 39 of the *Strata Schemes (Freehold Development) Act, 1973* as amended, so burdening all utility car parking allotments in the strata plan and/or an appropriate documentary restriction pursuant to Section 88B of the *Conveyancing Act 1919*, burdening all car parking part lots in the strata plan.

Reason

To ensure the on-site car parking spaces are not to be used other than by a resident of the building.

(114) SURVEY CERTIFICATE AT COMPLETION

A Survey Certificate prepared by a Registered Surveyor must be submitted to the Principal Certifier at the completion of the building work certifying the location of the building in relation to the boundaries of the allotment.

Reason

To ensure the development does not encroach onto neighbouring properties.

(115) WASTE AND RECYCLING MANAGEMENT – RESIDENTIAL

- (a) Prior to the issue of an **Occupation Certificate**, Council's review and written approval of the as-built waste infrastructure, facilities, and vehicle access is required. The City Cleansing & Resource Recovery Unit of Council must be satisfied that:
 - (i) All waste management facilities, storage, and collection infrastructure comply with the stamped plans, approved Operational Waste Management Plan and Council's *Guidelines for Waste Management in New Developments*, the City of Sydney's DCP, and the developments Conditions of Consent.
 - (ii) All waste rooms, corridors, doors, and gates to be accessed by Council's collection contractor(s) are to be fitted and accessible via Council's master key system. Specifications of locks, barrels, and supporting infrastructure are to be submitted to Council's City Cleansing & Resource Recovery Unit.
- (b) Site inspections are to be conducted by Council's City Cleansing & Resource Recovery Unit to review the site on-site waste collection, storage and loading bay infrastructure prior to the issue of an **Occupation Certificate**. The inspections are to be conducted a minimum 6-months prior to projects anticipated construction completion. Prior to the inspection an electronic copy of the latest architectural plans are to be submitted.
- (c) An updated Operational Waste Management Plan is to be submitted to Council's City Cleansing & Resource Recovery Unit that aligns with the latest version of architectural plans and waste related updates identified during the site inspections. The plan is to be reviewed by Council's City Cleansing & Resource Recovery Unit and approved by Council's Area Planning Manager prior to the issue of an **Occupation Certificate**.
- (d) The developer is to enter into a formal agreement with the City of Sydney Council for the utilisation of Council's Waste Collection Service. A signed agreement is to be submitted to Council's City Cleansing & Resource Recovery unit prior to the issue of an **Occupation Certificate**.
- (e) The assigned strata manager for the development and direct contact details are to be provided to Council's City Cleansing & Resource Recovery Unit prior to the issue of an **Occupation Certificate**.

Reason

To ensure that facilities and arrangements are in place to enable the provision of a safe and efficient waste collection service responsive to Council's policies and contractual service provisions.

(116) CONSTRUCTED FLOOR LEVELS

A certification report prepared by a suitably qualified practitioner engineer (NPER) must be submitted to the Principal Certifier prior to issue of any Occupation certificate stating that the development has been constructed and the required levels achieved in accordance with the recommendations of the report titled Flooding Assessment for 155 Mitchell Road, Erskineville (stage 2 Report) Ref no.300203763, dated 25 July 2024, prepared by Venus Jofreh and dated 25/7/2024.

Reason

To ensure the development achieves the required floor levels.

(117) FLOOD RISK MANAGEMENT

Prior to the issue of any Occupation Certificate, a certification report prepared by a suitably qualified practitioner engineer (NPER), for flood risk management measures including flood planning level/s demonstrating compliance with the approved construction plans must be submitted to and be approved by the Principal Certifier. A copy of the report must be provided to Council for record keeping purposes.

Reason

To ensure flood risk management measures are complied with.

