Shadow Plan Design Changes

- The proposed shadow plans have been revised to incorporate the updated Flood Planning Level (FPL of 16.04) and adjusted floor-to-floor heights, resulting in a minor lift shaft encroachment above the height plane.
- The 24m height plane is determined by the natural ground level, as a result, the lift shaft exceeds this plane at its highest point by 23mm, representing a less than 1% exceedance.
- The remainder of the building is well under the height limit. These adjustments are minimal and do not result in any discernible or representable change to the shadow diagrams.
- The updates, however, do not introduce any additional shadow impacts that would cause non-compliance or adverse effects on adjoining properties.

Proposed Shadow Analysis Plan Changes:

- Proposed shadow plans have been updated to include the approved envelope for 158 Botany Road, as requested by Council, as it forms part of the existing conditions.
