Advice

Advice will be updated after the meeting.

Background

A resident has raised concerns about safety and visibility at the intersection of Cunningham Street at the intersection with Pitt Street.

Comments

The T-intersection of Cunningham and Pitt Streets is currently uncontrolled.

Drivers on Cunningham Street entering Pitt Street must currently give way to all people on the Pitt Street footpath and vehicles on Pitt Street within the road.

To improve sightlines and intersection safety, it is proposed to install a “Stop” sign and line markings in Cunningham Street.

Drivers will be required to come to a complete stop before crossing the Pitt Street footpath to enter the road. This will ensure they take the time to check that the way is clear and will reduce the speed of their vehicle when moving through the intersection.

Consultation

The City distributed 203 letters to local residents and businesses to provide information about the proposed changes. No feedback was received regarding the proposal.

Financial

Funds are available in the current budget.