(118) STORMWATER COMPLETION DEED OF AGREEMENT AND POSITIVE COVENANT

Prior to the issue of any Occupation Certificate:

- (a) The Owner is required to enter into a Deed of Agreement (Stormwater Deed) with the City of Sydney and obtain registration of Title of a Positive Covenant for all proposed connections to the City's underground drainage system. The deed and positive covenant will contain terms reasonably required by the City and will be drafted by the City's Legal Services Unit at the cost of the applicant, in accordance with the City's Fees and Charges.
- (b) A Positive Covenant must be registered on the property title for all drainage systems involving On-Site Detention (OSD) to ensure maintenance of the approved OSD system regardless of the method of connection. The positive covenant will contain terms reasonably required by the City and will be drafted by the City's solicitor at the cost of the applicant, in accordance with the City's Fees and Charges.

Reason

To protect underground drainage system.

(119) SURVEY CERTIFICATE PRIOR TO ISSUE OF OCCUPATION CERTIFICATE

Prior to the issue of any type of Occupation Certificate for the building, a Final Identification Survey prepared and signed by a Surveyor registered under the Surveying & Spatial Information Act, 2002 must be submitted at the completion of the building work, certifying the location of the building and showing offsets in relation to the boundaries of the allotment.

Any encroachments of the building including gutters and downpipes over the side boundaries must be removed, or alternatively appropriate easements under Section 88B of the Conveyancing Act, 1919, with terms to the satisfaction of Council, must be lodged with the office of NSW Land Registry Services, and evidence of lodgement provided to the Principal Certifier prior to the issue of any staged or Final Occupation Certificate. Encroachments upon existing or future public roads must, if supported, be approved by Council's Area Planning Manager prior to the issue of any type of Occupation Certificate.

Reason

To ensure the development does not encroach onto neighbouring properties.

OCCUPATION AND ONGOING USE

(120) ON SITE LOADING AREAS AND OPERATION

All loading and unloading operations associated with servicing the site must be carried out within the confines of the site, at all times and must not obstruct other properties/units or the public way.

At all times the service vehicle docks, car parking spaces and access driveways must be kept clear of goods and must not be used for storage purposes, including garbage storage.

Reason

To maintain the orderly operation of vehicle parking areas and to ensure the public domain is kept free from physical obstructions.

(121) ENCROACHMENTS – NEIGHBOURING PROPERTIES

No portion of the proposed structure shall encroach onto the adjoining properties.

Reason

To protect neighbouring properties.

(122) ENCROACHMENTS – PUBLIC WAY

No portion of the proposed structure, including gates and doors during opening and closing operations, shall encroach upon Council's footpath area.

Reason

To protect the public way.

(123) USE OF COMMON AREAS AND FACILITIES

The communal open space at ground level (indoor and outdoor) and at level 7 must be available for the use all residents of the building and must be designated as common property on any strata subdivision of the site, with no exclusive use rights.

Reason

To ensure designated areas within the residential development are maintained as common property.

(124) CAR PARK VENTILATION

The car park must be ventilated in accordance with the *National Construction Code (previously known as Building Code of Australia)* and, where necessary, Australian Standard AS1668, Parts 1 and 2. Ventilation must be controlled by carbon monoxide monitoring sensors to ensure compliance with occupant health requirements.

Reason

To ensure car park ventilation complies with relevant standards.

(125) CAR WASH BAYS

- (a) All car wash bays must have connections to water and sewer.
- (b) All car washing must be conducted in a wash bay which is roofed and bunded to exclude rainwater, and which is graded to an internal drainage point connected to sewer in accordance with the trade waste agreement obtained from Sydney Water. Car wash run off must not enter the stormwater drainage system or give rise to water pollution.

Reason

To ensure the premises has access to water and sewer and to that run off is discharged appropriately.

(126) NOISE – COMMERCIAL PLANT / INDUSTRIAL DEVELOPMENT

- (a) Noise from commercial plant and industrial development must not exceed a project amenity/intrusiveness noise level or maximum noise level in accordance with relevant requirements of the NSW EPA [Noise Policy for Industry 2017 \(NPfI\)](#) unless agreed to by the City's Area Planning Manager. Further:
 - (i) Background noise monitoring must be carried out in accordance with the long-term methodology in [Fact Sheet B](#) of the NPfI unless otherwise agreed by the City's Area Planning Manager.

- (ii) Commercial plant is limited to heating, ventilation, air conditioning, refrigeration and energy generation equipment.
- (b) An $L_{Aeq,15 \text{ minute}}$ (noise level) emitted from the development must not exceed the $L_{A90, 15 \text{ minute}}$ (background noise level) by more than 3dB when assessed inside any habitable room of any affected residence or noise sensitive commercial premises at any time. Further:
 - (i) The noise level and the background noise level must both be measured with all external doors and windows of the affected residence closed.
 - (ii) Background noise measurements must not include noise from the development but may include noise from necessary ventilation at the affected premises.
- (c) Corrections in [Fact Sheet C](#) of the NPfl are applicable to relevant noise from the development measured in accordance with this condition, however duration corrections are excluded from commercial noise.

Reason

To protect the acoustic amenity of surrounding properties.

(127) OCCUPATION CERTIFICATE TO BE SUBMITTED

An Occupation Certificate must be obtained from the Principal Certifier and a copy submitted to Council prior to commencement of occupation or use of the whole or any part of a new building, an altered portion of, or an extension to an existing building.

Reason

To ensure the site is authorised for occupation.

(128) DEFECTS LIABILITY PERIOD – PUBLIC DOMAIN WORKS

All works to the City’s public domain, including rectification of identified defects, are subject to a 6 month defects liability period from the date of Completion. The date of Completion will be nominated by Council on the Public Domain Works – Letter of Completion Operational Acceptance.

Reason

To ensure all works to the City’s public domain are protected under a liability period.

(129) NUMBER OF ADULTS PER ROOM

- (a) No more than two adult people shall permanently occupy any bedroom and no bedroom shall contain more than two beds. This excludes children and children’s beds, cots or bassinets.
- (b) The total number of adults residing in one unit must not exceed twice the number of approved bedrooms.

Reason

To prevent overcrowding.

(130) MAINTENANCE OF TREES ON SITE

- (a) Tree maintenance must be implemented and complied with immediately following the tree planting, and until the tree reaches the required minimum height limit of six (6) metres in height and five (5) metres canopy width.
- (b) The newly planted tree on site must be appropriately maintained on an on-going basis.
- (c) Maintenance includes watering, weeding, removal of rubbish from tree bases, pruning (in accordance with AS4373-2007), fertilizing, pest and disease control and any other operations required to maintain a healthy robust tree.
- (d) If the newly planted tree fails to establish or does not reach a height of 6 metres and canopy width of 5 metres it must be replaced with a tree of comparable qualities and container size of 100 litres.
- (e) The conditions of this consent will apply to all replacement trees, including the maintenance and reporting which re-starts at each replanting event.

Reason

To ensure the ongoing maintenance of trees planted on the site.

(131) ONGOING WASTE MANAGEMENT – RESIDENTIAL

- (a) The ongoing use of development must be in accordance with the approved Operational Waste Management Plan, Council's *Guidelines for Waste Management in New Developments*, the City of Sydney's DCP, and the developments Conditions of Consent.
- (b) All general waste and recycling stream(s) materials emanating from the premises must be stored in the designated waste storage area(s) integrated within the built form and must not be stored outside the premises (including any public place) at any time.
- (c) The property manager is responsible for lodging requests for damaged/broken bins, managing the rotation of bins, ensuring the full allocation of relevant bins are available for scheduled collections, management of odour and the routine cleaning and maintenance of all waste storage areas.
- (d) Contracts (or agreements) with cleaners, building managers and tenants must clearly outline the waste management and collection arrangements, identifying clear roles and responsibilities outlined within the approved Operational Waste Management Plan.

- (e) The property manager is responsible for the installation and maintenance of all education signage for the respective waste stream(s) as requested by the City of Sydney Council responsive to the approved Operational Waste Management plan.

Reason

To support the safe and efficient scheduled Council waste collection service and ensure the impacts of waste management on the public domain and public health are minimised.

(132) SCHEDULED COLLECTIONS - RESIDENTIAL

- (a) Scheduled collections and waste management arrangements of Council's residential waste stream(s) is to be conducted in accordance with the stamped plans, approved Operational Waste Management Plan, the developments Conditions of Consent and the City's Local Approvals Policy Managing Waste in Public Spaces.
- (b) Council's Domestic Waste Charge is applied to all residential rate accommodation properties in accordance with section 496 of the *Local Government Act 1993*. Residential accommodation is defined in accordance with the *Sydney Local Environmental Plan 2012* dictionary.
- (c) Unobstructed access to be provided for Councils standard waste collection vehicles to access the waste and recycling storage area(s), loadings bays and supporting infrastructure between the hours 6am and 6pm on collection day(s) to support the provision of a safe and efficient waste collection service to the site.

Reason

To support the safe and efficient scheduled residential waste collection service and minimise the impacts on public amenity and safety.

(133) COMMUNAL OPEN SPACE – ROOFTOP

Access to the communal open space at rooftop (level 7) is to be restricted to between 8:00am and 8:00pm, Mondays to Sundays inclusive.

Reason

To protect the acoustic amenity of surrounding properties.

WaterNSW - CONDITIONS

The attached GTA issued by WaterNSW do not constitute an approval under the Water Management Act 2000. The development consent holder must apply to WaterNSW for a Water Supply Work approval after consent has been issued by Council and before the commencement of any work or activity.

A completed application form must be submitted to WaterNSW together with any required plans, documents, application fee, and proof of Council's development consent.

- (134)** Groundwater must only be pumped or extracted for the purpose of temporary construction dewatering at the site identified in the development application. For clarity, the purpose for which this approval is granted is only for dewatering that is required for the construction phase of the development and not for any dewatering that is required once construction is completed.
- (135)** Before any construction certificate is issued for any excavation under the development consent, the applicant must: 1. apply to WaterNSW for, and obtain, an approval under the Water Management Act 2000 or Water Act 1912, for any water supply works required by the development; and 2. notify WaterNSW of the programme for the dewatering activity to include the commencement and proposed completion date of the dewatering activity Advisory Note: 3. An approval under the Water Management Act 2000 is required to construct and/or install the water supply works. For the avoidance of doubt, these General Terms of Approval do not represent any authorisation for the take of groundwater, nor do they constitute the grant or the indication of an intention to grant, any required Water Access Licence (WAL). A WAL is required to lawfully take more than 3ML of water per water year as part of the dewatering activity. 4. A water use approval may also be required, unless the use of the water is for a purpose for which a development consent is in force.
- (136)** A water access licence, for the relevant water source, must be obtained prior to extracting more than 3ML per water year of water as part of the construction dewatering activity. Advisory Notes: 1. This approval is not a water access licence. 2. A water year commences on 1 July each year. 3. This approval may contain an extraction limit which may also restrict the ability to take more than 3ML per water year without further information being provided to WaterNSW. 4. Note that certain water sources may be exempted from this requirement – see paragraph 17A, Schedule 4 of the Water Management (General) Regulation 2018.
- (137)** If no water access licence is obtained for the first 3ML / year (or less) of water extracted, then, in accordance with clause 21(6), Water Management (General) Regulation 2018, the applicant must: (a) record water taken for which the exemption is claimed, and (b) record the take of water not later than 24 hours after water is taken, and (c) make the record on WAL exemption form located on WaterNSW website "Record of groundwater take under exemption", and (d) keep the record for a period of 5 years, and (e) give the record to WaterNSW either via email to Customer.Helpdesk@waterNSW.com.au or post completed forms to - PO Box 398 Parramatta NSW 2124 (i) not later than 28 days after the end of the water year (being 30 June) in which the water was taken, or (ii) if

WaterNSW directs the person in writing to give the record to WaterNSW on an earlier date, by that date.

- (138)** All extracted groundwater must be discharged from the site in accordance with Council requirements for stormwater drainage or in accordance with any applicable trade waste agreement.
- (139)** The design and construction of the building must prevent: (a) any take of groundwater, following the grant of an occupation certificate (and completion of construction of development), by making any below-ground levels that may be impacted by any water table fully watertight for the anticipated life of the building. Waterproofing of below-ground levels must be sufficiently extensive to incorporate adequate provision for unforeseen high water table elevations to prevent potential future inundation; (b) obstruction to groundwater flow, by using sufficient permanent drainage beneath and around the outside of the watertight structure to ensure that any groundwater mounding shall not be greater than 10 % above the pre-development level; and (c) any elevated water table from rising to within 1.0 m below the natural ground surface.
- (140)** Construction phase monitoring bore requirements GTA: a) A minimum of three monitoring bore locations are required at or around the subject property, unless otherwise agreed by WaterNSW. b) The location and number of proposed monitoring bores must be submitted for approval, to WaterNSW with the water supply work application. c) The monitoring bores must be installed and maintained as required by the water supply work approval. d) The monitoring bores must be protected from construction damage.
- (141)** Construction Phase Monitoring programme and content: a) A monitoring programme must be submitted, for approval, to WaterNSW with the water supply work application. The monitoring programme must, unless agreed otherwise in writing by WaterNSW, include matters set out in any Guide published by the NSW Department of Planning Industry and Environment in relation to groundwater investigations and monitoring. Where no Guide is current or published, the monitoring programme must include the following (unless otherwise agreed in writing by WaterNSW): i. Pre-application measurement requirements: The results of groundwater measurements on or around the site, with a minimum of 3 bore locations, over a minimum period of 3 months in the six months prior to the submission of the approval to WaterNSW. ii. Field measurements: Include provision for testing electrical conductivity; temperature; pH; redox potential and standing water level of the groundwater; iii. Water quality: Include a programme for water quality testing which includes testing for those analytes as required by WaterNSW; iv. QA: Include details of quality assurance and control v. Lab assurance: Include a requirement for the testing by National Association of Testing Authorities accredited laboratories. b) The applicant must comply with the monitoring programme as approved by WaterNSW for the duration of the water supply work approval (Approved Monitoring Programme)
- (142)** (a) Prior to the issuing of the occupation certificate, and following the completion of the dewatering activity, and any monitoring required under the Approved Monitoring Programme, the applicant must submit a completion report to WaterNSW. (b) The completion report must, unless agreed otherwise in writing by WaterNSW, include matters set out in any guideline published by the NSW Department of Planning Industry and Environment in relation to groundwater investigations and monitoring. Where no guideline is current or published, the

completion report must include the following (unless otherwise agreed in writing by WaterNSW): 1) All results from the Approved Monitoring Programme; and 2) Any other information required on the WaterNSW completion report form as updated from time to time on the WaterNSW website. c) The completion report must be submitted using "Completion Report for Dewatering work form" located on WaterNSW website www.waternsw.com.au/customer-service/waterlicensing/dewatering

- (143)** The extraction limit shall be set at a total of 3ML per water year (being from 1 July to 30 June). The applicant may apply to WaterNSW to increase the extraction limit under this condition. Any application to increase the extraction limit must be in writing and provide all information required for a hydrogeological assessment. Advisory note: Any application to increase the extraction limit should include the following: - Groundwater investigation report describing the groundwater conditions beneath and around the site and subsurface conceptualisation - Survey plan showing ground surface elevation across the site – Architectural drawings showing basement dimensions - Environmental site assessment report for any sites containing contaminated soil or groundwater (apart from acid sulphate soils (ASS)) - Laboratory test results for soil sampling testing for ASS - If ASS, details of proposed management and treatment of soil and groundwater. Testing and management should align with the NSW Acid Sulphate Soil Manual
- (144)** Any dewatering activity approved under this approval shall cease after a period of two (2) years from the date of this approval, unless otherwise agreed in writing by WaterNSW (Term of the dewatering approval). Advisory note: an extension of this approval may be applied for within 6 months of the expiry of Term.
- (145)** This approval must be surrendered after compliance with all conditions of this approval, and prior to the expiry of the Term of the dewatering approval, in condition GT0151-00001. Advisory note: an extension of this approval may be applied for within 6 months of the expiry of Term.
- (146)** The following construction phase monitoring requirements apply (Works Approval): a. The monitoring bores must be installed in accordance with the number and location shown, as modified by this approval, unless otherwise agreed in writing with WaterNSW. b. The applicant must comply with the monitoring programme as amended by this approval (Approved Monitoring Programme). c. The applicant must submit all results from the Approved Monitoring Programme, to WaterNSW, as part of the Completion Report

Reason

To ensure compliance with the Water Management Act 2000.

AUSGRID - CONDITIONS

(147) AUSGRID OVERHEAD POWERLINES ARE IN THE VICINITY OF THE DEVELOPMENT

The developer should refer to SafeWork NSW Document – Work Near Overhead Powerlines: Code of Practice. This document outlines the minimum separation requirements between electrical mains (overhead wires) and structures within the development site throughout the construction process. It is a statutory requirement that these distances be maintained throughout the construction phase.

Consideration should be given to the positioning and operating of cranes, scaffolding, and sufficient clearances from all types of vehicles that are expected to be entering and leaving the site.

The “as constructed” minimum clearances to the mains must also be maintained. These distances are outlined in the Ausgrid Network Standard, NS220 Overhead Design Manual. This document can be sourced from Ausgrid’s website at www.ausgrid.com.au.

It is the responsibility of the developer to verify and maintain minimum clearances onsite. In the event where minimum safe clearances are not able to be met due to the design of the development, the Ausgrid mains may need to be relocated in this instance. Any Ausgrid asset relocation works will be at the developer’s cost.

Additional information can be found in the Ausgrid Quick Reference Guide for Safety Clearances “Working Near Ausgrid Assets - Clearances”. This document can be found by visiting the following Ausgrid website:

www.ausgrid.com.au/Your-safety/Working-Safe/Clearance-enquiries

For new connections or to alter the existing electrical connection to the property from the Ausgrid network, the proponent should engage an Accredited Service Provider and submit a connection application to Ausgrid as soon as practicable.

Visit the Ausgrid website for further details:

<https://www.ausgrid.com.au/Connections/Get-connected>

Reason

To ensure construction activities do not interfere with overhead cables.

(148) AUSGRID UNDERGROUND CABLES ARE IN THE VICINITY OF THE DEVELOPMENT

Care should be taken to ensure that construction activities do not interfere with existing underground cables located in the footpath or adjacent roadways.

It is recommended that the developer locate and record the depth of all known underground services prior to any excavation in the area. Information regarding the position of cables along footpaths and roadways can be obtained by contacting Dial Before You Dig (DBYD).

The following points should be taken into consideration.

- (a) Ausgrid cannot guarantee the depth of cables due to possible changes in ground levels from previous activities after the cables were installed. Should ground anchors be required in the vicinity of Ausgrid underground cables, the anchors must not be installed within 300mm of any cable, and the anchors must not pass over the top of any cable.
- (b) In addition to DBYD the proponent should refer to the following documents to support safety in design and construction:
 - (i) SafeWork Australia – Excavation Code of Practice.
 - (ii) Ausgrid’s Network Standard NS156 which outlines the minimum requirements for working around Ausgrid’s underground cables. This document can be found by visiting the Ausgrid website via www.ausgrid.com.au.
 - (iii) The Ausgrid Quick Reference Guide for Safety Clearances “Working Near Ausgrid Assets - Clearances”. This document can also be found by visiting the Ausgrid website : www.ausgrid.com.au/Your-safety/Working-Safe/Clearance-enquiries

Reason

To ensure construction activities do not interfere with underground cables.
